For the first time, the cable giant Comcast could now merge with the Walt Disney Company, owner of ABC and some of its owned-and-operated broadcast television stations. AOL Time Warner, owner of Time Warner Cable, could buy NBC from General Electric. Both moves have come up for discussion by analysts and investment bankers as logical responses to match the new power of News Corporation, which will now combine studios, major broadcast and cable networks, and pay television distribution. Another investment banker fantasy: Viacom, owner of Paramount, CBS and MTV, might merge with the other satellite service, Echostar.

The centerpiece of the changes effectively makes it easier for networks, newspaper publishers, radio station owners and others to buy local television stations. Broadcasters sought the new rules to help support free over-the-air stations, which face growing competition from cable and satellite services as well as higher costs for programs and digital upgrading, said Victor Miller, an analyst at Bear, Stearns.

Owning local television stations in tandem with other television or radio stations, newspapers or cable systems in the same market offers the prospect of more economies of scale in producing news or selling advertising.

The change was a victory for the major networks, raising the cap on the maximum share of the national audience one company can reach with its stations to 45 percent from 35. News Corporation's Fox television subsidiary and Viacom's CBS division already own stations reaching about 40 percent of the market.

But owning more stations gives the networks more power over their affiliates in negotiations over fees and what programs to show. It also enables the biggest companies to consolidate the advantages of size over their smaller competitors.

One side effect of the rules, for example, caps the number of stations in some markets that can enjoy the benefits of merging with a local rival. The rules preclude a company from owning more than one of the top four stations in a market, so in markets with just five or six stations one or two will inevitably be left to go it alone. The loners in the market will face a permanent disadvantage, said Tom W. Davidson, a lawyer at Akin, Gump, Strauss, Hauer & Feld who represents the station owner Granite Broadcasting.

In recent weeks, some in the industry, most notably the entrepreneurs Ted Turner and Barry Diller, have raised alarms that the changes will make it harder for new or independent voices to be heard in television

programming.

But most analysts do not expect quick or earth-shaking reactions to yesterday's changes, or the start of a race to snap up local stations. "You could argue that not much might come of it," Mr. Miller of Bear, Stearns said. "We don't think there are a lot of natural buyers and few major potential targets."

He said the newspaper publishers McClatchy and Pulitzer and the publisher and station owner Hearst might be candidates to trade or merge with broadcasters. Gannett might buy newspapers and the Tribune Company might buy television stations.

Analysts said broadcasters were likely to swap stations to amass positions in certain markets, effectively carving up territories among themselves.

Dissatisfied companies and consumer advocates are expected to challenge the ruling in court. Yesterday, Clear Channel, the radio broadcaster, denounced the new rules because they limit its ability to expand or to sell some of its clusters of stations without breaking them up. "Radio has got a bad rap," said Andrew Levin, a spokesman for Clear Channel. He called it "an urban myth" that the industry's ownership had become concentrated.

"Everyone has something to litigate about," said Michael Russell, an analyst at Morgan Stanley, noting that recent F.C.C. decisions have often been overturned by courts. "That is going to be the hard part of all this. This was as we expected, but is this going to be what we get?"

If the three you mention are biased and that's wrong why is it OK for the "other" side to to be biased? Now we'll all have to watch everything and figure out which truth is truer.

Somehow offering news slanted in the other direction doesn't seem like the correct solution to providing accuracy. I didn't notice FOX reporting on the FCC's change in policy any more than the "slanted" news media.

Of course, FOX stands to gain a lot. Wouldn't want the public to know what's going on and mess it all up.

I remember when new cars all had AM stereo. What happened to that? Pay radio is a drop in the bucket compared to terrestrial radio, and would have to drastically increase its rate of growth to give terrestrial radio a run for its money.

In all the developed countries but America, the arts are funded by the State. Does that tells us something?

Commercialism turns a potential medium for culture into a platform for their wares. Does that tells us something?

The following quote talks about newspapers, but it got some resemblance to radio, doesn't it?

"Their constant yelping about a free press means, with a few honorable exceptions, freedom to peddle scandal, crime, sex, sensationalism, hate, innuendo and the political and financial uses of propaganda. A newspaper is a business out to make money through advertising revenue. That is predicated on the circulation and you know what circulation depends on."

-Raymond Chandler (1888-1959), U.S. author. Harlan Potter, in The Long Goodbye, ch. 32 (1954).

No other government in the world has the U.S. Constitution. It is not the function of government to take money from me by force and spend it so a small minority of people can "enjoy the arts." If enough people want to "enjoy the arts" then the free market will take care of that.

>B I found for nearly half that price.
No, Meyer has had others.

The other mid band station that Meyer, myself and two others were
involved with, WLYC came good other than for the fact we did not factor
in that it would take six months from putting the old girl back on-air
to take her into profitability.

My group were going to run out of funds.

However, we did succeed in bringing her back to life. Ownership taken on
by a local girl and investors and WLYC is slowly climbing up the charts.

I learned a lot from that experience, especially living here in England.

We are never the less waiting to try again when the right deal comes up.

The regional clear channel of 1050 in our part of Pa was real nice, even
at night while all the other AM's in town struggled with atmospherics at
the top end.

Do tell me more via private mail on the station you found for sale.

He fed's only allow me a 20% crack of the whip being a foreigner.

Hello,

I'm looking for the best method to file a complaint regarding KHAY(FM), if the problem I've described below is (as I'd like to think) someone's fault (and therefore could be remidied) as opposed to some _really really wierd_ natrual phenomena (which there is probably no cure for).

The stations involved:

- KFMB(FM) 100.7, owned by Midwest Television, using a "Hot AC" format, 30kw ERP; San Diego, CA. (36km from the Mexican border)

- KHAY(FM) 100.7, owned by Cumulus Licensing Corp, using a country format 39kw ERP; Ventura, CA. (According to the FCC, 288km from Mexico border)

The situation: I live in Temecula, CA, which is a tad north of the San Diego county line, and I commute to school/work in San Marcos, CA, which is a little less than 1/2 way between Temecula and the City of San Diego. I listen to KFMB to and from school, and typically it is problem free. Lately, KHAY has been "creeping into" KFMB's signal, to the point where in most areas of Temecula you hear a poor mix of the two, with KHAY being the more powerful, and it is getting worse (i.e. creeping south) on a daily basis. Throughout the drive through the I-15 cooridoor I am now being subjected to bursts of KHAY's programming at random locations.

This is a more-or-less recent event that doesn't seem to have anything to do with the weather. In addition, this has happened twice before, and (coincidentally?) within 24 hours of me sending an email to fccinfo@fcc.gov asking about complaint process the problem the problem was resolved (most recent was ~10/14/02). However, even though the autoresponder promised a response in not more than 20 days I never received a response... So I'm looking for the formal process involved here.

(I don't know much about ERP, but it seems a bit odd to me that a station at 39kw ERP ~200km away could take out a station at 30kw ERP ~30km away... Explanations?)

Thanks,

Lincoln

Maybe. It's also probably legal to travel at 25 MPH on most
interstate highways. But it's likely to get you in trouble. Let's
stick to the practical situations.

>Commercial stations (in particular) broadcast what they think will
>keep people listening to the station, so that they can sell ads that
>hopefully will be listened to as well. It's not about music appreciation
>education, or promoting a bunch of unknown bands....now, that's not to
>say that a format built around lesser known songs absolutely can't work...

Granted. However, many stations are broadcasting what effectively
appears to be nothing short of payola with a middleman. True, it's
not called payola because Congress and the FCC explicitly said so.
However, the bottom line is that it's very difficult for a startup
group to get radio exposure because it costs too damned much to get
the attention of the program consultants. The whole exercise is a
chicken and egg problem where you can't get air time without a lot of
cash and you can't sell records without much exposure.

This point has been hammered home by the existence of programs such as
American Idol, where the whole process becomes an insipid and idiotic
game-show. Cash and recognition produces an instant pop-star who is
talented enough to sing nearly anything written in the last four
decades, but bland enough not to have many original ideas of their
own.

The end result is that more and more listeners are turning to other
media. Oh, I know, the radio moguls find reasons to claim statistics
that they have more listeners than ever. But what those statistics
don't say is what that radio is doing. For many, if not most, it's
background noise. Thus, my question: How effective is an advertising
spot going to be if it's part of the background noise instead of the
foreground?

>> 2) Should radio broadcasting LEAD or FOLLOW the society it lives in?

>contributions
>c. other indirect support (word of mouth, etc)

I need to raise some important issues:

Ratings Services have a conundrum to consider, along the lines of the Heisenberg Uncertainty Principle. You can know with great detail what music is working well on a station as long as you don't use those same statistics to determine what to play next. You can also know, overall how well a station is doing. But you can't use how well the play lists work to direct the what to play next. Unfortunately, that's exactly the sort of narrow-minded foolishness that many stations do with their ratings data.

Radio stations are not alone in this problem. Educational Testing Service, ETS, is guilty of this phenomenon with the high school SAT scores. These scores are built by salting the test with new questions to see how students rate on the new questions. Then, based on curved data, this is used to build new tests. In effect, they were trying to predict how well students would do in college based on a test that previous students took. The SAT, once high regarded for it's predictive value, is now dismissed as nearly worthless. Why? Because it's a test for testing sake; it is not focussed on how well a student understands a relevant topic, or how well a student can parse a new language or mathematics problem.

Likewise, despite this experience, most radio stations still don't understand that their beloved ratings have very little foundation in reality any more. An phenomenon similar to the Heisenberg Principle is at work here: When the measuring method affects that which is measured, there are limits to what you can know about the situation.

Basically, this is WHY so many are turned off by radio programming. It has to be programmed with a notion of what they're following or what they're leading --or it's noise.

>The broad masses of people out there (who, by the way, tend not to post
>in online discussion forums and complain about the radio/music etc.) are
>pretty complacent in their listening habits anyway. They like the oldies
>they heard in high school and college, or perhaps some MOR in the office,
>some Top-40 while on the road, a little "light jazz" before retiring in
>the evening, etc. They're not *actively* seeking out radically different
>stuff (although I think they can have their listening habits gently
>"stretched" by competent programmers).

The broad masses use radio for background noise. Yes, they show up on ratings services, but they don't pay nearly as much attention to the radio as they did before such practices became common.

Thus, the questions are still very much unanswered. Where should programming come from and who should care?

Before you answer, consider that most Music formats along the lines of Top 40, Mix, Country, Classic Rock and so forth are very much closer to commercial speech than free speech. Remember, the Recording Distribution companies pay to put this music on the air in the hopes that they can sell it more. So be prepared to argue why this IS a free speech issue and why the public can't regulate it.

If WNYC was off the air there couldn't have been a 3-way simulcast. It
was all done as a result of 9/11 and isn't a normal occurrance.

Unlike most commercial networks, NPR and the other non-commercial nets
have more than one affiliate in a market. That doesn't constitute a
simulcast, particularly if the times are different.

That of course all depends on how you define "mentally retarded" and
"intelligent". The bell curve is not made to represent the IQ of a
population, but if I remember rightly the raw scores of a population are
adjusted to bring the average score to 100. Hence the discovery, by a
Dunedin academic whose name escapes me, that the raw scores have been
steadily improving over many years, and the argument as to whether people
have been getting more intelligent, or just better at doing IQ tests. It is
also I think generally agreed that the further a score is from 100, the less
it means in terms of a linear relationship with other scores.

Do you have the slightest idea what the US arts budget (such as it is)
goes to fund? Operas and symphonies get a tiny fraction of it -- most of
it is for things like high school bands and companies that put on
musicals locally.

Not to mention, of course, the budget for military bands, which is
larger than the entire NEA.

> with their ratings data.

Radio stations buy ratings principly to sell with. They are the currency by which radio audiences are measured. Additionally, ratings are a report card for programming. Where did we do a good job, where did we fail?

Radio ratings are not used except very indirectly to determine playlists. Stations do in-house research, or, in smaller markets, simply guess, to determine what established songs to play. There is no research done to determine what new songs to play... that is based entirely on gut feel, perception of the artist, needs to balance the playlist as to tempo, etc.

The ONLY place where the ratings can help in constructing a format is in the speed of rotations. Using Arbitron data, one can see how long and when listeners tune in, and derive reach and frequency ranges. With this in hand, a programmer can say, I want every listener to hear the top 5 songs at least 4 times a week and will be able to calculate whether to turn them every 2 hours or 2 hours and 20 minutes, etc.

Other than that, Arbitron provides no highly correlated data on the music a station plays. While ratings can show whether an overal format is working, it can not tell you whether it had to do with the specific songs or how they are played.

> Likewise, despite this experience, most radio stations still don't
> understand that their beloved ratings have very little foundation in
> reality any more. An phenomenon similar to the Heisenberg Principle

> measured, there are limits to what you can know about the situation.

Radio ratings are bought mostly to find out how many people in what ages are leistening to each station in a market, so that each station's advertising

can be priced. Your comparison with scholastic testing is not relevant, because Arbitron does not change its "questions." In fact, aside from finding out age, sex, and other demographic data, Arbitron doe snot ask questions in the radio survey. It privides each selected participant with a diary in which to write down what they listened to, and when. There is no questioning about opinion, songs, DJs, etc. Just a list of listening.

> Basically, this is WHY so many are turned off by radio programming.
> It has to be programmed with a notion of what they're following or
> what they're leading --or it's noise.

The most prevalent comment in this group has to do with so many people being burned out on radio. As I have posted before, 95% of Americans listen to radio weekly, and they listen for an average of 21 hours per person per week. Interestingly, this is the same number of weekly hours as given the medium by the "Average American" in 1950. I'm, for one, amazed by this. With all the gadgetry and new media available to suck up leisure time, radio still commands a hefty amount of people's time. Hmm. It must not be so bad.

I was about to say that, util I read ahead. Mosat people don't dislike radio, they don't post about radio to newsgroups. They listen in the car, the office, the workplace, the bathroom, they yard. If they like th emusic or the show, they stay. If they don't, they don't. It is not complicated. Radio is free, and used like an appliance. It has a use, a purpose.
>
> The broad masses use radio for background noise. Yes, they show up on

What practices are those? Radio today is simply a progression of the trends started in the 50s of music segmentation and formatic focus.
>

This is not true. Nearly no staitons are taking money to play specific songs. Most major companies in broadcasting don't deal with the independent promotor group any more, and pay-for-play (songs played as commercials) were never prevalent. record companies pay promoters to try to get songs played. In most cases, good songs get played and stiffs don't. Big aritsts get played before unknown ones, catchy songs become hits while hookless ones don't.

More than ever, money is not getting records played. In a big part, this is due to the fact that the record companies have an outdated marketing model, and are being eaten alive by downloads and pirates, and have very little money to spend on poromotion at all. In many areas, there are more smaller, idependent lables than ever, as the big companies can not justify large artist rosters and have to cut back.

Just so you know, here is how new songs are added at a radio station.

First, larger stations do call out research on currents. They know regularly, often once a week, which are moving up and down and which are not happening. So, a station knows how many open positions on the list are available for new songs. In most formats, this might mean between 1 and 3 tunes a week.

During the week, depending on format, a station has received anywhere between 5 or 6 and 100 new songs. So, let's say we have a huge 3 openings on our playlist. the first thing to see is if there is a good song or two or three by core artists... the artists that identify who we are and what we play. We take another listen to them. We put them in order on the desk. then we see if there are any songs happening on similar stations in other markets that we have been waiting on to see if there is a buzz on them. For this, we use BDS, MusicScan, R&R and tip sheets specific to our format to see what stations we respect have added. We identify these tunes, and listen again. We put them in the "potential" cue. Then we look at some of the maybe 100 songs that have no "papers" but might be long shots. Usually, the station Music Director will have reviewed the new arrivals, but most don't have time to do all this, do an airshift, remotes and production. Finally, we look at the existing list. If we have too many ballads, we don't select a new ballad.If we have too many songs of a sub-genre, we don't add another.

We end up with 3 songs to add. The other 90-some are divided into ones we will keep watching, and those that go into the trash.

But research, money and record companies have little to do with this process.

By the way, many stations these days use a music committee, where several people of different ages, sexes and even ethnicities share opinions on songs that could be added.

I 'only' see a couple of problems with that...

Firstly, your lack of funding for the arts produces aberrations like
Rush Limbaugh and other clowns to manipulate American public opinion.

Secondly, you money is indeed being spent on foreign broadcast (at the
tune of $500 a year) to sell the 'American way of life' across the
globe. Believe it or not the listeners in Zimbabwe get better
'culture'--and VOA is much better than the clown aforementioned--than
you do in Kansas City...

>(I don't know much about ERP, but it seems a bit odd to me that a
>station at 39kw ERP ~200km away could take out a station at 30kw ERP
>~30km away... Explanations?)

This spring we have experienced a great amount of tropospheric ducting, which is a fancy word for "skip." It is a weather condition, although conditions may seem perfectly sunny and nice otherwise. This problem is usually worst in the morning, and tends to go away as the day progresses.

One day last month, our station got totally wiped out in the vicinity of our 50 dbu contour by a station that is located over 300 miles away. This problem was not caused by the distant station, but it makes me wonder who we are wiping out. Thankfully this interference didn't last very long, but it is a problem that is very real.

There is a very good predictor map available at this web site:

http://www.globalserve.net/~hepburnw/tropo_car.html

The good news is, it is suppose to subside soon. You might want to wait a while before you call the folks at the FCC.

Chuck

Absolutely true. Another explanation for the score variances can be differences in methodology. Tests have been refined to eliminate cultural bias, a problem recognized but not addressed when the initial studies were made. I believe that I'm not alone in believing that the original motivation behind the bell curve was to prove that a certain race was more intelligent, ergo superior, to others. This should place it in the same shelf as phrenology.

I used the terms "intelligent" and "mentally retarded" in a gross, inexact way, as extremes in the range of scores. I could have used raw scores of 130 and 70 for the same purpose.

I'm no professional in the field. My wife is. I have done some reading on the subject fom her sources.

[Mildly OT]

No, it isn't legal to travel 25MPH on an interstate, at least not in
any state I've driven in. Ohio and Michigan both have minimum speeds,
Ohio's minimum typically being 15 MPH under whatever the speed limit is.

Boy, are you dumb. I feel sorry for you. If you think this issue does NOT effect you or your children's future, you are really living under a rock. Five MEGA media companies own 75% or what you see in movies, watch on TV, and read (books, newspapers & magazines) and listen to on radio. Several FCC employees (including Michael Powell) had 34 meeting this year with media lobbyist.

You think the media is BAD now, just wait another year and it will be much worse. You might want to read about what happen in Minot, N.D. -

An 'era of media megaliths'
05/14/03
ELI PARISER

It's like something out of a nightmare, but it really happened: At 1:30 on a cold January night, a train containing hundreds of thousands of gallons of toxic anhydrous ammonia derails in Minot, N.D. Town officials try to sound the emergency alert system, but it isn't working. Desperate to warn townspeople about the poisonous white cloud bearing down on them, the officials call their local radio stations. But no one answers any of the phones for an hour and a half.

According to The New York Times, one resident died after inhaling the gas and more than 300 people were treated at hospitals -- some partially blinded -- and pets and livestock are killed.

Where were Minot's disc jockeys on Jan. 18, 2002? Where was the late-night station crew? As it turns out, six of the seven local radio stations had recently been purchased by Clear Channel Communications,

a radio giant with more than 1,200 stations nationwide. Economies of scale dictated that most of the local staff be cut: Minot stations ran more or less on auto pilot, the programming largely dictated from farther up the Clear Channel food chain. No one answered the phone because hardly anyone worked at the stations any more; the songs played in Minot were the same as those played on Clear Channel stations across the Midwest.

Companies such as Clear Channel argue that economies of scale allow them to cut costs while continuing to provide quality programming. But they do so at the expense of local coverage. It's not just about emergency warnings: media mergers are decreasing coverage of local political races, local small businesses, and local events. There are only a third as many owners of newspapers and TV stations as there were in the 1970s (about 600 now; more than 1,500 then). It's harder and harder for Americans to find out what's going on in their own back yards.

On June 2, the Federal Communications Commission will consider relaxing or getting rid of rules to allow much more media concentration. While the actual rule changes are under wraps, they could allow enormous changes in the American media environment. Theoretically, one company could be allowed to own ABC, CBS and NBC. Almost certainly, media companies would be allowed to own newspapers and TV stations in the same town. We could be entering a new era of media megaliths.

Do you want one or two big companies acting as gatekeepers and controlling your access to news and entertainment? Most of us don't. And the airwaves explicitly belong to us -- the American people. We allow media companies to use them in exchange for their assurance that they're serving the public interest, and it's the FCC's job to make sure that's so. For the future of American journalism, and for the preservation of a diverse and local media, we have the hold the FCC to its mission. Otherwise, Minot's nightmare may become our national reality.

Eli Pariser of New York represents the MoveOn Media Corps, a group claiming membership of more than 29,000 Americans working for a fair and balanced media (www.moveon.org/mediacorps/).

WNYC-AM wasn't interrupted for a moment. Staff announcer Mark Hylan stayed at the mike the entire day (the regular on-air talent couldn't get to the studios, which are in the Municipal Building across from City Hall) relaying reports from reporters who called in from wherever they could to provide information.

> Unlike most commercial networks, NPR and the other non-commercial nets

And who suggested they did?

WNYC-AM and FM simulcast ME and ATC; their weekday local talk shows 10 am - 2 pm; Marketplace; PHC live (repeated on AM, but not FM, Sunday 11 am - 1 pm); and This American Life Sunday 6 pm. (And some of the network newscasts on the hour.)

Dear Phil:

Thanks for cc'ing me on comments to Peter. The station in GA is WNGA, Nashville, GA. 1600 KHz, 1 KW days, 500 watts presunrise (6 AM to actual sunrise) and 43 watts at night. Nondirectional. $90,000 full price including the building, land and tower. Their consultant says they can go to 5 KW days. For $100,000 the seller will finance with about $25,000 down.

Glad WLYC is up and running. Williamsport seems to be a nice area.

73,

Meyer

Where on earth do you get 15%? Cite, please.

"Legacy"? Yes, the Telecommunications Act was one of many Clinton legacies.
He made it possible for this nonsense to come to pass.

Lots of us saw this day coming the day he signed that idiot piece of
legislation (hint: that was the day I decided Bubba was a moron--it had
nothing to do with the which party he represented. Stupid is stupid,
regardless of political affiliation...).

But since he did you a favor, are you gonna give him credit for it? Of
course not! Because--you *are* a poor dumb sap, lemming-like in your
propensity to turn this into a right vs. left debate. And we know you
wouldn't be caught dead giving a leftie credit where it's due.

That's exactly what a drooling stooge does--follow their leader, regardless
if they are right or wrong.

Meanwhile, since it's a done deal, you'll be happy to know that the Heritage
Foundation, in their appeal to Powell to relax the laws, stated that the
Internet is a FINE alternative to 'teevee news'.

So in case you were wondering why I bring it up, it's very simple. You got your way out of this, but the price you will pay is that the days of bashing Internet news sources as an outpost for the lunatic fringe are over.

mellstrr--y'all should be careful what you wish for...

Here is the letter that I wrote to Sen. Gordon Smith, OR

~~~~~~~~
The FCC has sold it's soul to the devil.

They were created to remove ROGUE broadcasters and protect the airwaves for the American public plus foster competition and spur better radio practice and promote technologies (such as FM and TV) to make American life better. There is little belief of the last point being valid anymore. This is what you face in an FCC headed (hardly) by Michael Powell, a man/fool whom many of us simply called "Gen. Powell's kid" when he came to office. We were wary then, we are angry now!

Do what you must do! Ask Powell to RESIGN. Then get Mr. Bush aware of a much better leader (I do not pretend to know whom).

Thank you for your valued time.
~~~~~~~~

That sounds good, unfortunately most RCVR's are bad. I'd like to tune it
in with my own personal one, a Scott I have. 70's vintage Japan.

Valfer,

"I believe that I'm not alone in believing that the original
motivation behind the bell curve was to prove that a certain race was
more intelligent, ergo superior, to others."

The Mean, Standard Deviation, Normal Distribution (Bell Curve) are all
Mathematical Tools used to organize and analyze information (data).
These tools are applied to a variety of scientific applications. In
and of themselves they have no 'motivation'. They simply represent
the facts from a quantitative point of view.

The "Bell Curve" is used in Brown Mexico, White Russia, Yellow Japan,
Black Nigeria, all for the same reason it is a valid mathematical tool
that has its uses in science, industry, and education.

Or, are you implying that 'certain individuals' (the evil ones) are .
. .
- - - Torturing the Data Until It Tells Them What They Want It To !

And Who Are These "Evil Ones" who are Skewing the Bell Curve out of
shape ?

Just a footnote that one of WOR's engineers has informed me that this audio sample is "illegal" because whatever WOR broadcasts is copyrighted by their owners, Buckley Broadcasting -- apparently even infomercials, like WOR is so fond of airing on weekends, when I recorded this 5-minute clip.

So, if you're scared of that, don't listen to this MP3 file. But then, you might as well yank the Sound Blaster out of your computer because between this and all the "illegal" music files that everybody's downloading and sharing, if you want to avoid participating in "copyright infringement", there's just about nothing you can use it for, except to record and play back your own voice!

I suppose this also means that sites like http://www.northeastairchecks.com will either have to close up shop or risk getting sued, because they feature other recordings of WOR for people to download and listen to at will.

As an illegal parody of a Britney Spears song once said, "I just might sue myself".

Hell, we can't even get a national health care system, let alone state art funding....There's just no national consensus.

On the other hand, if we did get state radio stations playing classical music all day long, the academic geeks would start hollering about "dead white males" and other stuff.

I don't care, personally. Use the state funding to teach our kids about classical and jazz, and let the art geeks who take dirty pictures and pawn it off as "art" sell that stuff on the internet, with the rest of the porno....

How much good would it have done to actually get an alarm through the
radio. How many people are listening at 1:30 am? Not many. My feeling
is that without the economies of group ownership most of the stations
would have been off the air because management would have wanted to save
the salaries and other overhead.

The answer of course is that if a station is on the air, there MUST be a warm body covering the studio locally. Sounds like a good idea to me. Oh wait, that'll take us back 20 years in the rules and cost $500 a week (or so). I know minimum wage job.

Too logical.

If its not for monetary purposes, and does no harm, any copyrighter would be a fool to complain.

I like way back in the early 70's a local pittsburgh FM station would broadcast uninterrupted
entire new rock and jazz albums each week for our recording enjoyment. I thought that was pretty
cool.

I haven't forgotten. Cuba has bilingual broadcasts for the world while its people suffer scarcity. They however do fund the arts internally...

PS: Sorry the previous article somehow got duplicated, but it shows the Arts budget is around 120 million while foreign broadcasts hovers around $500.

You got no Arts, people may have to turn to something... :)

U.S. and the arts, a split personality
Frank Rich NYT Saturday, May 31, 2003

NEW YORK Given that the artistic muse of the Clinton administration was Linda Bloodworth-Thomason, the creator of the sitcom "Designing Women," George Bush's appointment of Bo Derek to the board of the Kennedy Center for the Performing Arts could hardly be faulted for breaking with tradition. Culture has always been considered ladies' work in Washington - first ladies' work. It was Jacqueline Kennedy who brought Pablo Casals to the East Room, not her husband, who celebrated his inaugural with a command performance by the Rat Pack. It is Laura Bush who invites writers to the White House, not the president, whose inaugural concert featured Andrew Lloyd Webber, Ricky Martin and Wayne Newton.

But at a certain point Washington's tenuous, tacky connection to culture ceases to be a joke, and that point is now. Almost two months after the world first heard of America's failure to protect Baghdad's museum from looters and thieves, Iraq's treasures are still being pillaged - now at the archaeological sites themselves. According to The Economist, the Italian diplomat the United States put in charge of Iraq's cultural holdings is obscuring the dimensions of this new fiasco by refusing to allow reporters to accompany him on helicopter visits to the scenes of these crimes. Meanwhile, the plundering continues, and each day we lose more of our collective memory of our religious, literary and artistic roots in the centuries before Christ.

As if this weren't enough, the government is now trying to cover up its culpability in the desecration of the Baghdad museum with smoke bombs of spin. On May 7, Lieutenant General William Wallace told reporters that "as few as 17 items" in the National Museum were unaccounted for - a figure that then allowed administration apologists to minimize the tragedy. But this and other low-ball estimates of loss are, as one Unesco fact-finder told the International Herald Tribune

last week, "a distortion of reality." The UN's team of experts estimates that at least 2,000 to 3,000 pieces are missing from the museum and that the entire 2 million volumes in the National Library and Archives are ash. "It's only by comparison with the most dire initial reports that said everything was gone that it seems not so bad," said a member of the team, John Russell of the Massachusetts College of Art. "Yes, not everything is gone, but major things are."

Another derogation of cultural duty by Washington, and one hitting closer to home, is probably about to become official. The Federal Communications Commission is expected to hand media giants like Viacom and News Corporation more power by letting them grab still more notches on the TV dial. The fix has long been in. The Center for Public Integrity revealed that the FCC regulators and staff members making these decisions had taken some $2.8 million worth of free trips (some 2,500 junkets in all, many of them to Las Vegas) from the very industry they are supposed to be regulating.

Michael Powell, the agency's Bush-chosen chairman, has freeloaded 44 times to rendezvous with show-business moguls even as he has disdained public hearings on the issues. The template for this behind-closed-doors policy making is Dick Cheney's secret energy task force, to which Enron executives got entree while environmentalists received short (if any) shrift.

Do American entertainment conglomerates need the same kind of government favors being showered on Halliburton? In the recession year of 2002, Variety has reported, the seven major Hollywood studios saw a rise of 18 percent in revenues. The reach of these companies is already so pervasive that performing arts institutions dedicated to classical music, dance and theater can barely be heard above the din.

As one critic puts it in the new issue of The Hudson Review, "Our commercialized, entertainment-oriented television-based culture has cheapened and trivialized all forms of public discourse." He points to a recent study showing that the average American spends 24 minutes a day reading - "not just books, but anything," TV Guide and diet tips included - as opposed to "over four hours daily of television and over three hours of radio."

The author of this grim indictment of the U.S. cultural state, as it happens, is himself a member of the Bush administration - Dana Gioia, who took over as chairman of the National Endowment for the Arts during the run-up to the war in Iraq. In the weeks since, I've spent several hours talking with him in New York and Washington - conversations I've found fascinating. The only subject he wouldn't expound on is the mystery of how he ended up in this administration in the first place.

Gioia, 52, is a contradiction. He's a working-class kid of Italian-Mexican heritage from Los Angeles who spent 15 years as a business executive (at General Foods) while building a career as a

poet and essayist. He has studied with Elizabeth Bishop and Robert Fitzgerald and marketed Jell-O. He's a Republican who voted for Bush but says "the only people I've ever contributed money to are Green candidates." As a critic, he's a fierce defender of what he considers traditionalist literary standards and yet takes pains to distinguish himself from the neo-con snobs who regularly deplore pop culture.

Nor does Gioia subscribe to the ugly culture wars that the likes of Lynne Cheney and William Bennett embraced. Many of those battles were in one way or another about National Endowment for the Arts grants to artistic projects with sexual content, especially homosexual content. Gioia will have none of it. "If the FBI investigation of me proved anything," he says, "it's that about half of my friends and in some cases my collaborators are gay - like Alva Henderson, the guy I wrote an opera with. How can you accomplish anything in the American arts if you're homophobic? It just can't be done. Someone doesn't want to do a play because it's gay? Well, grow up. This is America. It's just as simple as that. We're supporting arts for all Americans."

He does reserve one cheer for the cultural marketplace - he's not a Republican for nothing. "If you create a system where the marketplace doesn't operate in the arts," he says, "it breeds a kind of institutional stagnation, which you see in a lot of European countries." But he knows the perils: "If you put the marketplace entirely in charge of the arts, you see them very endangered." Like virtually all of his predecessors, Gioia's antidote is to increase the endowment budget and expand arts education. But at a time when arts programs of all kinds are falling prey to the fiscal crunch, the endowment would not make a difference even at three times its minuscule current appropriation ($117 million). Add the catastrophic money woes at American cultural institutions to the growing grip of the media giants that are sucking up the air in their stead, and you've got a crisis.

What can Dana Gioia do about it? He could shake Washington with the same asset that has made him successful as a writer, the power of his ideas. A legendarily contentious essay he wrote for The Atlantic in 1991, "Can Poetry Matter?," started a debate over the merits of the academic poetry establishment that raged for years. While he sees clearly the cultural lay of the land, including what he called the "heartbreaking" destruction in Iraq, his duty must be to convey the urgency of his vision to a larger audience. Can he? The knee-jerk answer, of course, is no. He would appear to be as doomed as another green administration appointee, the soon-to-depart chief of the Environmental Protection Agency, Christie Whitman.

Gioia is too smart not to realize that for all the efforts of the current first lady, a former librarian, to promote reading, libraries are closing, not expanding, on this administration's watch. He is too serious to stand idly by while Rupert Murdoch amasses more power at home and looters subsume the culture of America's 51st state, Iraq.

"The measure of a great nation is not merely its wealth and power but also its civilization," Gioia said when testifying before Congress in March. He seems to mean it. The measure of his tenure in Washington will be the extent to which he can counter those administration policies that damage our civilization rather than merely provide them rhetorical cover.

But at a certain point Washington's tenuous, tacky connection to culture ceases to be a joke, and that point is now. Almost two months after the world first heard of America's failure to protect Baghdad's museum from looters and thieves, Iraq's treasures are still being pillaged - now at the archaeological sites themselves. According to The Economist, the Italian diplomat the United States put in charge of Iraq's cultural holdings is obscuring the dimensions of this new fiasco by refusing to allow reporters to accompany him on helicopter visits to the scenes of these crimes. Meanwhile, the plundering continues, and each day we lose more of our collective memory of our religious, literary and artistic roots in the centuries before Christ.

It's just as simple as that. We're supporting arts for all Americans."

He does reserve one cheer for the cultural marketplace - he's not a Republican for nothing. "If you create a system where the marketplace doesn't operate in the arts," he says, "it breeds a kind of institutional stagnation, which you see in a lot of European countries." But he knows the perils: "If you put the marketplace entirely in charge of the arts, you see them very endangered." Like virtually all of his predecessors, Gioia's antidote is to increase the

endowment budget and expand arts education. But at a time when arts programs of all kinds are falling prey to the fiscal crunch, the endowment would not make a difference even at three times its minuscule current appropriation ($117 million). Add the catastrophic money woes at American cultural institutions to the growing grip of the media giants that are sucking up the air in their stead, and you've got a crisis.

What can Dana Gioia do about it? He could shake Washington with the same asset that has made him successful as a writer, the power of his ideas. A legendarily contentious essay he wrote for The Atlantic in 1991, "Can Poetry Matter?," started a debate over the merits of the academic poetry establishment that raged for years. While he sees clearly the cultural lay of the land, including what he called the "heartbreaking" destruction in Iraq, his duty must be to convey the urgency of his vision to a larger audience. Can he? The knee-jerk answer, of course, is no. He would appear to be as doomed as another green administration appointee, the soon-to-depart chief of the Environmental Protection Agency, Christie Whitman.

Gioia is too smart not to realize that for all the efforts of the current first lady, a former librarian, to promote reading, libraries are closing, not expanding, on this administration's watch. He is too serious to stand idly by while Rupert Murdoch amasses more power at home and looters subsume the culture of America's 51st state, Iraq. "The measure of a great nation is not merely its wealth and power but also its civilization," Gioia said when testifying before Congress in March. He seems to mean it. The measure of his tenure in Washington will be the extent to which he can counter those administration policies that damage our civilization rather than merely provide them rhetorical cover.

The New York Times NEW YORK Given that the artistic muse of the Clinton administration was Linda Bloodworth-Thomason, the creator of the sitcom "Designing Women," George Bush's appointment of Bo Derek to the board of the Kennedy Center for the Performing Arts could hardly be faulted for breaking with tradition. Culture has always been considered ladies' work in Washington - first ladies' work. It was Jacqueline Kennedy who brought Pablo Casals to the East Room, not her husband, who celebrated his inaugural with a command performance by the Rat Pack. It is Laura Bush who invites writers to the White House, not the president, whose inaugural concert featured Andrew Lloyd Webber, Ricky Martin and Wayne Newton.

But at a certain point Washington's tenuous, tacky connection to culture ceases to be a joke, and that point is now. Almost two months after the world first heard of America's failure to protect Baghdad's museum from looters and thieves, Iraq's treasures are still being pillaged - now at the archaeological sites themselves. According to The Economist, the Italian diplomat the United States put in charge of Iraq's cultural holdings is obscuring the dimensions of this new

fiasco by refusing to allow reporters to accompany him on helicopter visits to the scenes of these crimes. Meanwhile, the plundering continues, and each day we lose more of our collective memory of our religious, literary and artistic roots in the centuries before Christ.

As if this weren't enough, the government is now trying to cover up its culpability in the desecration of the Baghdad museum with smoke bombs of spin. On May 7, Lieutenant General William Wallace told reporters that "as few as 17 items" in the National Museum were unaccounted for - a figure that then allowed administration apologists to minimize the tragedy. But this and other low-ball estimates of loss are, as one Unesco fact-finder told the International Herald Tribune last week, "a distortion of reality." The UN's team of experts estimates that at least 2,000 to 3,000 pieces are missing from the museum and that the entire 2 million volumes in the National Library and Archives are ash. "It's only by comparison with the most dire initial reports that said everything was gone that it seems not so bad," said a member of the team, John Russell of the Massachusetts College of Art. "Yes, not everything is gone, but major things are."

Another derogation of cultural duty by Washington, and one hitting closer to home, is probably about to become official. The Federal Communications Commission is expected to hand media giants like Viacom and News Corporation more power by letting them grab still more notches on the TV dial. The fix has long been in. The Center for Public Integrity revealed that the FCC regulators and staff members making these decisions had taken some $2.8 million worth of free trips (some 2,500 junkets in all, many of them to Las Vegas) from the very industry they are supposed to be regulating.

Michael Powell, the agency's Bush-chosen chairman, has freeloaded 44 times to rendezvous with show-business moguls even as he has disdained public hearings on the issues. The template for this behind-closed-doors policy making is Dick Cheney's secret energy task force, to which Enron executives got entree while environmentalists received short (if any) shrift.

Do American entertainment conglomerates need the same kind of government favors being showered on Halliburton? In the recession year of 2002, Variety has reported, the seven major Hollywood studios saw a rise of 18 percent in revenues. The reach of these companies is already so pervasive that performing arts institutions dedicated to classical music, dance and theater can barely be heard above the din.

As one critic puts it in the new issue of The Hudson Review, "Our commercialized, entertainment-oriented television-based culture has cheapened and trivialized all forms of public discourse." He points to a recent study showing that the average American spends 24 minutes a day reading - "not just books, but anything," TV Guide and diet tips included - as opposed to "over four hours daily of television and over three hours of radio."

The author of this grim indictment of the U.S. cultural state, as it happens, is himself a member of the Bush administration - Dana Gioia, who took over as chairman of the National Endowment for the Arts during the run-up to the war in Iraq. In the weeks since, I've spent several hours talking with him in New York and Washington - conversations I've found fascinating. The only subject he wouldn't expound on is the mystery of how he ended up in this administration in the first place.

Gioia, 52, is a contradiction. He's a working-class kid of Italian-Mexican heritage from Los Angeles who spent 15 years as a business executive (at General Foods) while building a career as a poet and essayist. He has studied with Elizabeth Bishop and Robert Fitzgerald and marketed Jell-O. He's a Republican who voted for Bush but says "the only people I've ever contributed money to are Green candidates." As a critic, he's a fierce defender of what he considers traditionalist literary standards and yet takes pains to distinguish himself from the neo-con snobs who regularly deplore pop culture.

Nor does Gioia subscribe to the ugly culture wars that the likes of Lynne Cheney and William Bennett embraced. Many of those battles were in one way or another about National Endowment for the Arts grants to artistic projects with sexual content, especially homosexual content. Gioia will have none of it. "If the FBI investigation of me proved anything," he says, "it's that about half of my friends and in some cases my collaborators are gay - like Alva Henderson, the guy I wrote an opera with. How can you accomplish anything in the American arts if you're homophobic? It just can't be done. Someone doesn't want to do a play because it's gay? Well, grow up. This is America. It's just as simple as that. We're supporting arts for all Americans."

He does reserve one cheer for the cultural marketplace - he's not a Republican for nothing. Most of "National Radio" is in AM at present as mono but the
transmitters are am stereo ready but they wont do that here:-(
Its on FM in Auckland simulcasting with AM756 and Taupo on FM and one
or two small towns currently
Theres also RNZ International on SW too.

I listen to AM as well but unfortunatly here the AM Band is full of
non english programming or religious networks and very little music
and no AM Stereo either.

> small minority of people can "enjoy the arts."

You are mistaken. In the US, the government, which operates by
consent of the people, taxes us and spends the money on all sorts of
programs, including arts funding. Money for "the arts" is indeed a
function of government here.

And the money is certainly not taken by force. You consent to
taxation by remaining a US citizen.

> If enough people want to
> "enjoy the arts" then the free market will take care of that.

With rare exceptions, the free market makes crap. 99% of the great
art in the history of the world has been wholly or mostly
government/church funded. Great ideas can't rely on a common
denomenator.

John

Pardon me for making assumptions. "The Bell Curve" is one of several detailing studies of comparative intelligence made many years ago in the U.S.A.. Based on these studies, some pseudo-social scientists determined with an exaggerated degree of certainty that individuals of the Caucasian race possessed intelligence superior to that of the African, Eurasian, Jewish, Hispanic, etc. These studies, unfortunately, have not been completely discredited, and are quoted by interested parties as if they were the Gospel Truth. Just ask our neo-nazi posters, and they will quote these "findings" to you by page and chapter.

The statistical devices you quite properly name have little to do with my subject of discussion, and for this I apologize. These devices are valuable and irreplaceable tools for statistical analysis.

Clearly they would, but at the same time American 'classical music,'
jazz, is mostly black, so there could one station classical and one
jazz.

One thing applicable to both though--and I hope someone in NPR is
listening--MUSIC SHOULD BE EXPLAINED. In Spain, for example, classical
music is explained in context and it makes all the difference in the
world. NO COMMERCIALS, JUST ARTS.

But quoting only five words out of a whole song might qualify as fair use,
although I know the rights holders are trying to do away with the fair use
doctrine.

Why, then, aren't people who reject arts funding also complaining about sports funding? Why should my taxes assist George Steinbrenner build a new stadium for the Yankees? Practically every city has thousands of homeless and uninsured sick. Let's stop pouring money into hospitals. After all, why should my taxes fund someone elses health needs when Steinbrenner needs it more. Who needs this compassion stuff? Let the guy who's just been hit by a bus figure his own way out of his mess. Our money is much more usefully spent watching grown men (women not allowed) hit a ball with a stick.

I don't want a huge stadium in the middle of Manhattan. If he doesn't get it, he's threatening to move the team. How does "The Weehawken Yankees" sound?

Oh, I remember. It brings money to the city. I wonder if it brings in as much as it costs, especially in terms of the huge tax breaks they get that other people will have to make up for in property taxes on their homes.

According to the information line at the NY Public Library (you can ask any question and they'll find the answer) more people in this country attend arts events than sporting events.

I'm afraid the "small minority" are sports fans.

In New York the supporting companies for sports are hot dog concessions. Maybe $10 for a hot dog and a drink. Supporting companies for the arts are restaurants at $50 a pop, minimum.

Another advantage is the fact that arts people usually keep their clothes on, don't paint stuff on their beer bellies or wave around wierd things made of endangered foam. Except for a Wagner opera, the arts don't frighten the horses and give little children nightmares after watching their parents make fools of themselves. Though I have to admit a building full of people dressed like penguins does frighten me a little.

If you're going to stop subsidies, stop them all. Since the family farmer is a goner, why does the huge farming conglomerate need

government help? Why do the airlines need help from our taxes? Almost every other industry succeeds or fails based on the same markets as the airlines. If American Airlines can't make it through creative management, let it go under. Our ancestors made it across the country without airplanes. Considering the hot shot's attempts to save their own financial butts, do you think any loan we make to them will ever be paid back? If Lee Iacocca were running the Airline I'd feel much better about it succeeding and my tax dollars being returned.

Rich

Tivoli makes an AM/FM radio with a very good quality FM tuner. It's the Tivoli Kloss Model 1. Costs about 100 dollars....very classy looking. I'm pleased with mine.

www.tivoliaudio.com

Alternatively you can hop down to your local Sears and pick up a GE-Superadio III for $50. Still very good radio...even though the tuning dial is sometimes a bit "off". Try before you buy.

However both radios have analogue tuners. Personally, I prefer a knob with a tuning condenser to a bunch of tiny buttons and additional noise-generating circuitry.

Has WBT 1110 Charlotte been broadcasting
in "digital" (a.k.a. IBOC) for the past few weeks?

They seem to be "splattering" either side of their
center carrier quite annoyingly of late.

I like to catch the 12:00-1:00 weeknight
repeat of Coast to Coast AM on WTAM
1100 Cleveland, but it has been difficult of
late with all the QRM (ham radio term for
adjacent interference) from Charlotte NC.

Any ideas?

<Don, Again I ask you....out of the 284+ million Americans, how many are watching Murdoch stations? And how many are watching CBS/NBC/ABC/CNN/BBC?

Do you think the media outlets noted above represent "the same conglomarate of news, where big business--oil--is #1..." >

The answer is...

"In response to the 2001 NSF survey, 90 percent of adults said they watched television news reports or news shows every day (63 percent) or a few times a week (27 percent)."

The only ones that are less corrupt would be the more or less independent BBC and PBS, which you forget to mention. (And I don't think their combined audience amounts to a sizeable percentage.)

Other than that, their SUV commercials speak for themselves...

Meanwhile in a not-so-distant place called Canada...

ISSUE DEFINITION

Cultural policy is the expression of a government's willingness to adopt and implement a set of coherent principles, objectives and means to protect and foster its country's cultural expression. The arts are the very foundation of this expression. In an age when countries are becoming increasingly interdependent economically and politically, promoting cultural expression by means of a coherent cultural policy for the arts is a valuable way to emphasize and define what distinguishes one country from another.

Canada faces considerable challenges in this regard. Its vast territory and small population make it difficult to produce, exchange, disseminate and communicate works of art, while artistic production itself is economically fragile. Canada must also contend with the constant cultural presence of the United States in this country and the influence of this presence on the cultural identity of its population.

This review focuses exclusively on Canadian cultural policy as it concerns the arts; that is, on the range of government actions that have a direct effect on creative and performing artists and on the organizations within which these artists work. The review describes the leading concerns with respect to this country's cultural policy for the arts and the main responses of the federal government.

BACKGROUND AND ANALYSIS

A. Role of the State

A country's culture is its body and soul, reflecting the way its inhabitants act and think. In its broadest sense, its culture includes a community's knowledge, experience, beliefs, values, customs, traditions and distinctive institutions. A country may be composed of various distinct communities, each with its own exclusive cultural characteristics. An individual's cultural identity and sense of belonging are clearly in many respects a function of familiarity with the cultural characteristics of his or her own community and the surrounding communities.

Through a government policy that promotes the arts and whose primary goal is cultural, individuals are familiarized with the characteristics of their own society and their sense of belonging and cultural identity are strengthened. The role of artists is not only to

mirror the values of the society in which they live, but also to reflect on the issues that society must address if it is to know itself better. The role of the State in this regard is to support artistic activity, to provide creators with conditions favourable to the practice of their art, and to ensure access to their work by the general public.

Like this...

Source: Canada's CBC

Sound Advice

Classical music is becoming more and more popular. But with the
thousands of classical CDs that are released every month, how do you
make any sense of it all? Which ones do you buy?

SOUND ADVICE is the weekly guide to the world of classical music and
recordings.

Rick Phillips makes classical music selection easier for both longtime
classical devotees and new fans of all ages. This program takes the
latest Classical releases and offers musical comparisons to other
recordings still available. There are also hints on how to listen
critically, how to appreciate music more, what to listen for, and a
host of other topics.

There's also a Library segment every week, where Rick looks at how to
build a classical music library, or brief surveys of some of the great
performers from disc, or explanations and musical examples of some of
the basic forms in classical music.

And there's the popular SOUND ADVICE Music Quiz to close the show
every week.

Thanks to Ninth Grade "music appreciation," I _still_ cannot bear to
hear Rimsky-Korsakov's Sheherazade. That was 39 years ago.

<Didn't want to spoil your fun.....(and it's better for you to see what the actual numbers are) I'd bet that out of 284 million viewers, ABC/CBS/NBC/BBC only draw about 25 million on a given evening...I could be wrong, but that's my guess, what's yours?>

OK, it sounds right. The question is, what about the quality?

TV ratings: A competitive race again for network evening news

Friday, June 15, 2001

By DAVID BAUDER, AP Television Writer

"The "CBS Evening News" averaged 8.3 million viewers last week (6.2 rating, 14 share). NBC had 8.2 million (6.1, 14) and ABC had 7.8 million (6.1, 14)."

Ratings and quality...

FIXING TELEVISION NEWS.
Author/s: Bob Papper
Issue: Jan, 1999

Improvement will come only if viewers discourage the lowest-common-denominator approach too many stations take to boost ratings.

WHAT IS WRONG with television news is mostly a perversion of what is right with the medium. In an unbelievably competitive environment, television too often finds itself unable to settle merely for what it does exceptionally well. If this is the land of excess, then TV clearly defines who we are.

Television is the greatest mass medium of our time--arguably the only remaining one. As others specialize to survive, television invites everyone in--or at least everyone from the advertiser-desired ages of 18 to 54. In a mass medium, those with the biggest mass win.

"What's wrong with TV news? A simple one-word answer would be Nielsen," says Ramon Escobar, news director at WTVJ-TV in Miami.

Ratings are the god before which all TV bows. Can stations or networks win by taking the high road? Sure they can, but it is harder, calling for a long-term commitment and requiring better, smarter, and usually more expensive people. Moreover, it takes longer. Alternatively, there's the Jerry Springer low road to a mass audience, including sensational, screaming news coverage and sleazy special sweeps series.

This may be the dictionary definition of lowest common denominator, but don't kid yourself, there are lots of ones and zeroes generated.

"Yeah, there's a lot of junk out there," concedes Marci Burdick, news director at KYTV-TV in Springfield, Mo., and a former chair of the Radio Television News Directors Association. "Sometimes I flip on television in motel rooms, and I just laugh at what I see." Nevertheless, Burdick maintains that television news, in general, is a lot better than people give it credit for. "I think there's more excellent journalism being done than lousy journalism. Unfortunately, the consumers never hear about it from us, and that's one of the greatest ironies."

It can be tough for a news director and news department to take the high road. Some of the competition can be brutal. "We did a story on kids and values; we did a story on racism and race relations," notes Escobar. "While we're doing that, we've got other stations in town, they're doing bathroom sex. The last [ratings] book, we had sort of a bathroom motif going on. Another station did, can you imagine, that public restrooms are dirty? What kind of a story is that? Another station did bathrooms of the future."

"It's troubling," reflects Tamara Lehman, news director at KREM-TV in Spokane, Wash. "It is frightening to be looking at rating points and see when some stations do unethical things for ratings." Among the "unethical things" she has in mind are news contests, station-sponsored giveaways to "lucky" viewers who watch the news. Defending this demeaning practice, station managers point to newspapers that do the same thing--proof that the juvenile response that "Johnny did it, too" is alive and well in television today.

George Jellinek (sp?) of WQXR, New York, had a column in Stereo Review
Magazine called "The Basic Repertoire." The danger is that it's one
man's opinion and other "experts" will argue that the Moncton
Auxilliary Orchestra's performance of Janacek's "House of the Dead"
was much better than the Metropolitan Opera.

Someone asked an Arbitron representative how they'll deal with the people meter while in the shower. Make sure you take it into the bathroom was the answer.

Unless you're able to imitate the subaudilbe code in the shower, the meter won't register your version of "Feelings" in their report.

I avoid singing in the shower. Replacing the cracked tiles gets expensive. I'm the person bars hire to sing at 1:45am to make sure the room is cleared by 2.

Be careful. The gummint is taking notes on how best to torture us to
get information when we're arrested as terrorists. Ashcroft will get
to you, one day.

I learned how best to destroy space aliens from "Mars Attacks." Slim
Whitman records caused their heads to explode.

You'd be surprised how valuable little snippets of information can be.

According to former, kinda conservative Arianna Huffington, SUV's are
dinosaurs. I envision a plea for everyone to drive their SUVs to the
La Brea tar pits.

Of course, once Dubya and his oil buddies get hold of the Iraqi oil
fields we'll be swimming in the stuff and new SUVs will be spawned
because we need to burn the stuff even faster. The Lincoln Navigator
will look like a VW Bug compared to the revived generation of land
vessels.

Amateur Radio Newsline=E2=84=A2 Report 1347 =E2=80=93 June 6, 2003

Amateur Radio Newsline report number 1347 with a release date of Friday, =
June
6th 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T.=20

HIPPA affects ham radio and update on a harmonized 40 meter band. These
stories and more on Amateur Radio Newsline report number 1347 coming your=
way
right now.

(Billboard Cart Here)=20
=20
**

FEDERAL LAW VS. HAM RADIO: THE CONFUSION OVER HIPPA

A new federal healthier law with the acronym HIPPA is affecting Amateur R=
adio.=20
Bruce Tennant, K6PZW, takes a look at the recent implementation of the He=
alth
Insurance Portability and Accountability Act and its impact on the hobby.

--

If you are a ham with a disability and are a member of a group any other
organization that has knowlege of your problem, then listen up. In order=
to
continue receiving most benefits from such a group you are now required u=
nder
Federal law to fill out and return the new Health Insurance Portability a=
nd
Accountability Act privacy guidelines forms that you may have already rec=
ieved
or will recieved from each group.

Its the Federal government that requires the paperwork, and signing it wi=
ll
allow groups that must disclose disability information in the course of r=
outine
business to continue to serve you. For hams with disabilities it means t=
hat
groups like the Handi Hams can continue to provided direct assistance wit=
h
license renewal or license changes, publish news of individual license

upgrades, and even send a birthday greeting by the ham radio's National T=
raffic
System.

What about individuals who do not sign the forms? They will still be abl=
e to
receive some services offered by these groups, but limited to those which=
do
not involve releasing information about their physical condition. Howeve=
r, in
the case of the Handi Hams, a disabled ham could no longer be connected =
with
the groups assistance community of other members and volunteers because o=
f the
new federal privacy regulations.

For the Amateur Radio Newsline, I=E2=80=99m Bruce Tennant, K6PZW, in Los =
Angeles.

-- =20

INTERNATIONAL: 40 METER CHANGE LOOKS GOOD

ARRL Executive Vice President Dave Sumner, K1ZZ, says that prospects for =
a
harmonized worldwide 40 meter ham band are starting to look good. Speaki=
ng at
a recent Dayton Hamvention forum, Sumner says it may all hang on what the
United States proposes for the upcoming World Radio Communications confer=
ence
later this year:

--

Sumner Here

--

Even if a large number of delegations come up with similar proposals, Sum=
ner
says that caution is still the by-word until all the voting has been done=
:

--
Sumner Here
--

You can hear more of what Dave Sumner has to say regarding 40 meters and =
other
issues on this weeks RAIN report. Its in streaming audio at
www.rainreport.com. Those without web access can her it by dialing up
847-827-RAIN. Thats 847-827-7246 (RAIN, ARNewsline=E2=84=A2)

**

HAM SPECTRUM: 5 MHZ SPOT FREQUENCIES AVAILABLE MIDNIGHT JULY 3

LOOKING FOR SOMETHING NEW IN HAM RADIO? WELL, HERE'S NEWS JUST IN FROM =
THE
FCC AND THE ARRL. I'M ROY NEAL, K6DUE, WITH A LATE BREAKING STORY THAT=
HAMS
HAVE BEEN WAITING A LONG TIME TO HEAR. 60 METERS. 5 MEGAHERTZ =E2=80=A6=
SOON WILL BE
AVAILABLE WITH=20

5 CHANNELS FOR YOUR PLEASURE AND INVESTIGATION. A SECONDARY FIVE CHANNE=
L
DOMESTIC HAM RADIO ALLOCATION WILL BECOME AVAILABLE STARTING AT MIDNIGHT,
THURSDAY THE THIRD OF JULY.

FEDERAL GOVERNMENT USERS ARE PRIMARY IN THE 5 MHZ BAND. AMATEURS GET FIV=
E
CHANNELS, 2.8 KHZ WIDE, WITH CENTER FREQUENCIES OF 5332, 5348, 5368, 537=
3, AND
5405 KILOHERTZ.

GENERAL AND HIGHER CLASS LICENSE HOLDERS WILL BE PERMITTED TO OPERATE UPP=
ER
SIDEBAND PHONE, WITH A MAXIMUM OF 50 WATTS EFFECTIVE RADIATED POWER.

USERS ARE BEING ADVISED TO SET THEIR CARRIER FREQUENCY ONE AND A HALF KIL=
OHERTZ
LOWER THAN THE CHANNEL CENTER FREQUENCY. THE ARRL ALSO SUGGESTS RESTRIC=
TING
AUDIO BANDWIDTH TO 200 HERTZ ON THE LOW SIDE AND 2800 HERTZ ON THE HIGH E=
ND TO
KEEP THE TOTAL BANDWIDTH WITHIN THE 2.8 KHZ IMPOSED BY THE FCC.

THE REPORT AND ORDER GRANTING THE NEW SPOT FREQUENCY ALLOCATION AT 5 MEGS=
WAS
PUBLISHED IN THE FEDERAL REGISTER ON JUNE THIRD. LOOK FOR LOTS MORE ON T=
HE
SUBJECT IN THE NEAR FUTURE HERE ON THE AMATEUR RADIO NEWSLINE.=20

NORM. (ARRL, FCC)

**

INTERNATIONAL - SOLOMON ISLANDS: LICENSING CONFUSION

Meantime, in the Southern Hemisphere, some questions and some possible an=
swers

regarding the confused state of ham radio licensing in the Solomon Island=
s.=20
Q-News Graham Kemp, VK4BB, has the details:

--

Sam Voron, VK2BVS, spoke to QNEWS from an Internet kiosk at Dubai airport=
. Sam
was en route to Somalia, but paused just long enough to answer a few rum=
ors
regarding the Solomon Island H44 prefix licenses.

According to Voron, there had been no way for people to get a license in =
the
Solomons because there are no exams there. So in 2002 the H44 national r=
adio
regulatory body called Spectrum printed 21 novice licenses with the call =
signs
chosen by students at a radio school. These are people took the Unrestri=
cted
level license class of ham radio training.

But Spectrum said that it first wanted to issue Novice licenses because i=
t felt
new operators should start with an entry level ticket before moving on to=
a
full license. But Voron admits that at least two of these licenses may h=
ave
been issued with Unrestricted privileges.

According to Voron, the Secretary of the H44 national ham society has now=
drawn
up an Unrestricted exam. Students not happy being forced into the novice
license when they spent 6 months studying for the Unrestricted will be ab=
le to
take the exam. If they pass, they will go directly to the Unrestricted
instead of the Novice class operating privileges.

In further news just in and unsubstianted as yet, the real exam is ready.=
=20
Spectrum has directed the candidates to sit for it. The school and candi=
dates
are said to be dealying because they are frightened that it may be to har=
d.=20

For the Amateur Radio Newsline, I=E2=80=99m Graham Kemp, VK4BB, of Q-News=
,
down-under, in Brisbane, Australia.

--

No matter when that first upgrade test is held, it appears as if a method=
is at

least now in place for native born Solomon Islanders to take an Amateur R=
adio
exam. (Q-News)

**

**

FCC: KILLS RULES FOR LIGHTING DEVICE EMISSION LIMITS AT 2400-2500 MHZ

Remember a few years back when hams became very worried about degradation=
to
the 2 point 4 Gigahertz band? This, after the FCC adopted a First Repor=
t and
Order that relaxed the emission limits for R F lighting devices. =20

That was on June 9th of 1999 and at that time the Commission deferred to =
a
future date action on changes to the rules to permit such devices to oper=
ate
from 2400 to 2500 MHZ. =20

Now, with no apparent remaining interest by the lighting industry to prod=
uce RF
lighting devices in that spectrum, the FCC has decided to forego any furt=
her
rule change. Well, at least for the moment it has.

The whole story is at =20
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-123A1.doc on the=
World
Wide Web. (CGC)

**

RADIO LAW: FCC ACTS TO EASE MEDIA OWNERSHIP RESTRICTIONS

Federal regulators have acted to relax rules that restrict media ownershi=
p.=20
The change will permit companies to buy more broadcast properties and own=
a
newspaper as well as a radio or television station in the same city.

On Monday, June 2nd the Federal Communications Commission announced that =
it

voted 3 to 2 to adopt a series of changes favored by media companies. It=
now
says that a single company can now own TV stations that reach 45 percent =
of
United States households instead of the previous 35 percent limit. The a=
gency
also eased rules governing local TV ownership so one media conglomerate c=
an own
two television stations in more markets and up to three stations in the l=
argest
markets like New York or Los Angeles.

More controversial was a decision to end an age-old ban on joint ownershi=
p of a
newspapers and broadcast stations in the same city. The revised rule lift=
s all
'cross-ownership' restrictions in markets with nine or more TV stations.=20
Smaller markets still face some limits and cross-ownership is still bann=
ed in
city=E2=80=99s and towns with three or fewer television outlets.

And even these rule changes are expected to face court challenges. Some =
media
companies already indicate wanting more wide spread deregulation. Meanti=
me
consumer advocates will be seeking to reverse the deregulatory trend in f=
avor
of more local control over the print and broadcast media.

Not approached in this latest round of broadcast deregulation was the sub=
ject
of direct foreign ownership of U-S broadcast properties. Currently forei=
gn
entaties and governments are banned from such ownership. But over the ye=
ars
there has been intensive lobbying by foreign interest groups to do away w=
ith
this ban which requires an act of Congress to lift. Most annylists say =
its
not likely to happen in the near future. (Published news reports)=20

**

ENFORCEMENT: LOCAL CHARGES FILED AGAINST OHIO CB OPERATOR

Complaints from a group of neighbors experiencing interference on househo=
ld
appliances from phones and TV sets to baby monitors have resulted in a co=
urt
case against a citizens band radio operator. Amateur Radio Newsline=E2=80=
=99s David
Black, KB4KCH, takes a look at a most interesting case:

--

On the CB airwaves, he's said to go by the name Sugar Bear. James A Disbe=
nnet,
of Lancaster, Ohio, faces first degree misdemeanor charges of operating a=
CB
radio exceeding 4 watts. He also faces two counts of operating a CB radi=
o
without certification. The Lancaster Eagle Gazette says Disbennet was
released on bond after answering a summons in Fairfield County Municipal =
Court
May 20th.

The Lancaster City Council was the first such group in the U-S to pass an
ordinance allowing the City to enforce rules set by the FCC governing the
strength of CB radios. On April 10th, an assistant superintendent of the
City's Electrical, Communications and Signals Department went on a transm=
itter
hunt. The interfering signals were traced to Disbennet's home. The City =
then
obtained a search warrant, with Lancaster police serving the warrant the
following day. Officers seized four pieces of CB radio equipment worth mo=
re
than a thousand dollars.

A trial date has yet to be set. If convicted, Disbennet could be hit with=
a
1,000 dollar fine and 180 days in jail.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to the law under which Disbennet was charged, the definition of=
CB
radio "includes all private, two-way, short-distance voice communications
service for personal or business activities of the general public. Citiz=
ens
filing complaints must keep an accurate log of the interference for a min=
imum
of four weeks and there has to be more than one complainant in order to f=
ile
charges. The only exclusions to the law are for emergency communications
services like police, fire and FCC licensed radio amateurs. =20

The complete story is in cyberspace at
http://www.lancastereaglegazette.com/news/stories/20030521/localnews/3395=
9
6.html. (N6RU)

**

ENFORCEMENT: FCC WITHDRAWS LETTER IN ENHANCED SSB OPERATION

Remember a stir created on April 3rd the FCC sent advisory letters severa=
l hams
who run enhanced or so-called high fidelity single sideband? The FCC tol=
d
those operating the mode that the agency had received complaints from oth=
er
radio amateurs alleging that the enhanced mode transmissions were using
bandwidth wider than necessary. The FCC termed this as being contrary to=
good
engineering practice.

One of those hams receiving such a notice was Anthony G. Latin, W4NSG, of=
Ocala
Florida. Now, a month later the FCC has withdrawn its original letter to
Latin, stating that it was issued to him in error. The regulatory agency=
also
apologized to W4NSG for whatever inconvenience that letter may have cause=
d him.
No specific reason for the withdrawal of the letter was given. (FCC)

**

ENFORCEMENT: FCC ISSUES ANOTHER ENHANCED SSB WARNING

But its not over yet. This is because the FCC has issued another ham a s=
imilar
warning regarding the use of enhanced SSB on the Amateur Service bands. =20

The May 12th letter went to Tyler Stampfli, KA0KA. Like those issued bac=
k in
April, it tells the La Grange, North Carolina ham that use of enhanced Si=
ngle
Sideband emission with a bandwidth wider than necessary is contrary to go=
od
engineering practice. It also notes that no spectrum in the Amateur Serv=
ice is
designated specifically as =E2=80=9Cwideband audio=E2=80=9D frequencies, =
either by
Commission rule or in any informal band plans.=20

The FCC did not cite Stampfli. It did however request that he fully revi=
ew the
relevant Amateur Service rules and to make certain his station conforms t=
o
them. Also that he operate in the best interests of the Amateur Radio Se=
rvice
as a whole. (FCC)

**

ENFORCEMENT: BIG CELLULAR FINE

The FCC has issued Western Wireless Corporation and WWC Holdings two Noti=
ces of

Apparent Liability to Monetary Forfeiture in the amount of $200,000 each.= The
companies are the licensee of Cellular Radio Station KNKN343 in North Da= kota.=20
The FCC says that the the companies are operating radio transmitting equi= pment
from an unauthorized location resulting in the first fine. =20

The second $200,000 is the result of what the FCC says was Western Wirele= ss for
operating radio transmitting equipment from another unauthorized location= . The
two NAL=E2=80=99s wewre issued on May 5th and the companies were given th= e customary
time to appeal.

HAM RADIO AND THE LAW: CA HAM FILES FOR COURT COSTS

Mark Abrams, WA6DPB, the ham who recently triumphed over the city of Ranc= ho
Palos Verdes California in an antenna zoning case is headed back to court= . In
an e-mail to Amateur Radio Newsline, Abrams says that his attorneys have
recently completed our briefing in the 9th Circuit Court of Appeals on th= e
issue of damages. Abrams says that he is now waiting for a court date wh= ich he
expects will be around the end of August or early September. After the
hearing, Abrams says that he expects to wait another 60 days for a writte= n
decision from the Court. If the Court decides in his favor he wins the r= ight
to have another trial on the amount of attorney's fees, court costs and
damages. If he looses Abrams says that it will be unlikely that he will = take
the matter of reimbursement for his legal fees any further. (WA6DPB)

CHANGING OF THE GUARD: FRANK SCHWAB, W8OK, - S.K.

Some sad news to report. The changing of the guard in ham radio continue=
s.=20
This with word that Frank Schwab, W8OK, has passed away.

As we reported last week, Schwab, who helped to craft the Dayton Hamventi=
on
over a half century ago suffered a heart attack a few hours prior to this=
years
event. At the time, the 77 year old Schwab was also fighting cancer and
several other ailments.

While best known for his work in creating the Hamvention, W8OK was also a
world-class D-X=E2=80=99er and heavily involved in public service activit=
ies.=20
Services were held Monday June 2nd at St. Christopher's Church in Vandal=
ia,
Ohio. A page long tribute to Schwab appeared recently in the Dayton Dail=
y
News. (W8ILC)

**

TIME TO RETIRE: WISCONSIN SCHOOL CLUB GOING QRT

After over 25 years in operation, Andrew Martin, KB9ZLL, reports over qrz=
.com
website that the Fond du Lac, Wisconsin High School's ham radio club is
dissolving. This, due to the retirement of it's trustee Jeffry Hoeft, K9=
NC.

The club had its beginnings in the old high school building in 1972. Bac=
k then
it consisted of a wire antenna and CW transciver. Today the group has
operations on the high frequency bands as well as two meters and 440 Mhz.=
More
important, the Fond du Lac club has been responcible for the licensing of
nearly two dozen new hams over the years it has operated. (KB9ZKK, QRZ.C=
OM)

**

NET NEWS: NEW ECHOLINK VHF CONFERENCE

Ron Pastterson, W6FM, reports the creation of a new conference on Echoli=
nk
devoted to the discussion of all aspects of VHF and UHF weak signal opera=

ting.
The name of the on-line gathering is *VHF_TALK* and it was created to ass=
ist in
coordinating skeds, discussing band openings and anything else related to
operations in the world above 50 Mhz.

For those who aren't familiar, Echolink is a voice over I P system avail=
able
to licensed amateurs. For more information on it and the new conference =
take
your web browser over to www.echolink.org. Ron adds that the conference =
will
hopefully soon be avail over the world wide Internet Repeater linking Pro=
ject
as well. Information on IRLP is in cyberspace at www.irlp.net . (VHF
Reflector)

**

ON THE WEB: AMATEUR REPEATER BUILDERS HOME PAGE GOES QRT

The Amateur Repeater Builders Home Page appears to have gone QRT and its =
owner
is blaming the attitudes of some hams for its demise. In a posting to th=
e
website, its administrator says in part that due to an unfortunate series=
of
events resulting from this groups actions the Amateur Repeater Builders =
Page
page will no longer be maintained.=20

Whats involved appears to be a dispute over universal recognition and
acceptance of the the Northern California Amateur Radio band plan and wha=
t the
board administrator terms as intentional interference to coordinated 420 =
links
with an ATV transmitter. He says that the FCC's lack of time and/or inte=
rest
in addressing the issue has caused him to become thoroughly disgusted and=
that
he is -- quote -- =E2=80=98Gone fishing!=E2=80=99

But all might not be lost. Kevin Custer, W3KKC, says that he plans to c=
ontact
the Amateur Repeater Builders Home Page owner to try to obtain the rights=
to
the website and host it himself. He says he will let everyone know what
happens over the Yahoogroups based Repeater Owners remailer. (W3KKC, VHF
Reflector)

**

RADIO PICTURES FROM SPACE: THE EARTH FROM NEAR MARS

NASA's Mars Global Surveyor spacecraft turned away from the red planet fo=
r a
while on May 8th and took a unique picture of Earth from Mars-orbit. Thi=
s
first-ever image of its kind not only shows our home planet as a tiny ali=
en
world in the vast darkness of space, but also includes Earth's moon and a=
view
of the giant planet Jupiter. Go see

**

THAT FINAL ITEM: THE OWLS ARE BACK

And finally this week, its time to get ready to T-Hunt down those ever el=
usive
Burrowing Owls. And this year there=E2=80=99s another creature to look f=
or -- bats.=20
Heres Joe Moell, K0OV, with all the details:

--

For five years, ham operators and scanner listeners in western states hav=
e
monitored VHF frequencies to help researchers in Saskatchewan and Washing=
ton
state study the migratory behavior of Western Burrowing Owls, a species o=
f
concern. Now three more monitoring projects are beginning, and this time=
we
need volunteers in south-central and southeastern states.

A biologist at the University of South Florida at Tampa (USF) is studying
Florida Burrowing Owls. That's a slightly different subspecies from the
Western Burrowing Owl. It is thought that their range is limited to Flor=
ida
and the Keys, but there is one 40-year-old report of a sighting in North
Carolina. Researchers have banded the legs of these birds in the past, b=
ut
none of the banded owls have been recovered after leaving their Florida h=
omes.

For the new study, some Florida Burrowing Owl chicks are being radio-tagg=
ed
right now. Local researchers are tracking them as they leave their nests=
,
learning to forage. In the summer, the young owls are expected to take o=
ff for
parts unknown. USF wants volunteers throughout the southeast to listen f=
or the
VHF radio tags in an attempt to determine their routes and final destinat=
ions.

That's project #1. Number two involves Mexican Long-nosed Bats. For abo=
ut a
month beginning in mid-June, Bat Conservation International wants volunte=
ers to
join a team that will track their movements in and around Big Bend Nation=
al
Park in Texas as they pollinate century cactus plants. Physically fit hi=
kers
are especially wanted, but a few vehicle-based monitors will also be help=
ful.=20
And there may be opportunities for some home monitors. Hams with VHF rad=
io

direction finding equipment are particularly needed.

Project #3 is a study of orphaned Great Horned Owls. It's being done by =
the
Heard Natural Science Museum and Wildlife Sanctuary in McKinney, Texas, a=
long
with the University of North Texas. After being raised at the sanctuary,=
up to
two dozen of these owls will be released into the wild this summer, with =
radio
tags attached to help determine their dispersal patterns and survival rat=
es.=20
Volunteers are needed to monitor for the radio tags, especially in the De=
nton
and Collin County areas. Great Horned Owls are territorial and do not mi=
grate
long distances.

My Web site on radio direction finding carries the latest details, freque=
ncies,
and contact information for all three projects. Point your browser to
www.homingin.com HomingIn is one word --- homingin.com

Thanks in advance for your help! From southern California, where Burrowi=
ng
Owls are diminishing but still can be seen in the farmlands, this is Joe =
Moell,
Kay-zero-oscar-victor, for Amateur Radio Newsline.

--

Again, that website is www.homingin.com. (K0OV, ARNewsline=E2=84=A2)

> My guess, as you have no doubt figured out, is that it's better because
> it's produced by freer artists.

Do you ever, ever see a European--or even Canadian--program on TV, the way they must swallow our stupid shows?

"From its introduction in American society, television has proven itself capable of holding its audience riveted to the screen for countless hours. As a result, people who saw television as a means through which to provide culturally uplifting programming to the American public were gravely disappointed. Instead, TV almost immediately became an unprecedentedly effective means of selling products. Most Americans weren't interested in "educational" programming, and if people don't watch advertisers don't pay for air time in which to sell their products. TV shows in the late 1940s followed the model established by the success of radio; single advertisers paid for whole shows, the most common of which were half hour genre and variety shows. But in 1950 a small lipstick company named Hazel Bishop changed forever the way companies sold their products.

When Hazel Bishop first began advertising on TV in 1950 they had only $50,000 a year in sales. In two short years of television advertising, and at a time when only 10 percent of American homes had televisions, that number rose to a stunning $4.5 million. As advertisers flocked to hawk their products on TV, TV executives scrambled to find a way to accommodate as many companies as possible, which would result in astronomical profits for both the advertisers and the networks. TV executives realized that single product sponsorship was no longer effective. Instead, they devised a system of longer breaks during a show, which could be split up into 30 second "spots" and sold to a much larger number of advertisers. Although this advertising innovation led to television's greatest period of profitability, it also led to advertising dictating television programming.

In the early 1950s television advertisers realized they had a monopoly on the American public; they were competing with each other, not with other mediums, such as books or magazines. Americans watched regardless what was on. Advertisers discovered that what most people would watch was what was the least objectionable (and often the most innocuous) show in a given time slot; hence the birth of the concept

of "Least Objectionable Programming." A TV show didn't have to be good, it only had to be less objectionable than the other shows in the same time slot. Although more "serious" dramatic television didn't entirely disappear, the majority of shows were tailored to create the mood advertisers thought would result in their consumers being the most amenable to their products. By the mid-1950s lightweight sitcoms dominated the American television market. The relative success and happiness of television characters became easily measurable by the products they consumed."

Well, just a little bit. But, of course, there can more specialized
programs. Actually NPR had something like that a few years back.

The thing is that if you don't explain music to some degree, how can
you expect the regular people to listen to classical or jazz?

I still don't listen to jazz, but I've been exposed to "explanations"
every so often on general-interest radio or TV programs. It just doesn't
do anything for me.

If they like it they'll listen, if they don't like it they won't listen. I live in the 219th largest market in the U.S., yet there is a commercial jazz station here. If enough people cared about classical, I'm sure there would be a commercial station playing that too. What we certainly don't need to be doing is spending taxpayer dollars so a very small majority of people can be "educated" about the music they listen to on the state-run radio network.

1210. NPR FATHER'S DAY SEGMENT ON WEEKEND EDITION EDITION

Newsgroup: rec.radio.broadcasting
Date: 2003-06-10 16:20:00 UTC
From: JoeBev@comedyorama.com
Message-ID: <bc50fg$c6r$1@xuxa.iecc.com>
Source record: 7837

I wanted to alert you to a personal story about me I produced for National
Public Radio. It will be airing on the radio this Sunday (FATHER'S DAY) June
15, during "Weekend Edition". It is partly about how I got into producing
radio theater. It also features rare sound of DAWS BUTLER demonstrating how he did his voices.

You can hear the 10-minute piece on your local NPR station sometime between 8 and 10 a.m. To find out which radio station runs NPR programs in your town or city, check here:

http://www.npr.org/stations/index.php

If you have trouble finding the correct radio station, e-mail me back and I will find it for you.

Packing and unpacking one of my closets in the course of a recent move, I
found some bits of my life in a box of audiocassettes made by me as a child
growing up under the aegis of a volatile father. Listening to them proved
an unsettling yet fulfilling experience.

During the radio piece, I confront my difficult relationship with my father,
a Newark, NJ police officer, and the better one I had with cartoon voice
legend DAWS BUTLER (Yogi Bear) who became my surrogate father, and I play
some of the sounds I recorded of them and myself as a child.

It was a cathartic experience that I hope helps others as well. I tried to
portray the paradox of being an adult that was once an abused child.
Although a troubled relationship between parent and child has oblivious
negative effects, it often produces character strengths that serve the child
when they reach adulthood. I'm reaching out to every adult who was once an
abused child and given them a bit of comfort.

Joe Bevilacqua
Radio Producer

Over here is one commercial classical station that went into the AM
band because of costs...

What's sad is that $500 are being channeled into shortwave radio to
sell the 'American way of life' to the world.

EVOLVE OR DIE

Once upon a time lived a race of dinosaurs whose violence and appetite alarmed everybody... One day a Little Ant, tired of feeling stepped upon, and worried about her cooperative enterprise, came up to the Americanus Raptor--the biggest dinosaur of them all--and asked: "Why you always have to protect the right of the dinosaurs, who do nothing but eat everything in their path? Why don't the little animals get a fair share of this world?" Then the dinosaur, who had a bad temper, replied: "Bigger is better, so get lost..."

The Little Ant, then, gathered the whole cooperative and said: "Comrades, our world is being threatened by the dinosaurs, so..." And at that precise moment the Earth was hit by a big ball of fire, destroying everything but the small animals...

OK, we are talking about delivering culture to the people at large. If
you don't explain it, it'll remain the realm of an elite.

Something that I found in American sitcoms is that they are so deep
that they actually make you feel like crying, which is the reverse of
'serious' programming, where you end up laughing at it.

British comedies are lighter, and their dramas are dramatic.

The real problem with American programs though is the ratings that
make 'em appeal to the lowest common denominator.

Over here is one commercial classical station that went into the AM
band because of costs...

What's sad is that $500 are being channeled into shortwave radio to
sell the 'American way of life' to the world.

Are there any fans out there that have Chick Hearn's broadcasts from the 1980s? I'm looking for the 1985, 1987, and 1988 Finals in particular. I know some people have his radio broadcasts saved over the years and might have even dubbed them into VHS.

Please email me if you have these games.

Thanks,

EVOLVE OR DIE

Once upon a time lived a race of dinosaurs whose violence and appetite alarmed everybody... One day a Little Ant, tired of feeling stepped upon, and worried about her cooperative enterprise, came up to the Americanus Raptor--the biggest dinosaur of them all--and asked: "Why you always have to protect the right of the dinosaurs, who do nothing but eat everything in their path? Why don't the little animals get a fair share of this world?" Then the dinosaur, who had a bad temper, replied: "Bigger is better, so get lost..."

The Little Ant, then, gathered the whole cooperative and said: "Comrades, our world is being threatened by the dinosaurs, so..." And at that precise moment the Earth was hit by a big ball of fire, destroying everything but the small animals...

I feel sad for people who can't go into a museum and enjoy a sense of awe at the things humanity has accomplished. Since I can't answer the question "why are we here," I feel some comfort in knowing what we've done while we've been here. even if it's nothing more than curiosity about how the wheel came to be invented.

Much of what we do has its roots in Greek, Roman and Middle Eastern cultures. Frankly, I care much less about how the latest Nike running shoe was designed than I do about how social rules came to be what they are.

Without culture, we'd be like most recent graduates of our public school sysms

Does anyone know of, or have a copy of the tanner spirit music. I'm looking to get a re-sing of the jingle and can't find anyone who has, or knows where the original music is. There is a sung version on the Ken R CD, that comes with his book. I contacted TM Century but they don't have the original. So if anyone has or knows where the Tanner Spirit original jingle master is, can they let me know or give me any contacts who may know anything about Tanner Spirit.

What bothers me is that lying to suspects and altering evidence is standard police behavior. Neither police nor courts consider it wrong, let alone illegal, to offer a suspect a plea bargain then tell him/her that they have witnesses that don't exist, that he failed a lie detector test he actually passed, or even show him doctored pictures to convince him to plead guilty, whether he is or not; never mind the real perp escapes. But if you lie it's obstruction of justice.

What you think, to name just an example, of the ever present talk
shows where they degrade human beings into violent puppets?

British television is much better both because they have a more
enlightened audience and because they don't suffer the pressure from
the "ratings". The only way to see culture take preference over money
is to have an INDEPENDENT MEDIA--just like the BBC.

I seem to recall the BBC scrambling in radio and TV when commercial radio and TV came to the UK. As a matter of fact, I was offered jobs to help both sides. Each one felt the American way of broadcasting would beat the other. The same thing with Australia and New Zealand when FM began to grow. Being an American broadcaster gave you some magic power.

I have a hard time considering a government run service as independent. Friends at the BBC often complain of government pressure to report things differently or make one change or another. One day a Prime Minister will be elected and he'll throw the BBC tradition to the wind and the UK will have one, national, Clear Channel.

It's the same over here with the VOA. I had lunch with the gentleman in charge of English Programs Public Affairs. Politicians swarm over the place wanting to change it into a propaganda machine. I have friends who work there and complain about pressure from politicians. It's supposed to be independent, too.

I agree. All it does for me is lessen my respect for the law. However,
I doubt she's being beaten with rubber hoses and, since there's a
preppie broker involved, I'm inclined to believe the evidence was
altered to cover their butts.

I believe Wall Street to be corrupt to the core and completely
understand the small, "not from the Hamptons" investor's reluctance to
lose the rest of their investments.

Yes I do. A great civilization will have a better chance of surviving if it
doesn't take money away from its people and wastes it on needless spending
programs.

Not everything, just whatever is relevant. We are talking here culture
vs. commercialism, kind of, no?

Anyways, we must start recycling. :)

In my view, "preservation of culture" and like phrases are just
politically correct verbiage for promoting government subsidy for middle
class entertainment. Again, in my view, if you want it, *you* pay for it.

OK, here's some interesting look from outside at American TV...

Foreign Insight
Wiebke Lamer
Now, it would be impossible for me to write a column on American culture without looking at the one medium that has so much influence on it. Yes, I'm talking about television. Plus, I'm a media student, so there's no way that I'm missing my chance to get my two cents in on a topic like this.

Thanks to that lovely little thing called American cultural imperialism, I grew up with most of your television shows. The Flintstones, Cosby, Dallas - I've seen most of it. And of course we get all the cool new shows too. I think I watched more American shows than I watched German ones. Needless to say, I was excited to finally get to experience American television in all its beauty. So, the first thing I did when I got into my hotel room was to switch on the TV. But as usual I wasn't prepared for what I saw. After the initial shock dissipated, my only reaction was disappointment. How can you produce all these fabulous programs and yet manage to turn watching television into a torture?

You're right, that's a no-brainer. Of course it's the commercials that make watching American TV so deterrent. But I guess after you adjust to British television and its amazing public broadcasting system where a thirty minute program is interrupted by a single three minute break only, you would probably have a difficult time to get used to the excessive commercialism that's underlying American TV, too. And the massive amount of channels doesn't help either. Surely, it's a paradise for channel surfers but it's so frustrating to have about a hundred channels and you're still not able to find something interesting. In Britain my television access is limited to five public broadcasting channels and, believe it or not, they show everything you need.

Also, it might interest you to hear that American shows are dubbed over for German TV, since that's the first thing most people ask me about our television back home. I don't think a lot of countries do it; well the French obviously do, but the Scandinavian countries don't. It's really a rather peculiar procedure. Just imagine, they have to translate and rewrite all the dialogues and then they have to find German voices for the characters. Sometimes that works out for the better, but you have no idea how annoying the German voices of the Friends characters are. It's gruesome, and it's not as funny as the

original either. And after having seen many shows in their original version, bad synchronization gets really irritating. So, I'm not wild about German TV anymore and try to limit my TV consumption to MTV and CNN when I'm at home.

For some reason, however, I assumed that MTV would be even better in its homeland. Wrong again. I have to tell you that MTV Europe is doing a more presentable job. I mean, is there any music on that channel here at all? No. Instead, you find endless re-runs of award ceremonies or reality TV shows. I can only hope MTV 2 makes good for these shortcomings.

And don't get me started on your news. There is really no point in watching it as I have discovered. But at least I get the impression that this is a widespread sentiment among Americans, too.

Let me tell you however, that when it comes to movies, American television is great. You switch on the TV and there's always a good film on somewhere. British and German television suck in that regard because they tend to turn film premiers on TV into huge media events. Hence, we're lucky if we get to see good, recent movies twice a year, and all the time in between we are bombarded with re-runs of cheap or old films.

So, while I'm here I'll just stick to HBO and avoid those annoying commercials as much as I can.

Wiebke Lamer is always happy about some feedback from you, so email her at wiebke1@umbc.edu.

Will a great civilization survive if it removes tobacco subsidies? How about subsidies for large corporate farmers? Will it survive without all the pork in the budget that goes to contributors or to useless projects intended only to get Senator Foghorn reelected?

I don't believe there's ever been a great civilization without art. In fact, what physically remains of those former great cultures is often their artwork.

It's funny how in Disney's characters the small/weak beats the big/strong, while in real life is the exact opposite. But I guess it wouldn't be such a box office hit if the lion beats the little mouse...

I wonder if kids correlate those things. Chances are, they'll feel very confused.

1250. L+R L-R Matrixing

Newsgroup: rec.radio.broadcasting
Date: 2003-06-13 13:30:38 UTC
From: rj3923@hotmail.com
Message-ID: <bccjluecc1@xuxa.iecc.com>
Source record: 7777

People....

I am well versed (lol) in the concept of L+R and L-R for FM stereo decoding.

My scenario is as follows.....

To get the L+R signal you must sum up the L and R channels...so far ok..

Now when summing these two signals it seems we would also get a sum of Common Mode signals. In my prac and theory when +L+Vcm (common mode)is summed with +R+Vcm we get +L+R+2cm...so far still ok....

We send this to the reciever along with +L-R. It decodes this, i assume, with the following equation...
+L+R+2cm - +L-R => +2R+2cm/2 => +R+cm....so far all is still excellent!!!!

Now if in the case of a MONO receiver it would ignore the L-R signal and simply output the +L+R signal.

Here is my BURNING question......if above equations taken into account then it seems that a mono reveiver would output +L+R as well as 2cm!!!

Is it true to say that a mono reciever would output TWICE the common mode signal ?????...And if not WHY NOT...That is what I need to know

Can someone please tell me I am wrong and why...please!!!

Thanks guy's....

1251. Gates "The Yard" broadcasting console info

I was given ("get this thing out of here for us would ya?") a Gates "The Yard" broadcasting console the other night. It is a vintage that has tubes, 12ax7's and 6267's mostly on every card as well as transformers everywhere. I'd like to find out as much as I can about it. I'd love to find out how to get it fired up to see how it sounds before I let it retire with some dignity. I'm mostly into audio recording, not broadcast but I love old stuff and I don't recall ever selling a single thing in all my years of working with equipment. I have no intention of butchering this piece in search of some TOOB preamp. Just want to see if I can get it working and let it hang around in my "Hall Of Dinosaurs".

I's very much appreciate any info on this unit or links to any info or schematics. Thanks in advance.

So instead of culture, you get Rush Limbaugh. No wonder America is at
odds with the rest of the world.

This is the commercial "culture" you get in America...

Rush: The 35 Undeniable Truths

(All equally truthful: number 1 is not more or less important than
35.)

There is a distinct singular American culture - rugged individualism
and self-reliance - which made America great.

The vast majority of the rich in this country did not inherit their
wealth; they earned it. They are the country's achievers, producers,
and job creators.

No nation has ever taxed itself into prosperity.

Evidence refutes liberalism.

There is no such thing as a New Democrat.

The Earth's eco-system is not fragile.

Character matters; leadership decends from character.

The most beautiful thing about a tree is what you do with it after you
cut it down.

Ronald Reagan was the greatest president of the twentieth century.

The 1980s was not a decade of greed but a decade of prosperity; it was
the longest period of peacetime growth in American history.

Abstinence prevents sexually transmitted disease and pregnancy -every time it's tried.

Condoms only work during the school year.

Poverty is not the root ("rut") cause of crime.

There's a simple way to solve the crime problem: obey the law; punish those who do not.

If you commit a crime, you are guilty.

Women should not be allowed on juries where the accused is a stud.

The way to improve our schools is not more money, but the reintroduction of moral and spiritual values, as well as the four "R's": reading, 'riting, 'rithmatic, and Rush.

I am not arrogant.

My first 35 Undeniable Truths are still undeniably true.

There is a God.

There is something wrong when critics say the problem with America is too much religion.

Morality is not defined by individual choice.

The only way liberals win national elections is by pretending they're not liberals.

Feminism was established as to allow unattractive women easier access to the mainstream of society.

Follow the money. When somebody says, "It's not the money," it's always the money.

Liberals attempt through judicial activism what they cannot win at the ballot box.

Using federal dollars as a measure, our cities have not been neglected, but poisoned with welfare dependency funds.

Progress is not striving for economic justice or fairness, but economic growth.

Liberals measure compassion by how many people are given welfare. Conservatives measure compassion by how many people no longer need it.

Compassion is no substitute for justice.

The culture war is between the winners and those who think they're losers who want to become winners. The losers think the only way they can become winners is by banding together all the losers and then empowering a leader of the losers to make things right for them.

The Los Angeles riots were not caused by the Rodney King verdict. The Los Angeles riots were caused by rioters.

You could afford your house without your government - if it weren't for your government.

Words mean things.

Too many Americans can't laugh at themselves anymore.

TIP: AMERICANS, LOOK YOURSELF IN THE MIRROR! :)

> Can someone please tell me I am wrong and why...please!!!

You are wrong because any "cm", or "common mode" signal is removed from both the left, and the right channel signals before they enter the matrix stage.

Also it appears from your analysis above that if the "cm" signals are not removed from the left and right channel signals, the "cm" signal would appear not just in the output of a monophonic receiver, but also in the left and right channel outputs of a stereo receiver, which you say is "still excellent", although it doesn't seem so excelent to me.

For sale:

Part ownership (Joint venture) of 1 KW full-time AM in
important KY city of over 25,000 population.

Full price only $100,000.

Active or inactive (I prefer active) investors with at
least $10,000 each are welcome. No person, including
myself, can own more than 49 percent. These are the
ground rules. Bullies, stay away! "AM bashers", stay
away! Negative "nabobs", stay away!

High soil conductivity allows this station to be heard
on car radios 40 to 50 miles from the tower! A
"zillion" people in the daytime coverage area.

I am a semi-retired radio engineer aka "The Radio
Crazy". I am sure you have seen my annoying posting
from the past. Hi!

At least someone's posting links rather than stealing copywritten material and cross-posting it like someone who's taken their name from a Cervantes novel.

But like so many of these things, there is a correction to be made (also, it would help if the guy stated the *call letters and city* of his Salem station). Michael Savage is a moron, but he's not syndicated by Salem--he's syndicated by Talk Radio Network.

As for listening to Pacifica instead, yeah--if you want to substitute far-left-wing-wackoness for far-right-wing-wackoness. For civil, centrist discussion, there's still nothing like NPR (and if the extremists on both sides hate NPR, then they must be doing something right).

BTW, seems that Savage is off the air right now in his home base of San Francisco--rumors are that KSFO didn't want to pay him more (they also probably didn't want any more headaches from this guy) and that when his contract runs out at the end of the month he'll be moving his flagship to KNEW, which recently flipped to general talk from CNET. And guess who owns KNEW, boys and girls? That's right--Clear Channel!

John,

I'm not sure we are talking about the same common mode signal.The common mode I refer to is for instance a DJ coming through in the centre field of the stereo image. I suspect you are talking of unwanted noise.

Regards,

Dem..

hi,

i want to check the output power of an fm transmitter, and i don't have a wattmeter. most of the wattmeters available in market here have a range of
0-50watt or 0-100 watt.
i want to design one, with a range of 0-2 watt approx, using the components available with me - digital multimeter(V,A,ohm), diodes, transistors, resistors and capacitors. someone please suggest me a design or point me to a schematic.

i am very much interested in designing a low power fm transmitter, yet all that i hit upon while searching the net are readymade schematics, which ofcourse work, yet i do not get the real idea of how it was designed. is there any good document about how to design an fm transmitter from scratch, given that "i need to transmitt an fm signal at 90Mhz with an output power of 2 watt". i would like to know how to design circuits for oscillators, pll, power booster, amplifier etc. and how to tweak them for getting the desired output.

please don't worry about the output power(2 watt as i mentioned). i know it's illegal, and i am not going to cause any damage. i just want to learn how to design. let me mention that i am very new to this subject.

thanks.
anand saha.

Do you have any schematics for an RF probe? There are schematics out there for an RF probe which you can use on a VOM. You read the RF voltage on the output and use the formula P=E - squared / R (which should (in most cases) be 50 ohms - a standard dummy load). It will give you a ball park idea. Accuracy? Well, I've found it close enough for my uses and experiments with Wattmeters also have shown a close proximity.

Start out with a higher scale, say 40-50 VDC so as not to overload the meter. Can work down a level or two depending on voltage measured. I have an RF probe in my tool box to use on my VOM just in case I need to measure the RF voltage to get an idea of output, should I not have a wattmeter or dummy load with me. Even checking with the existing antenna, will give you an idea

of output.

An RF probe utilizes a diode, a cap or so and resistance. It may be frequency limited, so you have to watch that. The schematic will usually give the range limit, usually to 500 MHz. I've made a few with RG 58 cable, perf board cut to size, and a piece of aluminum tubing cut to size and drilled as needed. About $7 in parts and 1/2 hours work. Most of the parts may be in your junk box or found at Radio Shack.

Right, this is just a "design experiment." Except that you have a
particular frequency and power in mind, and you know it's illegal.

Why didn't you make the subject line, "Help me build an illegal
transmitter"?

I hope no one else aids and abets this activity, I sure won't.

>anand saha.

Hi Anand,

Your first problem is one of available voltage. Available from the transmitter, across the load, for the diode to then rectify and present to a meter for display. At 2W into 50Ohms you can at best develop:
P = E² / R
2 = E² / 50
E² = 2 * 50
E = 10V
This is far and away more than enough voltage to make the diode sing, as long as you use this meter AS the load. Trying to design a Wattmeter like an Amateur SWR meter (which is more versatile) would

lead to a design that attempts to use as little power going to the load as possible. You don't ask for that, so the Meter, AS load is appropriate, but then you need to ask yourself how much your real load appears to be like your Meter AS load (frequently not much at all).

Very few antennas offer a load of 50Ohms, which is simply the conventional value engineered into a system (your simple transmitter barely qualifies, and yet at some point it does have an output impedance and is driving a load of some input impedance - a system).

You should then build your Meter AS load with a value you can trust to be close to the actual value. For a ground plane style antenna this varies between 35 Ohms (with a flat radial design with around four spokes at 90° to the radiator, or 0° to the horizontal) and 50 Ohms (those same four spokes drooping at roughly 45° to the horizontal); or 70 Ohms for a dipole (vertical or horizontal) as long as they have been tuned to resonance (and now we return to the flexibility of the SWR meter which would allow you to determine this, but would be starved for power with only 2W available). Simple formulas for frequency and wire required to design these variations abound and you probably could trust them to be close enough. Download the free version of EZNEC and you will find them all and certainly within the means of the limitations imposed (for being free software) to determine those lengths for your self, to the materials at hand.

As for the detection portion of this we start with a 35/50/70 Ohm resistor. Connect this across the output of the transmitter (its antenna output connection and the chassis/ground or power supply common which is frequently the negative pole of the battery or lead of the supply).

Some cheap transmitters expect you to simply connect a whip to it and ignore that this point is also hot with supply voltage. As a precaution, insert a capacitor (one of the small disk types with a value of 0.001µF to 0.1µF) between that connector and the resistor. This capacitor will be invisible to the transmitter and the load (it won't matter).

I presume your meter is a solid state model from Radio Shack, but it could as easily be one with a needle that moves with input (probably found in a receding glacier). Either way, connect the negative lead to the common/chassis/ground described above.

Parallel connect an 1000 Ohm resistor (not critical - could be 620 or 2200) and another disk capacitor (not critical - like the one already described above) across the resistor. One side of this combination should go to the common/chassis/ground described above. The other side should go to the meter's free lead (the positive one).

You now have a lot of connections to common/chassis/ground and you have the 35/50/70 Ohm resistor being fed through a cap on one side (make sure the resistor can take 2W) and the meter with its circuitry

(specifically the +lead) isolated from it. Add a diode between these two points and you are complete: Resistor Load - Diode - +lead.

Apply power, measure voltage, apply Ohm's Law.

Let's see, now, he wants to learn how to design an illegal transmitter, and
the existing readymade designs are no good to him. He wants a fairly
sophisticated design (pll). He wants us not to worry about his power level.

He's posting from a free account.

Anyone else hearing alarm bells ringing?

1271. How to modify 79Mhz dipole to 88-108Mhz?

Mono. Fairly simple. 3 mic preamp boards. 2 amp boards I suspect are
for monitor and cue circuits or maybe one is a phono pre amp. Main
output amp. 8 GIANT stepped attenuators and a large VU meter. 12ax7's
and 6267 tubes on all the boards. Transformers on all the boards too.
I'm told they went to solid state after awhile. Patric

Assuming you know the value of the transmitter load resistance.

With the diode (preferably germanium or other low-forward-voltage diode) rectify the RF voltage across the load, bypass the RF component of the DC volts down to transmitter ground with a 10,000 pF capacitor. Connect a 2M-ohm 1/4-watt resistor across the capacitor.

With the high resistance digital voltmeter measure the DC volts across the capacitor. The measured DC voltage + diode forward volts will be equal to the PEAK RF voltage across the load.

Transmitter power output in watts = Squared(Peak RF Volts)/2/Load resistance.

The above circuit will work up to a measured DC voltage not more than the rated reverse voltage of the diode.

Reg, G4FGQ

In article <bcipqdqji1@xuxa.iecc.com>, David Eduardo wrote:
> And Pacifica is in what, 4 markets?

Pacifica has to beg and so does NPR.

They are non-commercial non-profit (supposedly) broadcast entities. And I believe Pacifica is entirely listener funded (I know Pacifica's NYC o&o WBAI is).

What holds Pacifica back is the constant infighting between all these little factions, "collectives" and special-interest groups.

The most notable of these was a so-called "Christmas Coup" back in 2000 at WBAI where new managers abrubtly fired and locked out the morning show and a few other programs whose producers didn't agree with management's policies and aired this dirty laundry on the air.

The amateurish sound of a lot of their stations (mumbling and stumbling announcers, shuffling copy, dead air, crappy phones, dead equipment, etc.) also doesn't help.

WBAI-FM 99.5 in New York does make a healthy amount of money during their (annoying) pledge drives.

It's got to be a healthy amount -- they have to pay the rent for transmitter and antenna space at Empire, electricity for the transmitter and studio/office facility and also the rent at their homebase in a WALL STREET office tower in the Financial District in downtown Manhattan.

And let me tell YOU, rent is _NOT_ cheap here!!

Tired of listening to terrestrial FM radios;
Tired of hearing the same songs over and over again on all FM radios;
....

If you are, just like me, then please try listening to STAR RADIO, a fresh new and different radio:
we search the whole planet (US, UK, Belgium, France, Spain, Italy, Germany...) for all the latest hits and play them all online 24h/24.

You can visit our website:
http://www.star-radio.net/

You can also see our playlist online where you will find songs you know, but also many many songs that are great but that you never heard of:
http://www.star-radio.net/playlist.htm

Please give your feedback in our Forums; let's make online radio the best place for Music!

Enjoy,
DJ Brian.

Element length is inversely proportional to frequency.

79/98=0.806. So each element should be 0.806 times as long for 98MHz as
it is for 79MHz - or about 19.5% shorter.

Not sure about alarm bells at 2W., although I concede there's still a
possibility for mischieve-making at that low power. What's actually on
90Mhz? Might give us a clue...

John,

From where are you getting CM info? If an announcer speaks in the center, for example, the information is captured in L and R channels, and when reconstituted forms the center information.

If a mike is wired "mono" (as many radio stations do) it simply would be feeding the same CM information to both left and right channels.

Dave

Paul, 88-108 MHz is the U.S. FM broadcast band.

HOWEVER, he also said he wanted a PLL design. You don't use a PLL design
for a single-channel transmitter. You use a PLL design for a synthesized
transmitter, that can go ANYWHERE in the band.

I can think of a few interesting things I could do with a 2W synthesized
transmitter. Running a pirate radio station is only one of them.

This is reply to all responses. The Station I listen to that is part of the Salem network is KRLA AM in So.Cal. The call letters was ripped off by Salem from the 60's/70's top 40 station that was notorious. Pafica radio may be on the left, but the AM ban is dominated by the conservative talk formatt, so another point of veiw is refreashing. NPR has one problem, it is dull and boring. Satellite radio is going to take over. AM radio will be eventually taken over by High Schools, radio buffs and other amateur sources. The FCC is giving out licenses to anybody who has a 500 watts transmitter. AM radio is dead.

1292. Why I think American radio stinks

Company's have destroyed radio. Company's like Clear Channel, Citadel and so on. Ever since our not so great US government allowed companies like these to buy up all the radio station radio has gone corporate. Also Technology has done it to with software like the Scott system. Bring back automation. I was laid off from Citadel for what I was told they wanted to maximize there profits. At the location I was at they had 4 stations. They only wanted ONE person in the building per shift to watch all 4 stations unless there were remotes going on or something. They also have the full time jocks voice tracking on the weekends which gives part timers less of a chance to do an OnAir shift.

Oh yeah, I forgot, IF he is using a dummy load or an antenna short of required length such as for a low power "Carrier Current" type Radio station of an FM variety, he would be completely legal. He didn't really specify his end result other than learning. For all we know, he could end up on a frequency where no license is needed anyhow.. And if so, what is the big deal? Two watts max FM, isn't going to do a hell of a lot. L.

Dave,

I am not sure if you are reffering that question to me Dem(the
original post) or John who responded.
If it is towards me, then what you describe IS the signal i am talking
about.
Also bear in mind that music itself(not just an announcer) has common
content.

Yes they are Daven pots. And yes it is a Simpson VU though I cannot tell what the model # is. The mic preamp cards are sporting Foster Transformers also.

I'd like to know what the power supply consists of. Is there a different unit that attaches? There must be. I can't see any rectification going on. There is a card with a transformer and a couple multicap canisters on it. 1 canister from Sangamo with 2 20MFD caps and another canister from the same company with 3 caps, 2 x 15 MFD and 1 10MFD and that hooks to a small protected barrier strip on the rear panel. It all looks like the place where the missing part of the power supply hooks in. I can't believe that they would attach 110 volts to a barrier strip. I'm guessing there is an external PS that has already split up the voltages and that is what hits the barrier strip. I'm missing that part at the moment. I'll have to go back and look for it. It would be nice to know what I am looking for.

I love a mystery. So far I haven't been able to find any schematics. Patric

You can say that again! The flood gates have been opened long before this
guy happened by. At least he admits to his actions and seems to understand
any consequences. If he is using it to learn as he says, and isn't planning
to cause RF interference, more power to him. At least he is honest about it.

I am speaking in engineering terms, where "Common Mode" refers to a signal, generally noise, either voltage or current, that is the same on both conductors coming from a microphone, or other source. The "Common Mode" signal is canceled by the input circuitry of the microphone preamp, which amplifies only the differential signal between the two conductors, which is generated by the sound waves impinging on the diaphragm of the microphone. As far as I know this is the traditional definition of a "Common Mode" signal.

> If a mike is wired "mono" (as many radio stations do) it simply would be
> feeding the same CM information to both left and right channels.

It sounds like you are using the term "Common Mode" to refer to a signal that is the same in both channels of a stereophonic system. This is a use of the term "Common Mode" that I was unfamiliar with.

This end of the FM band is traditionally set aside for Schools. The
FCC explicitly describes some transmission modes as being dormitory
oriented (although not at 2W). I am a longtime listener of KEXP/KCMU
90.3MHz. The KEXP is a vanity call linking it to Paul Allen's EMP
music pavilion (more than a shrine to Jimmy Hendrix). KEXP is one of
the leading internet broadcasters with community volunteer DJ's and
nearly 30% of their operating revenues covered through internet
pledges. In fact, the Seattle area consistently shows in the top 10
of popular internet broadcasters (3. KING classical, 6. KPLU jazz).

There have always been large corporations doing radio (e.g. RCA, which
owned NBC).

The difference today is rather that consolidation has brought in its
wake a reduction in the amount of competition in many markets; for
instance, in Boston there used to be two CHR stations that were bitter
rivals, but now they're both owned by Clear Channel. A longtime rivalry
between rockers WBCN and WZLX ended when both were aquired by Infinity.
And in New York, rival news stations WCBS and WINS are now co-owned.
There has been a perceptible decrease in the level of excitement in
radio with the end of rivalries like these. Radio has become less
interesting, I think, and cheapened in the eyes of advertiser and
listener alike.

>Also Technology has done it to with software like the Scott system.

Technology is a two-edged sword. Block Island, Rhode Island, a community
of perhaps 800 year-round residents, has a full-time classical FM that
would never be possible without the Scott System. And it makes money.

But I observe it is all too easy to get lazy and let machines run your
radio station. Moreover, many folks in radio today aren't broadcasters,
I think; their goal isn't to make money by running a broadcasting
business but by speculating in radio properties or stock. So you
have "regional vice presidents" and the like who are supposed to
program dozens of stations at a time, which is ridiculous -- even
a satellite-fed station needs a certain amount of human attention
or it will sound slipshod, and its listeners (and advertisers!) will
begin to perceive that nobody is minding the store.

AM radio is dead.
>>

KGO radio appears to be taking the largest audience and the largest advertising revenue up here.

Salem's KFAX burns the same amount of ac power to produce its 50,000 watts as KGO does, but there are 1,000 watt stations which have larger audiences than does KFAX.

1308. For sale: Partial interest in Paducah, KY AM station.

Newsgroup: rec.radio.broadcasting
Date: 2003-06-17 20:03:20 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bcns68$p8$1@xuxa.iecc.com>
Source record: 7685

For sale:

Partial interest in Paducah, KY full-time AM radio
station (Joint venture, silly!)

The "Radio Crazy", IT'S back!

No "AM bashers" or negative "nabobs", please!

Full price a steal at $100,000. City population is
about 26,000. Almost 5/8 wave tower yields 50 mile
daytime coverage on car radios!

No real estate is included. You heard it first here,
kiddies!

Active or inactive investors with at least $15,000
each are welcome. All investors would be on the board
with full voting rights if desired.

I am NOT a broker, agent, shill, owner or part owner
of this station!

Did they ever own over 1100 stations?

1310. Re: homebrew wattmeter for measuring transmitter output power

Newsgroup: rec.radio.broadcasting
Date: 2003-06-17 20:03:22 UTC
From: "L." <Tech@DP.NET>
Message-ID: <bcns6a$q5$1@xuxa.iecc.com>
Source record: 7686
Cross-posted to:
rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.broadcasting,sci.electronics.design

In my haste, I improperly stated a thought. It should have read "or a short antenna (required length or less) such as for a low power "Carrier Current" type radio station......."

Any one familiar with CC stations should know the antenna has to be kept a certain maximum length to limit radiation of the signal. IF that requirement is met, then they are in compliance - with no license needed. If memory serves me correct, I believe it to be 10' maximum. Seems to me too, that the figure also included the feed line.

One more thing, what is the big deal if he was posting from a "free account". Big deal! Sorry, but that party said or appears to have done - nothing - to warrant a federal case or spark a major concern. As Gerry pointed out, illegal amps and radios are a dime a dozen. You can find them most anywhere - hamfest, internet, you name it. This person's research is peanuts compared to the real situation.

Man don't EVEN get me started on Salem. I worked there for 4.5 years in Dallas and began writing my own automation and call screener software. I gave the screener to KWRD to beta and they happily ran it for over 2 years. Got an email from an old radio buddy about 2 months ago telling me to go look at salemradiolabs.com website. When I get there I saw they had ripped EVERY idea that I implemented in my screener, but they GPL'd everything I had done on the automation system as well. Still have not found a lawyer to take the case, and I have a bunch of Salem employees willing to testify that the screener is exactly what I had done. I did send them a cease & desist which has gone unanswered. Looks like the little people get screwed again....

In those days there were only a few hundred stations in existence. But
much of their programming came from RCA's NBC Red and NBC Blue (later
spun off as ABC) Networks.

>Did they ever own over 1100 stations?

Perhaps not. But there were also fewer stations total back then.
What percentage were owned by large corporations back in the pre-TV
era vs. now? And if there were a way to know what the listener
percentages were back then, that might be an even more telling
statistic...

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.
=20

Hi,

My name is Val Davis. I am a voiceover guy. I was the voice of the Capital Cities ABC Television station KTRK-TV in Houston. I was also "the voice" of the ABC Classic Rock format.

I do everything from institutional to comedy and character voices. My wife is a great voice talent as well and she does some character voices.

I have a home studio and can deliver whatever you need on CD or via the internet.

Please visit my site at www.productionroom.com

Thanks

Val Davis

My experience with Salem is WRFD 880 kHz Columbus OH putting out
a spurious signal on 760 kHz over WJR Detroit; a quick call to WRFD
got a manager-woman who assured me that they check their frequency very
carefully and there's nothing wrong with it - it's probably a harmonic,
she said. And no, I can't talk to an engineer.

If I had gotten an engineer he might have been interested that
two times WOSU 820 kHz minus WRFD 880 kHz is 760 kHz. They're both
in Columbus. If they even have an engineer.

Basically "talentless", except for a few exceptions. Totally homogenized. What I worry about is the removal of ANY proving ground for new talent. With voice tracking, and other satellite shows, there is nowhere for new folks to start out. What will it be like in 10 years?? Corporate could care less, as long as the bucks flow. Radio will never be as it was!

Five O&Os in New York, LA, San Francisco, Washington and Houston and affils in around 50 markets, many of them college stations, with a few NPR stations. Even though the affil count was taken off their web site, their network relationships went straight into the toilet during the last prolonged intercine warfare and they haven't really totally fixed everything yet. One of their main problems is that the two "flagship" shows, "Democracy Now!" and the evening newscast (now known as "Free Speech Network News"), are not produced by Pacifica anymore and can be picked up from other sources, including the NPR-run Public Radio Satellite System.

(A quick explanation--in the mid-90s, when it was felt that Pacifica had to start sounding more professional by many people in charge there, there was an expanded lineup of national programming, with "Democracy Now!" as their "All Things Considered." This, among other things, began the intercine warfare, as some of the local volunteer program producers and talent (the kind who put their KPFA time slot in their will) and some hardcore lefties, not liking the refocusing to national programming like NPR, started screaming "Censorship!" and "Purges!" Although everyone involved said that they were keeping the politics the same and were just trying to emulate NPR's professionalism, the screams of righteous indignation continued and almost put Pacifica out of business. And I guess now that the hardcores are back in charge, they'd rather be politically right than want to run a professional, listenable radio station.

I can't figure out how radio grew to be what it is today. After all,
most station owners in the early days had no experience in radio. They
were newspapers, battery companies and all sorts of self-interested
companies who only wanted to promote their products. They even let
their advertisers create their programming.

Let's try that today and see what happens.

I see a pattern here. Before you know it, syndication will appear and
local will go away. I Bing Crosby hadn't taken a liking to the tape
recorder we wouldn't be in the mess we're in.

Notice that the top 3 stations in San francisco's rolling averages are
AM.

If being #1 makes you dead the afterlife has got to be driven by AM
radio. Notice that WBZ, Boston, is also #1.

The #1 station in San Diego is KOGO, another AM.

Did I mention that 3 of the top 4 Chicago stations are AM?

How about the top 2 stations in detroit? WJR and WWJ?

Oh, have I forgotten KYW in Philadelphia?

Atlanta. WSB. Cincinatti. WLW. Denver. KOA. Hartford. WTIC.
Louisville. WHAS. Pittsburgh. KDKA. Sacramento. KFBK. Seattle. KIRO.
St Louis. KMOX.

I'm getting tired of making the list, but I think you probably get the
point.

AM is dead. Long live AM.

Does anyone know about/remember a weekly radio show based on the comic book "The Fantastic Four" ? During the mid-70's it came on late weekend nights on a Indianapolis radio station, I use to stay up late to hear it. I've always wondered if there are recordings of this available. Anyone know ?

Thanks! Alex

I don't have any recordings -- but I do remember hearing this on the
radio, somewhere around 1975. It ran for five minutes each weeknight,
with a full week's worth of episodes telling a complete story.

In Seattle/Tacoma, it was on AOR-formatted KZOK 102.5.

According to Hugo Gernsback (1922), the Detroit Police Department had
a station with the call letters KOP (on "286 meters", presumably
1050 kHz).

That's funny, I was thinking of that very jingle yesterday as I made a cup
of tea just after three. What makes it stick in my mind is how they fluffed
the final line: "...when everthing stops for stea" (with an 's')

Now that is SCARY! Just think, with a bit of careful editing, you could
segue into "...ve wright in the afternoon".

VERY scary indeed!

Amateur Radio Newsline™ Report 1349 – June 20, 2003

Amateur Radio Newsline report number 1349 with a release date of Friday, June 20th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A petition to end High Fidelity S-S-B transmissions is filed with the F-C-C, severe interference knocks out ham satellite operations ion Perth Australia and an update on W-R-C 2003. All this and more on Amateur Radio Newsline report number 1349 coming your way right now.

(Billboard Cart Here)

RADIO LAW: HAMS PETITION TO OUTLAW HI-FI SSB

On-air experimentation with so-called High Fidelity or Enhanced Single Sideband transmissions could be outlawed if thr FCC adopts a proposed rules change requested by two radio amateurs on opposite sides of the country. Amateur Radio Newsline’s Paul Courson, WA3VJB, reports from the nations capital:

--

A petition for rulemaking was sent to the FCC and accepted by the agency May 27th. It was not immediately issued a Rulemaking Number so it was hard to find in the public record. However, Newsline has talked with two sources who have seen the proposal, and it calls for what many would consider severe bandwidth limitations on HF phone.

The petition asks for a federally mandated bandwidth limit of 2.8 kilohertz for SSB, well below the extended bandwidth needed for what has been called enhanced audio.

One of the two hams who submitted the petition told the FCC they are motivated by interference problems caused by two groups of single sideband operators. These groups are portrayed by the petitioners as, in both cases, having cast aside traditional voluntary limits on bandwidth of roughly three kilohertz. The petition therefore asks that these voluntary limits be made mandatory to provide a clear enforcement mechanism for regulators.

The petitioners, Michael Lonneke WØYR of Virginia, and Melvin Ladisky W6FDR of California, said hams from one of the groups come on during radio contests, and are found tweaking their transmitters to splatter purposely to provide elbowroom on a very crowded band. The two men characterize the other group as those who experiment with high-fidelity audio, apparently trying to replicate the sound of FM Broadcast stations.

Newsline has recently reported on advisory letters sent out by FCC Enforcement Counsel Riley Hollingsworth, K4ZDH, who wrote to several members of the enhanced SSB group telling them the agency had received interference complaints. The letters did not validate nor dispute the complaints, but warned the stations that if such complaints continued, the unresolved friction could trigger petitions for rulemaking. One such petition is now at hand.

A Newsline reporter spoke with Lonneke, who declined to provide a copy of his petition for this report. He said he and Ladisky hold the same views on the matter of excessive bandwidth causing interference, and that they teamed up on the petition to add strength to their call for regulatory intervention. Lonneke declined further comment, and said the petition will speak for itself if the FCC chooses to assign it a rulemaking number and put it to public comment.

Members of the enhanced SSB group have told Newsline they believe their experimentation with improved audio is totally in line with the spirit of ham radio, and thet when conducted under appropriate conditions, is every bit as justified in bandwidth consumption as any other spectrum-intensive activity, including contesting. But the FCC's Hollingsworth, reacting to such comments, disagreed, suggesting the mode of SSB was commissioned for the amateur service as a spectrum conservation mode, counter to the idea of high-fidelity audio and the bandwidth it requires.

Hollingsworth could not be reached to comment on the proposed Petition, and another FCC official declined to comment.

The petition also mentions the legacy mode of AM, and said it, quote, does not create the same problems that the burgeoning use of so-called 'Hi-Fi Single Sideband' creates. Nonetheless, the petition asks the FCC to impose a 5.6 kilohertz bandwith limitation on AM, with the restrictions asked for on all HF allocations below 28.8 megahertz.

Previous regulatory proposals based on bandwidth have failed, including Docket 20777 from the mid 1970s. The conclusion then was that having loosely-defined technical standards allowed the greatest range of experimentation in ham radio, as long as such signals are clean. Indeed, many present-day violations of splatter, overdriven amplifiers, and poorly administered audio lashups can already trigger enforcement action under existing FCC rules governing the purity of signal.

Reporting for Newsline, Paul Courson, WA3VJB, in Washington

--

As we go to air, the ten page petition by W0YR and W6FDR has not been been assigned a Rule Making number designation. More on this story in future amateur Radio Newsline reports. (ARNewsline™, W5YI)

**

ON THE AIR: PERTH HAMS JAMMED OFF 2.4 GHZ

A cloud of radio frequency interference has settled in on the 2 point 4 Gigahertz in the city of Perth Australia. For many hams it is making satellite operations impossible. Felix Scerri, VK4FUQ, reports from the city

of Ingham – down under:

--
You may not hear many VK6 hams on AO40 for a while. Many are suffering from interference from some form of wide band data transmission centred on 2.4GHz. The signal covers much of the Perth metro area and is very strong. So strong in fact that it does not matter where you beam you can still hear it - mainly from reflections.

The signal, which runs continuously, sounds like a 100Hz buzzing sound and has a bandwidth of about MHz. Looking at the signal on a spectrum analyzer it has a flat top and very steep sides. The signal started about 6 weeks ago and one suggestion is that it might be an image response of S band down converters to the 2.1GHz G3 mobile phone service that have just started tests.

--

At airtime, the interference is still there and hams in Perth are wondering what to do to make the problem, go away. (Q-News)

**

WRC 2003: AN UPDATE

Radio regulators from around the world are still gathered in Geneva Switzerland trying to work out numerous spectrum issues including some dealing with Amateur Radio. Q-News Graham Kemp, VK4BB, is here with the latest:

--

The International Telecommunication Union's 2003 World Radiocommunication Conference got under way June 9th in Geneva Switzerland. Amateur Radio is only a small part of the conference which is trying to complete work on more than 40 agenda items.

Amateur Radio is but a small part of the conference, which is trying to complete work on more than 40 agenda items. Three are especially important to us: realignment of 7 MHz allocations (agenda item 1.23), revision of the regulations governing the amateur and amateur-satellite services (agenda item 1.7), and consideration of an allocation for satellite-borne synthetic aperture radars (SARs) in the 70-cm band (agenda item 1.38).

Two other agenda items that could potentially have a great impact are the drafting of an agenda for the next WRC scheduled for 2007 (agenda item 7.2) and the revision of footnotes to the Table of Frequency Allocations (agenda item 1.1). A member of the IARU core team has been assigned to follow each of these five items, with the most focus being on 7 MHz.

It is the intention of the IARU core team to send timely and accurate reports of final decisions reached on Amateur Radio issues. It is important to remember that nothing is final until the second reading of a document in the Plenary, which in the case of controversial issues
will not take place until the final week of the conference, 30 June to 4 July.

--

Look for up to date briefings on the ARRL website at www.arrl.org and weekly summaries here on Amateur Radio Newsline. (ARRL, Q-News)

IN THE MEDIA: HAM RADIO HIGHLIGHTED ON WBUR RADIO

Ham radio was the featured guest when WBUR radio in Boston Massachusettes devoted its show titled "The Connection" to the hobby on Thursday, June 12th. Hosted by Dick Gordon, the show's theme was that ham radio is alive and vital with close to two-and-a-half million hams world wide still consider ham radio their preferred way to fly.

The program was also centered around the new book titled "Hello World: A Life in Ham Radio" by Danny Gregory and Paul Sahre. A book based on the collection of QSL cards of silent key W2OJW. And while neither of the authors was there, Bob Hopkins, WB2UDC was. Hoskins is Director of the Computer Center at Cooper Union University in New York and played a key role in the books development:

--

Hopkins: "Hello World is a wonderful book, and where I work over at Cooper Union I have collegues that do many things. We have an engineering school, an art school and an arcetecture school. Because of the archecture aspect, a collegue of mine who works at the Princeton Archecture Press as well as Cooper Union contacted me and said that he had a couple of friends who were thinking of putting together a book on ham radio post cards and wanted to do the graphic design and would I be interested in having a conversation with them. I said -- oh sure -- fine -- bring them in. These guys came in with these fabulous cards dating back to 1927 up to the present."

--

Also appearing on the program were were Moody Law, WQ6I in Claremont California, Joe Leto, W0ANT from Ankeny Iowa, and Harry Han, BG4AGY, in Shanghai. Each spoke on the way ham radio has affected their personal lives and those around them.

Even though its well over a week since the perogram aired, it is archived as a Real Audio stream at the WBUR website. To hear it take your web browser to http://www.theconnection.org/shows/2003/06/20030612_b_main.asp

Our thanks to Daron Manoogian who is the Manager of National Program Marketing at WBUR for permission to use the audio you heard in this report. (K1TW)

**

RADIO LAW: NY HAM CITED UNDER STATE SCANNER LAW

A New York ham has been cited for having radio gear in his car even though the state law governing scanner radios exempts licensed Amateur Radio operators. On May 31st Richard C. Lalone II, KC5GAX, of Calcium, says that he was stopped while driving well under the posted speed limit by a New York State Trooper and given a ticket for having Icom IC 1500 and IC 706 radios in his vehicle.

Lalone says via the qrz.com website that he did try to explain that that he was an Amateur Radio Operator and even provided his Amateur license for the officer’s review. Apparently, this was not good enough and the ticket was issued.

Lalone appeared in court on June 10th to answer the summons. At that time he approached the judge with both his license and a copy of New York Traffic Law 397 a copy of PR Docket 91-36. But the Court Recorder immediately took the documentation from the judge and returned it to KC5GAX. The judge then conferred with the Court Recorder after which he told Lalone that he was entering a plea of innocent for him. He then instructed Lalone to seek an attorney and be present in court July 9th. They court then offered KC5GAX paperwork to obtain a public defender, and returned the citation with the new court date.

Its not clear as to what will transpire on July 9th. Lalone’s posting did not state if this was a trial date or other type of preliminary hearing. If he is convicted of violating New York’s scanner control law Lalone faces a fine of $1000, 6 months in jail, or both. (W6EM, qrz.com)

ENFORCEMENT: FCC WRITES PART 15 DEVICE USERS ABOUT ALLEGED INTERFERENCE TO AMATEUR RADIO

Turning to enforcement issues, the FCC has written two Northern Virginia residents to follow up on complaints from a local amateur. A ham who alleges that he's on the receiving end of harmful interference from telephone devices with the capability to support multiple cordless remotes. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, has more:

--

According to the ARRL Letter both units interfereing with Bernie Keiser, W4SW, of Vienna, Virginia, are unlicensed Part 15 consumer electronics made by a well-known manufacturer. In separate June 2nd letters to the two users, the FCC’s Sharon Bowers pointed out that if their units are the cause of harmful interference to a licensed spectrum user, they are responsible for solving the problem. Also, that the operator of the device is responsible for correcting the interference or ceasing operation whenever such interference occurs.

Bowers is the deputy chief of the Consumer Inquiries and Complaint Division of the FCC's Consumer and Governmental Affairs Bureau. She explained in her letters that the equipment was classified as an intentional radiator and noted that harmful interference to a licensed radio service from such a device is a violation of FCC rules. She advised the consumers that the alleged harmful interference must be corrected before they may use the devices legally. She suggested they contact the manufacturer or retailer of the equipment to see if they'd either allow them to return them or exchange them for devices that don't cause interference.

The interference to W4SW’s ham radio operation took the form of broadband noise from 2400 to 2450 Mhz. This made it it difficult for him to hear the AO-40 downlink and beacon in the 2.4 Ghz band.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

The complaints against the two Vienna Virginia consumers represent a bit of a turnabout from the typical interference scenario. Usually its the ham who generates complaints of RFI to consumer electronic gear and hears from the FCC. (ARRL)

**

ENFORCEMENT: HAM ACCUSED OF FALSE DISTRESS CALLS ORDERED OFF THE AIR

A California ham has lost his right to operate an Amateur Radio station. This, based on allegations by the FCC that he may have been the source of a number of phony distress calls made by radio.

On June 3rd the agency’s Riley Hollingsworth notified Michael V. Swift, the now former KG6QOB to inform him that his license had been cancelled. This, based on evidence that the San Ramon ham had made numerous false distress calls on Marine Channels 16 and 22A.

In his letter Hollingsworth said that in view of the agency’s action that Swift no longer has authority to operate Amateur Radio transmitting equipment. He also warned that any continued on-air operation by Swift could lead to a fine or criminal prosecution. (FCC, RAIN)

**

SPECTRUM REALLOCATION: FCC PROPOSES UNLICENSED DEVICES IN THE 5 GHZ BAND

Still with regulatory matters, the FCC has proposed making 5.47 to 5.725 Gigahertz available to National Information Infrastructure devices, including Radio Local Area Networks, on an unlicensed basis. If adopted, this plan will increase the spectrum available to license-free devices in the 5 GHz region by nearly 80%.

The complete story is on the web at the FCC’s website. A direct link to it is http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-110A1.doc (CGC)

**

WITH THE HANDI HAMS: NEW BLIND FRIENDLY WEB THEME FOR WWW.HANDIHAM.ORG

Phil Temples, K9HI, has created a blind-friendly theme for the Handi Ham System website. The reorganized site eliminates the complicated page structure that works well for sighted users but was difficult for blind users employing audio programs like JAWS or Window-Eyes to navigate. To take advantage of the new navigation system visit www.handiham.org and choose the "Courage" theme for easy blind navigation. (HandiHams)

**

NAMES IN THE NEWS: WA8SME NEW COORDINATOR OF ARRL'S "THE BIG PROJECT"

Mark Spencer, WA8SME, has joined the ARRL Headquarters staff as the new coordinator of the ARRL Amateur Radio Education and Technology program. That program is better known in ham radio circles "The Big Project." Spencer succeeds Jerry Hill, KH6HU, who has returned to Hawaii. (ARRL)

EMERGING TECHNOLOGY: THE TRUE UNIVERSAL REMOTE

A true universal remote unit that will literally help to control your entire lifestyle is now under development. Researchers on the project say that the all-in-one controller that would choreograph not just home entertainment systems but also intelligent appliances all around the house.

Maya Designs Inc. in cooperation with Pennsylvania’s Carnegie Mellon University has created a prototype based on a Compaq iPAQ portable digital assistant. The experimental handheld has so far been used to control two lamps, a fan and a stereo with a five-CD changer. Researchers say that more is on the way once standardization of remote control codes for various appliances

is achieved.

The Consumer Electronics Association is working on this aspect of the problem. It estimates the average household has at least four remote control units. It also understand why the consumer electronics industry considers a universal remote an important device for the marketplace. (Science Today)

RADIO AND SPACE: MOUNTAIN PEAK NAMED IN HONOR OF ILL FATED COLUMBIA CREW

A Colorado mountain peak has been named Columbia Point. This, in honor of the seven astronauts who died when the space shuttle Columbia broke up over Texas on Februay 1st.

The peak on Kit Carson Mountain in the Sangre de Cristo Range near Colorado Springs is close to the 14,081-foot Challenger Point. That peak was named in honor of the seven crew members who died in the Challenger space shuttle explosion in 1986. The newly cvhristened Columbia Point also is roughly 14,000 feet. (ANS)

INTERNATIONAL - EUROPE: PMR446 MEANS FUN

>From a listener in Europe comes word of a new communications network called PMR446. This is a licence free 500 milliwatt personal mobile radio service that is quite similar to the United States Family Radio Service with one big difference. The pan-Eueropean service permits is users to connect their radio gear to the Internet using personal computers and software interfaces. The software of choice is eQSO and with it Eueropean experimenters have created a network of linked rf-gateways.

On the R-F side, the radio gear is limited to flea power and built-in antennas, but thanks to gateway linking PMR 446 is quickly developing into quite a hobby thats bringinging together hams and non hams alike. In fact, it even has its own home in cyberspace at www.446user.co.uk. Drop by and have a look at what’s happening on the other side of the Atlantic. (PMR446 Users Group)

**

INTERNATIONAL - HOLLAND: RADIO NETHERLANDS TARGETED BY PUBLIC BROADCASTER

Radio Netherlands management have reacted angrily to a recent edition of the Dutch domestic current affairs TV programme Nova. A story reported on Nova said that drastic budget cuts of up to 85% was in the offering for Radio Netherlands, and as a result everything except broadcasts to the Netherlands Antilles and Surinam would be scrapped.

According to Radio Netherlands, the erroneous item was based on a leaked copy of a report into the efficiency of public broadcasting that was jointly commissioned by the Dutch Ministry of Culture and the broadcasters themselves. Nova seized on one section of the report and interviewed a representative of the Dutch Association of Journalists, who said this would effectively mean the

end of Radio Netherlands.

But Radio Netherlands says that the report was not a call to action. Rather, its purpose of the report was to identify multiple scenarios where cost savings could be made. The example quoted by Nova was just one. The Hilversum based station also noted that decisions on the mission of Radio Netherlands are made by politicians in The Hague, not by other public broadcasters or the authors of a commissioned report. (Media Network)

ON THE AIR: MUSEUM SHIPS 2003

On the air, K3CLG says that the 2003 Museum Ships Weekend special event stations will be held on the weekend July 19th and 20th. Operations will encompass all modes including phone, C-W, PSK-31, APRS and even contacts via the Internet Radio Linking Project or IRLP. You can check on all the details at this easy to copy URL. Its all at www.qsl.net/ww2dd/event.html (K3CLG)

**

DX

In D-X, word that SM3CVM, plans to be on as portable CU2 from Sao Miguel in the Azores through July 6th. Activity will be mainly CW on 80 through 10 meters. This will be a holiday operation, so he will mostly be active late evenings local time. QSL to his home callsign via the bureau or direct to his callbook address. (GB2RS)

Also V31MX and V-31-M-F will be active from Caye Caulker from July 23rd until noon of July 29th. They will operate on 80 through 10 meters SSB with some CW activity. QSL both callsign via KZBCN, either direct or via the bureau. (OPDX)

**

THAT FINAL ITEM: N6ZE’S CROSS-COUNTRY ROVING ODYSSEY

And finally this week, the story of Peter Heins, N6ZE, who may now hold the record for a QRP Rover in the June ARRL VHF QSO Party. In less than two days, Pete managed to rove coast-to-coast, from Grid Square FN-20 to CN-87. Thats a distance of 2754 miles and he operated 6 and 2 meter SSB from each location. Here’s how he did it.

>From 1400 to 14:45 E-D-T on Saturday June 14th, Pete was on the air from park bench overlooking Hudson River at Weehawken New Jersey. From there he even managed to work a station in grid EL-86 thru the tremendous E skip that was present at the time.

A bit more operating from a hotel room in midtown Manhattan followed until 15:30 Eastern Daylight Time. Then a quick drive out to the airport where Pete, who is a commercial airline pilot, traded his ham radio microphone and key for the co-pilots seat of a Boeing jetliner. He then spent the next several hours flying to Salt Lake City Utah.

During the layover, Pete rented a car, unpacked his FT-690 and IC-202 and took to the airwaves. From 8:45 to 15:30 Mountain Daylight Time hN-6-Zed-E roved through Grids DN30, 31, 40 and 41 operating both 6 and 2 meters.

He then repacked the gear, got back in the plane and flew it another 689 miles on to Seattle. Thanks to another hours time change, Pete was back on the air around 19:52 Pacific Daylight Time in Grid CN-87 from the airport ramp making two QSO’s. His last contact took place at 19:59 Pacific Daylight Tine. That was just 1 minute before end of contest.

His totals for the contest period: On 6 meters he had 16 QSO’s, 16 QSO points and 8 multipliers. 2 meters yielded 24 QSO’s, 24 QSO points and 9 multipliers for a grand total of 960 points.

In his posting to the VHF Reflector, Pete put out a special thank you to the hams in the Salt Lake City area who provided lots of information for operating sites in 4 grids that helped to make his cross country VHF roving odyssey, complete. (ARNewsline™, N6ZE)

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

1343. Matt Drudge and Ex-Gay transformation thru Roy Master's Ministry

Newsgroup: rec.radio.broadcasting
Date: 2003-06-23 12:26:55 UTC
From: jake415392@yahoo.com
Message-ID: <bd6rmf$4jh$1@xuxa.iecc.com>
Source record: 7719

What people have suspected for years, Matt Drudge confirmed recently in that he is seeking to heal his sexual brokeness by becoming ex-gay through Roy Master's Christian meditation excercise.

>From Radar Magazine:

PAGLIA: You have no religious affiliation?

DRUDGE: You could probably call me a ﷽new-age Jew. I'm really into meditation. I have been meditating since I was five years old. I love reading Jesus. I am open to a lot of different things. Again, it's a formula for my personal self that I've come up with. I don't go to shul, I don't go to church every Sunday. But the older I get, the closer I feel to a creator.

PAGLIA: What do you mean by meditating?

DRUDGE: I do exercises every day to clear my mind. Third-eye stuff.

PAGLIA: Transcendental meditation? Where did you learn it?

DRUDGE: I'm self-taught.

To anyone who had been involved with Roy Masters and the Foundation of Human Understanding, what Matt is describing in his cryptic fashion is clearly the excercise developed by Roy. Roy used to be a frequent guest on Matt's FOXNews TV show and has clearly influenced him to overcome his same-sex desires. If Drudge could only have the courage to be more open and honest about this, it might help publicize and garner respect for the other ex-gay ministries out there. We wish him success in his transformation and joint venture with Mr. Masters, Michael Savage, and TRN.

Most great art in history has been government or church funded. High
art is almost by definition not commercial, just as is speculative
science, which also requires government funding. The market sometimes
has synergistic effects with government funded art, but virtually all
of what it creates on its own is crap. Unfortunately, we live in
times where elitism, not to mention anything that differs from laissez
faire capitalism, is politically incorrect. Anyone who is familiar
with modern America can see the ravages of market driven "culture".

I think it's easy for any self-hating person to find "salvation" in just about anything, from religion to dog shows. Anything that takes them away from their self-loathing for a few months is something they see as beneficial.

Does this diversion solve anything? Nope. After the fix wears off, they need another fix. It's not enough to go to one dog show, they need another and another. Pretty soon they're in the dog grooming business. And it goes on from there, always trying to mask the loneliness and self-hate with yet another diversion.

But ultimately, a person has to live with him/herself. And unless a person truly accepts themself for who s/he is, they will never be happy.

1350. For sale: Partial ownership in full-time AM in GA.

For sale:

(The "Radio Crazy"....it's back!)

Partial ownership in full-time 1 KW AM in Quitman,
Georgia. Near Valdosta. Close to Florida border.
Callsign is WSFB. Please DO NOT CONTACT the station!!

1490 KHz. On the air since the laste 50s of the last
century (and the last millenium, you fruitloop!)

Joint venture (For this venture, you end up in the
joint!) Hi!! Just teasing.

Active or inactive investors with at least $10,000
each are welcome. No individual may own more than 49
percent and that includes me.

"AM bashers" and/or other "negative nabobs" are not
welcome. If you think "AM is dead" go flame somebody
else and you are welcome to pay a million bux for a
class "A" FM in Wyoming. (Yes, there is one going for
$950,000 in a town of less than 2,000. Shades of
Ebay!!!!!

Tel: (478)741-1710.

The "Radio Crazy" ain't THAT crazy. Former Chief
Engineer, AM in NYC. Past President and founder of an
FM in San Francisco on the air since 1973. Ham since
1950.

73,

Meyer Gottesman, W6GIV
Macon, GA

I trust that High Art refers to the state that most artists are in when they compose or fashion it.

http://simsim.rug.ac.be/staff/rob/Include2001/intro4.html
"Ways of seeing are also culturally determined processes.

Ways of seeing modern art, for example- are guided by mental and cultural models, models that are framed in stories. One particular story on ways of seeing modern art is that 'Le Bateau', a painting by Henri Matisse, was exposed upside-down for forty-seven days by the New York Museum of Modern Art in 1961:"

Fine example of art follows.
http://209.11.144.65/eldritchpress/el/mp/m47.jpg

http://www.techno-impressionist.com/evolve.htm
Abstract art reached a zenith towards the middle of the 20th Century when artists were first able to produce paintings that could be accidentally hung upside down.

http://www.techno-impressionist.com/quotes05.htm
"Paintings that can be accidentally hung upside down are a unique accomplishment of 20th Century artists."
> Jasper Junk

I'm looking forward to public funding of gun ranges, car races, etc. No reason that public money should go to something that benefits so few. Why not branch out, start using that money for something the common Joe or Jane goes for? Besides, artists generally have such a myopic political structure, they are pro-abortion, anti-gun, democrat, communist, anti-Christian, etc.

Regards

The ex-gay thing is a bit of a stretch from reading the article, and
Roy Masters isn't mentioned. I did find this:

http://makeashorterlink.com/?S4E022705

I never knew there was an alt.religion.roy-masters newsgroup, then
again, is Roy Masters about religion or mind control...

Am I the only one around here who finds Roy Masters and his right wing cult dangerous and scary. This guy has been working for years to get his new age right wing agenda before the American public and now he has found a way through Savage, Drudge, Dornan and others to do it sereptitiously. How come more people aren't wise to this and worried about it?

No Chris,

I wish that was me flying off the Empire State Building, but it is not.

Thanks

Val

>about it?

I think we're not worried because cults like this have never worked. I think this is the cult that had two "cured" men as spokespeople who ended up as lovers. It's not a new revelation that Savage and Dornan are homophobes and make their livings finding groups they can attack and make other homophobes feel validated in their hate. They often do the same with Immigrants, the poor and any other group that society in general looks down on. Hopefully, criminal corporate executives will join those ranks.

As you well know, a specific radio show reaches a tiny portion of the population. Even Limbaugh is unknown or unheard by the vast majority of the population. The last figures I saw had 96% of the population not listening. He still has a huge audience because he's entertaining and isn't driven by a mission. I don't put any ot these characters in Rush's league.

Dornan has a tiny audience and isn't really a factor. He's a pseudo macho caricature that has never been taken seriously. He could be a character in "Dr. Strangelove." Savage does a bit better but has recently lost two huge markets that will cause his ratings to drop dramatically - San Francisco and New York. Even his San Francisco replacement (probably a rimshot) will never come close to KSFO. There's no place for him to go in New York. Someone who feasts on free speech then sues those who challenge him makes himself look awfully foolish.

I think even the rightest of the right wing see these characters as buffoons and don't take them seriously. The shows are entertainment. Once they link up with "missions" not driven by the audience, they waste away.

I also think it's good for the population, in general, to know these cults exist. It makes it easier to read the hidden agendas.

Rich

No, you're thinking of mass market rock "musicians".

Name five classical musicians, most of whom are and have been funded
by the "evul gumbint" or by the church, who died of drug overdoses.

At the following URL you will find a table of "rock deaths" compiled
by
a rock "music" fan:

http://rockdeaths.mybravenet.com/rdl/rlistN.html

It lists the causes of death of what appears to be a comprehensive
list of
dead rock stars, by name, date, cause, etc. Last I checked, of the
556
deaths listed on this page:

60 are due to Drugs (10.8%)
50 are suicides (9%)
31 are homicides (5.6%)
12 are due to alcohol (2.2%)

All in all, over 1/4 of the rock stars listed died violently or via
some
form of substance abuse (not including lung cancer, btw). Over 1 in 5
die
by their own hand (suicide or substance abuse).

I invite you to compile a similar list of deaths of classical
musicians.
The table covers 39 years of rock history. If you wish, you may draw
your
data from the last 400 years of classical history, over ten times the
scope
of the above table.

Have fun.

That's what mass market "culture" produces.

> I'm looking forward to public funding of gun ranges, car races, etc.

Of course you are, since you're apparently a brain-dead, talk-radio brainwashed chimp.

John

Roy seeks out weak minded people because they are easy to turn into
Roy-bots. Scary? You bet. The fact that he owns more "legit" outlets
like Weiner et all is every scarier.

If that's what it is why has every culture that has been at war frantically tried to save its artwork? Why were people so concerned that the museum in Bhagdad had been looted before they found the real stuff in storage?

Why has classical music been viable for centuries? The same with fine art? It shows the heights mankind can achieve and is every bit as important as the scientific accomplishments we've made.

It's clear from your posts you're not an art lover and culture belongs in a yogurt container. Since more people attend cultural events than sports I have to assume great artistic accomplishments still have their place in the 21st century.

For that I'll be eternally grateful.

Rich

No, but what are we going to do about it? He's got money and followers. He owns a talkradio network. He and his followers own the town of Cave Junction and have been moving in on Medford for some time. But, what do you do about it?

I was once driving in LA about 15 years ago and heard a woman call in to his show, then originating from KIEV in Glendale. The woman was distraught about her failed relationship, her daughter on drugs, and whatnot. She was talking about killing herself. Roy Masters actually told her that she *should* kill herself because she was a failure as a wife, since she failed at her duty to satisfy her husband and take care of her family.

I phoned the local police (I forget if it was Glendale or LA), and told them the story. They acted as if they heard this kind of stuff all the time from the Masters program and didn't take any of it seriously.

But once again, the question, what can anyone do? Since they're not attempting to violate the tax laws or attack the government, the government isn't going to do anything against them. It doesn't matter to the authorities if people give all their money to him. It doesn't matter to them if people's lives are ruined.

When large sums are disbursed for opera or similar minority interests,
there is always a fallback to incontestable sentiments regarding the
value of high culture and performance, the importance of maintaining
standards of a kind which are necessarily elitist, and the
quasi-religious qualities of great music, painting, and poetry.
However, even the best of opera remains an elite enjoyment.

In spending on the arts there is a kind of organised governmental
philanthropy, in the form of handouts to aspiring artists, performers
and organizations dedicated to particular types of cultural activity.
Official philanthropy tends to be captured by movements and fashions,
the ruling orthodoxies of the political class and the bureaucracies
which are set up to administer them produce a culture of mediocrity. To
expect organised governmental philanthropy to find genius or even
outstanding quality is as unlikely as to expect the well-known room full
of monkeys with keyboards to write the works of Shakespeare.

Actually, no. It was the two FOUNDERS of "ex-gay" group Exodus Intl, who one day awoke from their own brainwashing and became partners. Incidentally, this is the same Exodus Intl that is often represented on virtually any Salem broadcast that focuses on homosexuality. They are also the same folks that like to take out full page ads in the NY Times, Washington Post, LA Times, etc to promote their "love the sinner, hate the sin" concept. If they have to advertise that aggressively, is it really worth buying? Of course, I say the same thing about organized religion...

As many of you may be aware, not much has been done with the Airwaves.com site since Bill Pfeiffers death in 1999. I was very fortunate to have been a close friend to Bill. It was troubling to me to see that his site (which was very important to him) had not been updated for a few years. Long story short, I contacted John Levine who has been hosting and managing Airwaves.com issues since Patrick Townson fell into bad health in 2000. I told John that I wanted to redesign Airwaves.com and restore functionality and resources that were there before. He and Patrick gave me their blessings and I began work on the site a little over a month ago.

The new site is up. You can browse through the Airwaves Digest Archives which currently contains digests from Dec 1997 through Nov, 1999. I hope to get more archives up as we find them. You can also search these articles for keywords like LPFM or Lujack or whatever.

The FCC Database search is also up. I have the entire FCC Database on the system but am only displaying a limited number of fields from that database. If you would like to see more info displayed or different search criteria, let me know.

There is also a working Radio Classifieds. It is database driven as well and only shows ads that have been posted in the last 30 days.

Soon there will be a radio links page and a page that contains the Bill Pfeiffer memorial. This will have the Real Audio file of Bill's funeral as well as stories about Bill.

I hope you like the site, but more importantly I hope you use the site. Is is for broadcasters, by broadcasters in memory of a real broadcaster.

Thanks

Val Davis

25 June 2003

According to reports on Dutch media sites, the radio ship MV Communicator was moved from her old mooring in the Pampushaven near Almere yesterday afternoon. The vessel is now said to be in the harbour of the Dutch fishing port of IJmuiden. Volunteers had earlier carried out repairs on the ship to plug leaks in the hull. The new owner of the ship says he plans to take her across the North Sea to Essex in the UK, where she will be re-fitted as a working offshore radio ship.

The average Zimbabwean (whatever the spelling) gets better quality programming from state-financed Voice of America than the average American gets from commercial radio. Unless, of course, you enjoy the stupid strident commercials...

I ordered stuff from them worth ?152. Payed with my VISA and the transaction was quick. Few days later I sent them a mail correcting my order but got no reply. Few days more and I sent to their second mail...no replay! now it's been 15 days and I have heard nothing from them! What should I do?? I thought Veronica FM was a reliable company! :(

Best Regards,

Henrik Olofsson

I wasn't speaking out for anyone.

I see that you are known for such quotes as:
"there is not now nor has there ever been nor will there ever
be, for that matter, a good rock song (by definition)."
--John Harrington, 2001 November 23

"Rock is crap by definition. Get used to it."
--John Harrington, 2001 November 24

I suppose that's what you refer to as 'just the sort of crap the
"market" dredges up' LOL. Lessee ... you think it is preferable for
government to take hard earned money away from rock fans so the
government can spend it on promoting the music which is preferred by a
few self-styled "elitists", too cheap to pay the full cost themselves
for their own pleasures?

The NEW Official Daws Butler Website is now online!!

Completely redesigned by graphic artist Lorie Kellogg, the site is dedicated to the career of the late voice actor and writer.

Check it out at:

http://www.dawsbutler.com

Daws Butler was the voice behind some of our most beloved cartoon characters. He was the voice of Yogi Bear, Huckleberry Hound, Snagglepuss and many more. He worked at Hanna Barbera studios from 1957 till 1988 as well as working for Warner Bros., MGM, Jay Ward and Walter Lantz. He also wrote and performed on the Stan Freberg show and the original live version of Time for Beanie (Albert Einstein and Harpo Marx's favorite show) as well as acting in radio and voicing TV commercials.

Read about his life, hear rare sound files of the man himself and more!

>their advertisers create their programming.
>

I can. When the FCC relaxed the prohibitions on station ownership back in the
'90's, that allowed the corporate network robber barons to start buying up all
of the independant stations around the country.

Nowadays you can go to any of a hundred major cities and hear the same music in
all of them. Gone are the days of the independant radio station with its
unique programming, specific to that location.

There are very few independant stations around anymore. Most of the remaining
stations are college or non-profit or religious outlets, and most of those are
affiliated with NPR.

Paul.

By the way, I was challenged on both of these quotes and defended both in subsequent posts. Nice to see somebody's obsessed enough with me to go investigate me on google groups. Rather flattering, that.

> I suppose that's what you refer to as 'just the sort of crap the
> "market" dredges up'

If you mean rock. Yup. Rock is crap. Just look at the laundry list of degenerates I posted a few days ago. Still waiting for a response, BTW.

> LOL. Lessee ... you think it is preferable for
> government to take hard earned money away from rock fans so the

What bullshit. The government doesn't "take" hard earned money, or easily earned money, from anyone.

> government can spend it on promoting the music which is preferred by a
> few self-styled "elitists", too cheap to pay the full cost themselves
> for their own pleasures?

If this clumsily loaded question boils down to: do I believe tax monies should be devoted, in part, to preserving and encouraging high culture. The answer is: you bet I do.

Perhaps you'd care to respond to the challenge I posted a few days ago:

Name five classical musicians, most of whom are and have been funded by the "evul gumbint" or by the church, who died of drug overdoses.

At the following URL you will find a table of "rock deaths" compiled by a rock "music" fan:

http://rockdeaths.mybravenet.com/rdl/rlistN.html

It lists the causes of death of what appears to be a comprehensive list of dead rock stars, by name, date, cause, etc. Last I checked,

of the 556 deaths listed on this page:

60 are due to Drugs (10.8%)
50 are suicides (9%)
31 are homicides (5.6%)
12 are due to alcohol (2.2%)

All in all, over 1/4 of the rock stars listed died violently or via some form of substance abuse (not including lung cancer, btw). Over 1 in 5 died by their own hand (suicide or substance abuse).

I invite you to compile a similar list of deaths of classical musicians. The table covers 39 years of rock history. If you wish, you may draw your data from the last 400 years of classical history, over ten times the scope of the above table.

Have fun.

You sure of that? In New York I hear people complaining about all
kinds of arts. This one didn't get funding while another did. If I
have a choice (I don't) between my tax dollars going to another
whizbang weapon even the military doesn't want or an aspiring artist,
I'll go with the artist and take my chances.

>Official philanthropy tends to be captured by movements and fashions,
>the ruling orthodoxies of the political class and the bureaucracies
>which are set up to administer them produce a culture of mediocrity. To
>expect organised governmental philanthropy to find genius or even
>outstanding quality is as unlikely as to expect the well-known room full

I guess that analogy is more appropriate to sports welfare than to
real art. Why should my tax dollars subsidize George Steinbrenner when
he threatens to take his team to another city if we don't build him
another playground? The only art I see in subsidized sports is the
stuff painted on beer bellies in the stands. I realize primitive art
has its place but the real stuff doesn't usually wash off.

Same as the 40's and the 50's and the 60's and the 70's and the 80's and the 90's. Heck, hits have been national since the started publishing sheet music. And now that I think of it, most classical selections were world-wide hits. And the ballads of the British and French troubadours were national hits... same the Mexican corridos of the Revolution.

Do you suppose hit songs are, indeed, universal? There is no such thing as a local hit. Just songs that did not get exposed more broadly.

Very few people travel to a hundred major cities. Most live in one and are unaware that the same programming is available in another place.

Why aren't we complaining about the even worse duplication of TV programming where everything a network feeds is usually carried by all the affiliates. The "local" stuff that differentiates one TV station from another is the syndicated programming each carries and the couple of hours a day of puffy local news which uses actualites provided by the network.

What makes a station "specific to its location" is not what music (recorded elsewhere) is played but what community services it provides that surrounds the music and talk created elsewhere.

From: Radiomatt (radiomatt@aol.com)
Subject: WWV Survey
Newsgroups: rec.radio.shortwave
Date: 2001-02-22 08:38:17 PST

Dear SWL:

As you know the National Institute of Standards operates radio stations
WWV,
WWVH, and WWVB for purposes of providing timely information to the Short
Wave
Community.

As part of our GAO review process, we are required to justify our
continued
funding. We ask that you complete the following questionaire and return
it to
the address at the bottom of the form:

GENERAL:
Your Age___
Your Sex___ (PLEASE, do not answer "three times a week" or "yes")
What are your most frequently listened to frequencies (mark '1" for the
most
used, "2" for the second. and so on)
2.5 MHz ___
5.00 MHz___
10.00 MHz___
15.00 MHz___
20.00 MHz___
25.00 MHz___

60 kHz___
60 Hz___
How much time each day do you listen to WWV, on average?
0-4 minutes___
5-10 minutes___
11-30 minutes___
31-60 minutes___
61-180 minutes___
over 181 minutes___
Do you monitor constantly? YES NO (Not more than 24 hrs per day)

What is your age?____
Are you listening to WWV now?___
Are you able to retune your radio? YES NO
Are you incarcerated? YES NO
(If YES, is WWV being used as part of an interrogation process? YES
NO)

Stations WWV/WWVH currently carry additional features, please check
those you
use regularly:
Propagation Forecasts___
GPS Information___
Weather Alerts___
DEFCON Status___
Sports Scores___
Stock Quotes___
Stock Market Updates___
Casey Kasem Countdown___
Voting in Congress___
Population updates___
Pork Belly Prices___
Time Signals___

What is the longest time you have listened to us in one sitting? ____
Hours
Were you inebriated at the time? YES NO
Did you enjoy our varied programming? YES NO
Would you object to commercials from oil companies? YES NO
If AOL/Time Warner were to provide enhanced programming, would this
increase
your listening time? YES NO

What sort of program enhancements would you like? (check all that apply)
Please remember that each of these items must be less than 55 seconds
long.

Poetry___
Short Encyclopedia Articles___
News___
Sports Scores___
Book Reviews___

Paid Personal Greetings ___ (Happy Birthday, etc)
Paid Personals___ (Man seeks Woman, etc)
Paid Obituaries___
Paid insults___
EBay auctions___
Disctionary entries___ (definitions, spelling)
Anti-communist propaganda___
Anti-orient propaganda___
Anti-Aussie propaganda___
Readings from Scriptures___
Love Personals___
UFO Alerts___
Autos For Sale___
Other classifieds___
Capsule Reviews of Shortwave Radios___
Capsule Reviews of Shortwave Antennas___
Computer tips___

What type of receiving equipment do you use to receive our signals?
Tube Home-type Radio___
Tube Communications-type radio___
Portable transistor radio___
Portable tube radio___
Heavy tube radio (over 50 lbs) which I carry around to show off___
Heavy tube radio nobody wants, so I use it for WWV___
Crystal set___
Clock with internal radio which is reset by WWVB___
My teeth___
Homebuilt Radio___
Solid state Communications receiver___

What is your ZIP code?_____ (If overseas, what country?_____)

Do you listen to CHU?
Which Frequency?
3330___ 7335___ 14330___
On a scale of one to 30, which do you like better? CHU___ WWV
family___
Are you Canadian? YES NO

How important is time accuracy? If WWV were to reduce accuracy, costs
would be
lowered and more ancillary services could be offered. Please indicate
level of
tolerance: figures are one part in___/second(10 to nth power)
__10 -12
__10 -8
__10 -3
__10 +2
__10 +30

Accuracy of other services. Please indicate your tolerance for
Sports Scores ___(+ or - 10 points) ___(+ or - 1 point) ___ (exact
only)
Dow Jones Average ___ (+ or - 25%) ___(+ or minus 10&) ____ (exact
only)
Weather Accuracy: 100%___ 50%___ 10%___ -10%___ -50%___ -100%___

> culture. The answer is: you bet I do.

Some brain dead person claimed earlier in this thread that we just had to
have taxpayer-supported government radio, or else how would people "learn"
about classical music? You know what? The other day I went out and
purchased a 10-CD classical collection, and now I am learning about
classical music. And I am doing it without government subsidy and no burdon
on taxpayers. I *paid* for it and if I like it I will *pay* for more - this
is a concept that the elitest socialist left doesn't seem to understand. To
them the purpose of government is income distribution.

While I agree with your basic premise that there are fewer independent voices today, to be fair, your comment about radio sounding the same in all cities is not new - that predates Clear Channel and the others. For one thing, many of the top stations used a handful of consultants, which resulted in stations sounding the same. Plus the nomadic nature of working in this business added to it.

I try to cope with the programs, but the stupid commercials...

TOO MANY FAST, FRANTIC AND FRUSTRATING TV COMMERCIALS
by: Harry Preston

It started with MTV; then Hollywood caught on; then television picked up on it. Now even the news programs are doing it. No, I'm not referring to gut-wrenching violence or graphic sex.

I'm talking about television commercials today, too many of which have excessively fast cutting of scenes, blurred images, and a desperately demanding voice pitching the product. I am getting more than irritated with this assault on our senses, though I'll admit television viewers under forty may not feel the same way.

I hit forty quite a few years back, but there is no truth to the rumor that I covered the fall of the Alamo for NBC; however I did write the news on Channel 8 in the late '50's, back before tape, before sound bites, before local news programs became almost as frenzied as most commercials are today.

Many people of my generation are finding it difficult to endure the current crop of commercials without becoming confused and often visually disoriented. Ultimately, we reach for the OFF switch. Or, as I do, stick with PBS where, thankfully, there are no irritating commercials except, perhaps, the one plugging the Store of Knowledge, which always has me reaching for the MUTE button like I do with any and all commercials on any station.

Curious about my growing irritation and frequent visual inability to follow many commercials, I spoke with Michael Van De Kamer at Post-Op in Dallas, who is one of the top film editors in the country. I asked him why commercials are becoming so fast-paced.

Michael said that fast editing is usually required in commercials aimed at younger viewers because they have a regrettably short attention span.

"Children used to grow up reading," Michael said. "Today most of them grow up watching TV, or playing video games. A traditionally edited commercial would be dull and boring to younger viewers. It wouldn't grab their attention."

In my youth there was no television, for which I am eternally thankful. Which makes me wonder: Is this excessively fast editing technique the result of young people today having a shorter attention

span, or is the short attention span the result of growing up watching MTV?

Dr. Gary Lefkof, a prominent Dallas psychiatrist, couldn't really say, but he does feel this situation stems simply from advertisers using the most effective methods to sell their product. In other words, the bottom line is the buck...whatever will grab the attention of potential customers. And if a product is aimed at the younger generation, then it's MTV time. Kids today need images to flash by with lightning speed to prevent boredom.

Are film editors to blame for this fast-cutting trend in film today? Not so, according to Michael van de Kamer. He explained that when a commercial is aimed at younger viewers, producers and ad agencies demand this fast editing otherwise the message will not get across, and the product won't sell.

But is mind-boggling editing of commercials really necessary to grab kids' attention? Recently I screened Bette Davis in "Now Voyager" for some young screen writing students of mine at Richland College. I had first watched this intensely moving film when I was in high school, and even today, it still has one reaching for the Kleenex. After the final fadeout, one young student (barely out of his teens)turned to me, wiped his tears away and shakily asked: "Why don't they make films like that anymore?"

I wonder, too. With traditional editing, a scene remains on the screen long enough for us to share the moment with the characters, to feel their emotions, to relate to their problems. If scenes flash by too fast, the impact of the scene tends to be lost rather than remain with us; and with a commercial, we are supposed to be impelled to rush out and buy the product, something I seldom do after having my sensibilities offended by an excessively fast-paced commercial filled with blurred images and narrated by a voice that is so desperate and demanding that it becomes annoying.

As a final thought, however, Dr. Lefkof had an amiably philosophical comment. He pointed out that with the hundreds of TV channels becoming available, viewers can always find something acceptable to watch.

I have a better suggestion: simply turn off the set, reach for a book and let your mind take you into a glorious world free from offensive commercials.

All,

I have a friend that is an advid adventure racer. He is getting ready to outfit a small RV for a race later this year, and told me that he is getting XM installed because "they are going to offer a data channel so you can get Internet Access."

Sounds fishy to me...

Can anyone verify or deny?

Regards,

The world is becomming smaller. Everything is done quickly, copied, and everybody watches each
other. Its not good. States watch what other states get away with in taxes and laws. Executives copy what other executives try to get away with. People can't do anything on their own
without seeing it in a movie first.

I cannot verify nor deny, but I smell the fish as well.

It doesn't seem technically possible. They do not any significant bandwidth
to dedicate to non-broadcast uses. What about 100 "digital" customers who
wanted 56 kilobits at the same time - that's 5.6 megabits per second - about
equal their whole program bandwidth, I suspect.

And XM/Sirius are one-way services. You'd still need to use the phone for
the you-to-them direction.

The rumor is probably based on XM's announcement that they will be sending
digital weather forecasts. But that would be only one low-speed channel.

I trust the military more than politicians to determine what weapons
they need. Their decisions are based more on effective warfare. The
politician is demanding pork to satisfy his district.

Does the Geneva Convention cover stupid commercials? How about boring
commercials?

In Scandinavia you look forward to watching smart, funny commercials
but in America they are sooooo boring...

"I have a better suggestion: simply turn off the set, reach for a book
and let your mind take you into a glorious world free from offensive
commercials."

Um, probably not, in fact. If that CD collection has orchestral music
on it, the probability is high you're listening to music funded in
whole or part by some "evul gubmint" somewhere in the world. In fact,
chances are good that if that 10 CD collection was bought at budget
prices, you're listening to orchestras that were founded by communist
governments (e.g., former eastern bloc nations).

Are you saying each channel is only 56kbit? I thought both XM & Sirius were
64kbit?

Yea, they don't have enough bandwidth for decent stereo, much less
datacasting.

Is that why XM sounds worse than FM?

1423. QSLs

For sale:

Partial ownership (Joint venture....if you venture,
you land in the joint! Hi!)

...of AM radio station in Paducah, KY. Full price is
only $100,000 for a fulltime Class IV AM in a city of
over 26,000 population. On the air since the late 50s.

No real estate included.

Active or inactive investors with at least $15,000
each are welcome. All investors would be on the board
with full voting rights if desired. No individual
(including me!) can own more than 49 percent! This is
not Iraq!!!!

No "AM bashers" or negative nabobs, please!

Tel: (478)741-1710 in Macon, GA or email.

Unless you are claiming the rock music is evil and the cause
of all the tradgedy, then I consider all of the above stats
irrelevant. If however, you are claiming that rock music is
itself evil, then the burden of proof is yours to
demonstrate it (e.g. how do I know that rock musicians who
overdosed weren't just stupid folks with more money then
they knew what to do with? If so, why should this discredit
rock music?).

1429. anyone have info on voiceamerica.com?

Newsgroup: rec.radio.broadcasting
Date: 2003-07-02 14:01:10 UTC
From: my2cents <my2cents4sure@hotmail.com>
Message-ID: <bduoj6$1sp$1@xuxa.iecc.com>
Source record: 7560

A friend of mine was recently approached by an internet radio company, voiceamerica, to do a financial planning show. However, he either had to pay to do the show or find sponsors. (We're talking between $2000-3000 for a series of--I think 10 or so--shows.) I did some searching on the web, but I couldn't seem to find out if anyone even listens to this company's broadcasts, whether it's actually effective as a means of self-promotion, etc. (I've never heard of it, but it seems to be 2-3 years old.)

Does anyone have the lowdown on voiceamerica? I'm not in the industry and don't know where else to look to see if its a worthwhile pursuit.

Many thanks!

Dallas

> Are you saying each channel is only 56kbit? I thought both XM & Sirius
were
> 64kbit?

I said no such thing. I postulated the load from a digital service, and
then estimated that it might be ABOUT the same as the program load.

I have no idea how many bits per baud (or hertz RF bandwidth) XM or Sirius
achieve.

I bet real money that the talk channels are allocated fewer bits than the
music channels. I'll also wager that some music channels are "more equal"
than others when the bits are passed out.
========
As I've also said, XM and Sirius are using advanced processing to "make a
linen purse of quality from a sow's ear of bits". They have no expectation
of making a silk purse. They are aiming for good enough for most people,
and are selling primarily on content.
========
If you want to see complaints about digital quality, subscribe to
alt.radio.digital, which is largely devoted to digital broadcasting in the
UK.

Two beautiful and expressive languages. What would be wrong with that?

At least you are spending it in useful ways, not wars or spaceships to
nowhere.
The Swiss got quite small taxes without sacrificing the welfare of the
people though...

TAXATION AND SPENDING
The federal government, cantons and communities all levy their
own taxes. Each level collects about one-third of total government
revenues, which in all comprise approximately 26% of GNP. Most taxes
are direct and low. The average Swiss citizen pays about 16% of his
income in taxes, and average company taxes are about 20% of profits.
Switzerland's national debt and inflation rate are low. Total
government spending for all three levels has averaged only 22.6% of
GNP since 1946, yet expenditure on welfare and education per capita is
high. This is because government revenues are spent effectively rather
than wasted on a bloated bureaucracy.

FCC Silences Community Radio Station

(Brattleboro, Vermont, USA) On the cusp of celebrating five years of community radio, the Federal Communications Commission (FCC) unexpectedly entered the studios of radio free brattleboro on Tuesday, June 24th and ordered the station to cease and desist from broadcasting.

The staff of radio free brattleboro (rfb) regrets that its mission of providing a community outlet for alternative music and news is now interrupted. The staff is considering its options and welcomes public input and comment.

Longtime DJ and trainer Steven Twiss, who coordinates monthly community orientations, remarked, “it’s a real shame because in addition to providing entertainment and information to the community, we have trained hundreds of local citizens of all ages in the art of radio broadcasting.”

Radio free brattleboro has grown in size since starting at the Teen Center in July of 1998. The studio is currently located on Main Street in downtown Brattleboro; rfb has a staff of about 70 DJs and 50 weekly shows.

The mission of radio free brattleboro is to uphold and exercise First Amendment rights in the face of increasing homogenization of corporate radio. David Long, co-founder and DJ explained “we’re part of national movement to return the airwaves to the hands and voices of the citizens as it was intended under the FCC’s original mandate. The Bill of Rights explicitly states ‘Congress shall make no law…abridging the freedom of speech,’ and it is clear to us and millions of Americans that the FCC has failed all of us.”

To contact radio free brattleboro, please call (802) 258-9879 or email rfb@sover.net. Correspondence and donations can be sent to PO Box 1951, Brattleboro, VT 05302.

*For more information please contact rfb members David Long (w) 802-463-1613 (h) 802-254-7676. Or Larry Bloch (h) 802-254-9106.

*Please view the Brattleboro Reformer’s article on the events of 6/24/03. http://www.reformer.com (article published 6/25/03 is at http://www.reformer.com/Stories/0,1413,102~8860~1478256,00.html)

*A video of the FCC visit of 6/24/03 and a current program guide is available by contacting Radio Free Brattleboro.

Don't you think they pretty grown up by now to be let on their own?
Why don't you spend the money home in things like education and the
arts, and perhaps you will start see people talking about quality of
life, instead of having some flag-waving, God-blessing apocalyptic
crowd.

IMHO if it's not an outright scam, it's full of baloney. I wouldn't
pay any broadcasting company $3000 without first reviewing an
audited ratings survey. Even then, it's listenership as an Internet
station is small as compared to a terrestrial (i.e. free,
over-the-air) station. Even the top 50 Internet broadcast streams do
not have the same reach as a radio station; at $3000 for a brokered
show, your cost-per-thousand is at least 10 times that of a radio
station.

Before your friend plops down good money to do an Internet show he
needs to ask the scammers how they'll promote the show throughout the
world. Of the thousands of audio sources on the net, how will anyone
know they exist without promotion?

I've never heard of them, so it's unlikely I'd search them out to
listen to a financial show. I've never seen them promote the service.
If they're going to spend that kind of money they should go to a local
radio station and buy the time. At least there's a chance someone will
listen.

Date: 2003-07-05 15:51:58 UTC
From: katwofoxx@yahoo.com
Message-ID: <be6s6u$n0c$1@xuxa.iecc.com>
Source record: 7581

Today while driving, I was listening to WDOD 96.5 near Chattanooga, somehow they were off the air..and instead there was a Mexican station taking over the signal, very strong signal, fading and coming back, then there was another Mexican station in the same channel.By the city and frequency I found it to be XHRN-FM in Veracruz.It was the same on other frequencies, like 94.5FM, there were 2 or 3 Spanish stations(One of those was from Mexico City, Insituto Mexicano de la Radio XHIMER,playing classical music). Then I moved to 101.7 and there were another 2 spanish stations there.
Why does that happens and how often? I think it has to do with the weather being hot and humid.
Any comments about that?

Ha, really strange when you think about it. "Pirate Station", huh? Who is the bigger pirate, a small operation serving community needs or big Clear Channel who couldn't care less about community needs? I would love to see more people using THEIR airwaves to meet the needs of their commnities. Perhaps it will give Michael "put the airwaves into the hands of a few" Powell a wake up call, if congress won't.

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Nice thought, but Congress wrote the laws, and the courts have interpreted them. Fairly recently a court told the FCC that it's rules about multiple ownership couldn't stand up since they didn't provide a legal reason for restricting multiple ownership. Socially good didn't cut the ice in that court, ie: "What basis do you have to claim that concentration of ownership is bad?". With court decisions like that, what would you do if you were on the FCC? [I think I'd resign.]

IIRC, the FCC does not represent itself in Federal court. IIRC the Department of Justice represents all/most Federal agencies. The DoJ can choose to not take on a case, leaving the FCC out in the cold.

So, what local need were the busted station serving? Did they have credible local news? Discussion of local issues that allowed ALL points of view to be heard? Or were they just a juke box for "alternative" music?

Yea, what clear channel is doing to local radio is clearly wrong, but two wrongs don't make a right, IMO.

It's called tropospheric ducting. When a layer of warm air forms above
a layer of cooler air, the boundary can reflect radio waves. This
can temporarily extend the range of FM signals. It is especially
common in summer months and over water. To broadcasters on the coast
it can be annoying, especialy when somebody's country station a
hundred miles away regularly wipes out one's classical station in
its home town.

There's a big difference. Clear Channel has a license. The pirate
doesn't. What they do, with or without a license, is irrelevant when
the FCC comes to add their equipment to their collection.

What investment? A domain name goes for $35 a year. You're trying to
make a profit. What else did you do to make the name worth many times
what it cost? Will whatever you've done come with the $150? Have you
paid for site development, research, photos, writers, etc?

>The mission of radio free brattleboro is to uphold and exercise First Amendment rights...<

It's almost comical, the number of people who still believe that the First Amendment gives them an unvarnished "right" to operate a radio station without a license. The Supreme Court stated explicitly, 60 years ago, that that was not the case. The FCC has been hearing this argument for decades, and it's no less wrong now than it was decades ago.

>The Bill of Rights explicitly states Congress shall make no law abridging the freedom of speech, and it is clear to us and millions of Americans that the FCC has failed all of us.<

"Us and millions of Americans" have apparently never read NBC v. United States, in which the Supreme Court explicitly states that the First Amendment does not apply to radio broadcast licensing procedures.

I've seen the MV Communicator in the harbour of IJmuiden. She needs a lot of painting, to make her look like a 'decent' ship. On board the ship everything is still a mess, but her mast is still right up to the sky. But a working radioship? Not for a long time...

PETER.

Sounds like trophospheric ducting, where vhf and uhf signals propagate beyond line of sight (do a search on google for tropospheric ducting for more info that you care to know).

In CC's case, I think it's more correctly called a "Letter of Marque".
A pirate wouldn't have one of them.

The Supreme Court has been known to reverse its decisions when either additional information or time suggests that the original ruling was in error. So the fact that the Supreme Court made a ruling 60 years ago is not an automatic guarantee that they might not rule differently today.

It would be interesting to see what sort of case could be made before the Supreme Court that the current licensing system unfairly limits freedom of speech by concentrating broadcast station licenses in the hands of an increasingly small group of companies.

While my suspicion is that the courts would toss out that argument pretty quickly, the Supreme Court certainly has issued rulings that have surprised me in the past...the fairly recent past.

I encountered this same phenomenom while driving through South Carolina
during the last week of June. I picked up signals from Kansas and Texas.

There are two types of "weird signals":
Troposheric ducting, which allows ground signals to extend for hundreds
of miles
Skip, in which the signals are bounced off an ionized layer in the
atmosphere. Signals over 1000 miles away are propagated this way.

Fine explanation of tropospheric ducting.

But that ISN"T the type of propagation involved in this report.

The propagation heard these past few weeks has been Ionospheric, by means of the sporadic E layer, about 100 km (60 miles) above the Earth's surface. Go back and read the information on the WA5IYX pages. Here are URLs again:

> Any comments about that?

Sporadic-E. (see R.J. Carpenter's links)

On occasion, one of the atmospheric layers responsible for long-distance reception on shortwave becomes briefly capable of supporting MUCH higher frequencies, like FM broadcasts. There are many theories as to why this happens but none are proven.

Weather is not a cause. Sporadic-E is more prevalent from late May through mid-July (and again around Christmas). It's also more prevalent in mid-morning and early evening.

The tropospheric ducting mentioned by other posters is almost certainly NOT responsible for this DX. Tropospheric propagation is almost never able to cross mountains, and the 1400-mile distance to Mexico City would be VERY, VERY unlikely. Sporadic-E, on the other hand, doesn't have much grief with mountains. 1400 miles is on the long side, but certainly possible.

(I had several Mexico City stations in just this morning at my place in Cheatham Co. about 30mi. northwest of Nashville)

Keep an eye on channels 5 and 6 on a TV with an antenna. (also 2 and 4 if you're far enough out that WRCB doesn't spill over too much) The skip will hit TV first.

Take a look at http://www.anarc.org/wtfda for more information.

It's an old tune, the version currently in use by Steve Scruton at BBC
Essex is a track from "The Syncopators" ....very old!!

Tom Desmond <tdesmond@sprynet.com> wrote:

>While my suspicion is that the courts would toss out that argument
>pretty quickly, the Supreme Court certainly has issued rulings that have
>surprised me in the past...the fairly recent past.

And note that the courts have found in broadcasters' favor (against
the FCC) on First Amendment grounds fairly frequently in the recent
past, which is part of what has made the recent tide of deregulation
unstoppable. The 35% TV viewership cap was one such rule that already
fell at the appellate level, and the newspaper cross-ownership rule
was, without question, going to fall soon if it were not repealed.
(The gambling-advertising case from a few years back made it clear
that any FCC rule that is waived as often as it is enforced -- like
newspaper cross-ownership -- is unlikely to stand judicial scrutiny.)

However, pretty much any argument you can make in favor of pirate
broadcasters weighs against them as much as in favor.

Freedom of Speech does not guarantee a soapbox, a podium, a newspaper or a
radio station to the citizens. It simply guarantees that the government will
not limit an individual's right to express him or herself, but does not
grant a forum to everyone.

But even if the Supreme Court did agree to that....perhaps the best result
of such a ruling would be to force a breakup of the existing broadcast
companies, Ma Bell style....

It's still a *long* way from being able to just put a transmitter on the
air and broadcast away.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I believe the court has ruled on that issue. Someone with legal
research tools could easily find it. The bottom line is is they say
you have to have a license. I think the Dunifer case made a similar
argument without including the consolidation issue.

The original court refused to shut him down. You know how them
lib'ruls in Berkeley can be.

...which would never happen, as long as there is more than one broadcast company out there. Ma Bell was one company, and that was also a good while ago. The government wouldn't even split up Microsoft, for as big and as imposing a behemoth as they are.

If, say, Viacom and Clear Channel were to merge (!), then maybe you'd be able to argue it's a monopoly. So long as the two of those remain independent competitors, not a chance.

I think that most of those decisions were made based on the courts'
interpretation of the 1996 Telecomm Act, not the First Amendment.

XM is receive only.
Web use requires he be able to send what URL he wants to see.
Email requires sending username and password.
Therefore, it sounds extremely like your friend has been hosed by someone
who doesn't understand the Internet,. or doesn't care.

The Radio Crazy is back!

Partial interest in fulltime AM radio station still
for sale. (Joint venture) If you venture, you go to
the joint! HI! Just teasing.

AM in Paducah, KY. Fulltime, 1 KW, class "C" (Formerly
called Class IV, or local or graveyard, etc.).

Only $100,000 full price.

Active or inactive investors with at least $15,000
each are welcome. All investors will be on the board
with full voting rights if desired.

"AM bashers" or other types of "negative nabobs" are
clearly unwelcome. If you are under 18 you need a
signed note from your parent(s) or a local biker!

I will disclose call letters upon showing of interest
on your part.

Tel: (478)741-1710 in Macon, GA

The Radio Crazy is not that crazy! He was once Chief
Engineer for a NYC AM station.

73,

Meyer Gottesman, W6GIV ala "The Radio Crazy"

Do you Yahoo!?
SBC Yahoo! DSL - Now only $29.95 per month!

Hey Rich some domain names have value because they have been held off the market for so long and are either rare or properly descriptive of a product or service someone wants to represent online. The guy might have paid two or three years worth of renewal and wants to get some money back on his investment. Is that so damned bad? So he's trying to make a profit? That's what the free enterprise system is all about, unless you're one of those liberal thinkers who wants redistribution of wealth and the government to tell us how much money we can or cannot make, and death taxes and luxury taxes and regulations for toilet flow tank size and internet user fees and all that crap...

This guy is just trying to unload a domain name he thinks has value. This isn't the same as cybersquatting. The guy has a name that some enterprising person might make the most of. If they happen to have servers located outside the US, they could very easily develop a music stream that pays homage to Radio Caroline and some of the other famous pirate stations of the past ... all without paying that intrusive RIAA webcasting fee for music licensing.

The guy that owns "rockandroll.com" has asked upwards of 20,000 USD for that domain since he registered it 7-8 years ago. I don't begrudge anyone developing value from a domain name. Remember -- there's always the first sucker to pay more than 50 cents for a piece of cardboard with a photo of a baseball player on it -- then lo and behold -- you've got yourself an industry!

WRC-03: GOOD NEWS FOR HAM RADIO - BAD NEWS FOR SUPPORTERS OF CW

The 2003 World Radiocommunications Conference in Geneva is over and there is some generally good news for ham radio. Q-News Graham Kemp, VK4BB, has been following this story and has a complete wrap up on the way that amateur radio fared:

--

The 2003 World Radiocommunication Conference concluded its discussions of the issues on its agenda on Thursday afternoon, 3 July, after marathon Plenary sessions that tested the patience and stamina of the conferees. The big news for radio amateurs is that there will be a dramatic improvement for we here in region 3 in regard the 40-meter band!

7100-7200 kHz band reallocated to the amateur service in both region 3 and 1, Region 2 7000-7300 kHz remains exclusively amateur. The change will take effect on 29 March 2009, less than six years from now!

Now the "but".. A footnote containing the names of countries that are mainly in Region 3 and the Arab States makes the band also available to the fixed and mobile services in those countries on a primary basis.

It was not easy to achieve such a positive outcome on this issue. A last-ditch effort to bridge differences was chaired by Alan Ashman of Australia.

Perhaps the magnitude of what has been accomplished for radio amateurs can best be explained this way: Never before in the history of radiocommunication has an HF broadcasting band been shifted to accommodate the needs of another service. This is not simply an accomplishment of the IARU. It would not have been possible without the cooperation of a number of broadcasters and many, many others. The people who worked with us who are not radio amateurs -- including some who were strongly opposed at the start but who acceded to the compromise --deserve much of the credit. For example, Australia came to the conference

with a strong "no change" position and had to shift its position dramatically in order to embrace the compromise.

Agenda item 1.7.1 (Article 25): A package of revisions to the international Radio Regulations that are specific to the amateur and amateur-satellite services, takes effect on Saturday, 5 July 2003. Michael Owen, VK3KI, has guided the work of IARU on this issue since 1996.

Agenda item 1.7.2 (Article 19): 432-438 MHz secondary allocation for satellite-borne synthetic aperture radars was approved in Plenary.

Agenda item 1.1 (footnotes): "Footnote fever" seized some administrations in the closing hours of the conference. Fortunately, the amateur service escaped serious damage from "footnote fever" although it may be a problem in the future if countries want to climb into the footnote for fixed and mobile at 7100-7200 kHz.

As Secretary David, K1ZZ said in wrapping up his report... "It's Over! Well, the work is over; the ceremonial closing of the Conference will occur on Friday afternoon, 4 July. Then we will
all be heading home, except for those who are staying for a two- day meeting to plan the preparatory work for WRC-07.

Yes, it's all beginning again...."

>From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.
--

There are two very important documents that came out of WRC 03 that every radio amateur should read. Both were issued at the close of the conference by the International Amateur Radio Union. The first is a final wrap up on the conference by Dave Sumner, K1ZZ. The other is an in-depth explanation of the changes to the worlds radio regulations authored by Michael Owen, VK3KI. You will find links to both of them on the front page of out website at www.arnewsline.org (Q-News, IARU, ARRL, WIA, others)

**

60 METERS: A LOOK AT NIGHT ONE ON THE NEW GENTLEMENS BAND

Its being called the “New Gentlemans Band” by some. At least thats what monitoring the first availability of the new 60 meter band as it opened to the East Coast on July 3rd. Newsline’s Don Wilbanks, was listening in from the deep South:

--
The ‘New Gentlemens Band” may well be a title that will stick on 60 meters. Even as the new frequencies came to life, there was none of the on-air pushing and shoving thats so prevelant on other bands like 20 and 40 meters. Instead, those observing, operating and posting thir thoughts to the Internet seemed to agree that calm and order was the way most approached 60 meter operation.

Ron Wray, WB5HZ, was one of those listening in. He says over the qrz.com website that it seemed as if someone had kicked an anthill at 11:00 PM Central time. That’s when hundreds of stations were conducting simultaneous QSO’s on all five frequencies.

According to Wray, there were explosions of activity that continued throughout the night as each time zone jumped onto the new band in sequence. And Wray notes the apparent success of the 50 watt effective radiated power limit. He says that from his location in Dear Park Texas, the low power limit made it so that no one signal was sufficiently strong to completely control any particular frequency. And because of this amateurs were able to make solid contacts despite the unbelievable level of QRM.

Robert Harper, AFZ0H, of Park Hills Missouri was another early user of 60 meters. In his posting to QRZ, Harper said that he was very impressed by the discipline of the amateur community on opening night. Despite the noise and the crowd, everyone seemed to keep a level head. He says that it was an atmosphere that reminded him of the "good ol' days," adding that he cannot recall when he last observed such gentlemanly behavior under such crowded conditions.

And Bill Collins K8NQC, may have summed it up best. In his QRZ note he said that multiple QSO's on the same frequency will greatly help the utility of the band. He adds that the absence of big signals is really a plus.

For the Amateur Radio Newsline, I’m Don Wilbanks, AE5DW, in New Orleans,

--

So far there seem to be no complaints about the new spot frequencies that comprise the current 60 meter ham radio allocation. In fact, one ham was heard to say that the rest of high frequency Amateur Radio can learn lessons in sportsmanship and courtesy by simply tuning in. (ARNewsline(tm), from QRZ.com and other sources)

**

RADIO RULES: ANTI-ENHANCED SSB PETITION ASSIGNED RM 10740

Its taken some time, but the FCC has now assigned the designation RM 10740 to the petition by Michael Lonneke, W0YR, of Round Hill, Virginia, and Melvin Ladisky, W6FDR, of Camarillo, California to limit the bandwidth of Single Sideband an full carrier ampletude modulated signals on all ham bands below 28 MHz. As previously reported, W0YR and W6FDR want SSB signals to be limited to 2.8 Kilohertz and AM to be no wider than 5.6 kilohertz.

The petitioners make no secret that their regulastory request is aimed squarely at those hams who are experimenting with enhanced SSB signals which are wider than the 2.8 kilohertz that they believe should be the maximum bandwidth. They claim that enhanced SSB is bothersome to other operations and that some users of the pseudo mode are unwilling to cooperate in minimizing harm being caused.

What Lonneke and Ladisky have not bothered to explain is why they also targeted users of AM whom even they they freely admit are not causing a problem for other radio amateurs.

Either way, RM 10740 carries a commentary cutoff date of August 2nd. You can let the agency know how you feel by submitting commentary by mail or using the FCC's Electronic Comment Filing System. It'sated in cyberspace at www.fcc.gov. Once there use the websites search function to locate RM 10740. (ARNewsline(tm))

YHOTY 2003: JAY THOMPSON, W6JAY, NAMED ARNEWSLINE(tm) YOUNG HAM OF THE YEAR

He is not yet 18, but he is a champion class hidden transmitter hunter as well as a young ham devoted to public service and to bringing more kids into the hobby. And for these reasons and more, a select committee of judges has named Jay Thompson, W6JAY, of Santa Ana California to receive the 2003 Amateur Radio Newsline Young Ham of the Year Award. We have more in this report:

--

If the name Jay Thompson and the call sign W6JAY sound familiar, its because Jay has made news several times in the world of hidden transmitter hunting. In the five years that he has been licensed, W6JAY has participated in three championship hunts has won virtually every type of medal offered in his age group. One hunt took him all the way to China. And when you travel the world, hidden transmitter hunting can leave you with moments to remember:

--

Thompson: "In China it was raining. And in the bamboo forest, when you shook the trees, you would get a mini-shower fall on you and it would just cool you off after you had been running for a while."

--

But his exploits in T-hunting is not the only reason that Jay was chosen as this years Young Ham of the Year. He is also heavily involved in emergency communications and is a member of the Orange County Hospital Disaster Emergency Communications System. This is a medical communications support group that gave W6JAY his first taste of what responding to a real emergency is like:

--

Thompson: "During the Plecencia Linda train crash I was stationed at a hospital with my dad where we helped to allocate information where patients were going. That helped the hospitals a lot from what I heard."

--

If Jay Thompson sounds enthusiastic about his T-hunting and emergency communications work, you have to hear what he has to say about recruiting youngsters into the hobby. Jay believes that the future of ham radio is with the young:

--

Thompson: “I noticed that there were not very many active young Amateur Radio operators, so I have tried to do my part to get more of them in so that Amateur Radio can have a better future. It starts with the kids and as they grow up they realize that it is such a good activity and will get more people to join. If there are not any kids, then there is not very much of a future for Amateur Radio.”

--

A lot of people seem to agree. In fact ARRL Southwestern Division Vice Director Tuck Miller, NZ6T, calls Jay Thompson: “...a magnet for other young hams to become actively involved in the Amateur service.”

The Young Ham of the Year program is co sponsored by the Amateur Radio Newsline, Vertex Standard which manufactures Yaesu brand ham radio gear and C-Q Magazine. Jay Thompson, W6JAY, will receive his award at a presentation on Saturday August 16th at the Huntsville Hamfest in Alabama.

Right now we ask you to join us in congratulating Jay Thompson, W6JAY, as he is named 2003 Young Ham of the Year.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, reporting.

--

2003 marks the 17th consecutive year that the award has been presented. (ARNewsline(tm))

**

ENFORCEMENT: FCC ACTS IN THREE CASES

The FCC has contacted three hams on various enforcement matters. The agency’s Daryl Duckworth, NN0W, has more:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Duckworth, that’s the FCC’s enforcement actions through the period ending June 28th. (RAIN, FCC)

**

RESCUE RADIO: PERSONAL LOCATOR BEACONS NOW LEGALLY SOLD IN LOWER 48

Hams could have a new emergency communications job in the near future. T-Hunting down people in distress wearing Personal Locator Beacons.

The CGC Communicator reports that retail stores in the continental United States are now being allowed market the pricey beacon transmitters which can be activated when a person is in a dangerous situation. Proponents of Personal Locator Beacons claim that they will assist rescue teams in finding lost persons in emergency situations.

According to CGC, each beacon must be registered with NOAA before alert activations can be relayed via satellite to the Air Force Rescue Coordination Center at Langley Air Force Base in Virginia. Actual beacon alerts are recieved over the SARSAT COSPAS satellite system which is a long term cooperative effort between the United States and Russia.

More information is on line at www.sarsat.noaa.gov (CGC)

**

RESCUE RADIO: THE DEAN OF ARRL SECTION MANAGERS RETIRES

The dean of ARRL Section Managers, New Mexico's Joe Knight, W5PDY, stepped down from his post on July 2nd. Knight cited poor health in his decision to retire from the volunteer position after serving for nearly 27 years. This is a record of volunteer service longer than any other sitting SM.

Assistant Section Manager Bill Weatherford, KM5FT, of Albuquerque, has been named to fill the remainder of Knight's term, which ends on December 31st. In his departure statement Knight said that he plans to try to help Weatherford as much as he can to assume the Sectiin Managers job. He also thanked his constituancy for the wonderful job that they have done and asked that they support KM5FT in the same way as they did him.

Knight had recommended Weatherford's appointment as his successor. KM5FT is an ARRL life member and has served as an Assistant Section Manager for the past two years. (ARRL)

**

ACCIDENTS HAPPEN: OMAHA’S KETV-TV TOWER COLLAPSES

Joe Eisenberg, K0NEB reports that a broadcast tower being converted for digital television has fallen in Omaha Nebraska. According to a story supplied by Joe, KETV's main broadcast antenna fell to the ground Friday July 4th.

Crews had been working to install High Definition TV technology on the tower since May 30. A new antenna was to replace the aging RCA TW-15 skyhook. A station spokesman said that it is not yet clear how much the tower collapse will set back the stations conversion to digital transmission or how long it will take to clear debris and rebuild. Nor is it known what caused the main tower to fall. (K0NEB)

**

RADIO CONFLICT: PENNSYLVANIA TOWN DISCOVERS WATER AND RADIO WAVES DON'T MIX

Officials in Chambersburg, Pennsylvania have asked the FCC to intercede in a dispute between that township and Radio Station WCBG on 1590 kHz. This, s the borough hires a Louisiana attorney to try to force the owners of the radio

station to cease operating long enough for workers to finish a 2-million-gallon water storage tank project in the nearby Chambers-5 Business Park.

Chambersburg's effort to build a new, elevated, 150-foot-high water storage tank on land adjacent to WCBG's towers have stalled because workers complained of receiving RF burns. Complicating the situation are allegations that the storage tank interferes with WCBG's signal, presumably warping its radiation patterns.

WCBG operates 5 kW non-irectional daytime and, 1 kW directional at night. The whole story is on-line at http://tinyurl.com/g1dk (CGC)

**

ARRL: LOOKING FOR MULTIMEDIA PRESENTATIONS AND VIDEOS

The ARRL’s Field and Educational Services is seeking donations of Amateur Radio related presentation programs or slide shows that utilize Microsoft PowerPoint or similar computer-based slide-viewing software. The department is also interested in VHS and digital video programs to add to materials that it offers hams through the ARRL Video Series. For guidelines on whats acceptable contact Mary Lau, N1VH, 225 Main St, Newington, Connecticut 06111 or e-mail herat mlau@arrl.org. (ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: 40 METER DX’ER AL HIX, W8AH, - S.K.

On a sad note, the changing of the guard continues with news that an internationally known dx-er has died. And this news hits very close to this anchor desk. As local hams gathered for field day here in Charleston last month, word was received that Albert Hix, W8AH had become a silent key. Al passed away at his home here in Charleston on June 25. He was 85.

W8AH not only loved amateur radio, he loved his country and the freedom she provides. Al was a skilled member of the US Army signal corps, serving during world war 2 when he was appointed radio officer to General George Patton. He also served during the Korean war and returned to Paris to climb the Eiffel tower again for the daily net with the Pentagon.

After his military service, Al returned to Charleston with his wife and worked as an engineer for Union Carbide until his retirement in 1985. He pursued his beloved hobby with a new vengeance, earning his place on the DXCC honor role with 388 countries confirmed. On 40 meters, he holds the top honors with 362

entries. Al made hundreds of friends around the world through amateur radio, many of them he visited with his wife, Connie.

Avid DX'ers knew one side of Al Hix. Many of us knew another side, as WV ARRL section manager Hal Turley, KC8FS, explains…
--

(KC8FS audio)

--
A US Army chaplain presided during Al's funeral and he was laid to rest with military honors. Meanwhile, local hams seemed to man the field day CW station with a special vigor… and without the traditional W8AH at the key at start time.

(KC8FS audio)_

Al is survived by his charming wife, Connie, brother James and by hundreds of ham friends around the world and here at home in the West Virginia hills… where we knew that the only thing bigger than his signal, was the kind heart of W8AH. (ARNewsline(tm))

**

RADIO PUBLICATIONS: CQ RELEASES HAM RADIO MAGAZINE ANTHOLOGIES

Fans of the old Ham Radio magazine, take note: A new series of anthologies, reprinting selected articles from the pages of ham radio, is now available from the folks at CQ Magazine

The first four books in the series were introduced two weeks ago at the 2003 Dayton Hamvention. The topics covered are: "Antennas, 1968 to1972;" "Antennas, 1973 to 1975;"Homebrewing Techniques" and "Troubleshooting Techniques."

Ham radio magazine was published from 1968 to 1990 and is generally acknowledged as the premier amateur radio technical publication of its time. CQ Communications now owns the rights to Ham Radio magazine and decided to release to compilation books based on requests from the Amateur Radio community. They can be ordered on-line at www.cq-amateur-radio.com. (CQ)

**

CONVENTIONS & HAMFESTS: CINCINNATI IN JULY

On the ham radio social circuit word that the sixth annual OH KY IN Hamfest is slated for Saturday July 26th at the Diamond Oaks Caerrer Development Center in Cincinnati Ohio. The event features a giant outdoor flea market, ham radio test sessions, vendor exhibits, door prizes and lots more. Fur further information e-mail Lynn Ernst at wd8jaw@arrl.net (Via press release)

**

CONVENTIONS & HAMFESTS: DENVER COLORADO IN AUGUST

And the Denver Radio Club Hamfest is scheduled for Sunday, August 17th at the Jefferson County Fairgrounds in Golden Colorado. Doors open at 8:30 AM. For more information contact Bryan Steinberg, KCZ0CUA via e-ail to kcØcua@arrl.net, or via the club website at www.qsl.net/w0tx (Via press release)

**

HAM RADIO IN SPACE: ARISS MARKS SUCCESSFUL EURO SPACE CENTER CONTACT

Another big success for Amateur Radio on the International Space Station. This as U-S Astronaut Ed Lu, operating as NA1SS made contact with youngsters on Space Camp at the Euro Space Center in Belgium at 08:25 U-T-C on Monday July 7th. .

The center operated as ON4ESC with bout 150 children gathered in the auditorium. Some of them were Dutch speaking, others spoke only French speaking and 45 were Americans living in Europe.

Ed Lu answered the call from ON4ESC the very second the ISS was in range of the Euro Space Center. He answered 17 questions during the nearly 8 minutes long pass. At its closest approach, the space outpost was 2000 km south of Belgium, over the Pyrenees mountains. AMSAT Vice Chairman Gaston Bertels, ON4WF, was on hand to oversee the operation as well as introducing the young audience to the amateur radio service, amateur radio satellites and the ham radio stations used by astronauts and cosmonauts while operating from space. (ON4WF)

**

DX

In DX, the question is -- did you work them? Of coarse we are talking about DL6LAU, DL8OBQ, OH2BH, OH2NB and OH3BHL who have been Albania in preparation of setting up a training program to enhance amateur radio in that nation. They have also been on the air as ZA1B operating on several new bands and modes including 6 meters and 2 meters. Their operation was scheduled to conclude on July 13th with QSL’s to be handled together with the April and May ZA1B operation by OH2BH. (OH2BH via N4GN)

Bob Cumming, W2BZY, says that he will be active on 50.110 MHz from Costa Rica TI2 through July 27th. This, in an attempt to activate some of the less common grid square in that nation including EJ79. When not on 6 meters, Bob will be looking for contacts on the high frequency bands. QSL as directed on the air. (VHF Reflector)

Also, look for Desertas Island on the air from July 23rd to the 27th. This as the Madeira DX group activates CT9D and CT9M on RTTY from that rare location. The main purpose of this trip is to mount a VHF repeater on the island to enhance F-M coverage across the Madeira Archiplego. The operators will also be active on SSB, CW and RTTY during their stay. Q-S-L to CS3MAD, P.O.Box 4694 - 9000 Funchal -Ilha da Madeira - Portugal. (OPDX)

**

THAT FINAL ITEM: MISSING LILLY FOUND

And finally this week, the story of a ham radio operator and his dog. It happened back in January, but only recently was the story forwarded to us. Here’s Amateur Radio Newsline’s Bruce Tennant, K6PZW with the details.

--
Peter Kringle K-C-9-B-I-W of Superior Wisconsin tells it this way. Back in January Peter came home for lunch to find his dog Lilly missing. She has some how unhooked the standard dog clasp and a locking carabineer.

Peter first walked around the area looking for his dog. He then got in his car and drove their normal walking loop. But he was unable to find Lilly.

At this point he began asking people in the area if they had seen her. He found out that she had been seen in the area a few times and that she had escaped around 10:30am. So Peter called the local dog shelters, leaving a description of Lilly in case some one found her and brought her in.

By this time it was 3 P.M and Peter decided to try something that he had not heard of anyone else every trying before. He turned to ham radio for assistance in finding his mising pup.

Peter picked up his Yaesu VX-5, and called out on the local 146.94Mhz repeater asked if anyone his area could help my look for Lilly. Two amateur radio operators answered his call. This meant that there were now two in cars and K-C-9-B-I-W on foot looking for her. This meant that the searchers were able to cover much more ground in a very organized fashion.

It was just before 4:00 p.m. when one of the hams spotted Lilly and was able to pick her up. He then called out on the repeater to let every know she was safe. A bit later Peter was able to rendezvous and take the wandering Lilly back home. And thats a perfect happy ending to the story and to this weeks newscast as well.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW reporting.

--

Peters Internet positing about the help he received came with an apology. He wants to thank the two hams who helped out, but unfortunately he has forgotten their call signs. He adds that he hopes they will e-mail him so that he can give proper credit where credit is due. And if you want to see what Peter and Lilly look like, look up KC9BIW om the www.qrz.com website. (WA9ICU)

For sale:

(The "Radio Crazy", it's back! Oy vey!)

Part interest in Paducah, KY full-time AM on 1450. 1 KW. 5/8 wave tower! $100,000. Joint venture. (If you venture, you go to the joint! HI!)

Active or inactive investors/saps welcome with at least $15,000 each. All investors/saps would be on the board with full voting rights if desired. Now why in Lord's name would they NOT be desired! HUH!

Paducah is a progressive city of over 26,000 population.

This is a steal.

Tel: (478)741-1710 in Macon, GA.

The "Radio Crazy" ain't THAT crazy! He was Chief Engineer for a NYC AM recently and was past President and founder of an FM in San Francisco which is on the air since 1973.

No "AM bashers" or other "negative nabobs", please! Put your cash on the barrelhead Son, no COD, just the entire sum. (Lyrics from old country song!)

Don't let my zany sense of humor fool you. I was once President of a corporation in San Francisco.

73,

Meyer Gottesman, W6GIV

Happy to see I am not the only one who noticed this!

I talked with an engineer of one of Birmingham (AL)'s local station groups. He said the interference was giving them fits that day! I knew something was up when I hit the scan button my radio and it passed over all the locals (whose TXs were only four air miles to the north of me), stopping only on Spanish language broadcasts. In this area, the skip was coming from the Brownsville TX / Matamoros TM region.

Murray is probably a little more so. At least its NCE-FM station is
not an evangelical satellite repeater.

Paducah is just across the Ohio River from the worn-out, dirt-poor
coal-mining areas of southern Illinois.

This station does need some work. (it could be as simple as someone properly adjusting the fader!) I was in Paducah yesterday and would estimate the modulation at about 50% or so. Haven't checked for coverage.

There are far less economically-viable towns in Kentucky. In general, the western part of the state is considerably more prosperous than the eastern. Paducah is the "jumping-off point" for the Land Between The Lakes recreational area, though a Class C AM there isn't going to cover the tourist area itself. (at least not at night) On the other hand, it also isn't going to cover any of the seriously depressed towns of southern Illinois!

For what it's worth, the car radio scan stops on five AM stations, (two of which are daytimers) four non-commercial FMs (one of which also has a translator there), and eight commercial FMs.

Just wanted to post that I bought one of the Pogo RadioYourWay units and it works pretty much as advertised with lots of functionality with it's ports for firewire, line in, mic in, phones out, SD memory card, cord adapter, etc.

http://www.radioyourway.com/

The only things I'd like to see improved are:

1) Possible higher bitrate capture for better quality(currently the options are 16kbps and 32 kbps, better for talk radio than music).

2) A resume function after powering down so I don't have to fast forward to where I left off in a 30 minute or longer recording.

3) A feature to let me listen to playback while still recording a show(so I can listen from the top while the device captures the rest of the live broadcast).

Other than that I couldn't ask for a better product.

Jeremy

1511. 930 WPAT in NYC area now testing IBOC/"HD Radio" Digital AM

Newsgroup: rec.radio.broadcasting
Date: 2003-07-17 06:16:23 UTC
From: wbrw@radiomailbox.com
Message-ID: <bf5evn$4vk$1@xuxa.iecc.com>
Source record: 7487
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting,alt.radio.digital

New Jersey's longest-running AM Stereo station, 930 WPAT in Paterson, is now the first in the state -- and the second in the New York City area -- to begin testing iBiquity's IBOC/"HD Radio" digital AM system.

Listeners to 930 WPAT may notice a quieter, duller signal, with less loudness and reduced treble response as compared to when WPAT was broadcasting a conventional analog AM signal. And since IBOC and AM Stereo cannot be transmitted at the same time, WPAT can no longer be received in Stereo during daytime hours when the IBOC digital signal is active. Also, the digital data sidebands -- that now extend all the way from 915 through 945 kHz on the dial -- will now cause a constant "hash" or loud static type of noise to nearby channels such as 910, 920, 940, and 950 kHz, as well as a constant hiss in the background of 930 WPAT's own signal.

The neighboring stations most likely to be affected by WPAT's use of IBOC include:

910 WLAT New Britain, CT
910 WRKL New City, NY
920 WGHQ Kingston, NY
920 WPHY Trenton, NJ
940 WADV Lebanon, PA (AM Stereo)
940 WINE Brookfield, CT
950 WPEN Philadelphia, PA (AM Stereo)
950 WHVW Hyde Park, NY

At my location in Somerset County, NJ, I hear WPAT's digital signal causing a constant hiss in the background of 910 WRKL and 950 WPEN, as well a loud "hash" on 920 kHz that severely degrades my reception of otherwise perfectly clear WPHY, to the point where WPHY's signal is only marginally intelligible. The "hash" on the other side of WPAT's signal also prevents any chance of being able to receive 940 WADV.

And as for 930 WPAT's signal itself, they are definitely "quieter" than before. In fact that's how I first noticed that WPAT was broadcasting the IBOC digital signal; on my car radio this afternoon, they seemed suspiciously weak and lacking in crispness, and did not switch my radio into AM Stereo mode as normal. Anybody with a good-quality AM radio will notice that WPAT's audio is now being limited to a telephone-like 5 kHz bandwidth, in order to accomodate the IBOC digital sidebands, which may be heard as a constant raspy hiss in the background, just as from 710 WOR's IBOC signal.

For better or worse, the IBOC/"HD Radio" digital AM system is currently only approved for daytime use. After sunset I will have to check if WPAT resumes broadcasting a full-bandwidth AM Stereo signal or not. The official sunset time is 8:30 PM, at which point WPAT's digital signal has to be shut off, per FCC rules.

At this point, no "HD Radio" receivers are available yet, and only a handful of stations across the country are transmitting IBOC digital signals on the AM band. 930 WPAT has now joined their ranks, but it remains yet to be seen if this is just a testing period or if WPAT intends to implement full-scale use of the IBOC digital signal.

With WOR I was unable to tell what the IBOC signal sounded like
because their signal was so strong I could receive it on my teeth.
WPAT is far weaker and I hear the same thing you hear from 910 to 950.
On my receivers it sounds like square waves and buzzing on either
side. Hash lower and buzzing upper. Beyond 960 all is quiet so it
isn't dimmer or power line noise.

The FCC has an official modulation type for dimmer noise, A6 or something. As
a format it manages about a 2.3 share if you don't pack it with too many
commercials.

Mr. Thorn has apparently tried to make a career out of being a "thorn"
(so to speak) in Mike Gallagher's side.

Mr. Gallagher made one mistake...when Victor called him once or twice,
he reacted to him on the air and probably gave him more attention than
he deserved. Victor has apparently seen that as an "entree" and is
trying to ride the "Mike Gallagher Gravy Train" to draw attention to
his own efforts (a Webzine, it appears).

If Mike Gallagher went off the air tomorrow, Victor would be upset,
because the Gravy Train would end. He'd have to go find another
nationally syndicated talk show host to bug, and try to get attention
from. Simple as that.

Mike

IMHO this confirms what many of us believed from the beginning; IBOC is
incompatible with analog AM. When HD stations start stepping on local AM
second-adjacents, the time has come to re-think IBOC.

P.S.: read again
"as well as a constant hiss in the background of 930 WPAT's own signal."

There is no better proof that AM-IBOC is incompatible with regular AM
radios.

>commercials.

So Infinity should replace the transmitter at Blink 102.7 with a really big
dimmer switch if they want to improve ratings?

Yes, there are ten timer events total you can set with each event
being AM/FM choice of station with a daily or weekly scheduled time.
It powers itself on and off so you can set and forget.

The only couple of other things are the included earphones(or really
any earphones) you plug into the 1/8th inch jack act as the antenna,
so you have to leave them plugged in to get reception. Also the
included 32MB of internal memory at the 32kbps rate only gives you
about 2 hours of record time - I went ahead and picked up a 256MB
SanDisk Memory Card for $110 at BestBuy which pushes it out to around
17 hours recording time.

> isn't dimmer or power line noise.

If you can't get enough of WPAT's noise-generating IBOC signal, try 1480 WZRC. As of 2:00 PM on Thursday afternoon, the IBOC was turned on at that NYC station as well. Listeners of 1500 WGHT -- whose transmitter is only 17 miles away from WZRC's -- will definitely not be pleased when they tune in 1500 AM and hear a constant "HISSSSSSSS" in the background. Yes, IBOC is currently daytime-only -- but so is WGHT itself (to accomodate WTOP at night), so there's no escape!

Furthermore, 930 WPAT is a hodge-podge of time-brokered ethnic programming, and 1480 WZRC is all-Chinese. Exactly what is the point of broadcasting these zero-ratings, zero-advertiser, zero-listener formats in IBOC digital?? And as for 710 WOR, most of its 85-year-old listeners probably don't even know what "digital" means. Regardless of its technical flaws, IBOC might have a chance if they put it on something like Radio Disney (1560 WQEW), as an attempt to attract more younger listeners to the AM band. Otherwise, it's just being wasted on the type of listeners who haven't bought a new radio since 1974.

Criteria are good dynamic range(not over-compressing), limited or no use of EQ and special fx(echo, verb, stereo expanders).

I'm in Stamford, CT, so the best sounding stations I pick up are 95.1 WRKI up in Brookfield, CT, 96.3WQXR classical - NYC, 99.1 PLR in New Haven, Q104.3 from NYC, and 106.7light FM, Lon GIsland.

The above stations prove that FM can sound good, and they also play their music at the correct speed, in stereo, and without editing out good bridges and solos from songs. Their volume is a little softer than, say, Z100 or KTU, because they don't compress near as much as those two stations. But their true fidelity makes them worth cranking up.

This "Thorn" character is all but walking around with a "LOOK AT
MEEEEEEEEEE" sign around his neck.

The funny thing is...Mike Gallagher's audience is relatively modest in
the world of nationally syndicated talk. If someone like a Rush
Limbaugh paid even the slightest attention to Mr. Thorn, he'd likely
have a heart attack from all the excitement.

Mike

Listers,

Please forgive this somewhat "off-topic" post, but I know there are a few Amateur Radio operators on this list. Since I consider this announcement important, I hope that you will bear with me for this one posting.

Regards,

Paul.

Fellow Operators and Radio Enthusiasts,

I have created a new list that deals specifically with legal issues pertaining to our hobby, the Amateur Radio Legal Issues List. The list is for the dissemination and discussion of legal issues (such as PRB-1 and pending legislation in Congress) and other related issues (court battles, etc.) that can affect our hobby.

If you are interested in such a list, you may send a blank email to ARLI-subscribe@topica.com.

73's,
Paul Gray, N0JAA
Moderator, Amateur Radio Legal Issues List

I've never even *heard* of Gallagher until just now.

Who are the current top-10 talk shows? It's probably something like
1. Rush
2. Laura
3. whoever replaced Art Bell
4. Howard Stern
5. Bruce Williams(?)
6 ...

>
> Mike

[Moderator's Note: There IS a Mike Gallagher working for Clear Channel
in Cleveland, but he is a jock, not a talker. The Gallagher in Cleveland
has been there for years and I've never known him to do talk radio.]

Amateur Radio Newsline™ Report 1353 – July 18, 2003

Amateur Radio Newsline report number 1353 with a release date of Friday, July 18th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

WRC 2003 says no more Morse but it may be years before codefree operation comes to the USA. Find out why on Amateur Radio Newsline report number 1353 coming your way right now.

(Billboard Cart Here)

**

INTRODUCTION

G’day and welcome to the first Amateur Radio Newsline report ever recorded in Australia. I’m this weeks host Graham Kemp, VK4BB, at the Q News studios in the city of Brisbane. And our first story as you might expect has to do with WRC 2003.

**

WRC FALLOUT: S.25 AND A CODEFREE USA

The now concluded World Radiocommunications Conference may have rule that Morse Code is no longer a world standard for getting a high frequency ham license, but don’t expect it to disappear very quickly in the USA. That’s because there’s lots to be done by Congress and the FCC before any action can or will be taken. Our team coverage starts here:

--

I’m Bruce Tennant, K6PZW in Los Angeles.

The International Telecommunication Union has dropped the international requirement that amateurs operating below 30 MHz must first pass a Morse code exam. According to the CQ website, this was among several actions related to amateur radio taken by the World Radiocommunication Conference and reported by the International Amateur Radio Union. The change took effect on July 5.

According to the IARU, the new language of International Radio Regulation Article 25.5 now reads: "Administrations shall determine whether or not a person seeking a license to operate an amateur station shall demonstrate the ability to send and receive texts in Morse code signals."

This leaves the question of requiring a code test optional for each government licensing authority. According to an IARU explanation, several countries still

feel the code is important as a license requirement and wanted to be sure that any country dropping it did so via what it called a positive decision not to require Morse.

In the United States, FCC rules continue to require passage of a 5 word-per-minute code test for access to the amateur bands below 30 MHz, although it is widely expected that opponents of the code requirement will quickly file petitions with the FCC to drop it.

How long will it take? Amateur Radio Newsline's David Black, KB4KCH, has that part of the story from our South East bureau in Birmingham Alabama.

--

Nobody can be quite certain when or even if the Morse requirement will disappear in the United States, but here's the way it has to play out thanks to the way our government works.

Since the agreements reached at WRC '03 are essentially an international treaty, the document has to be ratified by the United States Senate. Depending on their workload, that could happen before years end or it could be put off into the 2004 session or even beyond.

Senate approval has to take place can the FCC begin the process under the Administrative Proceedures Act and issue a Notice of Inquiry. A Notice of Inquirey or N-O-I is the first step in the rule making process to make any change and gives the general public a chance to voice its opinion. And by public we mean every American. Not just ham radio operators.

If there is enough interest shown in going ahead then a Notice of Proposed Rule making will be issued that again invites public comment. This will be followed by another time period for reply comments by those who might have arguments to counter what some initial commenters have to say. Then matter goes to the staff to prepare a Report and Order or Memorandum, Order and Opinion that is circulated to the five Commissioners who run the agency. If they approve, then the change become law on a date specified in the document.

So once again the rhetoric question of how long? Here's our guess. About two years minimum from the time the Senate ratifies the accords, but only if the FCC decides to proceed immediately there after.

Why two years? Well as Fred Maia W5YI of the NCVEC pointed out to us, since Novice Enhancement some two decades ago, just about every major change in the structure of ham radio has taken about two years. Fred is a pretty good Washington watcher and his guess is 2005 at the earliest. But for now, we will all have to just wait and see.

For the Amateur Radio Newsline,. I'm David Black, KB4KCH, reporting. Graham..

--

As we go to air, the ARRL Board of Directors is meeting to discuss the WRC '03 agreement and its impact on the U-S Amateur Service. Next week the

people who give ham radio tests -- the VEC's will be meeting with the FCC to do the same. (IARU, ARRL, CQ, FCC, ARNewsline(tm))

**

WRC FALLOUT: SWITZERLAND GOES 100% NO-CODE

Meantime, Switzerland may be the first country in the world to take advantage of the revised Radio Regulations. According to the website of the Swiss national amateur radio society, the licensing authority there will be writing to all Swiss CEPT Class 2 amateurs to give them "provisional authorization" to immediately start using the High Frequency bands.

Meantime the Radio Society of Great Britain says that nations Radiocommunications Agency has already stated that it will bring in code-free High Frequency licences as soon as it is practical to do so. An announcement will be made as soon as permission is given for United Kingdom Full and Intermediate Class B amateurs to start using the H-F bands. (RSGB)

**

WRC 2003 FALLOUT: IMPROVED EMERGENCY COMMS - WORLDWIDE

Ham radio emergency communications also got a boost at WRC '03. Jeramy Boot, G4NJH, is in Nottingham England with more:

--

Paul Gaskell, G4MWO, the RSGB Radio Communications Voluntary Services National Co-ordinator, has pointed out the enhancements to amateur radio emergency communications that have come about due to the revision of Article 25 of the ITU Radio Regulations.

Article 25.3 now reads: "Amateur stations may be used for transmitting international communications on behalf of third parties only in the case of an emergency or disaster relief. An administration may determine the applicability of this provision to amateur stations under its jurisdiction."

This is a notable change from the old wording, which was: "It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties."

Paul says, "A completely new regulation, Article 25.9A, has been approved, a provision which needs no explanation: It reads: 'Administrations are encouraged to take the necessary steps to allow amateur stations to prepare for and meet communication needs in support of disaster relief.'"

It is hoped that administrations will make regulations that facilitate amateurs preparing for emergency situations and providing communications in emergencies and for disaster relief. This was an important IARU objective.

Jeramy Boot, G4NJH

--

Reports from the 2003 World Radio Communications Conference and its impact on Amateur Radio can be found on the IARU website. Its in cyberspace at www.iaru.org. (RSGB)

THE WAR ON TERROR: FCC ESTABLISHES OFFICE OF HOMELAND SECURITY

The FCC has taken another important step in helping to fight the war on terrorism. This as the agency names James Dailey as Director of the its newly established Office of Homeland Security.

Operating under the Enforcement Bureau umbrella the FCC Office of Homeland Security will deal with many emergency related issues including those involving Amateur Radio. It will also oversee the establishment of an Emergency Relocation Board or E-R-B. The E-R-B will deal with the evacuation of FCC headquarters with little or no advance notice as well as overseeing the relocation of selected FCC staff members. More is on the web at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-167A1.doc and http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-236436A1.doc (CGC Communicator)

**

RADIO LAW: AB-1228 SIGNED BY GOVERNOR

California hams now have their own PRB-1 “like” protection. This as Governor Gray Davis signs Assembly Bill 1228 on Monday, April 14 th.

Assemblyman Bob Dutton and his staff shepherded the measure through the Local Government Committees and the floors of both houses of the legislature. It eventually passed without a single dissenting vote. The new law officially recognizes the doctrine of Federal preemption as outlined in PRB-1 over Amateur Radio antennas and their support structures as now being California state law.

In his cover letter to the California Legislature, Governor Davis took time to acknowledge the numerous Californians who are licensed amateur radio operators. He said that each year these volunteers give thousands of hours of service to the state and local governments. He added that since the September 11, 2001 attack on America, the state has also have come to rely on them and appreciate their commitment to the security and well being of all those living in the state.

California is the 20th state in the nation to adopt PRB-1 like ham radio anenna legislation. (ARRL SW Div. Bulletin)

**
RESCUE RADIO: RACES VS. FIRES ON THE 4TH
Radio Amateur Civil Emergency Service volunteers acted as dispatchers for the Huntington Beach, California, Fire Operating Center over the July 4th holiday weekend. Operating from the city's Central Net Training Center, eleven members of the towns own Radio Amateur Civil Emergency Service took incoming fireworks related calls from the public, verified addresses, and dispatched the appropriate fire patrol arson investigator teams.
But thats not all. Two communications volunteers were also assigned as spotters on the roof of City Hall. Two other hams got the experience of a lifetime when they lucked out and were attached to the Huntington Beach Police Department eye-in-the-sky helicopter.
Equipped with digital cameras interfaced to two-way ham radio gear, the field team transmitted live slow-scan television images from their lookout locations to the Fire Operating Center and the Huntington Beach Police Department sub-station command post. Glorria Morrison, who is the city's Emergency Services Coordinator said that everyone is proud to have such an extensive network of dedicated and skilled communications volunteers in Huntington Beach. (KH6WZ)
**

RESCUE RADIO: VARACES PULLS OUT OF VA STATE EOC

Meantime, a big change in emergency communications support has taken place in the state of Virginia. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--
The tug of war between the independent VARACES Incorporated and the ARRL affiliated Virgina state ARES and RACES group has tipped in favor of the ARRL group. This, according to the latest Repeater Journal that reports VARACES State Emergency Officer Tony Amato, KR4UQ, annouced in March that he and other officers were withdrawing support of operations at the state Emergency Operations Center in the city of Richmond.

VARACES had been providing staffing for the E-O-C since 2001. This following its split from the ARRL after the League's Executive Committee removed Lynn Gahagan, AF4CD, from his post as Virginia Section Manager. Amato, who had been Gahagan's S-E-C cited difficulty in working with the states Department of Emergency Management Operations Director Fred Vincent. Amato claimed that Vincent would not make a clear choice between his group and the ARRL. For his part, Vincent had stated a desire to work with volunteers from both ham radio groups.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, reporting.

--

Those leaving have been replaced by a ham radio group organized by the local Richmond Amateur Radio Club. (Repeater Journal)

**

OMARC 2003 TECH CLASSES IN SEPTEMBER

Steve Hajducek, N2CKH, says that the The Ocean-Monmouth Amateur Radio Club of New Jersey will again sponsor Amateur Radio Technician theory classes this fall. Classses beginTuesday, September 16th at 6:00pm and will continue through November. All training and testing will be held at the InfoAge Center in Monmouth County, New Jersey. For more information and directions go to www.qsl.net/n2mo on the World Wide Web. (OMARC)

**

NEW FOR HAMS: GLOBAL OVERLAY MAPPER

Tim Makins, EI8IC, in County Roscommon Ireland says that what is perhaps the most comprehensive set of world prefix maps ever assembeled is now freely available. This, in the demonstration version in his new Global Overlay Mapper software.

Makins says that Global Overlay Mapper represents a new concept in the field of maps for radio amateurs. That the software is packed full of features for all Amateur Radio enthusiasts, including seven Continental maps, 27 Sub Continental Maps, country outlines, 2204 maps of major cities C-Q zones, ITU zones, time zones and much more.

The on-line demo-version comes with with two fully featured maps to view. Online purchasing of the whole package is availasble in four major currencies. Download for use on your own computer and try it at www.mapability.com or www.qsl.net/ei8ic (EI8IC)

**

YOUTH RECRUITMENT: SPECIAL OFFER FROM HAMTESTONLINE.COM

The HamTestOnline website has announced its new Youth in Amateur Radio program, which gives eligible school, scouting and youth amateur radio clubs a 50% discount on website subscriptions for students 18 and under.

HamTestOnline says that its offering this discount to support activities aimed at bringing kids into amateur radio such as the ARRL's The Big Project. For more information on the HamTestOnlineT website's Youth in Amateur Radio program, visit www.hamtestonline.com or send an email to K1RV@hamtestonline.com (Press release)

**

FOR YOUR READING PLEASURE: UNDERSTANDING, BUILDING AND USING BALUNS AND UNUNS FROM CQ

If you're interested in how antennas work but don't know an unun from an onion, Understanding, Building & Using Baluns & Ununs from CQ Magazine should be part of your ham radio library.

The new book by Jerry Sevick, W2FMI, is the successor to his earlier work, Building & Using Baluns & Ununs. The new edition includes new tutorial material, designs and explanations of how and why they work. And like its predecessor, this book provides a unique opportunity to learn about the application of these devices to dipoles, Yagis, log periodics, Beverages,

antenna tuners and countless others.

Interested? You can find out more and place your advance order on line at www.cq-amateur-radio.com. Orders may also be placed by phone -- Monday through Friday -- 9 a.m. to 5 p.m. Eastern time at 1-800-853-9797. (CQ)

**

5 MHZ FOLLOW-UP: OPERATING TRENDS DEVELOP

A follow-up now on what's taking place on the new domestic United States 5 MHz allocation. As reported last week, opening night on July 3rd saw many stations making rapid contacts and cooperating together for an enjoyable operating experience. Now, according to noted High Frequency back-pack operator Bonnie Crystal, KQ6XA, the novelty of the 5 MHz channels has settled down to a usable level for calling and QSO's.

Writing to the q-r-zed dot com website Crystal notes that 5 MHz daytime propagation out to 250 miles is good, although summer noise limits the comfort level when working the 50 Watt domestic stations. Nights bring good D-X and regional propagation, but lightning storms tend to make it harsh in some areas.

But her most important observation is that of a very positive trend. KQ6XA says that hams still are acting like they are on their first date, treating the new channels appropriately and showing off their best operating habits. She says that they are observing the kind of brevity in operating procedures commonly used on a high-level VHF repeater or regional linked F-M system.

Crystal adds her hope that in the future 5 MHz will continue to be an example of the best ham radio good operating techniques and behavior. From listening on the air, many others appear to agree. (qrz.com, ARNewsline (tm))

INTERNATIONAL - AUSTRALIA: 5TH ANNUAL IARU REGION 3 ARDF GAMES ANNOUNCED

The IARU Region 3 Amateur Radio Direction Finding Championships will be held Friday, November 28th to Wednesday, December 3rd in Ballarat Australia.

Ballarat is a large provincial city in the state of Victoria. The Victorian ARDF Group, which is organizing the event says that it is expecting up to 100 participants from member societies in IARU Region 3 including Japan, Korea, China, New Zealand, and Australia. Guest competitors from other IARU Regions are also invited to attend in the world-wide Friendship categories.

This years championships are hosted by the Wireless Institute of Australia, with the WIA Victorian Division sponsoring this important event. Full details including competitor and volunteer registration forms can be found in cyberspace at www.ardf.org.au (WIA)

**

AWARDS: WORK A COLORADO MOUNTAIN

Two new awards are now available for ham radio contacts to and from the 14,000-foot mountains of Colorado. The Summit Award is earned by making contact with 10 or more stations operating from the peaks. The companion Pinnacle Award recognizes operation from 14,000 foot summits, requiring radio operation from 5
or more of the peaks.

Award recipients will receive an attractive, colorful certificate with name, call sign and the number of peaks worked or activated on it. A $5 fee is required to cover the cost of the certificate and any associated expenses.

To get yours, first hold the QSO's and then take your web browser to www.Colorado14erEvent.org. Questions should be directed to Paul Ermisch KB0LUR by e-mail to awards@colorado14erevent.org. And colorado14erevent is all one word. (K0NR)

**

DX

In DX, keep an ear open for GM3PPG stroke P to be active on 160 to 10 meter S-S-B from South Uist through August 8th, including the RSGB IOTA Contest on the 26th and 27th of July. The island counts as EU-010 for the RSGB Istands on the Air awards program. (GB2RS)

And R1PQ will be on the air from the Novaya Zemlya Archipelago through the 25th of July. Activity will be on 40, 20, 15 and 10 meters using CW, SSB, PSK and RTTY. The operation commemorates the British, Russian and American polar convoys between 1941 and 1944 and will have two stations active 24 hours a day. (GB2RS)

**

THAT FINAL ITEM: 73 TO THE W5YI REPORT

And finally this week we pause to bid farewell to a competitor and a friend. This, with word that the W5YI Report ham radio newsletter has ceased publication with it's July 15th issue. Bill Pasternak, WA6ITF spoke with Fred Maia whose call sign appeared on the famed publication and they reminisced about the past:

--

The W5YI Report was the last of the paper ham radio newsletters delivered by the postal system. At one time there were three. The very first was H-R Report from Ham Radio magazine in 1974. It was eventually taken over by Burt Hicks, WB6MQV and renamed the Westlink Report. Hicks ran it for 13 years

before closing down in January of 1995.

The ARRL Letter came into being in 1981 as a public version of the previously private ARRL Directors Letter. It initially dealt only with matters of interest to League members, but over the years has developed into a high quality publication covering every aspect of the hobby with items of interest to members and non-members alike.

W5YI Report was started by Fred Maia, W5YI in the late 1970's. This, as an information provider to the Richardson Wireless Klub near Dallas Texas. Other hams who saw it asked Fred to make it available to them:

--
Audio only at www.arnewsline.org
--

Initially Fred did not charge for those who supplied him with self addressed stamped envelopes. Eventually his subscription list grew to a point where Fred had thousands of envelopes in his home and the numbers were getting out of hand. So he decided to simplify matters by converting to a paid subscription operation.

--
Audio only at www.arnewsline.org
--

And as soon as word got out that Fred was accepting subscriptions, they came pouring in. And the rest -- as they say -- is history.

In 2000, Fred sold his company that included the newsletter, but agreed to stay on for three more years with the W5YI Report. He set this summer for his departure. July 15th was the publication date he selected and that's now past:

--
Audio only at www.arnewsline.org
--

If you are a paid subscriber to the W5YI Report, fear not. Fred has you covered. He has arranged for the remainder of your subscription to be covered by C-Q Magazine based on the value of the remaining portion of your subscription. And if you already get C-Q, your subscription will be extended by the appropriate number of issues.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, with my longtime ham radio friend Fred Maia, W5YI.

--

And what about Fred? He is not going away by a long shot. To find out what he has planned for his own future and his thoughts on the future of ham radio, be sure to tune into this weeks RAIN Report. Its on-line in streaming audio right now at www.rainreport.com and on the phone at 847-827-7246

Gee, isn't 1974 the official date when they stopped making real AM radios
and jammed everything into one 50 cent IC ?

>> There is no better proof that AM-IBOC is incompatible with regular AM
>> radios.

> How would DRM (as tested on the shortwave bands) fare?

Well, there's an very interested website concerning this in New Zealand:
http://www.owdjim.gen.nz/chris/radio/DRM/DRM.html

Scroll down to the reception-results to "2003/06/02 03:50". There's an
audio-sample of a DRM signal and a AM signal.

But do note:
- The DRM signal was a signal from the BBC from the transmittor-site of
RCI of shackville; aimed at North America.
- The person who did the recording lives in New Zealand. (which is pretty
far of for a broadcast from Canada into North America).

- The AM broadcast came from Turkey; althou I don't know where it was
aimed. (apparently, according the scedule of the VOT; it was in Turkish;
so it could be directed anywhere).

So the question is of the person would -otherwize, if this would have been
two AM broadcasts, been able to receive anything anyway.

It's a bit difficult to compair local MW broadcasting with long-distance
SW.

Cheerio! Kr. Bonne.

Forgot to add: the average listenerer age for all stations combined in NY is
41; the average age for WZRC is 38; for WPAT it is 46.

Your forgetting the great "AMAX" push of the late 90's where frequency
response was pushed to 7.5kHz when the AMs were pushed to 1700. In a
digital AM world these radios will be known as "AMUD/HASH" as your favorite
stations will be as clear as mud with a helping of background hash added in
for that perfect insult to injury.

Glad you asked :-) as I've proposed this on alt.radio.digital as IBAC-DRM
(in-band adjacent channel). If WOR were to stop IBOC and switch to IBAC-DRM
at 720 I believe only that channel (720) would be affected, 700 would be
untouched, 690 & 730 would be completely unaffected and, my guess would be,
710 would continue on at 10kHz without any hash on existing AM radios.

If today's situation is acceptable they could go dual-mode and do another DRM at 700, giving them the fidelity heard on www.drm.org on their 40kbit samples. Again, IMHO, same impact on 700 & 720, none on 690 & 730 and normal AM on 710. However, I'm not an engineer and I could be wrong. Sorry if I am but please point out where I am. I'm curious as to how this would be worse than IBOC.

Furthermore, WPAT is highly profitable, and the programs serve specialized communities that may have no other source for such programming.

Under this "hodge podge" standard, every TV station in America qualifies; different programs for different folks at different times of the day. It is just block programming. It was also radio's model during its first 30 years.

> Exactly what is the point
> of broadcasting these zero-ratings, zero-advertiser, zero-listener
> formats in IBOC digital??

You are saying Chinese speakers are less likely to be interested in improved audio quality than non-Chinese. Or are you saying they are less deserving? Less worth?

BTW, most of the brokered shows on these stations are chock full of local commercials for community stores, busniesses and services. Such formats don't show in ratings mostly because Arbityron has no Asian interviewers and does not do ethnic weighting for Asians. The staitons have listeners, advertisers and high billings.

> And as for 710 WOR, most of its 85-year-old
> listeners probably don't even know what "digital" means.

You are off by 26 years. WOR's average age is 59.

WABC's average age is 54 and WCBS-AM's is 52.

I happen to be somewhere in that range and digital is very interesting to me. And to many contemporaries I know.

> Regardless
> of its technical flaws, IBOC might have a chance if they put it on

Again, it appears you are saiying that Asina listeners are of no value, or are undiscriminating in taste or unsophisticated. Which is it?

> Otherwise, it's just being wasted
> on the type of listeners who haven't bought a new radio since 1974.

I bought my last one, oh, 3 weeks ago. It is a combined digital recorder, digital playback and AM FM radio with a computer interface for storing MP3's recorded off the air. A scaled version is being readied for marketing to Rush listeners who want to record and listen later; the average age of them is about 57. So much for your theories about technology. You are talking about the generation that grew up with the first transistor radios, avidly took to the cassette medium and rapidly gravitated to VHS, CD's, and DVDs.

Mike Gallagher's syndication is now handled by Salem, and thus, he's
ended up on a few of Salem's secular conservative stations in addition
to some others. He airs live from 9-noon ET. He's even on a couple
or three Clear Channel stations - but many of those who had him on
went with CC/Premiere's Glenn Beck in that slot instead.

He's popular in places like Greenville/Spartanburg, SC, where he
worked as a local host... but here in NE Ohio, he's carried on two
stations - live on Salem's new Cleveland market secular talker "The
Voice" (WCCD/Parma, ex-religious) - a 500 watt station - and WNIR(FM)
100.1 Kent/Akron, which runs him tape delay weekdays 3-5 AM. In
Mike's live slot, WNIR has two long-running local talk programs that
aren't going anywhere.

>Who are the current top-10 talk shows? It's probably something like

I guess the folks at Talkers magazine would be better off answering
this than me... but I believe ABC Radio's Sean Hannity is up at #2
now. I'm not sure Howard counts, since he's an FM shock jock. Your
#3 above would be George Noory, who is still probably in the top 5
even in Art's absence. Bruce Williams is now with TalkAmerica, but
has basically fallen out of the top echelon of talkers. (I don't know
his affiliate count or listener count these days...but it was somewhat
higher in the peak of his talk radio career with NBC TalkNet.)

>[Moderator's Note: There IS a Mike Gallagher working for Clear Channel
>in Cleveland, but he is a jock, not a talker. The Gallagher in Cleveland
>has been there for years and I've never known him to do talk radio.]

Steven - what station for Cleveland's Mike Gallagher? The Mike Gallagher we're talking about is a different person... a syndicated talk show host. I believe out in your current area, KRLH/590 ("KRLA") San Bernardino probably runs him... probably tape delay nights.

Mike

Both Stern and Imus are considered talk show hosts. Since any music they
play is incidental, they are not jocks.

Per Talkers, the top shows based on cume are:
1. Rush Limbaugh 14.50+
2. Sean Hannity 10.50+
3. Dr. Laura Schlessinger 8.00+
3. Howard Stern 8.00+
4. Michael Savage 6.50+
5. Art Bell - No longer on air 4.00+
5. Jim Bohannon 4.00+
5. Dr. Joy Browne 4.00+
5. Don Imus 4.00+
6. Neal Boortz 2.50+
6. Ken & Daria Dolan 2.50+
6. Clark Howard 2.50+
7. Mike Gallagher 2.25+
7. G. Gordon Liddy 2.25+
8. Glenn Beck 1.75+
8. Kim Komando 1.75+
8. Jime Rome 1.75+
8. Doug Stephan 1.75+
8. Bruce Williams 1.75+
9. Tom Leykis 1.50+
9. Michael Medved 1.50+
9. Bill O'Reilly 1.50+
9. Dave Ramsey 1.50+
10. Bob Brinker 1.25+
10. Dr. Dean Edell 1.25+
10 Phil Hendrie 1.25+
10. Rusty Humphries 1.25+

The stations that do carry Stern are in larger markets, and have very large
audiences.

>> Furthermore, 930 WPAT is a hodge-podge of time-brokered ethnic
>> programming, and 1480 WZRC is all-Chinese.

Don't forget that the New York Metropolitan area often has more people of a particular ethnic group than their naive counties have. The WPATs of the world are the only place where they can find programming that speaks to them. They lost their major outlet (WEVD) to make room for the third all sports station in the city.

New York has a larger Chinese population than most cities have people. I believe WZRC is Korean.

It was a tremendous improvement in the cultural life of the city. The only sports figure I've seen who makes any sense is Yogi Berra. "When you see a fork in the road, take it." How can you go wrong with that?

If you were to see a man on the street patting his male companion on the butt, what would you think? If you saw one of them bent over with the other with his hands between his companion's legs, what would you think? There are no women around. Yet we spend billions to watch allegedly heterosexual men do the same thing on TV.

Strange.

Rich

http://www.publicbroadcasting.net/wxxi/news.newsmain?action=article&ARTICLE_ID=518563

LOS ANGELES, CA (2003-07-07) In a move skeptics might call a deal with the devil, but those involved see as a match made in heaven, public radio station KUSC today is announcing a partnership with the nation's largest radio company, Clear Channel Communications.

KUSC-FM (91.5) relies on underwriting -- those on-air blurbs saying, ``this program is being brought to you by'' so-and-so -- for 18% of its income, with the rest coming from member donations and grants (the station gets about $400,000 of its $5-million annual budget from the Corporation for Public Broadcasting). But station general manager Brenda Barnes said her marketing staff is too small and has too much turnover to drum up those sponsorships effectively. So she has outsourced the job to Clear Channel, which owns eight commercial stations in the Los Angeles area and about 1,200 nationwide.

Thanks for the review!

I don't understand why the just didn't use the same mp3 encoding
bitrates that their RIPFLASH product has.

How is the MW (AM) reception/sensitivity/selectivity?

I'm not aware of many people who have faith in the accuracy of this list.

One PD told me it's partly based on a survey card sent to stations, many aren't returned and what is sent back to them isn't verified with actual ratings. Do the syndicators fill in the gaps? They are not known for being trustworthy in this area.

Talkers relies heavily on ads from the syndication firms behind these programs.

One person on this list went up from last year despite losing his major flagship station. He should have dropped based on the loss. The minnows he picked up elsewhere wouldn't have been a drop in the bucket compared to the

huge hit taken.
The syndicator behind the show is a heavy advertiser in Talkers.

I also really doubt that Rusty Humphries has over a million listeners given the tiny stations that carry him yet huge ads for his show run in Talkers every month.

There are several others who seem to have inflated figures and at least one (who never advertises in Talkers) who I think is understated.

Yeah, why exactly *did* they buy that station? WHK/1220's signal is
directional into the city, but purchasing WCCD couldn't have helped that.

Jesus, give Meyer a break.

He's already identified his employers several times, in response to facetious challenges such as yours.

Hint: his former employer was an ex-Class III-A station, and the frequency was between 1280 and 1480.

Gee, now just how many such ex-Class III-As does NYC (and surrounding communities) have?

1280, 1330, 1380, 1430, 1480.

Of these, only 1430 is not licensed to New York City.

Take a guess.

> Haven, Q104.3 from NYC, and 106.7light FM, Lon GIsland.

106.7 "Lite FM" WLTW has commendable dynamic range for a major-market AC station, but their audio quality is let down by the horrible digital compression artifacts in their music, which is stored as low-quality 192 kbps MP2 files on their computer system. Especially on songs with intense treble content, the "gritty", "sizzly", "twinkly" artifacts are prominent enough that you can even hear them on a clock radio with a 3-inch speaker. On a hi-fi stereo system, WLTW sounds even worse, as the low-end "grunge" and distortion typical of a clipping-happy Optimod or Omnia become obvious.

Of course, commercials sound the worst on just about all radio stations these days, because of the multiple digital compression schemes they are put through. By the time they get on the air, some sound as bad as a 32 kbps MP3 or WMA file.

Stations that play their music direct from CD and their liners and commercials from carts (yes, I said CARTS), and who don't use any digitally compression in the link between their studio and their transmitter, generally have the CAPABILITY to sound the best, as long as their audio processing is up to par and was adjusted by somebody with an ear for crisp, clear, dynamic sound with accurate stereo, no distortion, and no clipping "grunge".

Of course, there's no reason why *AM* stations can't sound great, either, as long as you're using a high-quality radio, such as the popular GE Superadio III or one of the many car radios with AM Stereo. A well-designed, well-processed AM Stereo signal can easily meet or exceed all of the performance specifications of typical FM stations, and many listeners consider it to sound even better than FM because of the different type of processing that AM Stereo stations use. The CRL "Amigo AM" is the best-sounding AM Stereo audio processor, with the older CRL units a close second. The Optimod 9100 series is also very good for AM Stereo, but tends to lean towards maximum loudness instead of maximum quality.

Here's a little MP3 sample of an AM Stereo station using well-configured CRL processing, as received on a $29.99 Sony AM Stereo Walkman. You may laugh, but I think you'll find the sound to be surprisingly crisp and clear, with good Stereo imaging:

http://tinyurl.com/hmtm

Even better are some of the powerful AM Stereo stations in JAPAN, such as 100,000-watt JOLF on 1242 kHz in Tokyo:

ftp://ftp.amstereoradio.com/airchecks/japan/jolfclip.mp3

Of course, AM and FM's audio quality both pale in comparison to *TV* audio, which at least with all-analog broadcast signals, can sound much better, because there's generally no "loudness wars" on TV. If you have a stereo TV or VCR hooked up to a good stereo system, you'll be amazed by just how good it can sound, particularly for music. TV audio also gives you Dolby Surround Sound from many programs, which is virtually unheard of on the radio (the closest thing were the few "Quadraphonic" FM stations in the '70s).

This list, as the heading indicates, is based on cume persons in the most
recent full Arbitron survey prior to its publication. I think it is based on
Summer or Fall 2002. While Talkers admittedly takes some liberty in
"weighing" the numbers, the general picture looks about right.
>

Cume is determined by Arbitron. Not by stations themselves. You may be confusing this with the same pubication's list of "most influential talk shows" which is a horse of a different color, and based on opinion, not cume.

>
> Talkers relies heavily on ads from the syndication firms behind these
programs.
>
And this does not affect the cume of the stations in the ratings. If the cume figures are even close to accurate, the relative position and size of the audience should be reasonably stated.
>
> One person on this list went up from last year despite losing his major

There have been no full ratings for the entire US since Savage lost KSFO. Arbitron ony started releasing Spring, 2003, ratings last week and is only up to the top 10 markets and thier periphery.

> The syndicator behind the show is a heavy advertiser in Talkers.

And the show was on the air through the last fullly published boo, Winter, 2003.
>
> I also really doubt that Rusty Humphries has over a million listeners
given the

It only takes 25 or 30 stations with a cume of 50 thousand to make that figure. It is not hard to fathom.

I work with the syndication of a morning talk show that is on only 7 stations, and yet cumes about 1.6 million. It is really not hard to build that kind of number. It is getting above 4 or 5 million that gets tough.
>
> There are several others who seem to have inflated figures and at least
one
> (who never advertises in Talkers) who I think is understated.

Still, the list is a good approximation.

Rich Wood, who is more familiar with syndication, can probably contribute some clarification.

Actually, out of syndicated talk shows, Imus is nationally in the top 10.

Usually, ties would be expressed as 1, 2, 3, 3, 5, 6, 6, 6, 6, 9. In any case, the rank is theoretically in the right order.

For national shows, cume is the only way of counting.

As another poster mentioned, the methods for adding cume in Talkers are less than scientific, but are reasonably close and do give an idea of how the individual shows rank.

That must be why we have TWO stations with primarily Russian-language programming (620 WSNR & 1380 WKDM), and if you count a simulcast, TWO stations with all-Polish programming (910 WRKL & 1580 WLIM). But yet, the nation's #1 music format, Country, does not exist on the air within 50 miles of NYC. Yes, yes, yes, people say that there simply aren't that many country music fans within the City itself, and they're correct -- but any decent NYC-area signal will cover plenty of the surrounding suburban areas were there *are* many country fans. "Y-107" proved this, with its lousy-ass signal getting better ratings -- even within the NYC market itself -- than what "Barbie Radio" is getting on a full-power heritage NYC FM station.

> They lost their major outlet (WEVD) to make room for the third all sports
> station in the city.

Well, *second* all-sports station, since 620 WSNR is now only "Sporting Radio News" when it feels like it. (Strange, but true -- a "flagship" station that doesn't carry its own network's programming most of the time.)

Umm... not that I disagree with you, but what does this have to do with radio?

However, since you got me thinking, could this be the reason why soccer has never been popular in America... because it's not homoerotic enough? :-)

> Strange.

...but true.

Not around me. When a neighbor installs a dimmer, I offer to buy him a better one.
The upscale Lutron stuff ($30 and up, not their cheaper stuff) has enough filtering
stages to suppress RFI in a neighbor's house. Installed in your own house, they're still
detectable
on the AM band.

I also buy touch lamps.

David, I think the list is miles off, and I know many major market folks who not only agree but get a lot more worked up about it than I do.

The fatal flaw: Talkers doesn't have access to original Arb numbers for these markets!

They rely on station managers and others for the info. A number of managers don't return the form, in which case, do they just guess? And if they do, the figures provided aren't verified by actual Arbitron data.

>> Talkers relies heavily on ads from the syndication firms behind these
>programs.
>>
>And this does not affect the cume of the stations in the ratings

Again, Talkers doesn't have access to the real numbers. One major market PD told me that he could put down any number and it would be taken as gospel by Talkers because there's no way they would know any better.

>> One person on this list went up from last year despite losing his major

I wasn't talking about Savage. He's kicking ass in places where I have seen the numbers myself. The loss of KSFO will be made up for very quickly elsewhere.

>> I also really doubt that Rusty Humphries has over a million listeners
>given the
>> tiny stations that carry him yet huge ads for his show run in Talkers
>every
>> month.
>
>It only takes 25 or 30 stations with a cume of 50 thousand to make that
>figure. It is not hard to fathom.

When you're talking about stations this small, most have nowhere near 50k weekly cume. Many are in unrated markets.

Say they have 10k weekly overall. That would be HIGH in many cases. He is going to have a fraction of that number. You're not going to 1.25m without some major stations on your list.

>I work with the syndication of a morning talk show that is on only 7
>stations, and yet cumes about 1.6 million. It is really not hard to build
>that kind of number. It is getting above 4 or 5 million that gets tough.

It's easy if you're on 7 KGO's, KIRO's, WABC's, KFI's, etc, but I think you need to see just how tiny these "markets" are. 200 of those won't add up to half of a WABC. Ever hear of Paintsville KY? Alturas CA? Austin NV? The Dalles OR? There are talk stations in SMALLER towns than these!

>Rich Wood, who is more familiar with syndication, can probably contribute
>some clarification.

We'll see what he thinks, but I saw him making some of these points about one of the hosts on the list earlier this year.

And their number ranking system makes no sense plus those approximations are spaced pretty far apart at a quarter million at a time.

I'd say the list looks about right to me. at least the top 10. The
most interesting list will be the next one once Michael Savage's major
losses (KSFO and WABC) are factored in. I think you'll se a very
dramatic loss. KNEW offers no competition to KSFO. It'll take decades
to equal the KGO/KSFO influence on San Francisco. KGO just reached its
100th straight book as #1.

>> I also really doubt that Rusty Humphries has over a million listeners
>given the tiny stations that carry him yet huge ads for his show run in Talkers
>every month.

Talk Radio usually has a long growth period. Humphries hasn't been
syndicated long enough, in my opinion, to make significant inroads.

>> There are several others who seem to have inflated figures

Don't ever, ever believe what you read in ads or press releases about
syndicated programming. One small network claims more than 100
stations for a show that's actually on 3. It claims 500 affiliates.
Not a chance.

At WOR I was very careful about reporting affiliates. If a station
carried one show it was one affiliate. If it carried 11 shows it was
still one affiliate.

Some networks would report those 11 shows as 11 affiliates. You can
legitimately add their AQH for all shows but they're still one
affiliate.

Also, watch out for ads that claim percentage increases in audience.
"Buford Pudwallop has increased WXXX's audience by 400%." Generally
they don't tell you that WXXX had a .1 and, even with the 400%
increase barely makes the book.

Since syndication is sold on average quarter hour, that's what I want
to see, not cume, percentage increases or station counts. Show me the
numbers you can actually take to the bank (ad agencies).

Some smart advertisers request "posts" or post audits to make sure of
the audience and that stations actually ran their spots. Stations

return affidavits as proof that they ran the spots. An advertiser will request, let's say, 2 weeks worth of affidavits. The network scrambles to call the stations that haven't returned theirs so they get the most accurate account. That's where the rubber meets the road. If the network claimed 500 affiliates and they can only account for 100 affidavits, something's wrong. The sales rep will then rerun the numbers based on the actual returned affidavits. The advertiser will either feel duped and request additional spots or cancel, altogether.

>most of the time.)

Word on the street is that Paul Allen is desperate to find a greater fool to take the station off his hands. That's why they're brokering it out -- it wasn't making them anything running SNR, and they want to get it billing *something* in order to get a decent sale price. (Is Arthur Liu full up yet?) I think the last SNR O&O that is still running SNR programming full-time is WWZN Boston, and rumors are swirling over programming changes there, too. (And Boston probably costs as much to run as Newark does, thanks to some poor decisions made by a previous Greater Fool.)

We sure have come a long way from the concept of about 80 years ago, when the government figured that 15-20 high-powered AM stations (back when AM was all there was) would be all the broadcasting that the US would need.

I don't believe they're correct. WYNY had some pretty decent numbers
as a Country station, if I remember correctly. I think there's a great
opportunity for Country here. I believe it's a sales and ego problem.
If I owned WLIE on Long Island it would go country in a heartbeat.

I really has more to do with TV. Actually, Soccer is very homoerotic.
They wear skimpy shorts and often get them pulled down during play.
Soccer players seem more physically comfortable with each other than
American players. They don't seem to care what anybody thinks.

Lately, it seems American players have to abuse or rape women to show
their heteroseuality. I was going to say manhood but real men don't
rape women..

It depends on how badly CC wants KNEW to succeed. If they really put some effort (marketing money) behind it, it could have a chance.

But Savage alone won't be enough and most of the rest of the current lineup is probably temporary.

KSFO is in good shape as long as it has Rush but needs some freshening up elsewhere. It just took a big hit in San Jose and other outside markets and a small one in SF. Interesting to see what will happen.

Exactly. Here's another scam: claiming in ads that you are cleared in San Francisco, when your affiliate is in Napa or Santa Rosa, etc., or your "Seattle" station actually in Port Angeles. I've seen this in trade ads.

>Also, watch out for ads that claim percentage increases in audience.

Yes, and what demo are they using? Men 85+? They don't always tell you.

Below certain billing levels, the value of stations like this is based, like lobsters in a restaurant, on "makret price." No sane person would keep the current programming, so billing is not material. The old day formula of 2.5 times billig or 8-10 times BCF are long gone.

Example: inferior, basin-floor limited Class B KFSG (now KXOL-FM) in LA with no billing and a must-change format: $250 million.

KNEW does not cover the entire market, so it is totally crippled at the
offset.

> KSFO is in good shape as long as it has Rush but needs some freshening up
> elsewhere. It just took a big hit in San Jose and other outside markets
and a
> small one in SF. Interesting to see what will happen.

San Jose is an embedded market, as is Santa Rosa. Both are using very small
numbers of diaries, and tend to wobble; San Jose is about a quarter
Hispanic, so that causes the non-Hispanic population figures to be less
reliable. The SF numbers include both of these markets, and no other market
is significant for KSFO... as in producing sales (althought they were up a
tick in Monterey). In fact, in SF, the station was well within its range of
the last 10 books in the just-released Spring 2003 estimates.

KSFO has been 5.0, 4.1, 4.2, 4.0 5.7, 4.0 in the last 18 months in San Jose.
The aberration is the 5.7, not the 4.0. The station did not take a big
hit... it actually got a big kiss 3 months ago. It's in range, that's all.

The SF market is so geographically large, only a couple of stations fully
cover it day and night, and those are AMs like KNBR... even KGO loses a
piece to the E when they go directional at night. KNEW is not one of the
signals that can claim near complete coverage.

So digital is the "devil in the details" with regards to FM.
Interesting. I mean, after all you folks know I am the Anti-Digit!
If the whole world just stopped with CD that would be just fine. Next
thing you know, the BEEP-BEEP of our alarm clocks will have to be
digitally processed! Sad.

_____
As far as TV goes, the music video channels have done exactly what the
major market FM radios have done: dynamically compressed the crap out
of their audio. This wreaks havic on matrix surround decoders such as
Pro-logic, because the phase differential requires significant
amplitude to be effective. So the front-to-surround signals just seem
to "blllend" together, what I call "Velveeta surround"!

Most stations playing movies, OTOH, arent too bad in that respect, and
PPV blows me away!

Arbitron does not publish summaries. Only authorized third-party sites and
some trade magazines do, as long as the market is not under embargo.

David, keep in mind that the main point about KSFO is that it has nothing to worry about as long as it has Rush. I don't want to give the impression it is in trouble, that's obviously not the case.

I do think KNEW has a chance to make a dent in KSFO's numbers, however. It depends on what approach is taken with KNEW. And remember, KSFO's signal is weak in many outlying areas as well.

Many talk stations held on pretty well to gains in the winter book with the new spring numbers, so the "kiss" may not be fleeting nationwide.

What a bunch of clueless retards. They utterly fail to properly confirm the subscription at allaccess by verifying the email address, and they send the initial "confirmation" email (and I use that term loosely) in pure HTML that I, as a properly clued in sysadmin, reject.

Hell, allaccess' ratings don't even have as much info as rronline.com! The R&R site goes back further and includes ratings for stations below a 1.0.

Allaccess is a joke.

KNEW is in Oakland and simply doesn't have the signal the competition
has. To beat KGO and KSFO they'll have to come up with an entire
lineup of Limbaugh quality talent. As a former ABC employee I'm
willing to bet that the San Francisco stations are left alone. No
corporate interference, no voicetracking, no corporate contests, etc.
Both Mickey Luckoff, the GM and Jack Swanson the OM/PD are brilliant
programmers and marketers. They haven't been beaten on KGO for 100
books (25 years).

>>Don't ever, ever believe what you read in ads or press releases about

I have no idea. This also happens with FM but IMHO isn't as noticeable due to the nature of frequency modulation. I also doubt FM Extended Hybrid Mode would have as detrimental an effect on its host as AM has on its (telephone quality and hash on most AM radios).

If anyone can post an audio sample (with a link here) of an IBOC-AM using an average AM radio please do so.

1579. Most Powerful AM Radio Stations

Newsgroup: rec.radio.broadcasting
Date: 2003-07-24 16:19:27 UTC
From: katwofoxx@yahoo.com
Message-ID: <bfp0uf$28m$1@xuxa.iecc.com>
Source record: 7407

I always have wanted to know how much power are stations allowed to operate.
I remember while living in Mexico, listening to XEWA 540AM, they used to operate at 150,000 watts day and night, but now they are less than that, probably 5000 watts or something.
XEW 900 is well known, they use 250,000 watts and say they cover most of North America.
American stations use at most 50,000 watts and they are forced to lower their power at night, while at the same time, one station, I think is in Mexico City, goes from 5,000 to 150,000 at nights.
Any explanation would be appreciated and one question,
Is there any pros and cons of running that much power?
How about other countries, whats the most power a station can have?

>>
I always have wanted to know how much power are stations allowed to operate.
>>

This is specified by international treaties. For North America, this would be the North America Regional Broadcast Agreement (signed 1939, effective 1941), and the subsequent U.S.-Mexico Broadcast Agreement and U.S.-Canada Broadcast Agreement.

For Class I-A stations, only, the wording was stated to be "at least 50,000 watts" because Mexico was already using in excess of 50,000 watts.

For all other Class I-B and Class II-B stations the wording was stated to be "50,000 watts".

However, Mexico subsequently authorized 100,000 watts, during daytime only, for stations not otherwise entitled by treaty to use more than 50,000 watts.

In fact, for some stations which were limited by treaty to 10,000 watts, Mexico also allows 100,000 watts, during daytime only.

The much later "Rio" treaty further modified the rules, and allowed for the first time Mexican and Canadian operations on U.S. clear channels, as well as unrestricted operation of U.S. stations on Mexican clears.

(The earlier NARBA treaty had already authorized U.S. operations on Canadian clears, provided the stations were more than 650 miles from the U.S.-Canadian border).

>>
I remember while living in Mexico, listening to XEWA 540AM, they used to operate at 150,000 watts day and night, but now they are less than that, probably 5000 watts or something.
>>

XEWA was not the original Class I-A occupant of 540.

By 1941's NARBA, 540 was given to Canada as a Class I-A.

By the mid-1950s U.S.-Mexico agreement, 540 was added to Mexico's Class I-A list, and that frequency was assigned to San Luis Potosi, at 150,000 watts.

IIRC, XEWA is still operating with 150,000 watts.

Certainly, it is "notified" and authorized to do so.

>>
XEW 900 is well known, they use 250,000 watts and say they cover most of North America.

>>

NARBA also gave the U.S. night time priority on 800 and 900 in Alaska, although one of those stations has been changed to a U.S. clear channel on account of excessive interference from Canada.

Insofar as the U.S.-Mexican treaty, the U.S. includes all states and territories, so Hawaii, Alaska and P.R. are included, even though these states and territories really can't interfere with Mexico's "notified" operations.

However, Canada, not being contiguous with Mexico, used all Mexican clears for whatever purpose it wanted. It's just that Canada could not "notify" any Class I stations on those frequencies.

Additionally, the U.S.-Mexican treaty prohibited the U.S. from operating any station on Mexican clears at night, and also prevented any day operations greater than 1 kW. Unless specifically excepted by treaty, which covered the 50,000 watt DA-1 operations in Cleveland (1220) and New York (1050), and the 5,000 watt operation in Alaska (800 and 900).

>>
American stations use at most 50,000 watts and they are forced to lower their power at night, while at the same time, one station, I think is in Mexico City, goes from 5,000 to 150,000 at nights.
>>

U.S., Canada and The Bahamas have a 50,000 watt limit.

Unless a specific station is "notified" for lower power at night, the same power may be used night as well as day.

Class I-A and I-B (now Class A) stations are permitted a flat 50,000 watts (more for Mexico, under the conditions described above).

That is, unless the Class A is "grandfathered" at a lower power, say, 10,000 watts.

There is only one U.S. Class A station which is so grandfathered.

There is one Canadian stations which is so grandfathered (1550).

There are three Mexican stations which are so grandfathered (1000, 1190 and 1550).

>>
Any explanation would be appreciated and one question, Is there any pros and cons of running that much power?
>>

Lots of power was needed to cover "underserved" areas in decades past.

Lots of power is now needed in order to overcome all the man-made interference from the gazillions of switching power supplies used in computers and entertainment appliances.

With "Rio" stations which were formerly limited to 5,000 watts were allowed to increase to 50,000 watts.

Practically speaking, this only applies to "historical" Class III-A stations (KJR, KMJ, KKOL, KXTA, etcetera, etcetera, etcetera) as these Class III-A stations received better protection then Class III stations of inferior priority (Class III-B, e.g.).

>>
How about other countries, whats the most power a station can have?
>>

In Europe, there is/was a 1,400,000 watt station.

But, because of unauthorized use by other countries (Cypress and Israel, IIRC) the 1,400,000 watts is largely wasted at night.

Doubt it. They paid money to get consent form the Utah X-band station to get
it. It stands for "El Sol 96.3" which is the station name; in Mexico, "X" is
pronounced almost like an "S."

150,000 day and night.

> XEW 900 is well known, they use 250,000 watts and say they cover most
> of North America.

They say nothing like that. The signal had been dropped to 100 kw for many years, but due to high man made interference in Mexico City, they upped it again to provide good coverage of the Mexico City metro area.

> American stations use at most 50,000 watts and they are forced to
> lower their power at night,

Some US 50's are 50 day and night; a few are non-directional all hours, others go directional at night, others are directional at all hours. And then there are many 50's in the daytime, that reduce to lower levels at night... as low as 250 watts!

>while at the same time, one station, I
> think is in Mexico City, goes from 5,000 to 150,000 at nights.

Not so. In the 60's, XERF in Cd. Acu&#65533;a, Coah., on 1570 only operated at night as it's business was mail order and preachers. This was an exception. It is now 15 kw day and night.

No Mexico City AM has higher night power than day power.

> Any explanation would be appreciated and one question,
> Is there any pros and cons of running that much power?
> How about other countries, whats the most power a station can have?

Mexico: 250 KW. Most of Central America: 50 kw.
Colombia: 250 kw
Venezuela: 1,000,000 watts.
Chile, Argentina: 100 kw

Many European nations have 1,000,000 stations. Higher power is used in several of the Arab nations.

Not all US 50kW stations reduce power at night. The old clear-channel
(not to be confused with Clear Channel) stations such as WBZ, KDKA, etc.
run 50 kW all the time (except when doing transmitter or tower maintenance,
etc.).

>Any explanation would be appreciated and one question,
>Is there any pros and cons of running that much power?

Pro: Bigger coverage area.
Con: Bigger electric bill.

Not really much more to it than that, IMO.

The market extends from north of Santa Rosa to around Campbell and Gilroy to the south, and east halfway to Stockton and Sacramento. Most people would say that a 10 mv/m signal is required to regularly and consistently overcome manmade interference in large metros; the KNEW 10 mv/m signal does not come close to covering the market in the daytime, and even less at night. Even with the CP, they will miss a large part of the market, and continue to be essentially unusable from San Jos&#65533; south.

As the author of what you term the Bakersfield argument, I contend your argument fails because you (a) assume the station is priced correctly and the buyer did not over-pay -- which is a common phenomenon in broadcasting -- and (b) fail to take market size into account. Los Angeles is so big that a station with a tiny percentage of the audience is still reaching so many people that it can be profitable.

In smaller markets that just isn't so. Divide up the pie in Bakersfield thinly enough, and nobody makes any money. Without consolidation, only the top-ranked handful of Bakersfield's 30+ signals could be operated profitably today. Only three or four of Bakersfield stations can be considered full-service operations under the loosest definition of that term, and they're all in clusters of three or more signals. A stand-alone, fully-staffed all-news station with a 2 share in L.A. can be hugely profitable. A station with a 2 share in Bakersfield pretty much needs to be automated, and the rent had better be cheap.

The Los Angeles metro is listed by Arbitron with a population of 10.407.400, approximately 21 times the size of the Bakersfield metro. So a station that is really nothing but a "stick" selling for $250,000,000 in Los Angeles, is roughly analogous to such a Bakersfield station selling at between $11 and 12 million, which would be high (my employer sold a full power TV station a few years back for about that much), but I suppose it's possible. Of course, having paid out that money, you'd have no guarantee of ever making it back. And if you did, it would mean you really did invent a better moustrap and put somebody else out of contention.

Band-scans up and down across 930 WPAT's IBOC signal (notice how it
nearly obliterates 920 WPHY and hisses in the background of 910 WRKL
and 950 WPEN):

ftp://ftp.amstereoradio.com/uploads/wpatiboc.mp3
ftp://ftp.amstereoradio.com/uploads/wpatscn2.mp3

Switching back and forth between 1530 WSAI and 1520 WWKB, when WSAI
was testing IBOC at night and WWKB happened to be broadcasting "dead
air", making the "hash" from WSAI even more noticeable (skywave
reception from New Jersey):

ftp://ftp.amstereoradio.com/iboc/wsaiiboc.mp3

> to "blllend" together, what I call "Velveeta surround"!

The last time I had cable TV, there was an inexcusibly large
difference in loudness and audio quality between the channels, and at
least 1/4th of them were in MONO.... including MTV!

And don't forget that the vast majority of today's music is highly
compressed, clipped, and distorted to begin with, on CDs, and of
course, encoding it into MP3/WMA/etc. makes it even worse. Even
supposedly 'soft' and 'relaxed' songs like Norah Jones' hit are
produced and mastered with highly limited dynamic range and clearly
audible clipping distortion (for example, during the 'loud' bridge
sections of "Don't Know Why" -- that grungy distortion in Norah's
voice is that way *right on the CD*).

Also, for the past decade or so, "Digitally Remastered" has become
nothing more than an euphemism for "highly equalized and compressed".
Even supposedly "pristine" albums like Pink Floyd's "Dark Side of the
Moon" have been subjected to this auditory mangling, all for the sake
with making them more "competitive" with the consistent loudness of
today's music. Alas, this is the reason why people are still buying
turntables... when you have the choice between a dynamically superior
original LP and a smashed-and-trashed CD re-release, of course the LP
is going to be preferred, even by people who aren't astute enough to
know the real reason why.

BTW, if you've wondered why digital photographs, even at high
resolutions, just don't look as natural and realistic as traditional
film photography, that's because of the limited VISUAL dynamic range
of the digital camera. This effect is componded by the fact that most
digital cameras store their pictures in JPG format -- which is a form
of "lossy" compression, just like MP3 for audio.

Near as I can tell, assuming local WQSX is still running it, FM IBOC
is not nearly as objectionable, at least on a car receiver with
average adjacent channel rejection and capture ratio. It hasn't made
an impact on the DX-ability of the adjacent channels, at least from 30
miles away. It has no impact on second-adjacents that I've noticed.

As the FCC will tell you if you make this sort of complaint, the FCC does not and cannot guarantee reception of any station, regardless of power output, distance to the receiver or interference.

> American players. They don't seem to care what anybody thinks.

Rubgy, too... I'd love to hear the radio play-by-play of what the article below describes. It's a strange world, isn't it? American athletes go around raping and killing people, while Aussies engage in foreplay with their teammates right on the field. And was nobody suspicious when they saw this guy carrying around a tube of KY? :-)

Rugger Resigns Over Rectal Fouls
Matt Alsdorf, Gay.com / PlanetOut.com Network
Wednesday, April 4, 2001 / 05:51 PM

Digital penetration of opposing players while on the field was deemed "unsportsmanlike interference" by Australian rugby's governing body, and the offending player has been forced to resign.

An Australian pro rugby player who resigned this weekend after being caught sticking his finger in opposing players' anuses during a match is now considering taking legal action against the New Zealand Cancer Society (NZCS) for using his picture in an advertisement for prostate cancer checks.

John Hopoate, a winger for the Australian National Rugby League's West Tigers club, received a 12-week suspension from the NRL judiciary last week for "unsportsmanlike interference" with three North Queensland players whom he digitally penetrated. The Associated Press reported that the resignation came after team management met to consider calls for his removal.

Hopoate said he believed his decision was in the best interest of the club and its fans, according to Agence France Presse. "I sincerely regret that anything I may have done has caused stress, anxiety and disappointment to everyone involved with the West Tigers," AFP quoted Hopoate as saying in a statement he released through his manager.

NZCS took out an advertisement in New Zealand's The Dominion newspaper with a color close-up of Hopoate apparently sticking his finger in North Queensland captain Paul Bowman's anus. According to the Australian Associated Press (AAP), the accompanying text reads, "A bloke's chances of developing prostate cancer increases as he gets older. If you have symptoms that you're concerned about, consult your local doctor. It won't hurt a bit -- promise."

The AAP reports that Hopoate and his manager say they were not consulted by NZCS about use of the image and are "looking at the legal ramifications." NRL chief executive David Moffett said the ad was "appalling."

But NZCS's Roger Taylor was quoted by New Zealand's One News as saying, "It's a difficult message to get across for a difficult disease ... and we felt our normal health promotion doesn't work that well and that this was a topical issue that would perhaps get it out there."

According to AFP, Hopoate, a 27-year-old teetotalling Mormon father of five, had faced the NRL's disciplinary commission seven times in the past four years, primarily for fighting.

p.s. Relevancy to this thread: Due to its 8.5-second digital encoding/transmission/decoding delay, IBOC is incapable of broadcasting live sporting events in real-time. And since the analog audio is also delayed to match, spectators who bring a transistor radio to the game will hear the play-by-play of what happened 8.5 seconds ago!

> PS you mean > http://tinyurl.com/hmtm to be > http://tinyurl.com/htm ,
> right?

No. TinyURL abbreviates long URLs into four-letter codes.

For example, the URL used by Google to let me post this message is:

http://posting.google.com/post?cmd=post&enc=ISO-8859-1&msg=bfmjg0%24f7v%241%40xuxa.iecc.com&gs=/groups%3Fdq%3D%26hl%3Den%26lr%3D%26ie%3DUTF-8%26selm%3Dbfmjg0%2524f7v%25241%2540xuxa.iecc.com%26rnum%3D4

Feeding that mess into TinyURL resulted in the creation of this
shortcut:

http://tinyurl.com/i0b6

There are a handful of 2,000,000-watt stations in the Middle East and I believe at least one in Europe. I know of nothing more powerful.

Is that megawatter in Venezuela operating? I've seen it mentioned from time to time but always as "future plans".

David Eduardo <radiodavid@yahoo.com> had written:
|
| The market extends from north of Santa Rosa to around Campbell and Gilroy to
| the south, and east halfway to Stockton and Sacramento. Most people would
| say that a 10 mv/m signal is required to regularly and consistently overcome
| manmade interference in large metros; the KNEW 10 mv/m signal does not come
| close to covering the market in the daytime, and even less at night. Even
| with the CP, they will miss a large part of the market, and continue to be
| essentially unusable from San Jos&#65533; south.

By the way, Campbell is essentially an enclave surrounded by San
Jose, and is in a location that's relatively central to the rest of
Santa Clara County. The probability of signal problems in Gilroy
makes a little more sense to me; it's almost to San Benito County.

But, again, the question remains: what parts of the market is KNEW
missing? Or to be more precise, which parts of which counties?

Heck, the eastern border of the southern upside-down panhandle
of Alameda County is at the I-580/I-205 interchange. Until recent
years, that would have been a part of the Bay Area only by virtue
of the fact that California counties are geographically large
(there are only 58 of them) compared to counties in many other
states. While not in the Bay Area, I always wonder how markets are
parsed into counties such as Nevada and El Dorado, which are split
in two by the Sierras. (Probably this is more a factor for TV than
radio.)

Advertising in this country would be so much more fun if we had the guts to do such things. The act was done in public, so use it in an ad for a good cause. It was probably even broadcast, so it's no secret.

If I were the "invader" I'd let it drop. Imagine the press coverage a lawsuit like that would bring. I'd send the Comedy Central news team to cover it. Or is it more properly "uncover" it?

Salespeople and advertisers would learn a whole new meaning of the term "insertion order."

That station doesn't have a DA. Might it be possible that KIQN once
had a DA-N and then gave it up?

Does nighttime coverage really matter any more? How much radio
listening is there at night (after PM drive)? And, more to
the point, is that an audience worth selling to?

I wonder if a good, solid cost/benefit analysis has really been
done for stations with limited coverage that are still staying on 24/7.
I suppose the costs these days are marginally low enough that a
small amount of revenue would make it worthwhile.

XEW 900 is listed at the Secretaria de Comunicaciones y
Transportes(www.sct.gob.mx) with 250 kW, along with other 3 more
stations with more than 50 kW(XEB 1220 100 kW, XEEP 1060 100kW, XEX
730 100kW). I remember listening to XEG 1050 from Monterrey, the
signal sounded better than some locals and but only at nights.
Its a shame that the Secreataria doesnt provide coverage maps for the
stations, it would be nice to see a coverage map for a 100kW or a
250kW.
Is there a way to make a map with the Effective Radiated Power, Height
above Avg. Terrain and Antenna Pattern?
XEW 900 broadcast over the Internet at www.esmas.com/wradio. The site
used to stream a few other FM radios, it dropped them and now only has
W Radio and other Pop station.
The promos of XEWA 540 used to say the covered North Mexico and the
South of the USA, and they fed their signal to regular satelite, you
could hear either a Televisa channel or the station. Satelite radio?

The most recent HTML-ized version is at
http://www.old-time.com/otrfaq.html

---------------------------------------------------------------------
Table of contents:

Q01. What is "OTR"?
Q02. You haven't mentioned OTR music, why not?
Q03. Where can I buy recordings of old radio shows?
Q04. Which vendors have (lower prices) (higher quality) (faster
response)?
Q05. Are OTR shows rebroadcast? If so, where and when?
Q06. I remember a great show called (x). When was it aired?
Q07. Are there any books about OTR?
Q08. Does anybody trade tapes of OTR shows?
Q09. What's this stuff about Copyright?
Q10. How can I get my local radio or TV station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the plots or
themes of OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
```

Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. What ever happened to the person that played [insert character] on [insert name of show]?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. Where can I buy 1970s CBS Radio Mystery Theater programs?
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at\ the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?
Q42. Where can I find OTR to download?
Q43. I bought some CDs with OTR MP3s. Some of the programs sound pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html

---

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

Just to get a little perspective in this
controversy, copyrights do expire. Under the old
copyright law, a copyright was good for 28 years
from the date of first publication, renewable for
another 28 years, for a total of 56. Under the 1976
act, those copyrights were extended to 75 years,
provided they were renewed. Copyrights under the new
law, which took effect on 1 January 1978, are good
for the life of the author plus 50 years. Copyrights
on anonymous works, works made for hire, etc. are
good for 75 years after first publication.

So, since otr has just barely been around for 75
years, little or none of it is in the public domain
yet by reason of having been around for a long time.
The question of what constitutes publication, and
the fact that sound recordings could not be
independently copyrighted until the new law took
effect add additional complications.

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

The days of radio being ruled by the artisans is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors

on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.

The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.

Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!

Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!

You need to keep in mind that some types of stations are more likely to air OTR than others. If your local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog)

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

Also check Frank Passage's logs at the old-time WWW site; most contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The major OTR WWW sites all have links or pointers to each other, so you can explore many topical areas within old time radio. Good places to start exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

An excellent database of OTR-related WWW sites, with an explanation of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very popular and freely available electronic newsletter, delivered nightly. Its purpose is to foster general discussions about the hobby of collecting, preserving and listening to OTR. To subscribe, send an email

TO: old.time.radio-request@oldradio.net
SUBJECT: subscribe
(The body of the message is ignored)

Q18. What ever happened to the person that played [insert character] on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home pages of several well-known OTR personalities. Also check the Where Are They Now pages at www.440int.com.

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in

the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: andy@vintagebroadcasts.com (Andy Blatt)

I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But

not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request

to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it is
played. I tried it. Although temporary, it does indeed work! I'd
recommend it for those squeaky tapes that you wish to re-record onto
newer reels.]

Richard Fish (lodeston@bluemarble.net) also left this helpful info
about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the magnetic
particles to the plastic backing -- has absorbed water
from the air. The water molecules actually make the tape
expand a bit, so it doesn't fit the machined tape-guides
properly anymore; and they can interfere with the
lubrication impregnated into the tape; and it is theorized
they can even interfere with the polished smoothness of
the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70s, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-'80s. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono news group, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) - Focuses on radios, phonos, and related materials made before the 60s - Avoids "ham" radio gear (the Boat Anchors group covers that) - Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through the old-time WWW site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

---

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios.

Some readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Some pointers to instructions on how to build them are at http://www.old-time.com. Also, Dan Hughes (dan@soltec.net) left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, visit my website
at http://members.soltec.net/~dan

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164

Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you.

Here is a list of some of the WWW sites for modern audio drama:

Jim French Productions (Imagination Theatre):
http://jimfrenchproductions.com/
Atlanta Radio Theatre Company:
http://www.artc.org
ZBS Media:
http://www.zbs.org/zbs.html
LodesTone Productions:
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop:
http://www.mrtw.org/mrtw

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system. There is also a news group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR shows (news groups are notoriously inefficient at transferring large binary files, however).

You can select from many moderate-length soundbytes at Jerry Haendiges' Preview Listening Lounge at www.otrsite.com/ra/preview.html
---

Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.
[Polyline has a website at www.polylinecorp.com, and their new address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A27. Yes. Although my WWW page is best viewed with Netscape or Microsoft Explorer, most pages render well with LYNX and associated reader software.

Blind visitors who depend on DOS-based software to access the net, or who use a reading program to audibly display their computer's output might be interested in a program called "Nettamer". The Nettamer home page is at www.nettamer.net/

Q28. I am interested in re-creating some OTR drama. Where can I get scripts?

A28. Check your local or national OTR clubs. Many have a "print library" that includes scripts. You can also point your browser at the University of Maryland's script page, at www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

One excellent source is the book. "One Hundred Non-Royalty Radio Plays" compiled by William Kozlenko, Greenberg Publ of NYC 1941. It's certainly out of print now, but many libraries would have a copy. I bought mine at a used book store a few years ago. The 100 radio plays in the book include adventure, mystery, fantasy, comedy and historical. Most were originally produced on educational stations in the 30s. Authors include Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages dedicated to on-line OTR scripts at http://www.genericradio.com
---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970s & early '80s when most collectors traded on open reel tapes which were quarter-track mono -- there were different (separate) programs on left & right channels. This allowed 6 hours of shows to be placed on one reel. Unfortunately, many collectors would duplicate L & R shows simultaneously. Depending on the quality of the equipment (and its condition) it was common for one program to bleed into the opposite channel...especially if the collector was careless and allowed over-modulation.

Crosstalk results when a tape is recorded (or played back) on a machine with mis-aligned tape heads. It can also occur when trying to record over a 1/2 track recording with a 1/4 track machine with dirty or mis-aligned erase head. You usually will hear another program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or track at a time. As for crosstalk, make certain your machines are kept in proper alignment. Use a high quality BULK ERASER if you re-use old tapes... this is especially true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws once they are there.

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please get software and instructions from your favorite Internet Service Provider or shareware/freeware software site, or connect to www.old-time.com/irc.html for basic instructions.

Q31. I'm looking for copies of old "CBS Mystery Theatre" radio programs, primarily from the 1970s era. Does anyone know where I can call or write to obtain such items? I'd like to purchase a complete set if possible.

A31. Jack French (OTRpiano@erols.com) left the following information:

You most certainly do not want a complete set of this series, because you couldn't afford it. There were 2,970 shows aired so even if you could find them for a buck an episode, you'd have to cough up three Gs. The series ran from 1-6-74 to 12-31-82 and since it came so late in

radio history, every episode was recorded by somebody.
All episodes are still copyrighted, and CBS enforces
their copyrights. Therefore no dealer is going to list
them, and collectors are reluctant to sell or rent them.
Your only hope is to find some way to get copies in a
fashion not in violation of copyright law.

Editor's note: By my count, there were about 1400 different CBSRMT
shows. The rest may be duplicates.

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since
many news servers ignore alt.groups, you may need to contact your ISP
to get that news group listed locally. See
www.old-time.com/newsgroups.html for more information. Also try
www.groups.google.com to sample some of the messages.

Q33. OTR network shows were usually heard at the same local time, no
matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show
from the studio to transmitter sites. The show was done live at least
twice - once for the East coast, once for the West. After Bing Crosby
spearheaded the introduction of recorded shows (about 1948), the East
coast show was recorded for later telephone transmission to the West
coast.

Q34. I'd like all the information there is about [insert name of OTR
show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed
on pieces of processed dead tree) written about what we now call
"OTR". See answers A7 and A37. If you would like to contribute an
original article about one or more facets of OTR, many of the
webmasters of on-line OTR sites would be happy to consider archiving
it.

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
* Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
* Radio Classics Live, Brockton MA (May)
* Annual Lum and Abner Society Convention (June)
* REPS Radio Showcase (June)
* Friends of Old-Time Radio (October)
* SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been

converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material.

Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.

Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees, Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William

L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter.

You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)

It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money

than with the entity which has done more for the physical
preservation of broadcasting history than any other organization
in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless
to say, you may not make any commercial use of the
recording in whole or in part -- and you had to sign a contract
to that effect in order to get access to it. Commercial
permissions are a whole separate case.

Like I said, this is not for everyone -- but if you're working
on a serious project, it can be a valuable resource for getting
access to material that simply isn't available anywhere else and
which is unlikely ever to be released on the commercial market.

Elizabeth

Q42. Where can I find OTR to download?

A42. The number and location of FTP sites that provide OTR changes
more rapidly than does this FAQ. Your best bet is to check the
backissues of the various alt.binaries.sound(s).radio.oldtime groups
on USENET.

Hint: point your browser to www.groups.google.com and try your search
from there

Q43. I bought some CDs with OTR MP3s. Some of the programs sound
pretty bad. Why is this, and how can I make them sound better? If I
make an audio CD from the MP3s, will it be better?

A43. Wow. The answer to that question could fill a whole FAQ by
itself. I'll try to keep it short.

Poor-sounding audio can be due to several causes. The audio on the
tape from which the MP3 was made could have been poor, or the person
that converted the analog audio to digital audio could have done a
bad job. The statement: "remastered to digital audio" doesn't mean
much, if the person doing the remastering does not pay attention to
enhancing the source material.

MP3 and other digital compression techniques are lossy. That means
the encoding process throws away data in order to make the file
smaller. Although digital copies may not have noticeable loss,
re-encoding, or encoding in a different digital format will lose even
more data. Example: If somebody took a 32/22 MP3 and encoded it as a
64/44, it would sound no better than the 32/22, since data was lost
in the original encode. Similarly, making a 128/44 MP3 out of an old,
high-compression RealAudio(R) file would not improve the sound. The
advantage to the higher bitrate is the possibility that the new
encode will play in a larger number of MP3 players.

Some people record their RAs or MP3s onto cassette, and then trade the cassettes. At some time in the future, somebody else might try making an MP3 from the cassette. This analog - digital - analog - digital conversion results in a very quick deterioration of the sound because of the lossy compression I mentioned before. The new encode is a "sample of a sample". The sound deteriorates much more rapidly than does the "generation loss" experienced when duplicating tapes.

How can one tell if an MP3 was originally made with a high bitrate, or merely upsampled to a high bitrate? Listen to it, and compare it with a low bitrate sample. After all, the objective is to get as good an audio rendition as possible.

NOTE: URLs mentioned in this FAQ may have changed. For the latest information, point your browser to www.old-time.com, or join one of the internet mailgroups mentioned above. Email addresses listed here may have changed as well.

I think it was a low-power daytimer that upgraded to the best it can get.

> Does nighttime coverage really matter any more? How much radio
> listening is there at night (after PM drive)? And, more to
> the point, is that an audience worth selling to?

In LA, 53.3% of all persons 12+ listen to radio in the 7 to Midnight time
period.

Keep in mind that in deep winter, sunset may happen in the middle of
afternoon drive and sunrise late in morning drive. That means a daytimer in
a middle latitude may operate from 6:30 AM to 4:45 PM. So night operation is
critical.

> I wonder if a good, solid cost/benefit analysis has really been

> small amount of revenue would make it worthwhile.

Since overall ratings performance and pricing are based on 6AM-Mid, Mon-Sun,
you don't see many daytimes doing well anywhere.

It tested briefly on 1240 (odd frequency) and never reappeared. It was some
president's boondoggle. I was told the transmitter was the same one that
operated in Costa Rica (TIRICA-625) for a few weeks in about 1971.

100 KW or more, either daytime or fulltime, are:
XEW, XEX, XEN (100 day, 20 kw night), XEEP (day @100 only), XEROK, XEWA, XEG
and a permit for days at 100 for XERFR. Oh, 640 in Hidalgo owned by El Chino
Wong is also licensed at 100 kw days.

> Is there a way to make a map with the Effective Radiated Power, Height
> above Avg. Terrain and Antenna Pattern?

HAAT is not applicable to AM. Local coverage is determined by power, ground
conductivity, and frequency. Variations in conductivity would mean that a
station might get much farther in one direction than in another, even if it
is nondirectional.

Directionals are far less common in Mexico than in the US, which is why you
see more stations that are 10,000 watts daytime and 250 watts at night. In
Mexico City, which is big and electrically noisy, stations have discovered
that they need 50 kw to adequately cover the market; many have put
transmitter sites to the north or NE of the city and are shooting 50 to 100
kw over the zone. 830 AM is the next one planning to go to 100 kw. Some,
like XEABC-760, have gone as high as they could with intermediate level
power... in this case, 70 kw. And stations that did very well with 1 kw in
the 60's like XEBS-1410, now have 25,000 watts.

1613. Ken Hamblin?

Newsgroup: rec.radio.broadcasting

From: "G.T TYSON" <gtyson@nc.rr.nospamcom>
Message-ID: <bfsc88jvu1@xuxa.iecc.com>
Source record: 7441

Anybody heard anything about the current status of the Ken Hamblin
show? Our local news-talk AM does not carry his show any longer.
I called the station and they gave me a vague, rambling explanation
about some kind of "contractual dispute" with his syndicator. Not that
it would ruin my life if his show was cancelled on that level, but has
he been discontinued in any other markets?

gtt

<etc,>

Two comments -

1) Didn't PJB, 800 khz, Netherlands Antilles (Bonaire) run 500Kw? Do they still do so today? I used to be able to pick them up in Massachusetts as long as I turned the loopstick away from CKLW in Windsor, Ontario and CKGM in Montreal. It carried Radio Nederland broadcasts. However, the local AMer (now WCEC or something like that) is allowed to go with something like 77w at night. Not a show stopper to catch DX if you're 100 miles from its transmitter but certainly is if you're ten miles from it.

2) Of course, there are a lot of stations that are "50Kw" AMers. Here in Boston, I can name four = WWZN - 1510, WBZ - 1030, WRKO - 680 , and WEEI - 850. However, all except WBZ have severe pattern restrictions and broadcast lobe restrictions that their signals -- except for WBZ -- are beamed out toward the ocean and their signals don't go west. Even WBZ has a lobe dampened, IIRC, to protect a station in Wyoming.

I believe they switched to a lower power (like 100-250kW) and a directional antenna pointed southward. (I could hardly hear them when I was in Puerto Rico back in Dec 2001. In years past, I'd visit the South, say about 50 miles south of Memphis, and hear PJB blasting away).

>>
Even WBZ has a lobe dampened, IIRC, to protect a station in Wyoming.
>>

Bzzzzzzzzzzzzt!

Wrong answer.

WBZ is an ex-Class I-A ... the highest possible class of station, and clearly superior to the Wyoming station, which is an ex-Class II-A.

WBZ has a total null towards 90 degrees, and sends its maximum power power due west, towards Wyoming.

As a station of lesser class, the Wyoming 1030 protects WBZ, and not vice versa.

The reason WBZ operates a DA-1 is to avoid losing most of its power over the North Atlantic.

WTAM/1100 in Cleveland, WWL/870 in New Orleans, and WNBC/660 in New York once used a similar strategy.

But, now only WBZ and WWL, of all U.S. ex-Class I-As, utilize DAs.

Four of the U.S. Class I-Bs operate ND: KNX/1070, KNBR/680, WGY/810 and KOA/850.

So, twice as many ex-Class I-Bs operate ND as ex-Class I-As operate DA-1.

1617. Any Collectors?

I'm a collector of Chick Hearn broadcasts, either TV or radio. Has
anybody saved his games over the years, the 80's games in particular?
Here are some events/games I'm looking for:

1985 Finals Gms 4 & 6
1987 Finals Gms 1-6
1988 Finals Gm 6

1985 Parade & Rally
1987 Parade & Rally

Please email me if you are willing to sell/trade/share.

Thanks,

coop21@sbcglobal.net

> they still do so today?

No. The cost was so high, and the 790-810 area on the dial became so
congested they dropped to 100 kw in the early 80's. It ran 500 kw from the
mid-60's to that time.

> I used to be able to pick them up in Massachusetts
> as long as I turned the loopstick away from CKLW in Windsor, Ontario and
> CKGM in Montreal. It carried Radio Nederland broadcasts.

Only a small part of the time. Most of the time, as TWR, part of Trans World
Radio, they ran preaching shows in English, Spanish and Portuguese (aimed,
directinally, at Brazil).

> 2) Of course, there are a lot of stations that are "50Kw" AMers. Here in

WBZ does not protect KTWO. KTWO protects the former 1-A clear, WBZ. WBZ is
directional _TOWARDS_ KTWO. WBZ asked for a license to reduce the signal
towards Cape Cod and force it to the West, over the populated areas of
Mass., not the Bay. The null is on 90 degrees, and starts opening up towards
45 degrees and 135 degrees. To the West, it is the equivalent of around 70
kw.

Are there that many daytimers left? The only one I know if in LA (or
anywhere
else for that matter) is KBRT-740 on Avalon (KCBS stomps on it as soon as it
gets just a little bit twilighty...)

All of the other local daytime-only stations (KIEV-870, whoever's on 900
and 1220 over in Pomona....were there any others) are full timers now
(much to the consternation of the DXers out there....)

P.S. Wasn't the expanded band designed to give these daytimers a place to
go be fulltimers without cluttering up the rest of the band? Well, guess
what
didn't happen...

It's no longer on the air. None of his stations are keeping the time
period silent waiting for his return. If he does, he'll have to start
from scratch. That's a very difficult, long term process for a host
that didn't have that many stations to start with.

He's basically shot himself in the foot. Possibly the head. Any
station that picks a new version of the show will have no idea when
he'll throw another tantrum and disappear, again. Not a good way to
put a successful program schedule together and give it time to grow.

He screwed his stations.

Rich

As I understand it, Hamblin left because he wasn't getting paid.
He may be looking for another syndicator but he's now off the air.

> Exactly what is the point of broadcasting these zero-ratings,
> zero-advertiser, zero-listener formats in IBOC digital??

You miss the point. The point is that, once the stations goes
digital, they can convert to music formats and be competative with FM
in terms of sound quality -- and (with good programming and promotion)
ultimately market share.

Since it will take several years for there to be a substantial
installed base of IBOC radio receivers, which stations would you
propose converting first? The ones that already have a large
listenership, or the secondary players? Remember, digital is an
equalizer -- you don't need to have the most powerful transmitter in
the market in order to act like you do.

What's pointless is converting the major stations that current have
talk formats, with Dr. Laura, Rush, etc. The digital artifacts are
most noticable with talk, anyway. What digital broadcasting does is
provide a scenario whereby the smaller AM stations that have fallen
into disuse can find new life (and from their owners' perspective,
gain value).

My guess is that the reception for both AM and FM is about the same as what you'd get with a walkman type radio. You have 10 station presets for AM and 10 station presets for FM. Whatever you plug into the phones jack serves as the antenna - I leave mine in my car plugged into the cassette adapter and it picks up talk shows well enough for my listening needs.

The battery runs down faster than I like(about 12 hours of record/play time, plan on getting a few rechargeable AAA's) and the manual could have been written clearer. At $150 + $50-$100 for additional recording memory it's probably more expensive than it's worth unless you're constantly missing your favorite radio shows or just really like the conveniences offered by the device. But I'm glad to see the product offered and hope to see competitors to drive down the price and improve the design.

Yeah, that *was* a strange choice of frequency!

Anywhere else on the dial a million watts from Venezuela would routine
reception here. On 1240 I'm not so sure.

Wasn't around back in 1971. (OK, I was, but I was 12 and had no idea
you could hear foreign stations on AM...) I'll bet the rest of the
TIRICA-625 story would be rather interesting....

Yeah, that's about as believable as the reasons cyclists say they wear skin-tight spandex outfits which are designed to be worn "commando".

Or, as believeable as Mike Savage's excuse "I didn't know I was on the air".

Yes and no.

(the night before my brother's wedding in Traverse City, Michigan PJB
was BOMBING into my motel room. I mean, they were louder than the
Chicago clears less than 200 miles away. Things must have been auroral
that night.)

My understanding is PJB's power plant (they had their own...) burned
down. When they rebuilt they decided to settle for 100kw and a
directional antenna favoring northern South America. (Venezuela &
Colombia)

> beamed out toward the ocean and their signals don't go west. Even WBZ has
> a lobe dampened, IIRC, to protect a station in Wyoming.

My understanding is that WBZ's DA actually protects the *east* - they're
trying to avoid wasting power over the ocean where there's nobody (at
least nobody with a diary) listening. The Wyoming station (KTWO Casper)
protects WBZ, but not vice-versa.

> Are there that many daytimers left?

In the USA, AM daytime-only stations are "Class D". This used to be a strictly daytime-only classification, but quite a few years ago many of these stations were reallocated with "flea power" nighttime signals, as low as 1 WATT. Today, "Class D" AM stations are limited to a maximum of 50,000 watts daytime, but only a maximum of 250 watts at night.

I don't know what the lowest DAYTIME power level for North American AM stations is; despite it traditionally being 250 watts, there are a number of stations using less than that during the daytime; I've heard of one 170-watt daytimer, and right in my own backyard, 1170 WWTR in Bridgewater, NJ is licensed for 243 watts, non-directional, daytime-only. In that case, it's a long story -- the station originated as WBRW, a 500-watt directional daytimer which went dark in 1990. Their license was subsequently bought out with the intent of getting it back on the air under new ownership. Unfortunately, the original WBRW transmitter site was vandalized beyond repair and the towers were taken down, so in order to help simplify the construction of a new site, they were granted a Construction Permit to change to a one-tower non-directional signal, which necessitated the power reduction to 243 watts. So, in effect, New Jersey got a "new" AM daytimer in 1997 -- even though the FCC stopped accepting applications for new daytimers a decade earlier!

Again, aacPlus would provide FM talk to AM stations, better sound on both
the host and callers.

> There are a handful of 2,000,000-watt stations in the Middle East and I
> believe at least one in Europe. I know of nothing more powerful.

My outdated edition of the World Radio/TV Handbook lists Longwave stations in Sweden (171 kHz) and Russia (261 kHz) that claimed to be 2,500,000 watts, as well as a number of 2,000,000-watt Longwave stations in the Middle East, Asia, and Europe.

Also, near St. Petersburg, Russia, there's a station on 1494 kHz that transmits 1,200,000 watts (with a transmitter capable of 2 MW) through a *26-tower* directional array with a gain of 25 dB, aimed at Scandinavia. The array is more than 1-1/2 miles from end to end.

BTW, right in my town, there's a 5,000,000-watt UHF TV station, but that's the ERP due to antenna gain, not actual transmitter power.

1637. Classic Rock Web Site for sale (Q-106)

Hello all.

I designed a page a little over a year ago for a classic rocker in NH.
This is a killer site.

They opted to move thier site in house on a Windows 2000 server and
their
new site designer couldn't make some of the features work on the new
server so they opted for a new site.

I retained ownership of this design and am reselling it cheap. It is
a very nice classic rock page complete with Flash open and really nice
java scripts.

This site originally cost $7000 to develop. I will customize it, set
it up and host it for 1 year for $800.

You can see the site at http://www.onephiladelphia.com/q-106

Interested parties email vald@onephiladelphia.com.

Thanks

Val

|
| In LA, 53.3% of all persons 12+ listen to radio in the 7 to Midnight time
| period.

But what does the hour-by-hour breakdown look like? And are other markets comparable? With a time period that broad, and a criterion that easy to meet, it could just as easily be that the figure is skewed from leftover PM drive listening (e.g. people with hour+-long commutes).

| Keep in mind that in deep winter, sunset may happen in the middle of
| afternoon drive and sunrise late in morning drive. That means a daytimer in
| a middle latitude may operate from 6:30 AM to 4:45 PM.

At about 38 or 39 degrees in the center of any time zone, the minimum time period for daytime operation would be 7.15 am to 4.45 pm. Chicago's typically is 7.15 am to 4.15 pm. The comparable time period in Houston (29 or 30 degrees) was 6.45 or 7 am (I forget which) to 5.30 pm. The PSRA helps AM drive for these stations somewhat. It probably isn't as big a factor as it was 30 years ago when PSRAs were first granted on a widescale basis and is probably most meaningful for small-town community-style stations.

| So night operation is critical.
|
| > I wonder if a good, solid cost/benefit analysis has really been
| > done for stations with limited coverage that are still staying on 24/7.

|
| Since overall ratings performance and pricing are based on 6AM-Mid, Mon-Sun,
| you don't see many daytimes doing well anywhere.

I thought the figures for daytimers were, at least at one time, weighted to account for hours actually on the air. If not, it seems to be a serious skewing of the figures, not that I've ever felt that radio surveying methodologies were particularly good as far as statistical validity is concerned -- skew upon skew upon skew.

Thanks for the links, dude ;-), they were most helpful.

First-adjacents get the major step-on while seconds get their share of hash.

To be fair, much of the hiss (in regard to listening to 930) was on stereo reception. In mono the hiss was less, but still annoying. It's a noisy signal that a strong signal doesn't fix. And don't get me started on the telephone tin-can quality of what's left of the analog signal.

920 & 940 were both obliterated, an inexcusable situation. The fact these stations were receivable without analog interference from 930 suggests these are receivable AM stations being jammed (ok, not intentionally, we'll say involuntary stomping on). Wasn't the FRC (Federal Radio Commission, predecessor to the FCC) formed to stop this kind of interference?

As stated before, this isn't IBOC but IBAC twice (an in-band adjacent channel on both sides) with a hit to the main channel to boot (hiss & reduced fidelity).

IMHO the only answer is for the FCC to allocate spectrum in the short-wave band for DRM to replicate current AM service in digital. The FCC allocated new bandwidth for FM, let them do the same for DRM.

As the term "clear channel" was originally defined (meaning, only one station on the frequency across North America), yes...that was dropped decades ago. IIRC, WLW was the last one.

| Are there that many daytimers left? The only one I know if in LA (or
| anywhere
| else for that matter) is KBRT-740 on Avalon (KCBS stomps on it as soon as it
| gets just a little bit twilighty...)
|
| All of the other local daytime-only stations (KIEV-870, whoever's on 900
| and 1220 over in Pomona....were there any others) are full timers now
| (much to the consternation of the DXers out there....)

All the AMs in the Bay Area are full-time except for two,
KDYA/1190 and KTIM/1510. And even KTIM has a CP for DA-2 with COL Piedmont.
That's one of the benefits (I guess) of living in an area where the
nighttime signal can be shot out over the ocean.

("Bay Area" is defined here as 100 km radius from the reference coordinates
for Oakland, minus stations east of Solano, Contra Costa, Alameda,
or Santa Clara counties.)

Even back in the 1980s, when I was in Houston, I recall that, of
the AM stations, only KIKK and KCOH were daytimers.

| P.S. Wasn't the expanded band designed to give these daytimers a place to
| go be fulltimers without cluttering up the rest of the band?

No, it was more designed to resolve situations where stations had
very critical nighttime patterns to other stations, with
interference often resulting due to natural variations in
propagation. Most of the stations that got x-band allocations were
DA-N stations.

Arbtiron, at www.arbitron.com, has a report on radio usage that anyone can
download. It shows hour by hour usage of radio on a national level.
Generally, listening levels decline form 7 PM to 11 PM, but the 7, 8 and 9
PM hours are significant.

The usage by market does nt vary widely; the 50% plus cume of radio in 7-Mid
is fairly typical

In larger communities, the countour that is usable without interference form
other stations and local noise is often only a few miles in radius. Totally

useless in these cases.

Daytimers are weighted.However, cume they can't get is cume they don't have, and the ability to show in the ratings is impaired as the station is not competitive. If you miss half of AM and PM drive in some locations in Winter, there is no way to get regular usage; radio's average listening is more based on multiple incidents of listening than length of individual incidents.

Doug Smith W9WI <w9wi@invalid.invalid> had written:

| My understanding is that WBZ's DA actually protects the *east* - they're
| trying to avoid wasting power over the ocean where there's nobody (at
| least nobody with a diary) listening. The Wyoming station (KTWO Casper)
| protects WBZ, but not vice-versa.

As others here have said, that is correct. A visit to the site in Hull makes it clear that there was some pretty shrewd engineering behind that move.

As a data point, in Chicago, the very minute WNVR/1030 goes off the air at sunset, WBZ comes booming in. I think WNVR may have a license that allows it to sign on at Boston local sunrise rather than Chicago, but I don't remember for sure now.

Farther to the south, though, in Missouri, WBZ isn't much of a catch for nighttime listening while, sometimes, thanks to the time difference, KTWO can be heard in the early evening hours. In the Kansas City area, 1030 was also horked up by the station in Blue Springs which has practically no nighttime signal north of the Missouri River...one of the two areas in KC with the fastest population growth. (But who listens to AM at night?)

There is a "de facto" daytimer in the Miami, FL area. This station is on 1550, with a day power of 10000 watts, and a permitted night power in the 500's. I have never heard the station at night, even when I was in Miami. Curious history about this station, a couple years ago it was on 1560, broadcasting both day and night.

I would say that most of the existing daytimers left are on clear channels.

On a) I suppose my phrasing was a bit ambiguous. I didn't mean to imply that this particular station was correctly priced, only that markets are wise to price a scarce asset like a radio station according to its reach, not according to its billing in some passing, suboptimal implementation.

Whether in large communities or small, a free market in scarce licenses virtually guarantees that stations end up in the hands of the brave or foolhardy or optimistic entities that are willing to pay the most. At least where there's no sentimental legacy attachment, as there clearly is in Bakersfield.

Can the govt. really know how many stations a market is able to support, if entrepreneurs are willing to bet their own funds that that market can support one more? Isn't the advertising market dynamic with the evolution of traditional employees into contractors who must flog their services continually? Most importantly, doesn't the rate of return generated by that advertising market depend fundamentally on what the high bidders freely dared to pay for their licenses? And wouldn't a Bakersfield-inspired, govt.-imposed scarcity work its way right back into the license price...to where the buyer's ROI from operations got knocked down all over again?

at night the station would carry real far, and could possibly interfear with
other stations real far away, and I guess you could say another con would
be you could have less stations on that same frequency.

> How about other countries, whats the most power a station can have?

I saw in the FCC's database a station in cuba that was at 500kw, this link
will show you all the stations in the western hemisphere.

What we have now is government-imposed oversupply. When we had free competition, we had two-thirds of stations losing money, so the government stepped in to keep them on the air by allowing consolidation of ownership. Without that intervention, the less capable operators would have gone bust and we would have far fewer stations on the air than we do today, (just as when we have too many grocery stores, those that can't maintain market share go out of business). Had that happened, we might not be having all these debates about how local service has gone to hell in a handbasket. Instead, the government created a mechanism that allowed the bad operators and marginal signals to cash out at inflated prices to roll-ups -- and some of these stations were even put on the air with the specific purpose of so doing.

1220 in Canyon Country is a daytimer, as is 1050 in Frazier Park, 850 in
Thousand Oaks and 1050 in Big Bear.

LA is not typical, though, as it is on the coast where more AMs can go
directional at night and ship power over the Pacific Ocean without having to
protect anyone... a luxury not afforded to stations in Kansas City, for
example.

> There is a "de facto" daytimer in the Miami, FL area. This station is on
> 1550, with a day power of 10000 watts, and a permitted night power in the
> 500's. I have never heard the station at night, even when I was in Miami.
> Curious history about this station, a couple years ago it was on 1560,
> broadcasting both day and night.

They were operating illegally and had to move back. In the 70's and 80's,
the 250 watt signal at night from towers in the waste disposal facility on
72nd south of the Airport afforded excellent coverage of the Cuban
population of Miami, then concentrate mostly along the Trail.
>
> I would say that most of the existing daytimers left are on clear
channels.

As mentioned before, about 1800 AMs have power of 0-99 watts at night. That
is about 40% of all AMs in the US. 900 are pure daytimers, and the rest are
these with low night power, below 100 watts.

> I would say that most of the existing daytimers left are on clear
channels.

There are a surprising number of daytimers that are not on clear-channels.
There are 3 within 30 miles of where I live:
1330 (a regional) WTRE Greensburg, Indiana
1390 (a regional) WZZB Seymour, Indiana
1460)a regional) WNVI North Vernon, Indiana

Even though all 3 are daytimers, all have micro-watt night time
authorizations.
WTRE is 500 watts days/33 watts nights
WZZB is 1000 watts days/ 74 watts nights
WNVI is 1000 watts days/92 watts nights.
They all do a good job of covering the city of license at night.

There is another daytimer on a Canadian Clear in this part of Indiana:
1010 (a Canadian Clear) WCSI Columbus, Indiana

WCSI is 330 watts days/13 watts nights... This station frequently gets
obliterated by WINS amd CFRB at night.. especially in December and January.

>>
1220 in Canyon Country is a daytimer, as is 1050 in Frazier Park, 850 in Thousand Oaks and 1050 in Big Bear.
>>

The two 1220s in L.A. county are Class Bs, operating full time.

Canyon Counry's KIIS (Citicasters) is 1 kW days, 0.5 kW nights, DA-2 is really 1/0.5 DA-1 as the day and night parameters are the same.

Pomona's KWKW (Lotus) is 0.25 kW-U DA-2 is also really DA-1 as the day and night parameters are the same.

The 850 just outside L.A. county in Thousand Oaks has been a Class B for more than two decades, IIRC. Started out as a daytimer, however, with three towers and 0.5 kW. Added a fourth tower to add night operation at 0.25 kW.

Saul (Sol) Levine's ex-1050 in Frasier Park was always a daytimer. Apparently intended to get Sol yet another X-band allocation on-the-cheap (KFOX/1650, which see), this station is actually sited to serve Bakersfield (surprise), and has 10 kW with a 3-tower DA near the I-5/US-99 split and 0.01 kW from a single tower near Oildale, adjacent to Bakersfield. IIRC, Frasier Park is in L.A. County, or is only a few hundred yards outside thereof.

[Moderator's note: Citicasters? Ummm... that'd be Clear Channel, would it not? As I recall, Citicasters was borged by Jacor which was in turn borged by Clear Channel...]

I believe that the Cuban 500 kw station is on 710 kHz. This is part of
Castro's "radio war", to keep Miami's Spanish speaking Radio Mambi (710
also) from reaching the island.

1655. Still superhet radios?

I recently took apart my AM/FM walkman and found no IF transformers in it. Do these small radios still use superheterodyne type circuits with a fixed IF frequency (455 kHz for AM, 10.7 MHz for FM)? I would love to put my hands on a schematic but could not locate any.

Nobody has mentioned that for 5-years of so back in the 1930's WLW
was licensed for 500,000 watts. The signal was so strong that

florescent bulbs within a few miles of the transmitter would glow, and the station had to cut daytime power to 50,000 watts until "directional suppressor towers" because the signal interfered with a station in Toronto.
The whole story is on Jim Hawkin's WLW page, including other interesting facts, pictures and schematics of the WLW transmitter site.
(http://www.hawkins.pair.com/wlw.shtml)
It doesn't mention it on this site, but I believe the station had daytime listeners through most of the 48-states, and was heard in Hawaii and Europe at night.

I doubt this is the newsgroup to discuss this.

You need to be more specific about what you saw inside the radio.

Except for cheap radios (and that too may have shifted in very recent
years), AM radios don't rely on IF transformers for selectivity. They
use ceramic filters, and for the common AM radio IFs, they'd be plastic
in green or orange squares (or sometimes rectangles).

Likewise, just about any FM broadcast radio (even cheap ones) use ceramic
filters, which at 10.7MHz would be three legged ceramic packages looking
rather like ceramic capacitors, though usually they are marked with the
IF frequency.

Though, depending on the design, there often is one IF transformer
in the picture, but once the ceramic filters are in place, they
are not a necessity.

Now, there seems to be a new wave of very cheap broadcast radios.
If you've seen these two-button FM only radios, I can get them here
for $1.99, they use an IC intended for mass consumer items. It's
a superhet design, but converts down to 70KHz or so, where they
can use active filters for the IF filtering. Likely big limitations
on performance, but likely also acceptable for a lot of uses. I
have no idea if they put these into "walkmans". The one I opened
up uses a TDA7088, though in my case the prefix was missing. You
can find the datasheet around the internet.

I hear, but haven't seen, that some cheap radios use a TRF IC.
A descendent of the thirty year old ZN414, but the present version
is the MK484. Good agc action, which helps make up for the single
tuned circuit at the front end.

Michael

At present, the highest power Cuban on the air is supposedly 150 kw, although I believe these are the last 2 or 3 remaining Czech 120 kw transmitters of which there were half a dozen in the 60's. There was one, estimated at around 200 kw, called Radio Ta&#65533;no, in the late 80's and early 90's on 1160; it broadcast partially in English with tourist information and Cuban culture; that name is now used by an FM in Holgu&#65533;n.

To the best of my knowledge, there has never been a 500 kw medium wave station in Cuba. And 710 is only moderately interfered with today by a couple of medium power local stations in 3 to 4 locations around the Cuban nation. Mamb&#65533; does not get any significant interference in its regular coverage area, and is heard widely in Cuba based on reports and letters.

Yes, although licensee names have largely remained unchanged through
these acquisitions -- CCU just made them subsidiaries. Also, Clear
Channel just sold the 1220 Canyon Country station back to the guy from
whom they bought it.

Frazier Park (correct spelling) is in Kern County, about 2 miles north of the L.A. county line.
>>

Well, that's "only" 3520 yards ouside of L.A. county.

Since the Tx site is many, many, many miles outside of L.A. county, Frasier (Frazier) Park might as well be inside L.A. County, for purposes of this discussion.

Certainly, Gorman, which is the I-5 turnoff to Frasier (Frazier) Park is wholly within L.A. county ... the NW-most point, in fact.

Too, too bad Levine couldn't accomplish with his 1050 station what he did with his 540 station.

What a f**kin' "goniff".

(Yiddish, for "thief").

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

1666. Re: Still superhet radios?

Newsgroup: rec.radio.broadcasting
Date: 2003-07-30 14:22:46 UTC
From: rlewart@shell.monmouth.com
Message-ID: <bg8kbmihk1@xuxa.iecc.com>
Source record: 7344

Mike,
I think you hit it on the head with TRF suggestion. I also experimented with ZN414, I even wrote a construction article for Elementary Electronics featuring it. I could not find any ceramic filters in my Panasonic walkman either. Still I would like to find from an authoritative source if TRF is being used. If you find anyting please let me know possibly via e-mail.

Cass

Michael Black (blackm00@cam.org) wrote:
: rlewart@shell.monmouth.com (Cass Lewart) wrote in message news:<bg5vg5$15j$1@xuxa.iecc.com>...
: > I recently took apart my AM/FM walkman and found no IF transformers in
: > it. Do these small radios still use superheterodyne type circuits with
: > a fixed IF frequency (455 kHz for AM, 10.7 MHz for FM)? I would love to
: > put my hands on a schematic but could not locate any.

: I doubt this is the newsgroup to discuss this.

: You need to be more specific about what you saw inside the radio.

: Except for cheap radios (and that too may have shifted in very recent
: years), AM radios don't rely on IF transformers for selectivity. They
: use ceramic filters, and for the common AM radio IFs, they'd be plastic
: in green or orange squares (or sometimes rectangles).

: Likewise, just about any FM broadcast radio (even cheap ones) use ceramic
: filters, which at 10.7MHz would be three legged ceramic packages looking
: rather like ceramic capacitors, though usually they are marked with the
: IF frequency.

: Though, depending on the design, there often is one IF transformer
: in the picture, but once the ceramic filters are in place, they
: are not a necessity.

: Now, there seems to be a new wave of very cheap broadcast radios.
: If you've seen these two-button FM only radios, I can get them here
: for $1.99, they use an IC intended for mass consumer items. It's
: a superhet design, but converts down to 70KHz or so, where they
: can use active filters for the IF filtering. Likely big limitations
: on performance, but likely also acceptable for a lot of uses. I
: have no idea if they put these into "walkmans". The one I opened
: up uses a TDA7088, though in my case the prefix was missing. You
: can find the datasheet around the internet.

: I hear, but haven't seen, that some cheap radios use a TRF IC.
: A descendent of the thirty year old ZN414, but the present version
: is the MK484. Good agc action, which helps make up for the single
: tuned circuit at the front end.

: Michael

I would be enormously surprised if the owners of this station, which
does not serve the metro area of any radio market in Massachusetts,
either paid for Arbitron audience measurement or cared what the
results were.

Dennis Jackson was involved in the station's relaunch late last year,
although it is not one of the stations he owns. The stations that he
does own tend to have Gold-AC or Oldies formats with deep playlists.

It's in a sort of no-man's land between Worcester and Springfield. I think its claim to fame is that it has an exit on the Mass Pike.

Yes. Different names for the same thing. I believe RBDS (Radio Broadcast Data System) was the USA term for RDS (Radio Data System).

Most RDS-capable radios I've seen in stores are labelled simply RDS.

There are small differences between RBDS and European style RDS, for
instance they use different codes for some of the genre categories.

I ask this because I plan to import an RBDS radio card, and there are
some Euro style RDS services here in Australia.

1680. Michael Savage in detroit?

Is there an AM or FM station that carries Michael Savage in detroit?
Thanks

1681. Sam Phillips dead

Newsgroup: rec.radio.broadcasting
Date: 2003-07-31 14:17:24 UTC
From: Walter Luffman <bucketbutt@bellsouth.net>
Message-ID: <bgb8dkngn1@xuxa.iecc.com>
Source record: 7359
Cross-posted to: rec.radio.broadcasting,alt.guitar,alt.showbiz.gossip

Sad news. Sam Phillips, the recording studio owner who "discovered" Elvis Presley, has died at a Memphis, TN hospital at age 80.

Phillips started Memphis Recording Service (which later became Sun Records) originally as a sideline to his day-job at WREC(AM) in Memphis. He recorded a number of country, gospel and R&B performers in the 1950s, and also allowed people to walk in off the street and, for a small fee, record their voices on acetate discs.

That's how Phillips came to discover Elvis; the teenager came in to make a record as a birthday present for his mother. According to legend, it wa actually Phillips' secretary who heard the young Presley and suggested that Sam pay attention to "this white kid who sings black". Elvis got his acetate, but Phillips talked him into recording a couple of other, more upbeat songs with a small backing combo (IIRC including Scotty Moore on guitar and Bill Black on upright bass). The rest, as they say ...

Phillips also personally produced the earliest recordings by Johnny Cash, Roy Orbison, Carl Perkins, Jerry Lee Lewis and other early rockabilly artists, all of whom got their start on the Sun label. He sold Sun to Nashville businessman Shelby Singleton sometime during the 1960s -- I don't remember the year offhand.

More recently, Phillips had returned to broadcasting, this time as owner and operator of a small chain of stations in the Southeastern U.S. He had made guest appearances at three Rockabillyfest events in Jackson, TN as well as the dedication of the Rockabilly Hall of Fame in that city, and was scheduled to appear at the fourth Rockabillyfest in Jackson next month.

Rest in peace, Sam Phillips. And thanks for all the music.

>>

5 MW UHFs are pretty common, really.

Here's a real challenge: list the top ten (or top five) highest gain AM stations.

That is, those with the highest maximum-to-RMS field ratio, regardless of power.

The power ratio, hence the gain, is the square of the field ratio.

Hint: start looking at stations with eight or more towers.

Second hint: look for arrays with major axes of 180 or somewhat more degrees and with minor axes of 90 degrees, more or less (210, or so, degrees and 80, or so, degrees, respectively, are among the prime candidates).

Are you going to post the answer later?

I think I did part of this exercise once before, listing all the stations with 8 or more towers, and I seem to remember that the list was not all that long. I only checked the "field ratio" on a couple though, so don't have any idea which are the "winners".

Not in Detroit itself but in Dearborn -- try Clear Channel's AM 1310 "The X"
(WXDX)

http://1310thex.com/schedule.html

Savage's show is carried from 7 to 9 p.m. Detroit time.

[Moderator's Note: Dearborn isn't Detroit, but it is part of the
Detroit metro. It is an inner-ring suburb that borders the city. Its
major claim to fame is that it is the corporate home of Ford Motor Co.,
whose headquarters you can see from the Southfield Freeway heading out
into Southfield. And it is also the home of Greenfield Village and the
Henry Ford Museum, IIRC, which everyone should visit if they get the
chance to dos o. :)]

Would WRAL FM/TV (Raleigh NC) count?
WNYC-FM New York?

There was an urban-formatted WRAP in Virginia some years back. Makes me wonder if there was a KRAP somewhere out west.

Did the FCC ever inadvertently assign call letters that turned out to be risque somehow? There was a KOME in California for a while. Farmville NC had WFAG on 1250 through the 60s and 70s. Havelock NC presently has a WANG on 105.1. Any others?

I am typing this from the production studio of WCUM, Bridgeport, CT. The call letters refer to the Spanish word CUMBRE, translated to English is SUMMIT.

There used to be a KCOK (K-COK) in Tulare, CA but the calls were
changed years ago. IIRC it's the station that's now KJUG (K-JUG), but
the logo is a moonshine jug, not a Dolly Parton jug <g>.

1190 in Dallas is the winner (6 by 2); 1070 in Houston is a close second (3 by 3).

There are numerous 9- or 10-tower Canadians which are contendors.

You've got to get beyond 180 degrees, major axis, in order to make the "aperture" small enough, then you just add additional instances of those tower pairs until you get the gain way high ... certainly higher than 12.

Second challenge: name the top ten (or top five) stations with the most steel in the air.

The winner is ... 1070 in Houston, again.

He frequently shows up in those "History of rock and roll" miniseries type documentaries. And the man was always eminently quoteable in them.
>
>Rest in peace, Sam Phillips. And thanks for all the music.

Amen. He was a good man.

His most famous quote [paraphrased]:

" I always said that if I could find a white man who could sing like a black R&B/Blues artist, it would take over the world.Then Elvis walked through my door.
Boy, did we show the world it was true."

in the very early days of Elvis' first Sun Recordings, DJs didn't know if he was black or white.The white stations wouldn't play him cause he was to black, the R&B stations wouldn't play him cause they thought he was white.Once the world caught a glimpse of him, though, all Hell broke loose.

People of my generation don't really understand the impact Elvis had on music, most people my age I know remember the bloated Elvis performing in Las Vegas or doing those lousy movies....

But he was THE ONE - the one who influence OUR generations heroes and made them want to be Rock- N- Rollers.

Bob Dylan
Robert Plant
Lennon and McCartney
Jimmy Page (inspired to take up guitar after hearing Elvis' "baby, Let's Play house) [A sun studio single]
and the list goes on and on and on

Elvis' and the other Sun artists were the Heroes to OUR herous, and we have Sam Phillips to thank for it.

Trans World Radio (PJB) still operates from Bonaire with 100kw and still on 800 khz MW. About 3 years ago (not in the late 80's as someone else mentioned), TWR decided for reasons of cost to replace the old faithful unit with a new solid state transmitter. Tubes for the old 500 kw MW unit got increasingly more expensive to rebuild when they failed, and the costs of fuel to run the deisel generators higher and higher. With a reassessment of the need to "boom" into its former coverage, TWR decided to focus on the Caribbean and northern parts of S. America only as we are able to serve many of the areas further south by program distribution to local Christian stations. We do get occasional reports from US-based MW DXers and are grateful for them, but don't consdier the US a target any longer. We're airing English (though on a reduced schedule), Spanish, Portuguese and a couple of smaller Indian languages.

The PJB power plant was sold to the local electric company on Bonaire to help power the grid there. The fire mentioned above was not at TWR (PJB's) site, but rather at the R. Netherlands facility also on Bonaire.

Trust this will help clear things up.

My impression, born out by field strength readings by the engineer at
WKVM-810 in Puerto Rico, was that the station had ceased to run 500 kw,and
was using the big rig at lower power since sometime around 1995 or 1996.

> TWR decided for reasons of cost to replace

At least it happened finally, although too late for some of us. I owned an
AM on 805 AM in Ecuador when TWR went on the air. It nearly destroyed the
station untill I could change frequency. A friend's station in Bucaramanga,
Colombia, was driven off the air by TWR's misguided religious zeal that
caused it to stomp on the coverage and signals of over a dozen radio
stations on 790, 800 and 810 in the NE South American zone.

People here complain about arrogance as demonstrated by Clear Channel; TWR is the supreme example of arrogance for a "cause" with no thought for all the people injured due to their actions.

Not currently on the FCC lists, but a sort of related call with a history of its own is. There's a WKRP-LP (TV) licensed to Washington DC. W-KRaP? Wonder if the TV show producers saw it that way. Why anyone with a real station would WANT those calls is also a different matter.

805??? I thought AM radio in Ecuador was on the 10khz band plan like
the USA and Colombia.

In the past few years, though I've noticed a number of drop-in FM
stations on the "even" frequencies -- 95.4, 100.2, etc. That really
has to cause hell with a lot of digitally tuned car radios that only
tune in the odd frequencies.

> People here complain about arrogance as demonstrated by Clear Channel; TWR

1705. AM Radio Reception

Newsgroup: rec.radio.broadcasting
Date: 2003-08-01 15:03:46 UTC
From: David Berchtold <berch@erie.net>
Message-ID: <bgdvgihrp1@xuxa.iecc.com>
Source record: 7379

Dear Friends,

I have posted to this group on a number of occasions and have received a weath of information. For that I am appreciative. This time I am seek help with AM (and possibly FM) radio reception.

My question is:

What are the best ways to improve radio reception?

Here is an idea of what brought this question to light. I live in Erie, Pennsylvania, a port city on Lake Erie. Right across the lake is Canada (a distance of about 20 to 25 miles). Quite frequently, like everyday, I enjoy the offerings of Canadian radio. CKOC AM 1150, Hamilton, CHUM AM 1050, Toronto, and CFCO AM 630, Chatham-Kent are among my favorite radio stations. I would like to know how to improve the reception of these stations with the resources that I possess.

I have an Electro Brand Multiband radio that I inherited from my father. This is a great radio for reception, but I use this for mostly outdoor DXing. I am not sure how to attach an external antenna to it.

I have several general purpose radios throughout the house. The ones that I find I have the best luck with are from Radio Shack. (where else?) I have also purchased a Ring Antenna from Radio Shack. I had the idea of somehow attaching the Ring Antenna to above mentioned Electro Brand radio. The instructions, however, were not clear about how to do this. Maybe I missed something.

I also have a crawl space/half attic that is presently being used to store nothing but insulation and hold up a roof. I believe that there is plenty of room up there. The possibility of a wire antenna layed from front of house to back of house is an extremely good possiblity, but again I am unsure of how to connect radio with antenna.

I am also considering a more costly investment by getting into ham radio. I would like to construct an antenna in back yard. But once, again, how does the antenna get connected to radio. Any help would be greatly appreciated.

Thank You,

David B. Berchtold
Radio Listener and Fan from Erie, PA

> Farmville NC had WFAG on 1250 through the 60s and 70s.

Don't forget Washington DC's WGAY, first on 99.5 FM as an Easy Listening station for decades, and then briefly reincarnated by Clear Channel as WGAY 1260 AM, a syndicated Nostalgia/Adult Standards station. I believe it was named after the station's original owner.

Also, there's KLIT on 92.7 FM in Avalon, CA.... and KRAK on 910 AM in Hesperia, CA.

And in the ham radio genre, there is a legitimate call sign "N2SEX".

First thing -- DO NOT attach an external antenna at any radio which is powered from AC and does not have external antenna terminals. To do so is to possibly expose yourself or others to fire, injury, or death.

The best bet for what you want to do if the radio does not have terminals is to use one of the loop antennas that you place near the radio sold for that purpose. Read the instructions with the device, or find them on-line at the manufacturers web site.

>I have also purchased a Ring Antenna from Radio Shack. I had

This is supposed to be placed near the radio, not attached to it. To find the best position, you have to experiment.

You probably could run a wire antenna in the attic, which you would attach to the terminal or wire on the Rat Shack device, not to the radio (unless the radio has an external antenna terminal.

You should also be aware that with an inexpensive radio you could just overtload the thing by using an external antenna, and cause worse rather than better reception.
>

>I am also considering a more costly investment by getting into ham

Getting into ham radio would be a great hobby, but would have nothing to do with what you are trying to do here. Purchassing a good communications (shortwave) receiver would help with your situation, and if not a portable one it would not only accept but require an external antenna. In that case, the wire in the attic or better yet an outdoor wire would be great. But don't go cheap, there are lots of cheap radios out there that are more trouble than there worth. You don't want to buy a cheap radio first and then a good one when you realize the cheap one is no good, that will cost more in the long run.

I hope this helps you.

The Radio Crazy is back!!! (Yucch!!)

Part ownership in fulltime AM for sale. (Joint
venture, if you venture, you go to the joint! HI!)

The "Radio Crazy" ain't so crazy this time. We have a
chance to acquire a fulltime AM in an Ohio city of
47,000 people with a county population over 225,000
!!!

Only $125,000 full price INCLUDING 12 acres of land,
the two towers and the transmitter shelter.
Transmitter is solid state. DA-1, two tower
directional 500 watts days, less at night. About
300,000 people live in the daytime coverage area.

Active or inactive investors with at least $10,000
each are welcome.

Studios are rented from the city at $600.00 a month
and I am told they are very beautiful. Perhaps even
"Art Deco" !!

No "AM bashers" or other negative "NABOBS"!!

Tel: (478)741-1710 for more information. If you will
not ID yourself fully, you get zero new data.

There was a WKRP-AM in Atlanta for a short time in the 70's, designed
specifically to cash in on the TV show's popularity. The stars of the
show were invited to appear on the station's first day of broadcasting
but none showed. The FCC denied the calls until someone pointed out
that MTM Productions was not an actual licensee.
The first record played on the new station came up at the wrong speed.
Potential advertisers thought it was a joke. It was a daytime- only
station with all sorts of signal problems. As I recall, it lasted less
than a year.

There was a station that had the call WKRP and I worked for that station in 1981-1982.

It was WKRP in Dallas, GA. Mitch Lepord put the station on the air in 1979. It was suspose to be WDLS, but WKLS in Atlanta (96 Rock), said those calls were too close to the 96 Rock calls, and Mitch went after the WKRP ID.

And yes, it was a Crappy station to work for. 1500 KHZ, 1000 Watt daytimers, 500 Watts CH and no presunrise authroization. Mitch started it off with a format of playing one country record, then one rock record. It sucked. First record on WKRP Dallas was 'Lonsome looser'. It's now WDPC playing gospel music.

I did mornings there for a while. Still have airchecks and press from those days. Then walked out on them in October 1982, when the owner threatend to fire me for low sales numbers (and I was a sales/jock and hated the sales side of it). I went to WFOM in November, 1982 and played rock, until that station got sold in 1983 and changed to christain music.

WKRP was crap, it sucked working there.

I'm a person who only just started to investigate satellite radio, like, five minutes ago. I'm tired of there being no country station in the NY-Metro area, and I don't believe in "video killed the radio star", so I need my radio.

It looks to me, from what I've read thus far, that satellite radio is only for vehicles, not for the home - is this true? I'd be very disappointed, as I don't spend a great deal of time in my car.

So, is there (or not) satellite radio for the home?

I might augment Larry's comment here, that most ham radios now contain general coverage receivers that can tune from 150 Khz up to 30 Mhz. These are good, but not the most outstanding receivers for MW (the AM band) DXing.

Other alternatives = car radios always have an external antenna jack; some DXers use those with batteries to power them.

And of course, the low-cost GE Super Radio III (they were under $50) - if you can find one - was a favorite among those who do what you wish to do.

WRKO and WEEI have north-south patterns, to protect San Francisco and
Denver respectively. Their signals don't do well very far west of Boston,
but cover Vermont, New Hampshire and Maine quite well at night.

www.xmradio.com

XM has the Delphi unit that works in your home/car/office etc. They also
have a PCMCIA card for your computer.

Sirius (www.sirius.com) also has a "Plug-n-Play" unit, but I don't hear very
nice things about it.

I've personally experienced both Sirius and XM programming (I have an XM
unit in my 2001 Ford F150).
While I prefer the audio quality of Sirius, I prefer the content variety on
XM. I suggest spending an afternoon at Best Buy and
making a judgement call.

The other thing to consider would be the longevity of the broadcaster. It's
been suggested that Sirius is on some fairly shaky
financial ground. XM seems to have the better shot at actually "making it"
in this economy. Since the radio units aren't cross
compatible, you'd be SOL if you'd purchased a Sirius compatible radio and
then Sirius went the way of DrKoop.com.

Just my two cents,

Jeremy Powell

Sure. http://www.xmradio.com/skyfi/ has info on a Delphi unit that works with XM and http://www.siriusradio.com/servlet/ContentServer?pagename=Sirius/CachedPage&c=Page&cid=1019257316821 has the same for Sirius. Of course most of the hardware is sold through dealers so check out Best Buy, Circuit City or any other in your area.

BTW, if you're looking for an alternate to local stations check out your cable TV or satellite TV provider. They often have a bunch of audio channels. You may already have what you're looking for.

1726. Re: AM Radio Reception

Newsgroup: rec.radio.broadcasting
Date: 2003-08-04 06:08:26 UTC
From: Robert Jeffares <robert@pnn.org.nz>
Message-ID: <bgkt8qlel1@xuxa.iecc.com>
Source record: 7251

Dear David,

For good radio reception there is no substitute for a decent wire antenna, and a lead in from the antenna to your radio [we'll get to how you connect it to the radio] AND a GOOD EARTH CONNECTION.

The best receive antenna is as high as possible, and as long as possible with the wire running in the general direction of the station(s) you want to hear. [this is not always possible]

Amateur Operators use tuned antennas to resonate on the frequency band they are using, and it's true a resonant antenna works well as a receive antenna.

But on the AM Broadcast band a resonant antenna is difficult to construct. So whatever you do is going to be a compromise.

A DX er constructs a loop antenna with a number of turns of wire on a frame which may be 1 m square and uses it to null out interfering stations and pull in the desired station using a high gain communications receiver.

An AM radio listener can do well with a long wire if you can get it up off the ground and 10 m or 20 m is better then nothing.

If you want to get pedantic you need some sort of matching device between the aerial and the coax you will use to run the signal into the house and onto your radio. Measuring the feed point impedance of a random length of wire involves a lot of theory a lot of messing around, and won't make any difference you will notice so a good soldered connection between the centre wire [thats center to you] and the aerial wire is all you need.

At the other end you need to have a good earth connection.

DO NOT RELY ON THE MAINS EARTH.

The kind of connection that electricians make is OK for appliance safety [well it's supposed to be] but it's likely to carry a lot of AM Band interference induced from every kind of source connected to the mains.

A copper pipe about 1 m long buried in the ground with a well connected copper wire soldered to it which runs into your radio and connects to the "earth" connection will pull the noise and hash down considerably.

If your radio does not have an "Earth" connection and you can't get into it to hook onto the frame [the headphone socket frame is radio earth] you can wind a coil with insulated copper wire on a suitable former. I used to use the centre from a toilet roll, wind on 30 - 50 turns depending what wire I could get, and connect this between the aerial wire and the earth wire, then drape the coil across the top/back of the radio where the ferrite antenna

is. The arrangement is a simple transformer, which delivers the signal from the aerial into the radio.

If you live on a farm you can run wire quite a long way, but most people live in city spaces that run to 1/2 acre at best just don't have a lot of space to put up wire antennas.

Vertical antennas are difficult because wherever you live there will be rules limiting the height of anything you put up and the higher you go the more engineering stuff you have to be involved with.

Mothers are a limiting factor. Either your mother or the Mother of your children will object to large unstable looking structures. [long before the local body engineer]. Neighbours get fussy too, whatever you do make sure you don't upset anyone. Ask first. Watch out for power lines, phone lines, Cables of any sort.

If you are interested in Amateur Radio track down the local amateur radio club. The club will have members who will share information ideas, and show you their inventions. They may have classes you can attend.

The local library will have books with diagrams which will help you, and you can spend hours on the internet searching aerial, antenna, dipole, long wire, and beverage antenna. You won't have the space for a real long wire or a beverage antenna [unless you are Very Lucky] but you need to look at the theory of how they work.

Good Luck..

Regards

Robert

We finally got the funding for our Short-Wave project and are now looking to source the first of a series of transmitters which will be 1 kW - 5 kW and operating single frequency allocations on 90 M - 39 M

Next problem is locating Manufacturers who are still around. We looked at this some years ago and created a list, but there seems to be a high loss factor in the industry!

I recently bought this clock:

http://store.yahoo.com/atomictime/attimsildigw.html

for use in a radio studio. We're going to do a fancier timekeeping solution after our studio move next year but for now this is good enough.

Well, it would be if it worked. The clock synchronizes with WWVB every night, and I had it working on my engineering bench. But with it mounted on my air studio wall, it won't sync. I've tried three different positions -- mounted flat on west, north and east walls. In each position, I left it there for about a week to see if it would sync.

I'm in Atlanta, so WWVB is generally west from me. I don't know how the internal antenna element is oriented, but I assume it's parallel to the big flat dimension of the clock, so either east or west should have worked best. Obviously the building is attenuating the signal, but I really want it to work in that room, so I've got to find a way to improve the signal reception without moving the clock much from where it's at.

So, does anyone have any experience with opening these clocks up and adding an antenna? What kind of antenna should I use, and how should I orient it?

I have a GE clock that is very good. It is also using WWV. These clocks generally scan the base frequencies and lock in on the best of them.

Your problem is that in your studio, the unit is not seeing the signal, which I realize is also your conclusion. It is possible to open the radio, and add on an antenna wire of some sort. If the signal is not present in your location, all you will add is noise in to its front end.

You would have to work out the front end circuit of the clock receiver, to determine the best place to pick off to put a piece of wire to act as a simple antenna. The only drawback is that soldering to the circuit, you may also detune it a bit because of the stray capacitance of the added antenna wire, and also the soldering itself. There is no added RF input amplifier stage to offer isolation to the front end for any external antenna connection.

It would be recommended in any case to put a capacitor of about 47 pF in series with the added wire at the antenna solder point. This is to give DC isolation. The 47 pF will easily pass frequencies from 5 mHz to 20 mHz which is the scanning range of these clocks.

The front end of these clocks are using MosFet devices. If there is any static electricity, this can cause damage. Care must be taken to not touch the bare end of the wire with the fingers. Use insulated wire only. A small gauge of about AWG 22 to AWG 26 stranded wire should be adequate. A length of about 6 to 10 feet should be okay.

If all of this detunes the front end due to having no input isolation, then the reception will infact be worsened.

If you want something very good. Leitch, and Torpey Time make professional clock systems that are designed to work from GPS. There are a number of other companies that also make these. You put up a small antenna about the size of a large donut in an area where it can see the sky. There is a 52 ohm foam coax cable that runs back to the clock receiver. The receiver has a digital packet output to run studio type clocks. The output time accuracy is in the parts per trillion. As a starter you need the receiver, antenna, cable, and 1 clock display module.

At the TV station, we are using the Torpey system for our precision time keeping. This one is excellent.

Check out:

Robert,

LPB took over the Omni-Tronix range.

We supply these but here's the company site;

http://www.lpbinc.com/

You've got Continental:

http://www.contelec.com/

I think these boys are a little to high power for you:

http://www.riz.hr/salest.htm#t1

There are others but you woulldn't like the prices and they mainly cater
to the goverment or bible broadcasters (God will provide).

How the hell did you get a SW licence?

Mr. SFBobby:
Thank you for listening. The cut in question is from 1968. HH was migrating to WABC so this was his last WMCA b'cast. Seems like 1968 wasn't all pothead music.

I apologize for not catching it earlier. It is still in transition so there are plenty of faux pas. It went on a few days ago and the silly software from live365 will not automatically fill in date/time and the guess feature won't fill all information in.

I will always insert call letters, announcer when possible, and month/day/year or as much as possible.
Thank you for bringing this to my attention and keep listening.
Ken

You may have a RFI problem. The 60KHz signal is pretty weak compared to a lot of the signals floating around in the average civilized office. Light dimmers, flourescent lights, CRT's, switching-mode power supplies all put out lots of RF in that part of the spectrum. Your best bet might be to just receive WWV on a SW radio and use it to set your clocks. Low-tech but usually works, unless propagation is just shot.

There are some hints at the NIST website. I live in Florida and the nighttime signal is much better than the daytime signal. This is also true for Atlanta, but not as much variation as at my location. One thing that helps (sometimes) is to move the clock away from TV receivers and monitors. A 60 kHz antenna is a large beast, so there is nothing simple that you can do in that department.

Amateur Radio Newsline report number 1355 with a release date of Friday, =
August
1 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T. Amateur Radio helps solve a murder by tracking=
down
one of its own. Get to know about the ham radio heroes involved in the h=
unt
for a cop killer on Amateur Radio Newsline report number 1355 coming your=
way
right now.

(Billboard Cart Here)=20
=20
**

ENFORCEMENT OF A DIFFERENT KIND: AMATEUR RADIO HELPS HUNT HAM WHO KILLED MICHIGAN COP

Hams in Michigan were called on to help track down a cop killer after wha=
t
should have been a routine arrest became a grusome homicide scene. It ha=
ppened
on July 6th. Amateur Radio Newsline=E2=80=99s David Black, KB4KCH, is he=
re with the
rest of the story:

--

Never in Michigan's ham radio history has there been a case like Scott
Woodring's. It began July 6th. That's when Woodring, KC8JNG, a member of =
the
Christian Identity movement and described as a survivalist, shot and kill=
ed a
Michigan state police officer. It happened while Woodring was being arres=
ted
for solicitation of a minor.=20

A stand-off ensues and lasts nearly a day. During a law enforcement shift
change, Woodring manages to escape, triggering an extensive manhunt throu=
ghout
western lower Michigan. That's when ham radio operators became involved, =
since
it was suspected that Woodring had been using amateur radio equipment to
communicate with other members of his group.=20

James Wades, WB8SIW, is Michigan's RACES Officer and Section Emergency
Coordinator:=20

--

Wades: =E2=80=9CI directed the EC for Newago Co. to establish an intercep=
t peratio in
the area and monitor seldom used frequencies in and about he VHF 2 meter =
band.=20
And, additionally, we sent out a broadcast nouncemnt to selected areas to
selected area RACES members thrughout Michigan, essentially asking them t=
o
listen for conversations between Mr. Wodring and whomever else he might s=
peak
with.=E2=80=9D

--

That paid off. A ham in Holton, Michigan reported monitoring Woodring and
another operator talking on the air. The intercept was reported to state =

police
they then asked government agencies including the FCC to provide directio=
n
finding assistance to find Woodring. But it was a Friday night and police
couldn't get any response from the federal agencies. So Wades says=20
investigators turned to radio amateurs for help:=20

--

Wades: =E2=80=9CWe deployed amateur radio teams from several counties in=
the area,
and had pretty much a continuous radio direction finding occurring throug=
hout
the weekend, with teams from from Kent, Ottawa and Musquogen Counties. W=
e also
had teams on standby in Kalamazoo County as well as the Civil Air Patrol =
team
=E2=80=93 which weren=E2=80=99t utilized, but it was reassuring to know =
that they were
there=E2=80=9D

--

Hams and the police knew the general area where Woodring was believed to =
be
hiding. Wades says it was an eyewitness who ultimately led to Woodring be=
ing
found:=20

--

Wades: =E2=80=9CMr. Woodring was discovered through a tip from a citizen =
who saw him
essentially taking shelter in a non working vehicle. When Michigan state
police officers approached, he leveled an assault rifle at them and he wa=
s
subsequently shot to death when he refused t comply with orders or lower =
the
rifle.=E2=80=9D

--

Wades says police were hesitant at first to work with radio amateurs. But=
he
says the hams' efforts made a powerful and positive impact with law enfor=
cement
agencies.=20

--

Wades: =E2=80=9CWhen all was said and done the feedback has been increda=
bally
positive. Tremendously good comments about the professionalism and the s=

kills
of the radio amateurs involved. And basically I think that they were some=
what
=E2=80=93 almost shocked at the capabilities and the skill level of our A=
RES and
RACES members in Michigan, which, of course was highly complimentary=E2=80=
=9D

--

Around 40 radio amateurs took part in the effort to help find Woodring. W=
ades
says the hams involved coordinated their work with police carefully, even
establishing a dress code for hams reporting on scene with investigators.=
The
professionalism Michigan hams showed has given law officers a new appreci=
ation
for the kind of help radio amateurs can provide when it's needed.=20

>From Birmingham Alabama, I=E2=80=99m avid Black, KB4KCH, reporting for th=
e Amateur
Radio Newsline.=20

--

In all, RACES members provided 494 staff-hours to the man hunt. Most of t=
his
was contributed during the 36-hour period when radio direction finding
activites to locate Woodring were being conducted. (ARNewsline(tm) from =
lead
provided at www.qrz.com)

**

THE FIGHT FOR OUR SPECTRUM: HAM RADO VS. BPL

If you think that the term Broadband Over Powerlines and its acronym BPL =
will
never afect you, guess again. BPL could effectively spell and end to ham=
radio
as we know it. This, if it is ever approved by the FCC and popularized a=
cross
our nation.

Just how real is the chalange to the survival of the Amateur Radio Servic=
e?=20
ARRL Southwestern Division Director Art Goddard, W6XD, gave some graphic
details at last weeks Fort Tuthill Hamfest in Arizona based on test data
collected by Ed Hare, W1RFI, of the ARRL Lab:

--

Goddard: =E2=80=9CIf you are an engineer, anywhere from 33 to 63 decibels=
increase in

the noise level thatr you will see at your reciever due to BPL run in the=
power
lines in your neighborhod. If you are into S-Meter readings, thats somew=
here
between an S-6 and 10 over S-9.=E2=80=9D

--

For those unaware, Broadband over Powerlines is a scheme to give consumer=
s and
businesses high speed Internet connections using the existing power
distribution grid. This would put the power providers in the position of=
also
being broadband internet providers as well. The problem is that powerlin=
es are
not shielded. They will act as much like giant antennas as they will a c=
losed
carrier of the broadband connection. In other words, whatever is on the =
power
lines will be radiated and heard by your ham band reciever. And Art Godd=
ard
says that the Broadband Over Powerline signals will occupy the spectrum f=
rom 2
through 80 MHz, meaning every band from 75 meters through 6 meters will b=
e
affected. =20

According to Goddard, BPL has the backing of the White House which views =
the
increased use of unlicensed devices as being good for the U-S economy. H=
e also
notes that the FCC =E2=80=93 which is supposed to be neutral and regulati=
ng in the
public interest, is =E2=80=93 in this case -- actng like cheerleaders for=
the
proposed service. =20

Goddard says that this is an issue that the ARRL is keeping a very close =
eye
on. He also indicates that the League may soon be asking ham radio opera=
tors
to lend their voice in opposition to BPL. (ARNewsline(tm))

**

RESTRUCTURING: NCVEC FILES TO END CW TESTING IN THE USA

The National Conference of Volunteer Examination Coordinators has filed a
Petition for Rule Making before the FCC to end Morse testing in the Unite=
d
States. In its July 29th request, the NCVEC asks the FCC for an immediat=
e end

of CW testing of applicants. =20

The NCVEC request is based primarily on the action taken in Geneva at las=
t
months World Radiocommunications Conference. At that time, Morse testing=
as a
world standard was abolished, leaving it to individual nations to decide
whether or not to continue to administer CW exams.

The NCVEC petition concurs with the WRC findings. It notes an appearance=
that
most of today=E2=80=99s radio amateurs want to communicate using voice. =
Because of
this, the NCVEC says that it makes no sense from a regulatory standpoint =
to
require hams to be Morse proficient when the greater majority of radio am=
ateurs
show no desire to use the mode. The petition also notes that the future =
of the
hobby now encompasses many new modes that were undreamed of only a few sh=
ort
years ago. It adds that while manual telegraphy is a noble part of Amate=
ur
Radio=E2=80=99s past, it is no longer the services prime emission mode.=20

The NCVEC approach will still requires all applicants for an Amateur Serv=
ice
license or upgrade to pass the current written exams. Only Morse testing=
would
be eliminated. =20

As we go to air no Rule Making designation has been assigned to this requ=
est by
the FCC. The full text of the petition can be found on our website at
www.arnewsline.org (ARNewsline(tm) from NCVEC release)

**

HAM RADIO TESTING: QPC RECALLS QUESTION

Also from the National Conference of Volunteer Examiners Coordinators wor=
d that
its Question Pool Committee of has withdrawn question T5B04 from the Elem=
ent 2
Question Pool. This, effective July 27th. This question is withdrawn d=
ue to
the changes in Part 97 of the Amateur Service rules dealing with the new =
60
Meter amateur allocation. (NCVEC)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, hea=
rd on
bulletin stations around the world including the WR9ARC repeater of the
Riverland Amateur Radio Club serving La Crosse, Wisconsin.

(5 sec pause here)

**

HAM SPECTRUM: ARRL & CQ PRESENTS A PRIMER ON 5 MHZ

And speaking about 60 meters, want to know just about everything there is=
to
know about how to operate legally in this new 5 MHz spot frequencies? Wa=
lk,
run or drive to your news stand and buy a copy of the August issues of bo=
th QST
and CQ Magazines. Then go home, settle down and read the articles titled=
60
Meters Frequently Asked Questions by Rick Lindquist N1RL and Ed Hare W1RF=
I in
QST and Getting Ready For 60 by Gordon West, WB6NOA. Both are a wealth o=
f
information on how to approach this rather specialized allocation and han=
dily
compliment one another. We asked Gordo to explain what readers will find=
in
his:

--

West: =E2=80=9COne of the things that my CQ Magazine article talked about=
was the
Amateur frequencies And tuning in. There was allot of confusion about wh=
at
exact frequency one uses for upper sideband on the 60 meter band. As long=
as
everybody remembers that 60 meters =E2=80=93 5 MHz =E2=80=93 point 5 -- =
all of the upper
sideband frequencies end with point 5.=E2=80=9D

--

And why did her write the article?

--

West: =E2=80=9CWhen I first heard about the band it immediately came to =
mind as
channelized operation that many new hams are not used to. Well, growing =
up on
10 meter FM as well as 6 meter FM, I knew what channelized operation was=
all
about. And the key word is =E2=80=9Csharing.=E2=80=9D There=E2=80=99s n=

o QSY'ing =E2=80=93 at least
not easily on the 60 meter band beyond the 5 channels, so its going to be=
up to
all hams to sort of take turns in using this exciting 60 meter =E2=80=93 =
5 MHz
band.=E2=80=9D

--

Where Gordon takes the story telling approach, Lindquist and Hare present=
their
material in pure Question and Answer form. A style of writing that compu=
ter
enthusiasts call a FAQ. That=E2=80=99s an acronym for the words =E2=80=9C=
Frequently Asked
Questions=E2=80=9D and the answers that they provide is fact filled, pre=
cise and
right to the point.

Taken together, =E2=80=9C60 Meters Frequently Asked Questions=E2=80=9D an=
d =E2=80=9CGetting Ready
for 60=E2=80=9D are the most complete operating guide for the 5 MHz band =
penned to
date. Hams contemplating operation on the five channels that make up the=
60
meter allocation would be well advised to read both before hitting the
transmit switch.

For more information about subscribing to CQ, visit www.cq-amateur-radio =
on the
world wide web. You can join the ARRL, support its work and begin receiv=
ing
QST by signing up at www.arrl.org. (ARNewsline(tm))

**

THE WAR ON TERROR: TWO HAMS KILLED IN IRAQ

Two recent casualties of the war in Iraq were amateur radio operators, on=
e
American and one from Sri Lanka. The ARRL Letter reports that Specialist=
Jon
Fettig, KCZ0HSQ, of Dickinson, North Dakota, was killed in an ambush on J=
uly
22nd.=20

The following day, Nadisha Yassari Ranmuthu, 4S7NR, an International Red =
Cross
aid worker, was killed and his Iraqi driver was wounded after their vehic=
le,
marked with the Red Cross emblem, came under fire south of Baghdad. Ran=
muthu
was 37 and well-known in the Sri Lankin ham radio community. (ARRL)

**

ENFORCEMENT: HAM TOLD HE MUST RESPOND TO FCC QUERRY

A California ham has been told that he had better respond to an earlier F=
CC
letter to him regarding a pair of uncoordinated repeaters that he alleged=
ly
operates. Otherwise it could cost him his ham ticket. The agency=E2=80=99=
s Daryl
Duckworth, NN0W, explains:

--

Duckworth: =E2=80=9CThe Enforcement Bureau has sent a warning letter to =
WA6SEK,
Thomas De Lasaux, of Stockton California, concerning uncoordinated repeat=
ers on
224.660 Mhz and 441.275 Mhz. There has been no response to a letter of M=
ay 5th
where he had 20 days to reply. He is being afforded an additional 20 day=
s to
respond.=E2=80=9D

--

According to Duckwoth, if there was no resolution by July 25th, the agenc=
y
planned to initiate enforcement action against WA6SEK=E2=80=99s Amateur S=
ervice
license. Its now past that date and we are awaiting word from the FCC as=
to
wheter or not De Lasaux has filed the required reply. (FCC, RAIN)

**

ENFORCEMENT: TRUCKING COMPANY WARNED ABOUT UNLICENSED 10 METER OPERATION

Also receiving a letter from the FCC is the Tidewater Transit Company, In=
c. of
Kinston, North Carolina. This one warns the company to stop using the 10=
meter
ham band for its communications or face some rather severe consequences.

In his letter to Tidewather, the FCC=E2=80=99s Riley Hollingsworth notes =
that
information before the Commission indicates that a 2002 Volvo truck belon=
ging
to Tidewater and bearing North Carolina license plate LK 4130, was the so=
urce
of radio transmissions on the Ten Meter Amateur Radio band on July 8th. =
This
while it was driving on Interstate 20 near the city of Lexington, South
Carolina.

The Letter warned Tidewater that continued unlicensed operation could bri=
ng
with it a fine of up to $10,000. The owners of Tidewater Transit were al=
so
instructed to contact Hollingsworth to discuss the matter with him. (FCC=
)

**

RESCUE RADIO: HAMS TO THE RESCUE AS CELL PHONES FAIL

Interlinked emergency repeaters played a key role in providing communicat=
ions
during the recent Arizona wildfires. =20

As learned at last weekends Ft. Tuthill Hamfest, radio amateurs in Navajo
County set up repeater links to allow contact between the Red Cross
communications center and a number of evacuation sites. This, after it w=
as
found that cellular telephone coverage across the area was inadaquite.=20
=20
The hams stepped in when the walkie-talkie feature of the cellular teleph=
ones
failed to operate as advertised. The reason appears to have been the sma=
ll
number of relay sites available in the isolated areas where the fires wer=
e
burning. =20

The hastilly assembled Amateur Radio relay system along with existing hig=
h
level Amateur service repeaters are reported to have performed flawlessly=
.=20
This made possible an ongoing exchange of vital evacuation information.=20
(ARNewsline (tm) from information gathered at Ft. Tuthill Hamfest)

**

RESCUE RADIO: E-911 KIND OF ON HOLD

A lack of funding from cash-strapped state and local governments appears =
to be
slowing the rollout of enhanced 911 services. And in some areas it has p=
ut the
new wireless emergency phone location service on what appears to be an
indefinite hold.

--
Under FCC regulations, wireless companies were required to respond to 911
center requests within six months by providing technology that can locate=
any
individual on a given wireless phone networks who is using a phone equipp=
ed to
gather information from the global positioning satellite system. This

technology lets emergency operators locate cell phone users in need of
assistance, but only one in ten emergency call centers has access to it.=
=20

But John Melcher, who is the president of the National Emergency Number
Association says that moneys earmarked for Enhanced 911 are being spent o=
n
other needs. In a recent press statement Melcher charged that some state=
s have
diverted millions of dollars=20
in Enhanced 911 funds collected from consumers and have used the money to
subsidize budget shortfalls. This says Melcher puts the public in danger=
,
adding that moneys earmarked on customer billing for Enhanced 911 service=
s
should be spent only on Enhanced 911 and nothing else.

For the Amateur Radio Newsline, I=E2=80=99m Bruce Tennant, K6PZW, in Los =
Angeles.

--

The FCC set specific deadlines for implementing this new service back in =
1966.=20
To date, many providers have yet to meet that implementation goal. (Publ=
ished
news reports)

**

RESCUE RADIO: THE INTERNATIONAL AREN NET

Still with rescue radio and emergency communications news, word that the =
Irish
Amateur Radio Emergency Network takes to the air for its regularly schedu=
led
drill session the first Tuesday of each month. The net is at 21:45 local
Ireland time. Thats pretty close to UTC, with the net operating on 7 po=
int
043 Mhz on SSB. (Q-News)

**

BREAK 2

This is ham radio news for today=E2=80=99s radio amateur. From the Unite=
d States of
America, We are the Amateur Radio Newsline with links to the world from o=
ur
only official website at www.arnewsline.org and being relayed by the volu=
nteer
services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: WI-FI SPEED INCREASED 4X

The most widely used wireless local area network protocol, IEEE Standard
802.11, also known as Wi-Fi, was extended last month to make it four time=
s
faster. The CGC Communicator reports that the new standard, IEEE 802.11g
transmits data at up to 54 Megabits per second. Thats up from 11 megabyt=
es per
second as was called for in Wi-Fi standard 802.11b. (CGC Communicator)

(DO NOT READ: CGC)

**

INTERNATIONAL - ASIA: NON HAMS INVADING THE 7, 10 AND 14 MHz HANDS

The increasing use of more frequencies on various ham radio bands by the=20
Indonesians and other South East Asian non amateurs for their personal or
business traffic, is becoming a very serious problem. Q-News reports tha=
t the
Indonesians are using the lower 40 kHz of 40 meters, and frequencies aro=
und 14
point 100 MHz in the 20 Meter band most of the time. =20

Nor have they spared the 10 MHz allocation. There unlicensed oprators ar=
e
regularly heard in the 10.0 to 10.1 MHz segment which primarily carries
international air traffic control communications.=20

Q-News notes that this is a very serious situation. One which could enda=
nger
the lives and safety of air travelers in ITU Region 3 and a situation tha=
t
needs to be to be dealt with quickly at the highest levels of internation=
al
diplomacy. (Q-News)

**=20

INTERNATIONAL - UK: BBC HELPS THE BLIND

The British Broadcasting Company is playing a crucial role in developing =
new
radio equipment that could help increase number of visually-impaired peop=
le
working at the organization. Across the UK, BBC local radio stations are
converrting from analog to digital equipment. The digital equipment is de=
signed
to make life easy for full-sighted broadcast journalists, using a visual
touch-screen system, which is why it needs to be adapted for visually-imp=
aired
people. =20

Now comes word that Claire Jennings, who is the the BBC=E2=80=99s Disabil=
ity Advisor
for Technology, has been working alongside technology company Calrec. Th=
is, to
design a digital radio broadcast mixing console that is user-friendly for
visually-impaired radio producers =20

The BBC has spent the past few months working with Calrec to adapt the
broadcast desk and with BBC Technology to extend the touch-screen control
system so that it can convert text into speech and be controlled using a
standard keyboard. As well as controlling sources to faders on the Calre=
c, the
BBC system can control most other hardware in a similar manner.

The entire story may be found in cyberspace
www.bbctechnology.com/newsarchive4.htm. (Media Network)

**

SPACE: NASA TEAMS WITH LOCAL LIBRARIES TO DELIVER -- SPACE

NASA and the American Library Association have partnered to create a
one-of-a-kind interactive space research exhibit. This, as part of a new
program called NASA @ your library.=20

The unique exhibit will tour 120 public libraries in five regions across =
the
nation for the next two years. It will feature special presentations
specifically created to expose people of all ages to NASA research in the=
areas
of health, home and transportation, agriculture and environment, and comm=
erce.=20

The program was recently launched at the Enoch Pratt Free Library in Balt=
imore.
NASA @ your library was created to inspire more participation at public
libraries, raise awareness and encourage interest in science. (NASA)

**

CONTEST CALENDAR: FISTS C2C IN SEPTEMBER

Mark September 13th and 14th on your calendar for the third outing of the
annual Fists Coast to Coast contest. This year the contest will run a ful=
l 24
hours beginning at 5 P.M. Pacific Daylight Time on September 13th and
concluding at 5 P.M. on the 14th. That corresponds 0000 to 2400 UTC on
September 14.
=20
This year the rules are easier to understand and the sponsors say that th=
ere is
the potential for higher scores due to the use of multipliers. The URL fo=
r
rules and awards is complex and appears in the print edition of this repo=

rt.=20
If you have questions, please e-mail them to Paul Beringer NG7Z at
fistsc2c@yahoo.com. On-line information is at
www.tomochka.com/k7fff/fnw_c2c03.html. (FISTS)

**

DX

In D-X, word that two separate groups will be operating from Swaziland th=
rough
the 3rd of August. K4SV and VA7DX will be active as 3DA0SV and 3DA0WC. =
Four
South African operators will be on as 3DA0DX between the same dates. QS=
L each
group as directed on the air. (GB2RS)

**

THAT FINAL ITEM: ARNEWSLINE TAKES YOU TO A HAM RADIO BALLON LAUNCH

And finally this week, take a listen to this:

--
=E2=80=9C15,790 feet. Course 44 degrees moving at 10 miles an hour.=E2=80=
=9D
--

That=E2=80=99s the report of one of the controllers tracking a high altit=
ude ham
radio balloon launch that took place Saturday, July 26th at the Fort Tuth=
ill
Hamfest just outside of Flagstaff Arizona. =20

The launch was sponsored by hams belonging to Arizona Near Space Research=
.=20
Brian Bingham is a Physics teacher from Deer Valley High School in Glenda=
le,
Arizona, who came out to take part in the launch. He says that many of t=
hose
assisting are also educators who want to bring space a bit closer to thei=
r
classrooms:

--
Bingham: =E2=80=9CMost of the people you see out here helping are that g=
roup and a
group of Arizona high school teachers that are going to be taking on some=
of
the balloon launches. They will have teams from their schools do balloon
launches through the NASA Arizona Space Grant.=E2=80=9D

--

Bingham, who was a radio amateur many years ago described the system bein=
g
readied to be sent aloft:

--=20

Bingham: =E2=80=9CYou can see a small package down here. It was built b=
y one of the
teams from a workshop and contains temperature sensors, humidity sensors,=
a
small still camera, solar cells all in something just a little over a pou=
nd in
weight. It has telemetry equipment with GPS position via satellite and
transmits it back so that we an track it on the ground and recover the
equipment.=E2=80=9D

--

And how high will it all go?

--

Bingham: The balloon will go up to somewhere in the neighborhood of 100,=
000
feet. The balloon will also swell to somewhere about forty feet in diamet=
er
before it finally bursts. And then the parachute will bring it back down=
to
Earth.

--

Brian Bingham says that his students will soon be choosing a project of t=
heir
own to launch to the edge of space on a future balloon flight. It will b=
e
another educational experience made possible through the cooperative effo=
rts of
NASA, the educational community and ham radio. (ARNewsline(tm))

**

Go to the SIRIUS radio site with your browser. They just released 2
home/car units. Sample their music channels before you buy anything.
I've set up a mobile Jensen unit in my home since they launched in NY and
it works great.

I have two of those "atomic" clocks, one at home and one at work. Both came
with admonitions in the instruction sheet to keep them at least 10 feet away
from any computers, monitors or TV sets. Naturally, all of these items
generate intense EMI fields around them and would swamp the weak 60KHz
signal from WWVB.
Unless you can satisfy these criteria, or provide an external antenna that
you could couple to the internal antenna of your "atomic" clock, then I'm
afraid you've a couple of boat anchors on your hands. Your clocks can only
syncronize if they have a signal that is strong enough to allow it to
receive the coded information that it needs to set the clock. Antenna
placement is critical for these clocks.

I have several of these clocks at my house, including some atomic watches.
No problem (luckily) but the antennas aren't really that big, especially
inside the watch.

Someone suggested I could take another loopstick antenna and put it outside,
then run some wires back to the clock inside and wrap a few turns of the
wire around the clock's antenna. I would think that some tuning would be
necessary to get it to work well. I want to install a clock at a well
shielded radio station transmitter building and short of putting the entire
clock outside, I'm also running out of options.

1749. Weird - Stations on 44 *and* 45?

Newsgroup: rec.radio.broadcasting
Date: 2003-08-06 02:26:31 UTC
From: "Steven J. Sobol" <sjsobol@JustThe.net>
Message-ID: <bgpp0n$o41$1@xuxa.iecc.com>
Source record: 7276

>From 1988-1990, I was in college in Dayton, Ohio. At the time, there was a 5-year-old TV station (WRGT/45) which had just signed on as a FOX affiliate.

Today I was at the website for another Dayton TV station, WHIO-TV 7. Their website also has information on Dayton's UPN station. Dayton's UPN station is apparently at Channel 44.

I've never heard of two TV stations in the same market separated by one position on the dial. I know that for technical reasons, you can't do that with radio, and I'm trying to figure out how it's being done here.

The Dayton FCC listing includes all of the stations that were there when I was in school (2, 7, 16, 22, 45), an active HDTV license on Channel 30, and HDTV applications on 41, 50 and 58. And there is an LP license on Channel 66. Nothing on 44.

In Springfield, the other major city in the area (radio and TV stations generally identify themselves as "WXYZ Dayton/Springfield"), I see a WBDT-TV26, WBDT-DT18, and a couple miscellaneous LP licenses.

The only stuff I can find at Channel 44 in Ohio: WTLW-TV Lima, WOUC-TV Cambridge, and W53BN Youngstown. There is not a single license for Channel 44 *anywhere* near Dayton. Not in Montgomery County, not in Clark County, not in any of the counties surrounding Dayton or Springfield. In fact, there are only a handful of records referring to TV44 anywhere in Ohio, according to the search I did on the FCC website.

I'm going to e-mail the station, but they have a note that "due to the volume we receive, personal replies will not always be possible."

I hope someone answers my e-mail. I'm really curious about this.

I believe "UPN 44" is on cable only.
http://www.greaterdayton.com/localinfo.shtml (not conclusive but
suggestive)

I can't find anything about a over-the-air 44 there either.
==========
That said...

Such things are no longer impossible. It looks like part of the big
overhaul of the rules for DTV included relaxation of the channel-spacing
requirements.

Look, for example, at Philadelphia where WFPA-CA, a Class A (low-power
analog) station operates on channel 28 within a mile of full-power WTXF
channel 29. Or, in Boston, where full-power WFXT on channel 25 is
surrounded by low-power stations WFXZ-CA (24) and WHDN-LP (26). (they
even managed to shoehorn in a 3,000-watt LPTV on channel 3 in Boston,
between WGBH on 2 and WBZ on 4. W38CL tried to get a permit to use
channel 3 in the Bronx but failed...)

Even here in Nashville, we have a low-power station on channel 26 - a
full-power DTV on 27 - and a full-power analog about 30 miles east of
town on 28.

Now, you still can't use adjacent channels for full-power analog
stations. But you can definitely get a DTV in adjacent to a full-power
analog; and you can also get a low-power analog adjacent to a full-power
analog.

That's because it's NOT being done here... Dayton's "UPN 44" exists
solely on local cable TV. It just sounds odd, because most
"cable-only" broadcast-style stations aren't as high up as cable
position 44.

44, I believe, started off life as "MVC"... which I believe would
stand for "Miami Valley Cablevision". WHIO-TV - which runs it (Cox, I
think) - only recently started calling it "UPN 44".

Apparently not... I'm not in Dayton, but your puzzle intrigued me. It looks like the WHIO web site is the only place that makes any reference to a "UPN 44", and notice there are no call letters, just "UPN44".

It looks like it's a cable-only station. If you go to one of the TV listing sites and plug in a zipcode for Dayton, then choose a cable system, you'll find a "MVC 44" listed on channel 44. Look at the listings, and they're identical to the WHIO website's listings for UPN 44.

There's also a broadcast station called WWHO on channel 53, also a UPN affiliate, but it doesn't appear to be carried on cable.

But getting back to your original point... there are not actually two stations in Dayton on 44 and 45.

(There are some places where digital stations are on adjacent channels to analog stations, but no adjacent-channel analog-analog or digital-digital.)

I don't think it is. It looks like the ch44 is one of those made-for-cable
stations.

There was something floating around either on one of these groups or maybe
at 100000watts.com about two non-comm FM's on the *same* channel on opposite
ends of a city.

I was working for The Tanner Company, producing promos and jingles and stuff in the late 1970's. Each of us had a studio assigned and mine was a 16-track wonder designed by Wilton Jatan (sp?). We guarded our settings and equipment fiercely.

Keith (?), the Tanner Sales Manager (he always carried at least a carton of cigarettes in his briefcase), brought a grey-bearded client into my studio late one afternoon, clearly after a long liquid lunch for both. He asked me to spool up and play a jingle demo for the client. I did, and sat back listening to it with them. Then the client got up and started working the eq on MY Audiotronics custom board.

He fussed and fiddled with the sound until I stood up and asked him, please to stop and sit and just listen and to LEAVE MY GEAR ALONE!

At that point, Keith introduced me to Sam Phillips.

How do you tell the guy who invented Elvis to quit messing with your 2k eq switch?

There are two stations each on 88.1 and 88.3 in Chicago. I believe
you're correct that they're at opposite ends of the city. One of the
88.1's is a grandfathered Class D (10-watt) operation.

For good measure, there are six more 88.1's in Chicago suburbs and five
more 88.3's. Plus someone's managed to shoehorn in two pirates on 87.9...

What's been done to the NCE band in recent years is absolutely
scandalous. I was under the evidently false impression that the
mission of the F.C.C. was to prevent interference, not promote it.

Since you have a location where the clock works, why not put a small light on it
and point a small wireless camera at it. Then you can monitor the time almost
anywhere in the building. I have atomic clocks in my home and they only work in
2 west facing areas, so I know what your dealing with.

The separation between those two sets of frequencies is wide enough
that such an allocation is allowable.

I believe the same thing can be done with 6 and 7 (both are at
opposite ends of the FM broadcast band).

| The separation between those two sets of frequencies is wide enough
| that such an allocation is allowable.

4 MHz.

| I believe the same thing can be done with 6 and 7 (both are at
| opposite ends of the FM broadcast band).

Actually there are 66.1 MHz separating the topmost FM channel and
TV channel 7. In between are the aircraft band, two-way radio
services, and a few other things.

One city with stations on channels 6 and 7 is Omaha.

> Easy way to find out: Unplug your cable feed and hook up the TV set to an
> antenna.

If you do that, remember to switch your television to broadcast TV ("Air") mode. Cable TV uses different frequencies for the upper channels than UHF broadcast TV, so if you try to receive UHF TV with the television still in cable mode, all you'll see is static.

That being said, VHF channels 4 and 5, or 6 and 7 can be broadcast simultaneously in the same city because their frequency allocations are not right next to each other, like the other channels. Between channels 4 and 5 there's the 72 MHz radio band, used for things like pagers and wireless microphones. Channel 6 is at the top of the "VHF-Lo" TV band -- just below the FM radio band, so you can hear Channel 6's TV audio at 87.7 "FM" -- while channel 7 is at the beginning of the "VHF-Hi" band, over a hundred MHz higher, with many other radio services between them, including FM broadcast radio, aircraft communications, ham radio, public safety (police, fire, etc.), and business communications.

In the early years of TV, at least up through the 1950s, it was common to have separate antennas for the VHF-Lo and VHF-Hi bands, with a switch on the back of the TV set to select between them.

Jerry, WWVB only operates at 60 KHz, while WWV is on the higher
frequencies. you can not scan and lock on the best signal when there is
only one signal.

4 and 5 are allocatable to the same COL/market, as are 6 and 7 and 13 and 14.

There is now no Channel 1, although early TV receivers provided for such a channel (Philco, e.g.).

The only COL (and market) to have every possible VHF channel AND with every such channel having an offset of zero is Los Angeles.

This one will no doubt be making the rounds (you may even spread it yourself) so let me be the first -- or second -- to share it with you:

Three guys are waiting to get into heaven.
Peter asks the first man, "How much money did you make?"
The man responds, "$250,000."
"Really, what did you do to make that kind of money?"
"I was a lawyer" the man answers.
"Very well, you can come in..."
Peter asks the second man the same question.
"I made $279,000 last year," he says.
"And what did you do to make that money?" asks Peter.
"I was a doctor."
"You did well...come on in!"
Finally, Peter reaches the third man and asks the question again.
The man proudly states, "I made $17,500 last year!"
"Really," Peter responds, "and what were the call letters?"

Tonight I was installing a media system in a new conference room and listening to a webcast of "WOLF-FM" (not sure if it was real radio or web-only).

As far as I could tell, at least for the hours that I was listening to it, that station is purely automated -- even the IDs were canned and each track lead into the other. I pondered this.

Then I had a great feeling of irony -- as I was listening to the words "the top brass don't like him talking so much and he won't play what they say to play [...] there goes the last human voice [...] as we celebrate mediocrity [...] there goes the last DJ" ... here was Tom Petty's _The Last DJ_ on a station that (again, as far as I could tell) has no DJ. (IMHO, though, the music was farily good and there were very few interruptions for ads compared to what I'm used to)

Was this just a random pick? Did someone throw this into the setlist for the subtle humor? Does WOLF exist in the real world and do they have DJs?

Thanks,

Lincoln

I always found it unusual that WFXI-TV in Morehead City NC managed to get a channel 8 VHF allocation assigned to them. There's a full-power 7 and 9 less than 50 miles away and another channel 8 just across the border in Virginia. That must have taken some extremely creative engineering.

I think you're ignoring the other part of the curve for a broadcaster
and that's the issue of what a broadcaster can earn with a particular
format. The likely reason that country doesn't work in NYC is that
advertisers in NYC don't want to target country music listeners, or
alternatively even though large in number, they're too spread out to
support many small advertisers away from where they regularly travel.

I understand what you mean and not just from a DJ point of view. I used to be a radio DJ on both am and fm stations. I live near a major city and there is a good % that is canned. The closest radio station to my location is 95% canned. I lost my last radio DJ job because the station decided to broadcast from a feed in California - still there are a few good live (for the most part) stations around.

It seems to me the Commission's impression of service area is badly pessimistic. "Protected contour" for a Class C station may be 60dBu but my car radio gives reliable program-quality reception of signals as weak as 42dBu. That's a pretty big collection of stations I can receive with good signals but might lose to interference.

But that's not what's up in the Chicago area. Virtually all of these stations have been around for a LONG time - originally licensed as 10-watt Class D outlets. Most of the surviving ones are minimal Class A operations at between 100 and 150 watts ERP. There is some interference but it really seems managable.

Under the old regulations adjacent VHF channel full-power stations must
be at least 95.7km (just shy of 60 miles) apart. (87.7km, just shy of
55 miles, for UHF)

The FCC shoehorned in a few short-spaced allotments back in the early
1970s, and it took awhile for them to decide who'd get those allotments.
Channel 8 in Knoxville, TN and Altoona, PA are two examples.

One, I think it's snobbery. Two, much of today's Country doesn't sound
much different than AC. Three, media buyers are younger than most
Boybands and the owners are chicken.

They'd all rather the the 11th
techno-alternative-trance-AC-Urban-Polka station in the market before
taking the Country plunge.

I would bet that if Roseland (a local concert venue in Manhattan) had
a country night every week we'd have to rope off the streets to
control the crowds. Even better, the guns wouldn't be automatic
weapons, they'd be six shooters like the good ol days.

Chicago's in Zone I, so the maximum would be at Class B levels.
(WMBI is grandfathered). Most of the downtown commercial FMs barely
reach the exurban areas.

There has been a little bit of NCE-FM clutter out in the exurban
areas, but, as you note, the clutter in-town is longstanding and
dates back to the days when class D stations were being created
anew in the NCE part of the band.

Source record: 7170

I've recently upgraded my car stereo and the new unit can decode RDS signals. I know the service never took off in the US but I was surprised in my travels to find that my home area has more RDS stations than pretty much anywhere else.

West of Birmingham, AL I've got 5 different stations providing a signal. So far the only place with more that I've found is Atlanta, with 6 or 7, depending on the area.

Are there any markets with 7 or more stations with RDS? Are there any small communities with 100% RDS coverage?

In addition to the ones in Chicago, here in Birmingham, AL we have two stations on 91.1, both of which are college-run outlets.

WVSU operates at only 500w with a south-oriented directional antenna from atop Shades Crest in the southern suburbs, and WJSR operates with a massive 100w which may be directional to the north from the far-north community of Pinson.

About five years ago they both were 100w nondirectional, but both had really low HAATs and several hills separating the signals. Either way, the only place I could find discernable interference between the two was in east B'ham near Century Plaza and in Tarrant City, just north of downtown.

Join the GAGLIARCHIVES this Saturday night at 10pm Eastern time for program 808, as we feature a 4 hour spotlight on the music of the legendary music festival Progday. We'll be spotlighting music from this year's lineup featuring Bubblemath, Nick D'Virgilio, Wishbone Ash, Samla Mammas Manna, Arti + Mestieri, Clearlight, Krakatoa, and Cast. We'll also flashback to some of the previous Progday's with some stunning performances from Ars Nova, Cloud Nine which ultimately became Ozone Quartet, Deus Ex Machina, Discipline, and music from Kraan and their new CD Through. We'll also give you the all around updates on location, history, and Progday exclusive merchandise info....this is our first Progday focus so tune in....

1796. Kansas City: WDAF to 106.5

Newsgroup: rec.radio.broadcasting
Date: 2003-08-11 02:46:52 UTC
From: Richie Kennedy <route56@route56.com>
Message-ID: <bh702s$k4s$1@xuxa.iecc.com>
Source record: 7172
Cross-posted to: rec.radio.broadcasting,alt.radio.broadcasting

As of noon today, WDAF "61 Country," has become "Country 106.5" as the format has moved over to the FM side, as announced last week. 610 and 106.5 currently are being simulcasted, although plans are to change formats on the AM side, presumably to sports talk.

They are also genoursly referring to themselves as "WDAF-FM," so those calls will eventually be assigned to 106.5 (the top of hour ID currently referes to both stations "WDAF Kansas City and KCIY FM Liberty"). I have no clue as to whether the AM will retain the WDAF calls or new calls would be sought. I'll bet 50/50, as on one hand, the WDAF calls are tied to the format and there should be something new for the new format. But on the other hand, the calls are also tied to the frequency, and if they are going to sports talk, using the WDAF calls could be beneficial, especally since the main competiton flouts its historic calls -- WHB.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been

broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Amateur Radio Newsline™ Report 1356 - August 8 2003

Amateur Radio Newsline report number 1356 with a release date of Friday, August 8 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL tells the FCC to set R-F-I immunity standards for consumer electronic gear, the FCC says it won't decide the merits of a California frequency coordinators actions, and the price of a vanity call sign is going up again. These stories and more follow on Amateur Radio Newsline report number 1356 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: ARRL TELLS FCC TO SET INTERFERENCE REJECTION STANDARDS

The ARRL has told the FCC that improved interference standards for consumer electronic devices is among the most pressing needs being faced by the ham radio community. This, as the Commission considers the interference immunity performance of receivers. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The ARRL made its position known in comments July 21st in response to an FCC Notice of Inquiry titled Interference Immunity Performance Specifications for Radio Receivers. That probe was released last March as ET docket 03-65. In its filing the ARRL says that no receiver immunity standards are necessary or practical in the "essentially experimental" Amateur Service. Instead, says the ARRL, the real need for receiver immunity specifications is in the area of consumer electronics and the FCC must establish stronger interference rejection standards for such devices.

The ARRL's 21 page reply also recounted the recent history of efforts to come to grips with interference from RF sources, including amateur stations, to receivers used in other services, such as TV and radio broadcasting, and to consumer electronics. The ARRL suggested that the FCC mandate a standard for all consumer electronics or adopt a labeling or grading system. It also suggested that the FCC not rely exclusively on manufacturers to set standards as a way of lessening the problem.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The politically powerful Electronic Industries Association which represents the manufacturers of consumer electronic gear is categorically opposed mandatory RFI immunity standards. (ARRL)

**

RADIO LAW: FCC REFUSES TO DECIDE ON MERITS OF COORDINATORS ACTIONS

The FCC has told the attorney for one side in a California coordination dispute that it will not offer any opinion on the actions of the local frequency coordinator. This most likely means that a rumored law suit in the mater may now proceed to court.

Attorney Ted Smith of Santa Rosa California had written to the FCC on July 3rd. In part, Smith asked for the Commission decide if the Northern Amateur Relay Council of California's revocation of the Sonoma County Repeater Association coordination status exceeded the coordinators authority under the organizations bylaws, policies, and procedures, or if the Commission consider such an issue a local matter.

But in his July 15th reply, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingswoth states that the Commission does not anticipate making a such decision on the merits of Northern Amateur Relay Council of California's action. He also stated that the Commission considers coordination in the Amateur Radio Service a matter more appropriate for the parties to resolve among themselves locally, or by mediation, dispute resolution or in the local courts.

With the FCC declining not to take any stand in regard to the merits of the Northern Amateur Relay Council position in the dispute between the W6SON and KD6LSO repeaters, it appears as if the decision of the coordination council will stand unless a expected legal challenge goes ahead. Its also a sure bet that repeater coordinators across the nation will be keeping a very close eye on what happens in Northern California if this issue actually goes into court. (FCC, ARNewsline(tm))

**

RADIO RULES: VANITY FEES GOING UP IN SEPTEMBER

The cost of getting a vanity call sign is going up again this fall. This as the FCC announces that the the ten year license term fee for a vanity call will rise to $16.30 for as of September 9th.

The action to raise the fees comes in answer to petirtions from the ham community to eliminate the fee completely. But the FCC says it expects to collect close to $160,000 from 9800 Amateur Radio vanity call sign applicants during Fiscal Year 2003. That's up by almost $30,000 and 800 applications from Fiscal Year 2002.

Applicants for vanity callsigns will continue to pay the $14.50 fee until the new fee goes into effect in September. Further details on the FCC's position and its response to amateur requests to eliminate the fee can be found in cyberspace at www.arrl.org (ARRL, FCC)

**

RESTRUCTURING: NCVEC NO-CODE PROPOSAL GETS LITTLE AIR TALK TIME

The petition by the National Conference of Volunteer Examiner Coordinators to the FCC to end Morse testing in the United States is getting allot of discussion in cycerspace, but apparently very little on the air. Over the past week the Amateur Radio Newsline team has monitored the ham bands to try to gauge on-the air reaction and so far there does not seem to be very much at all. An occasional mention of the proposal is about all thats been heard over the past 7 days.

But the opposite is true in cyberspace where the NCVEC petition has become the hot topic of discussion in places like the rec.radio.policy newsgroup and on qrz.com. As far as we can tell, qrz.com com has the most interesting discussion of all. Most of the comments are well thought out with very little in the way of rhetoric. So far close to 350 hams have dropped by to add their voice to the discussion. To read what they have to say or add your thoughts, please take your web browser over to www.qrz.com and scroll down to the topic titled NCVEC files no code petition. (ARNewsline (tm))

HAM TESTS: GUNFIRE CAUSES HAM TEST CANCELLATION

I'm Bill Pasternak, WA6ITF, with a late breaking story. Dateline Ventura County California where gunplay has caused the cancellation of a ham radio test session slated for Sunday August 10th.

The exams we to be held at the East Valley Sheriff Station in the city of Thousand Oaks. The session was canceled following an incident earlier in the week where a disgruntled man drove up and attacked Ventura County sheriff's deputies with a gun. No one in the building was injured. The deputies responded and killed the attacker.

But as a result of her gunfire the community room where the ham radio tests are held was damaged. It's also considered as a part of the crime scene and is off limits to the public until further notice.

The Conejo Valley Amateur Radio Club is the group that sponsors the bi-monthly test sessions. It says that it hopes to resume its normal exam schedule in October. (AA6JR)

**

INTRUDER WATCH: MORE CB'ERS ON 10 METERS

Sunspots activity may be down but that's not keeping rogue CB'ers and other intruders off the 10 meter band and spectrum near-by. Q-News reports that while normal ham radio activity on the 21, 24 and 28 MHz bands is down, occasional openings of the 10 meter band shows a number of unlicensed long line fishing net beacons in operation. Also being heard is Citizens Band radio type traffic in the band. Q-News also says that CODAR pulse transmissions in the region 24.950 to 24.995 MHz are continuing and are sill unidentified. (Q-News)

**

RADIO LAW: UK HAMS OBJECT TO RADIO SHOW ON BPL

Last week we reported on the signal degradation that Amateurs in the United States will face if the FCC permits power companies to become suppliers of broadband Internet. But US hams are not alone. The United Kingdom's national ham radio society is angry at a report by the BBC that touts the system without telling the other side. They say the report is not fair and balanced. RSGB news reader Jeramy Boot, G4NJH, is here with the rest of the story:

--

The RSGB has contacted the BBC to point out its objections to an item on the BBC TV 6 o'clock News on Thursday the 24th of July. The item referred to the use of the electricity supply as a medium for Internet access. This is variously referred to as PLT, PLC or Powerline Communication.

The following is a quote from the e-mail sent to the BBC TV News: "The news item was unbalanced in that no mention was made to the very serious problems of radio interference inherent in Powerline technology. At the present time there is strong disagreement as to how much radio interference should be permitted. Needless to say radio interests, which besides ourselves, include the BBC and many other organisations are anxious that radio interference should be minimised."

The e-mail went on to point out the difference between the systems based on ADSL technology, which are currently being deployed in considerable numbers, and the proposed PLT systems.

Jeramy Boot, G4NJH.
--

At airtime, it is not known if BBC 6 plans a follow up report giving the negatives of BPL. An interesting article on Broadband Over Powerline communications is available by clicking the link marked "powerline communications" on the RSGB website at www.rsgb.org. (GB2RS)

**

RESTRUCTURING: DENMARK GIVES HAMS 70 MHZ

Amateurs in Denmark have been given permission to operate on the 70 MHz band. This, according to OZ2M who says that three frequencies are available at 70.025, 70.050 and 70.100mhz.

Individual applications have to be filed for the relevant frequencies and the maximum power is 25 watts, but there are no other restrictions. In other words, the 70 MHz allocation is available to all license classes in Denmark and all modes may be used. (UBE)

**

RESCUE RADIO: FIRES DAMAGES TWO REPEATER INTERTIES

Back here in the United States, Arizona wildfires have damaged two repeater newtworks. Blazes wiped out repeater relay links on Mount Lemmon, Arizona, for both the Zia Connection and the Cactus Intertie. Both are wide area linking networks. The fires occurred in mid July. (Repeater Owners Remailer)

**

RESCUE RADIO: ECHOLINK ASSISTS DURING HURRICANE CLAUDETTE

Traditional ham radio communications during Hurricane Claudette in Texas in July were augmented by an Echolink connection keeping key players in constant contact. According to the ARRL Letter, the Nacogdoches Amateur Radio Club used Echolink to tie together coastal repeaters, the National Hurricane Center, the National Weather Service, the Texas Department of Public Safety and most coastal emergency operating centers. Club spokesman Tim Lewallen, KD5ING, said that at the height of the storm, there was "almost constant" activity on the link, mostly between the National Hurricane Center and ham spotters providing real-time, first-hand reports. (ARRL)

**

ENFORCEMENT: $8,000 FINE AFFIRMED FOR FAILURE TO INSTALL EAS EQUIPMENT

The FCC has affirmed an $8,000 fine against WENA of Yauco, Puerto Rico. This for the stations failure to install Emergency Alert System equipment. The FCC says that Puerto Rico is a possession of the U.S., and is therefore governed by the it's Regulations and rules. The complete story is in cyberspace at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2360A1.doc (CGC)

**

AT THE COMMISSION: FCC OFFERS FREE WiFi TO VISITORS

The FCC says that it will provide free wireless Internet access to visitors at its Washington, D.C. office, but there are a few caviats. Visitors must bring their own hardware and software and can use the service only in two specific locations. The FCC alao says that it won't provide any technical support. More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-237306A1.doc (FCC)

RADIO POLITICS: PRINTER ERROR IN AMSAT BALLOTS

An error by AMSAT's printer has resulted in a reprinting and remailing of ballots for the amateur satellite organization's board of directors.

The CQ website reports that the mailing included biographies for candidates from a past election. As a result, the original white ballot cards sent out with the first mailing will not be counted. If you never mailed yours in simply disguard it.

Only the replacement yellow ballot cards sent in the second mailing will be accepted as valid votes by AMSAT members. These are due at AMSAT headquarters by September 15.

By the way, AMSAT is not ouut any money on this one. The printer bore the total cost of the reprinting and remailing. (ANS)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: A WEB PAGE FOR NIKOLA TESLA HISTORIANS

In the world of electronics and telecommunications, inventor Nikola Tesla was one of the more mysterious of our early technological pioneers. His experiments and demonstrations caused some to believe he was a genius, while others had to wonder if he was engaged in witchcraft.

Much of what he wrote nearly a century ago still evades our understanding. If you're intrigued by the man and his specific visionary approaches to physics, you can visit his selected writings at www.tfcbooks.com/tesla/contents.htm (CGC)

**

NAMES IN THE NEWS: KA3HDO PROMOTED AT NASA

Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, has been promoted to the highest technical rank accorded a NASA scientist or engineer. Bauer, who works at NASA Goddard Space Flight Center in Maryland has been named as a Special Technical or S-T. This, in recognition of his record of exceptional technical achievement in the field of guidance, navigation and control.

KA3HDO's promotion came through in time for him to be appointed to the NASA deputy administrator's new blue ribbon panel on Alternatives to the Orbital

Space Plane. Bernard Seery, chief of the Mission Engineering and Systems Analysis Division in the Applied Engineering and Technology Directorate, said Bauer's new ST rank formally recognizes him as a lead guidance, navigation and control expert at the Agency level. (ANS)

**

HAM RADIO IN SPACE: AN ALL HAM CREW FOR ISS EDITION 8

The ARRL reports that both members of the recently-announced Expedition 8 crew for the International Space Station are hams. Astronaut Mike Foale, KB5UAC, will be the crew commander and science officer. Cosmonaut Alexander Kaleri, U8MIR, will be I-S-S flight engineer and commander of the Soyuz capsule used to transport the crew members to and from orbit.

Both Foale and Kaleri are veterans of the Mir space station. They'll be joined briefly by a third ham, Spain's Pedro Duque, licensed in the U.S. as KC5RGG, who will represent the European Space Agency. Duque will return to Earth with the departing Expedition 7 crew. The crew exchange is scheduled for mid-October. (ARRL)

**

INTERNATIONAL-UK: HAMS AT GASS 2003

Amateur Radio will be a part of a major science exhibition down-under. Q-News Graham Kemp. VK4BB, reports:

--

The Great Australian Science Show (GASS) will be held in conjunction with National Science Week at the Melbourne Museum, and amateur radio is to be on
display for three days.

WIA Victoria with the help of its member clubs are participating in the show, for three days from Saturday 16, Sunday 17, and Monday 18 of August. The Melbourne Museum is open from 10am to 5pm.

Displays of IRLP, Morse code, VHF Transceivers, Crystal sets, ARDF equipment, Satellite tracking software, Power Point Computer Displays and more are planned.

--

Again, those dates are August 16, 17 and 18 at the Melbourne Museum in Melbourne Australia. (Q-News)

**

ON THE AIR: UK HAM TO DO SUMMIT BACKPACK

On the air, word that Richard Newstead, G3CWI, is planning a long solo ham radio backpacking trip across the hills of South Wales this month. His objective is to activate 15 of the hills in the Brecon Beacons National

Park on 40-meter CW for the U-K's Summits on the Air award program.

The walk will be over 90 miles with a nearly 25,000 feet of ascent. In addition to the High Frequency radio gear, G3CWI will be carrying all his own food and camping equipment. The walk is expected to be completed by the 17th of August. (RSGB)

**

ON THE AIR: RUSSIAN POLAR MOUNTAIN EXPEDITION.

And speaking high locations, word that the Russian Robinson Club plans to be active as R3RRC/9 from August 14th to the 25th from the Polar Ural Mountains. Their operations will be on both the H-F and VHF bands. If you can read Russian, more information is available on the web page link you will find in this weeks print edition of the Amateur Radio Newsline report. More is on-line at www.hamradio.ru/rrc/AWARDS/rma.htm
QSL via UA3SGV: Andy Blinushov, P.B. 180, Ryazan-35, Russia, 390035. (OPDX)

**

DX

In D-X, word that M0GMT, and DJ9AO, are teaming up for an ambitious DXpedition to Cambodia running through the 18th of August. hey will use the callsign XU7ACT for normal operation and XU7ACU for the WAE CW Contest on August 9th and 10th. QSL's for both calls go via G3SWH. (GB2RS)

And N6XIV/KH9 is expected to be active again from Wake Island for about three weeks. This will be his last Wake Island work assignment for 2003. He operates on SSB only whenever possible during his very limited spare time. (GB2RS)

Lastly, word from Great Britain that nominations are being sought for the G5RP Trophy. This is an annual award to encourage newcomers to High Frequency D-X'ing and is awarded for making recent rapid progress in D-Xing, which only newcomers have the scope to do. Nominations should be sent to Colin Thomas, G3PSM, by e-mail to hf.chairman@rsgb.org.uk Nominations must be received by the 31st of August at the latest. (GB2RS)

**

THAT FINAL ITEM: THE NIGERERIAN SCAMMERS ARE AT IT AGAIN

And finally this week, theres another scam involving Nigeria and this one is targeting Amateur Radio. But this time a ham has outwhitted the alleged scammer. We have more in this report:

--

It all started about a month ago. That's when Jeff Novak, KB3DIV, of Lucinda, Pennsylvania, placed an ad on the QRZ dot com website to sell his Yaesu VX5 hand held. And in a follow-up posting to that website, Novak tells the story of what happened next.

KB3DIV says that he was soon contacted through e-mail by a person identifying himself as James Cruise. Cruise who stated he was from Africa and that he wanted to purchase the unit.

To make a long story short Cruise insisted that a contact here in the United States would send Novak a check for 4800 dollars. Cruise wanted Novak to deduct the purchase price of his HT along with shipping cost and send him a moneygram for the difference.

Soon, Novak received a bank draft for the 4800 dollars. Several phone messages were also left on Novak's cell phone from Cruise. These urged KB3DIV to quickly send him the difference and H-T.

But Novak became very suspicious. So he called the F.B.I. and explained what had transpired. They told KB3DIV that the supposed bank draft is a actually a credit card check and most likely already void. Also that the person calling himself James Cruise was most likely a scam artist. In other words, had he cashed it and sent Cruise the balance, the chances are that his bank would have dinged him for the amount of the bounced check and he would have been out his VX5 to boot.

But in this case the targeted victim was allot smarter than the alleged con artist. He asked the F.B.I. what to do. It advised Novak to destroy the check. He did, and also informed the person calling himself James Cruise that the deal was dead. And when it was all over, KB3DIV still had his VX5, and it was the person allegedly trying to scam him that was - proverbially -- left holding the bag.

For the Amateur Radio Newsline, I'm Mark Abramovich, NT3V, in Philadelphia.

--

Score one for a rather smart ham.

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Norm Seeley, KI7UP, in Scottsdale Arizona saying 73 and we thank you for listening.

1799. San Francisco: KKDV goes country

Newsgroup: rec.radio.broadcasting
Date: 2003-08-12 19:10:32 UTC
From: markrobt@attbi.com
Message-ID: <bhbe38iiv1@xuxa.iecc.com>
Source record: 7176

Bonneville's KKDV (95.7) in San Francisco went from "The Drive"
(classic hits) to "My Country Station" Monday (8/11) at noon.
The call letters haven't changed so far. This marks the return of
a country format on an FM signal to the central part of the Bay Area.

Reportedly, listeners will be asked to "select" a new slogan (which
probably means one or two have been preselected already). There are
no announcers or personalities at the present time and the station
generally sounds like a small-market automated country station,
complete with at least one moment of dead air and hokey announcements
about listeners' helping select the music, build the radio
station, and so on.

With country's shaky history in San Francisco and nearby areas, it
was probably important for this station to put its best face
forward from the start. Instead, it's sounding hokey and small-time.

This is the fifth format on the 95.7 frequency since classical KKHI
was dropped by then-new owner Westinghouse nine years ago.

Other country stations in the Bay Area have mostly suburban
coverage: KRTY for the South Bay and KRPQ in Rohnert Park
for Sonoma and Napa counties.

--
Mark Roberts | "...right-wing radio is niche entertainment for the spiritually
Oakland, Cal.| unattractive. It succeeds because a substantial segment of the
NO HTML MAIL | right-wing rank and file enjoys listening, hour after hour, as
smug, angry, disdainful middle-aged men spew raw contempt at
reified enemies, named and unnamed." -- Hendrik Hertzberg

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

I don't think Bonneville has changed since the days when someone I know
managed a station for them in New York City. He said that he was never
asked about religion. Of course he is pretty conservative, and the format
was one that was unlikely to cause heartburn.

Bonneville owns three "stations" here in the DC area:

WGMS - commercial classical
WTOP - straight news, no "talk", no discernable tilt
see their web site www.wtopnews.com
WWZZ - a rock station that may well be watered down "to suit"

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their

own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I have to differ with you on this one RJ. The Mormon sensibilities have definitely made their share of appearances on the WWZZ signal over the years.

Back when WWZZ/WWVZ was a half decent CHR (before CC decided to put Rhythmic CHR on 99.5 and Bonneville bailed on the format altogether) the were notoriously touchy with the dump button during the morning show, they edited songs excessively; etc. One song example that really used to bug me from the late '90's - "Sexual" by Amber - Bonneville edited the song for airplay and changed it to "Sensual"; subtle, yet highly annoying. In certain urban cuts, they would edit out not only the foul language, but also references to drugs that they (apparently) thought were too overt. This often has the effect of butchering songs - resulting in long lyrical silences throughout the cut.

I often wondered - "if they're so offended by the content, why do they spin these songs?" I guess someone at Bonneville finally agreed - to my knowledge, there are no CHR's left in the Bonneville stable. Can anyone think of an example of a CHR still owned by Bonneville? I don't claim to understand the programming decisions, but I do think that CHR content and Bonneville corporate sensibilities were often in direct conflict.

Best,

Jeremy Powell

When Bonneville ran CHR on 95.7, there didn't seem to be much
different about the fact that Bonneville was running it, although
it was fun in a very minor kind of way to refer to it as "Mormon Hit Radio".

"The Drive" was the best thing on radio in the past 30 years. It was
great the day it came on the air and got better and better every week.
The slogan said it all: "Remember the way radio used to be, well its
that way again".
But now its just, "Remember, listeners don't count. We can jam
anything into their ears we think will bring us more money". No wonder
there isn't any listener loyalty anymore. The only radio we can count
on being here tomorrow is NPR because we get to vote with our own $$.
Maybe this is a good time check out satellite radio. It surly isn't a
good time to listen to Country - hell its NEVER a good time for that
crap!

Take a listen to the AM Stereo airchecks on this site:

http://www.1240keva.com/airchecks/

KEVA is an 880-watt Class C station in Evanston, Wyoming, using a vintage McMartin vacuum tube (valve) transmitter and a complete 1983-era audio chain: a CRL AM Stereo Preparation Processor, a CRL AM Stereo Maxtrix Processor, and a Motorola C-Quam AM Stereo Exciter.

The audio in the MP3 clips was recorded from KEVA's Motorola AM Stereo Modulation Monitor, so you are hearing KEVA exactly as they sound on the air -- not from a direct feed from their audio board.

Now, for those of you who have heard IBOC or DRM... can digital AM ever sound this good? I don't think so... there's only so much quality you can squeeze out of a 20 to 36 kbps data stream. At this point, neither IBOC nor DRM have managed to eliminate the swishy, gritty, phasey, heavily artifacted "28.8K RealAudio Web-Cast" type of sound from their digital audio. And except for a MAJOR revolution in the science of "lossy" audio compression, I don't think they ever will.

Digital does have its advantages... but not in AM audio quality!

>Boybands and the owners are chicken.

Can't comment on point three, but your first two are bulls-eyes!

Point two in particular is right on target. when talking about today's
"mainstream" country. The currents, recurrents and even most of the
oldies sound closer to the hits of the Top 40 Era than the music being
played on CHR and some AC stations. In fact, some of the song and
artists played as oldies on mainstream country stations *are* straight
out of the Top 40 Era -- Johnny Cash, Statler Brothers, Oak Ridge
Boys, Dolly Parton, quite a long list of country acts that are fondly
remembered by Baby Boomers who grew up on Top 40.

And let's not forget the number of country performers, especially
female artists, who are actually getting a lot of play on AC radio and
VH-1. Sometimes I turn on VH-1 while I'm at the computer just because
I enjoy looking at Faith Hill, Shania Twain, Martina McBride, etc.

Country has always been an important part of what started as Top 40
and has evolved into Adult Contemporary. I grew up listening to
rockabilly, along with the blues, R&B, and Brill Building pop that
also contributed to the big hits of the '50s, '60s and early '70s. At
the time I didn't care for much "hardcore" country -- George Jones,
Tammy Wynette, Loretta Lynn, Conway Twitty (himself a Top 40 one-hit
wonder with "Make Believe"), Porter Wagoner and the like -- probably
because it was the "old folks" music my parents and grandparents
listened to. But when Ray Charles did an entire album of country
songs, I listened and liked what I heard. When Roger Miller and Ray
Stevens turned out very clever novelty songs, I didn't care how they
were categorized. When Patsy Cline sang "Crazy", it didn't matter one
bit that both the song and the singer were considered country. And to
be honest, I didn't consider Johnny Cash's "Ring Of Fire" country at
all, since I JUST KNEW that country music never used mariachi
trumpets!

All these artists were able to co-exist on the Hot 100 with Chuck
Berry, Brook Benton, the Beach Boys, the Four Seasons, and all of the
Memphis, Motown and British Invasion acts. If the music was good and
spoke to the teenaged heart-and-soul, that's all that mattered to us
back then.

Today's music industry, including music radio formats, is actually hurting itself with its emphasis on format fragmentation. An artist, label or station that tries to reach only a specific audience is in trouble when the day comes that the audience stops listening and buying. OTOH, an artist, label or station with broad appeal can continue to sell to a maturing/aging audience even as a new generation discovers it -- even if that sort of appeal skips a generation now and then before being rediscovered, as happened with Dolly Parton and more recently with Tony Bennett.

>They'd all rather the the 11th
>techno-alternative-trance-AC-Urban-Polka station in the market before
>taking the Country plunge.

And when the Flavor Of The Month changes, they'll change format in search of another short-term success. Their problem, not the listeners'.

Now that I'm a fulltime listener, the music-station presets on my radios are filled with various flavors of oldies stations. If I'm listening to a Classic Rock station and a song comes on that I don't especially care for, I punch over to a Classic Hits station ... or an AC with an extensive oldies library. If all else fails, I grab a CD from the Time-Life or Rhino catalogs. Rap, trance, boy-bands and the other genres that appeal to today's youth may or may not be popular a few years from now; the music I listen to has been around for fifty years, more or less, and it still appeals to the largest and most affluent generation in history.

Maybe today's youth-oriented stations are actually the modern equivalent of the pioneering Top 40 stations, and they'll be successful for decades to come. But that's not the way I'd bet. I just don't see a modern-day Alan Freed, Bruce Morrow or Art Roberts among the current crop of jocks. Nor do I see very many record industry execs these days who working to find and develop artists with even moderately broad-based appeal. Tommy Mottola has had considerable success, but he's still a long way from becoming the next Clive Davis; as far as I can tell no one is even trying to become the next Berry Gordy, Sam Phillips or Phil Spector.

>I would bet that if Roseland (a local concert venue in Manhattan) had
>a country night every week we'd have to rope off the streets to
>control the crowds. Even better, the guns wouldn't be automatic
>weapons, they'd be six shooters like the good ol days.

I dunno. These days even rural deputy sheriffs and Texas Rangers (the closest modern kin of the Old West lawmen) carry semi-autos. People just don't respect tradition anymore.<g>

I agree broadly with your conclusions regarding IBOC/DRM - however - you
are incorrect in labelling low kbps RealAudio as being completely awful..
It depends on the site specification regarding the codex and how carefully
the site administrator works on the sound objects/transaction model prior
to conversion..

I'm generating very close to AM stereo quality RealAudio at fixed 20kbs
without that 'bottom of the well' sound or any buffer problems on low speed
connections world-wide - have a poke around the site below.. I run 40-45
streams per 1mbs of outbound pipe and still feed a general site through the
same server head..

I have picked up a number of wireless/mobile users over the past year given
that my feed doesn't overload their available bandwidth at the CPU while
still providing a pretty sound quality at G2+ and I have been suggesting on
and off that WiFi may provide for a better over all software based receiver

model.. I can do the same with video feeds - but that limits the feeds to about 20 streams per 1mbs or pipe and advanced Flash/SMIL falls somewhere around 30 feeds per 1mbs outbound..

I apologize and say again that I'm not really a RealAudio zealot or anything - I can't even get them to list my little bitcaster on their site.. But credit where it is due - it's a pretty good codex and multi-media streaming solution overall.. Broadly ported to *many* operating systems and codex too..

I wonder now if the same model applies to IBOC/DRM.. Can you force minimum kbps before accepting transmission as viable? If so - does it improve the quality at the receiver head while limiting some of the problems you have outlined?

A LOT of the complaints related to RealAudio have MUCH more to do with bitcasters cheaping out, not really understanding the details at the server/codex or trying to mess around client side for the marketing bulls rather than anything particularly wrong with the particular multi-media solution itself..

Brattleboro, Vermont

Our local radio station, radio free brattleboro, is currently documenting community support to show the FCC that indeed, we have the "authority to operate" as granted to us by the public, who own the airwaves. We are a non-profit, non-commerical, 10 watt station with a mission to train local citizens in the art of radio broadcasting and the rights and responsibilities inherent to free speech. Our lawyers have advised us that since the FCC has not defined what "authority to operate" is, we can define it as community support. Since we webcast, you are our community too!

Please click on this link to read our petition & register your (electronic signature) support for our project.

http://www.petitiononline.com/07131998/petition.html

Please note that this is for Non-Residents of Brattleboro, VT only, and only one signature can be registered per computer. If you've already signed, please take a few minutes to pass this along to your contacts who care about media reform and continuing to challenge the increasing homogenization of corporate media.

You can check out our website at www.rfb.fm where you can access our streaming web signal and look at our program guide. More information on our current struggle to remain on air despite a recent visit by the FCC is available at www.ibrattleboro.com, and by contacting us at rfb@sover.net

Thank you,

Sara, "DJ Undahcovah"

"It is time to move from being a passive consumer of media to becoming a co-creator in a movement which gives voice to the voiceless. If you can't communicate, you can't organize. If you can't organize, you can't fight back. And, if you can't fight back, you have no chance of winning."

Greetings,

I would like to make you aware of the newest radio show prep site on the net. The Online Prep Resource hopes to become the one site a jock will need to complete all their prep. With a listing of the top news of the day in entertainment, politics, world news, and kicker stories, in addition to links to many news, sports, and other prep resources, this is the one site a jock needs for all that is radio. The OPR is a free service, and will stay that way. Being in the radio industry, I know how important show prep is to ratings and sound. There should be no reason that a jock would have to spend 3 hours a night hitting as many as 20 sites to get the prep they need for their show. The OPR has everything you need in one site. Please feel free to browse the site (www.oprweb.com), and send me your comments (editor@oprweb.com) on what you think would make it better for YOU.

> few years from now; the music I listen to has been around for fifty
> years, more or less, and it still appeals to the largest and most
> affluent generation in history.

And it's a generation that is aging out of the range advertisers want.
It's also a generation whose upper tiers are dying off.

The music will still be around, no question. Just start getting used to
not hearing it on commercial radio anymore (and maybe not even
non-commercial radio as the bulk of that is either religous, NPR
war-on-terror talk, Pacifica it's-whitey's-fault talk or kids more
interested in playing their favorite records).

It's not a question of how affluent the demographic is...it's how WILLING
to SENSELESSLY and IMPULSIVELY part with that money that is the issue.

How many 60-year olds do you know are drowning in credit card debt, car
payments, etc. versus how many 25-year olds who "GOTTA HAVE" the latest
car, 5 credit cars in their wallet, cell phones, PDAs, the latest music,
the trendiest clothes, etc.?

Last time I checked, places like the Galleria Mall in White Plains, NY and
the Jefferson Valley Mall in Yorktown Heights, NY were full of teenagers
(especially teen-aged girls) spending (their parents') money, not senior
citizens and baby boomers.

And I'm sure that's the situation with most of such places where "middle
America" shops.

1815. Voice over Talent - Beginner's FAQ

Newsgroup: rec.radio.broadcasting
Date: 2003-08-14 18:43:32 UTC
From: justinstriker@hotmail.com
Message-ID: <bhgl8kbug1@xuxa.iecc.com>

Voice Over Talent Recording - Frequently Asked Questions

1. Do I have a good voice?
Voice work is more than just the sound of your voice. It is the ability to read, persuade and perform under the intense pressure of the studio recording session, and to speak truthfully under imaginary circumstances. Everybody has a unique voice. Few know how to entertain with it.

2. How do I get an agent?
The best way to get an agent is to put together a high quality professional demo which not only shows off your voice, but your sense of humor and your personality'. We want the agent to say "That's the kind of performer I want to represent."

3. What's a good voice over demo?
A great demo will show off the range of your voice and your powers of persuasion, fully produced with music and sound effects, professionally voiced with elegance, clarity and wit. Your demo should show you at your most persuasive, at your most charming

-Make your tape 90 to 100 seconds (aim for the 90).
-Your first piece should be your most natural voice.
-Aim for five to nine pieces within the 90 seconds.
-Stay away from accents and impersonations unless you do really good ones. If you do use them, keep them short.
-The trick is to be able to read a lot of copy in a short amount of time. You'll need to be able to speak quickly without sounding like you are. Watch for "popping" letters (mainly ps and ts).
-GOOD COPY IS ESSENTIAL!
-Humor is good. We love humor.
-Most talent agents prefer commercial copy; industrial reads are not necessary.
-Smile while you're reading the copy; it really does add warmth to the sound.
-Keep in mind variations in tempo, rhythm, energy level and enthusiasm level, as well as pitch and volume.

4. Can I do voice work part-time?
Voice work is a business like any other which requires your full attention 8 hours a day, 5 days a week. You must develop a strategy of self-promotion by creating a relationship with recording studios, or creating your own in-home studio because you will be forever producing new demos for prospective clients and replacing old material with newly produced spots. It is important to stay current. Things constantly change in advertising. New trends demand new voices.

5. How much money can I make?
Call your local ACTRA performer's union office or log onto their websites and ask for the union rate card for a :30 second TV voice over commercial session and residual schedule. You'll be pleasantly surprised at what you see.

6. Do I have to join the union?
If you want to be recognized as fully professional, you must eventually join the union. Your local ACTRA performer's union office will outline the requirements necessary to become a member. While you are non-union, you can gain valuable experience by voicing public service announcements, volunteering at the local radio station, seeking non-union commercial work, reading for the blind etc. Your payment and reputation will grow with repeat business until you will be compelled to join the union with all it's benefits.

Good luck and welcome to the business!

Have to agree with BR. I was listening to "The Drive" since day one. It "almost" reminded me of the old KMPX days in SF. The way they changed format over night and not telling the listeners ahead of time just sucked!!!! The ONLY way I knew ahead of time was the discussion in ba.broadcasting about the firing of the on air talent. 95.7 has been deprogrammed from all of my digitally tuned radios. Give me back my Classic Rock, Album Sides, and songs I haven't heard in 30 years.....I like country, but I like my rock as well......Eric

Can Digital AM ever sound good?

Not as good as analog.

Analog cell phones sound better than digital cell phones.
Analog Laser Discs look better than digital DVDs.
Analog cable looks and sounds better than digital cable.

Why would digital AM sound better than analog AM?

1818. Where to obtain tracks for radio station music library?

I am in charge of getting a 1200 song Classic Rock music library for a new small college radio station. I would like to ask the pros here what is the cheapest source for this music. We have taken care of the ASCAP/BMI/RIAA annual fees but now I need the actual music.
I know about TM Century but they seem a little high priced. This is all classic rock so the list of songs we need is set at about 1200 songs.
Any information or links would be greatly appreciated. Thanks!

> you are our community too!

1. you can never have too many lawyers. get some more!

2. look at case law!!!!! MicroKind prevailed in the appelete court!!
(look up the case file and read how they argued the case and why they
prevailed in the appeals court).

3. Read up on the lost cases to.....understand what the arguements
were and why they lost the cases.

4. read read read all case law on Pirate radio court cases!!!!!!!!!!!

5. craft an argument (an original, one or the one Microkind used to
temporarily previal).................don't bother crafting an argument
which has lost over and over in the courts (i.e. 1st amendment rights
argument).

6. forget the 1st amendment!.............try for specific case law where
the pirate previaled (again Microkind)(I think I remember that there was
another (preacher in Indiana?) who gave the courts a good fight).

7. General appeals to Constitutional rights and precepts invariably fail
in the real world courts. So using the 10th or 9th amendments is
out.....well.....the tenth argument
(i.e. municipality rights might be interesting). If you can get your
mayor and city counsel to publically defend and endorse you that would
be a good thing.

goodluck.....you will need it!

> I agree broadly with your conclusions regarding IBOC/DRM - however - you
> are incorrect in labelling low kbps RealAudio as being completely awful..

You are correct that when properly encoded, the newer versions of RealAudio can sound surprisingly good at low bit-rates. For stereo music web-casts, RealAudio at 44 kbps is generally very crisp and clear, while 32 kbps gets a little "watery" but is otherwise still very acceptable. 20 kbps isn't all that great, but at least the compression artifacts manifest themselves in a way that isn't grossly objectionable to the ear, unlike WMA's horrible tinny, echoey, metallic sound, and MP3's awful twinkling and chattering noises.

However, given particularly "challenging" audio to encode, just about *any* lossy compression system is going to create audible flaws in the sound. I can even hear artifacts in 384 kbps MP2 encoding, which is considered by the broadcast industry to be a "CD-quality" reference standard, and is what many radio stations as well as the entire XM satellite service use to store their music.

Nevertheless, RealAudio at low bit-rates still sounds better than IBOC or DRM! DRM's "simulated" treble creates a gritty, artificial-sounding high end no matter what bit-rate it's used at, and IBOC sounds just plain *awful* at their AM bit-rate of 36 kbps. They claim to have developed a new proprietary "HDC" codec which will improve the quality of IBOC's audio greatly, but I'll believe it when I hear it!

Most Top 40 Oldies fans (including rockabilly, blues and other genres
popular in the early portion of that era) are Baby Boomers, the leader
edge of which group is only now in its late fifties. Even extending
the beginning of the "Top 40 generation" upward a few years, they're
in their early 60s at most, which means relatively few already dying
of age-related causes.

And we Baby Boomers generally have more disposable income today than
we ever had in our past. The kids are out on their own. We're either
at or just past our peak earning years. Our homes are already paid
off. We can treat ourselves to luxuries we could never afford when we
were younger. Believe me, I buy a lot more than Metamucil and
blood-pressure pills!

I just finished reprogramming the station memory in my Grundig YB 400
PE; four of the first ten stations play some form of rock/pop oldies.
(Of the other six, four are commercial talkradio and two are public
radio. Positions 11 through 40 are filled with distant AM talkers, a
couple of oldies stations I listen to when in Memphis or Nashville, a
country station where a friend works, and shortwave broadcasters such
as BBC and Radio Netherlands. Interestingly enough, some of the
international broadcasters play pop oldies now and then; rockabilly
and blues are more popular in Europe today than they have ever been in
the U.S.)

>It's not a question of how affluent the demographic is...it's how WILLING
>to SENSELESSLY and IMPULSIVELY part with that money that is the issue.

Let's see ... I have two new PCs (built my own desktop, bought the laptop), a motorcycle, guitars, two telephone lines (with DSL on one of them) plus a cellular telephone, a few other toys. I go out to eat once or twice a week. I go to movies, and also buy an average of two or three DVDs per month. My CD collection is constantly growing, although admittedly it's mostly replacements for my vinyl albums and 45s. My two cars are both 2001 models; I'll probably trade one in on a newer model next year. I could go on, but you can see my point -- I'm not just sitting on my money, although admittedly I am saving more now than I ever did as a younger man. (Then again, stockbrokers and mutual fund companies advertise on radio too.)

Okay, I'll also admit that I buy Metamucil too. I don't buy blood-pressure pills, at least not directly; that's what insurance and HMO premiums are for.

>How many 60-year olds do you know are drowning in credit card debt, car
>payments, etc. versus how many 25-year olds who "GOTTA HAVE" the latest
>car, 5 credit cars in their wallet, cell phones, PDAs, the latest music,
>the trendiest clothes, etc.?

Who cares? Most of my contemporaries would rather pay off their credit card debt, or just pay cash and stay out of debt in the first place. You might have a point when it comes to "the trendiest clothes", though -- I wear a business suit when I must, jeans or khakis when I can, but I stopped worrying about being trendy a long time ago.

>Last time I checked, places like the Galleria Mall in White Plains, NY and
>the Jefferson Valley Mall in Yorktown Heights, NY were full of teenagers
>(especially teen-aged girls) spending (their parents') money, not senior
>citizens and baby boomers.

I'll grant you that most of the people who hang out in malls are teenagers. But a typical kid who hangs out in malls, sipping Frozen Cokes in the food court and buying a CD or two doesn't put nearly as much money in the cash register as an Old Fart like me who buys jewelry, major appliances, home entertainment gear, gourmet food, nutritional supplements, power tools and nice (but not trendy) clothes.

I don't go to the mall nearly as often a typical teenager, but I spend much more than a few bucks every time I do go. And I also spend a lot of money in places other than the local mall. Kids get their ears and other body parts pierced; Old Farts get hearing aids, lineless bifocals (or laser surgery), plastic surgery to remove baggy upper lids that impede vision, and otherwise do what we can to keep what we still have in working order. Kids buy whatever brand of sneaker is hot this season; Old Farts buy sneakers too, but we also buy dress shoes, work shoes, walking shoes, cowboy boots, motorcycle boots and sometimes special orthotics that go into our shoes. Kids buy pizza at Sbarro; Old Farts have their pizzas delivered, and go out for steak, Italian, seafood, Chinese or whatever.

Don't tell me that my generation doesn't spend money, because I know better. And our numbers mean we spend a lot of it.

And lest you get the wrong idea, I'm not wealthy. Far from it, in fact. But I'm comfortable, I don't have children living at home, and I buy quality stuff that lasts instead of junk that ends up in the closet ... or the trash.

>And I'm sure that's the situation with most of such places where "middle
>America" shops.

You have something against Wal-Mart, Sears and Best Buy? Yeah, I shop at those places. I also spend lot of money at Home Depot, PetsMart, Office Max, Kroger, various upscale department stores, Starbucks, and even Burger King (although I prefer Sonic Drive-Ins ... I tip the carhops, something I doubt many teenagers ever do). All those places are part of "middle America". I have no idea where people in parts of America outside the "middle" shop. And I don't especially care where people outside the United States shop, although I would presume they shop primarily in their home countries because of convenience.

>Digital does have its advantages... but not in AM audio quality!

Sigh. There are those who can show better performance using vinyl records than a CD recording, and there are those who can show really good performance with a tube amplifier.

--BUT THAT'S NOT THE POINT.

Unless you're really close to this broadcast station and your AM receiver is of unquestionable quality, you'll never know the difference. The beauty of digital broadcasting is that it works better overall in a wider variety of conditions and the radio doesn't have to be outrageously large, heavy, expensive, or high maintenance.

Don't misunderstand me, this station probably is quite an achievement. Unfortunately its an achievement that will hardly get noticed but for maybe a handful of listeners. That's the unfortunate fact of life.

The halls of technological progress are littered with high performance efforts like these...

> you are our community too!

The "authority to operate" is the license from the FCC. Until you
have that, you have no authority to operate--you're a pirate. The
airwaves are sparse and that's why they have to be regulated. You may
not like the way they're regulated or not regulated, but it's still
the law.

And because you're a pirate, you are ineligible to get an LPFM
license--and considering that Vermont is an area that *didn't* lose
its LPFM frequencies in the argument with the NAB and NPR over
adjacencies, you very well could've received a legal LPFM license if
you weren't waving the Jolly Roger. Congratulations, Long John
Silver.

Yeah sure.

One of the responsibilities inherent to all of our liberties is to respect and follow the existing laws. If you want to work for legislative change, that's fine....but you don't get laws changed by breaking 'em.

I believe that "Radio Free Brattleboro" is run out of a urban youth center. Apologies if I'm incorrect about that, but if I'm not.....way to go; great example to set for these young people (NOT!)

I vaguely recall early on in Z-95.7's run (after they started having
live DJs), their morning drive guy was let go for some kind of alleged
indecency. Also, many of the songs they played that had indecent or
suggestive lyrics were edited.

Absolutely! Otherwise, there wouldn't be room for Clear Channel to have 5, 6, or 7 full 100kW stations in each market!

1831. Aircheck Trades Wanted

Newsgroup: rec.radio.broadcasting
Date: 2003-08-18 14:22:07 UTC
From: culturanta@yahoo.com
Message-ID: <bhqnef$h3f$1@xuxa.iecc.com>
Source record: 7208

Looking for the following Chicago market airchecks, unscoped - have lots to trade! I realize most of these are long shots, but that's what a want list is for, I suppose! Please email your lists and inquiries to culturanta@yahoo.com....

WDHL/MET - 1973 through 1983
WLS "MUSIC PEOPLE" artist interviews 1970s through early 80s - complete and unscoped only
WVVX "Night People" overnight show feat. local music 1986-90
WVVX "Antidote Radio" new wave/punk show c. 1982-84
WNUR/WZRD (College) Punk and new wave, c. 1981-86
WLUP - 1979-82
WEFM - 1979-81 - I believe the format became much more eclectic around this time period and included some of the early new wave acts - I remember hearing very old Gary Numan on this station during this time period

ANY help offered will be much appreciated. Thank you in advance!!

Lori in Chicago

1832. WFAN running the "Best of Imus" during a blackout?

Newsgroup: rec.radio.broadcasting
Date: 2003-08-18 14:22:18 UTC
From: Myself <Me@My.Computer>
Message-ID: <bhqneq$h4f$1@xuxa.iecc.com>
Source record: 7206

I'm surprised to hear that when WFAN managed to get back on the air...they were running a "Best of Imus" show.

Wouldn't you think they would at least attempt to have some live programming on?

I initially thought that they were running a "best of" *because of the blackout. Apparently the repeat was schedule already...and they did little to dump it in favor of anything live.

Thoughts?

M

-----article below---------

WFAN/New York's Drive To Get Back On The Air

WFAN PD Mark Chernoff tells R&R, "Sometimes the best laid plans - WFAN has a generator at our studio, as well as a generator at our transmitter. Sounds like we should remain on the air despite a power outage. Well, the generator at the Kaufman Astoria Studios didn't kick on, and the transmitter generator wound up needing to get a boost from our chief engineer's Volvo battery before kicking in." The Infinity Sports/Talker was ultimately able to pick up yesterday's Yankees game from Baltimore to let sister WCBS/New York cover the blackout. Chernoff continues, "While all this is going on, our power supply goes up in smoke and completely knocks out our studio. So, after a couple of hours of hard work by our engineers, we got back on the air." As of today, Chernoff says, "Our studio is still out of commission - no phone lines and only a bit of power. Our Imus show was broadcast from our transmitter site (glad it was a Best of Imus), and midday host Jody McDonald used WIP's studio in Philadelphia - thanks, Tom [WIP PD Tom Bigby]! And now it's Christopher "Mad Dog" Russo at the transmitter, talking for 5 1/2 with no guests and no calls. Anyway, everyone's healthy, we're coping with the situation, our engineers have been unbelievable, and I can't tell you how much everyone has chipped in to keep the station running. Situations like this can bring out the best or worst in people. At WFAN, it's been only the best, as everyone has chipped in! I want to thank my comrades who also helped us out, including Eric Spitz, Frank Raphael, Mark Mason and Tom.

1833. WLIT Chicago...in the pitts again...?

Newsgroup: rec.radio.broadcasting
Date: 2003-08-18 14:22:29 UTC
From: Myself <Me@My.Computer>
Message-ID: <bhqnf5$h5g$1@xuxa.iecc.com>
Source record: 7212

WLIT seems stuck at a 2.9 (in the recent Spring rating period.)

Jeesh...There are only a handlful of major markets that can't seem to support a mainstream AC station. (WASH, KVIL, WLIT...) In most cities they can be THE mass appeal station.

Anyone care to speculate?

M

> blood-pressure pills!

Stop there. Adevertisers determine where ad money will be spent. When
station reps or sellers call, if they do not offer the target deemo, they
are wasting their time.

Very, very few advertisers use radio to reach 55+ consumers, whatever their
income level. The main reason is a belief, backed by tons of research, that
older consumers are more set in buying patterns and thus require much more
advertising (repetiton) to be convinced to change. In most cases, the
increase in frequency is not worth the eventual sale. So 90+ percent of ad
campaigns are not targeted at 55+.

Since these decisions are made by marketers at P&G and Ford and Budweiser,
there is no way individeual stasitons or groups can possibly get through at
that level... in fact, demographics were probably considered in procut
design.

Those who do target 55+ ususally use specialized magazines (AARP, for example) and special interest publications (like travel magazines, finance magazines, etc.) since they are efficient in reaching 55+ persons.

You are an exceptional person in this group. A significant portion of Americans reaching retirement age have savings under $100,000 (think it is 90% plus) and will live on $1200 in monthly SS payments. Most retired persons have extensive credit card debt, since they use the card to finance emergencies, and then gto for years paying it down.

Where you shop or how much you spend is not the issue. It is how much in dollars per person an advertiser would spend to get you to quit buying Metamucil at Wal-Mart and start getting it at Target. The conclusion by most is that changing life-long brand preference is more expensive to change than the profit on several years consumption of Metamucil, even if you use really heaping tablespoons full.

But (and I can't believe this hasn't been argued before....but then I've been gone for a while)....IBOC is the WRONG way to do this, on AM or FM.

Frankly, given the way the broadcast industry has handled audio processing and programming, it really won't make a damn bit of difference whether it;s IBOC or in a new service - it'll still sound like crap. I've said for a long time now that current owners of any broadcast operation shouldn't be permitted to apply for, let alone be granted, a new digital license. Of course, it may just be this concern that U-S broadacasters have opted for IBOC in the first place, since they already "own" the allocation. Less competition.

AM is dead, FM is dying, and they can have their IBOC in its dying days. In the end the only broadcasting left will be the satellite-subscription services, and you'll need to pay for that, just like everything else worth watching or listening to.

1839. Want to receive the DX tests Summary?

Newsgroup: rec.radio.broadcasting
Date: 2003-08-18 14:23:37 UTC
From: ircamember@ircaonline.org
Message-ID: <bhqnh9$hh1$1@xuxa.iecc.com>
Source record: 7218
Cross-posted to: rec.radio.shortwave,rec.radio.broadcasting

Calling all BCB DXers...

It's that time of year again! Another "DX season" is about to begin with the cooler days of the fall. What is a DX test, you ask? From the IRCA web page (courtesy of JD Stephens):

"A DX test is a special transmission aired by a station for the specific
purpose of giving DXers a chance to log their station - something that in many cases may be very difficult or impossible to do under normal circumstances.

DX tests must be aired during what the FCC calls "experimental hours", which is between midnight and 6 am local time at the station. Also, most
DX tests are scheduled for Monday mornings, because traditionally Monday
mornings have been a time for many stations to do routine maintenance on
their transmitters. This is good for the station, because many of them will work in a DX test during their normal testing/maintenance. This is
good for the DXer, because the band is less congested at this time - thus increasing in many instances the DXers chances of hearing a station.

DX tests programs are as varied as the stations themselves. Most will include Morse code identifications and test tones (two things that really "cut through" the interference better than voice or music), and many will include some special music which will really "stick out" as something out of the ordinary. Examples of this are March music, polkas,
TV & movie themes, or Christmas music played at an odd time of the year
(such as in October).

There are some DX tests which are scheduled on Saturday or Sunday mornings, and, at the request of the stations, on other mornings. But, most are usually scheduled for Monday, Saturday or Sunday mornings."

And, if you know someone at an AM radio station or are personally involved at one, I'd *LOVE* to hear from you about doing a DX test! ANYONE is welcome to arrange a DX test - just please, let me know so I can get the word out to as many DXers as I can!

If you'd like to receive a weekly summary of DX tests, please let me know, via e-mail, at ircamember@ircaonline.org. For starters, I'll plan on using the list of e-mail addresses from last DX season to send out the Summary. If you got the weekly summary last year and your address hasn't changed, rest assured that I'll be sending it to you again this season! If, however, you want to be taken off the list or your address has been changed, please be sure to contact me!

73,

Lynn.

Also try thrift stores - they have tons of LPs for about a buck apiece (if your station still has turntables in the control room) and other chains like Tower Records, HMV if you want cassettes and CD.

Alternatively, try a truck stop. Lots of classic rock tapes and CDs for sale in some of those places. :-)

thus the problem being identified. Just because the sales folks or ad folks
ignore this demo today only seems that they will be replaced in not too distant
future. Guess my point is follow the money.

can not argue with this on general principal - again - follow the money - the % of disposable $ very soon is not going to be teens but all of us old farts as the snake continues to swallow the elephant - just my opinion and your test obviously show I am dead wrong - but lets talk again in another 10 years and see what the deal is then :-)

OK - even if all us old farts are broke and deep in debt, the card companies and banks keep letting us buy, though I doubt these statistics as they apply to the present 50 to 60 age group, maybe for present 70+ folks your numbers work - what you got for the current 50 to 60 group?

Again - this may be true today, but the elephant is getting to be toward the back of that snake and that elephant has lots of disposable $ compared to a current 15 year old population. I would think that at some point ad and marketing folks would at least look at this reality. Or maybe I am just old an senile and unrealistic

> > have to be outrageously large, heavy, expensive, or high maintenance.

Weird claims.

Digital broadcasting does not affect the size, weight, or maintenance of a radio. It may increase the price. The digital signal is certainly is more fragile than AM. Analog AM smoothly fades into the interference and noise - digital quits.

In fact digital may increase the weight of a battery-powered radio because of the current drain of the digital processing chips - at least in early versions.

The size of a radio is determined largely by how good you want it to sound.

Typical of radio today. Instead of providing useful information to their
audience, they're airing a rerun. That is a crappy effort.

The concern of analog supporter is not what digital is capable of but what it invariably devolves into, a mechanism for adding saleable minutes at the expense of audio or video fidelity.

Radio was useless in my area for local blackout information.

The county executive resorted to calling into the New York City Channel 4
WNBC News Center to pass info to the public. So how many folks do you think
could view his State of Emergency Message and curfew decree for Orange
County, NY ?

Source record: 7228

It was a `best of Imus' week; they reran the Thursday show on Friday,
evidently having grabbed the wrong one. There's nothing to cover,
so it might as well be a BOI. It would have been even better if
it hadn't been the same one they played the previous day.

Janice and Minko were doing a morning zoo starting at 5:30 until about
6:10 I guess and then dropped into BOI. I guess they found the tape.

If you want live coverage of the exciting blackout, WCBS right up the
dial will satisfy you with endless drivel on that very topic.

Not, by the way, that Imus has been that great recently; mostly the
show is stalling fishing for material, and Imus isn't thinking of any.
The fallback is calling Sid Rosenberg reprehensible, and trash talking
the upcoming fight to benefit the Ranch once again. When you hear
either of these, it means there will be no yuks for the remainder of
the show. Imus has been stumped. The neurons that used to fire fire
no more.

Bernie and Lou are getting surly. I imagine looking at job prospects.

I myself have taped almost all of Imus since 98 and probably will not
reorder another box of 120-casettes when the current one is empty.
Sorry J&R (you get a good deal there but I won't be needing them).

One of the BOI's they played at 5:50 Friday was from a 1998 show;
the difference was immediately apparent.

Next time you watch a ball game, tape the audio. Then, listen to it without the video. Then tell me if you want sportscasters delivering the news. It might be great for the comedy but my news ain't comin' from someone named Mad Dog.

Maybe they couldn't find enough famous sports figures to interview. "Why do you think the power failed, Mr. MVP? Probly cuz thu litz got dark."

Yogi Berra is the only sports figure I'd trust to have the answer.

We have two of the finest all news stations in the world. Why on God's earth would I tune to a sports station in an emergency. If I have Jock Itch, maybe, even though I've got the Gold Bond spots nearly memorized.

WCBS was on almost immediately. WINS took a little longer. Those are my "crisis" stations, not one that makes "Dumb and Dumber" look brilliant. It works extremely well in good times, but not in an emergency.

The smartest thing they could have done was to simulcast WINS or WCBS.

How will the satellite services find the space to serve every
community with the news and local information they need? Virtually
every community has a relatively local station. Whether they actually
provide service is another matter. Rural areas, I doubt, have
repeaters, so localization can't be done that way even if the FCC
allows it.

Then the repeater becomes a radio station (as cookie cutter as you
could ever imagine) at a diffferent frequency.

During the recent blackout I listened to WINS. Once WINS is gone, will
the satellite providers provide an identical service to me? I didn't
go to CNN (though WINS carries CNN among other networks). CNN or the
satellites can tell me what's happening across the country but
couldn't possibly support the cost of all the local news departments
(yes, they're dwindling) for every market. Who is going to tell me
which subway lines are running or where there might be food. Please
don't tell me wireless Internet because the cell site UPSs ran out of
power a couple of hours into the blackout. No cell service. My phone
switched to analog, then the dreaded "no service" message appeared.

Here the outage lasted 29 hours. Does every translator have a
generator capable of that fuel duty cycle and where will the fuel be
stored. Gas stations had fuel but no pumps working. As you can
imagine, New York has extrememly strict rules about fuel storage and
handling. I can't even bring a camp stove propane tank through a
tunnel. It's a felony if you're caught, according to the NYFD. If I'm
renting cell site space to Verizon I don't want a gas tank in the
building. Clearly, the weren't running on natural gas.

I believe all the news services on both satellite services are
pass-throughs.

I found it funny that TV stations stayed on the air with virtually no
operating receivers. They were talking to themselves.

You'll find that WFAN 660 (Imus) had the best live coverage of 9/11 by far; it's even
on the web.

Try
http://rhhardin.home.mindspring.com/sep11a.ra (3.9mb big) 8am hour
http://rhhardin.home.mindspring.com/sep11b.ra (3.9mb big) 9am hour
http://rhhardin.home.mindspring.com/sep12.ra (3.9mb big) 5am hour next morning

The 9 hour above is covered poorly as internet various feeds failed.

Imus replayed it all (more than captured above) on Sep 11 _2002_ and that's at
http://rhhardin5.home.mindspring.com/imuscut.sep1102.ra (4.1mb big)

The reason it's the best is that he's not trying to get something for it; he
and McCord are the finest news people ever.

The ``we-are-bringing-you-your-news'' tone of every news guy is insufferable.
Compare it to Imus.

No. Market forces will make this happen.

>Digital broadcasting does not affect the size, weight, or maintenance of a
>radio. It may increase the price. The digital signal is certainly is more
>fragile than AM. Analog AM smoothly fades into the interference and noise -
>digital quits.

Initially a digital radio will cost more. I don't disagree with that.
Digital signals may or may not be more fragile than AM.

They can certainly ride much closer to the noise floor than an AM
signal can. They don't suffer from background skip causing the
carrier to flutter. They don't put crap out of the speaker when
selective fading hits --they squelch instead. Most people would see
those features as acceptable tradeoffs.

>In fact digital may increase the weight of a battery-powered radio because
>of the current drain of the digital processing chips - at least in early
>versions.

In early versions, you'd be right. Have you looked at the size and
performance of PCS phones lately? No, they don't sound as good as
analog cellular phones. But they're close enough that nobody cares
about the difference.

>The size of a radio is determined largely by how good you want it to sound.

...And the program's desirability will directly determine if anyone
will bother turning this thing on in the first place. If you want a
CD of your brother in law's band, you're not going to hear it on the
radio anyway.

The bottom line: just because a certain degree of performance is possible doesn't mean it is desirable by the general public. Dare I say it: Mediocrity rules. If it didn't, do you think Bill Gates would be a multi-billionare?

Maybe you're right, maybe not. I wouldn't know, since I'm only 54.
But I watch the all-news cable channels instead of MTV, and most of
the commercials I see are for things that are marketed to my
generation. Same goes for the radio stations I listen to and the
magazines I read -- I choose the ones that meet my tastes, and they
are the ones advertisers use to reach me.

I may be an Old Fart (and proud of it!), but that doesn't mean I don't
still choose between McDonald's and Wendy's, or between Ford and GM,
or between Coke and Pepsi. AAMOF, I recently switched from Coke
Classic to Pepsi One. Needed a sugar-free alternative to the Coke
I've preferred all my life, and never cared that much for Diet Coke's
aftertaste. So I ignored brand loyalty and went with the product I
liked better. I suppose that means I can still be swayed by
advertising if I find the product itself suitable.

>Since these decisions are made by marketers at P&G and Ford and Budweiser,
>there is no way individeual stasitons or groups can possibly get through at
>that level... in fact, demographics were probably considered in procut
>design.

I never said otherwise. But the radio stations I listen to generally
carry advertising that's aimed at adults, often at middle-aged and
older adults rather than young ones. Advertise anything you want on a
CHR station, I'll never hear it. Advertise Clearasil or The Gap on an
oldies or news-talk station, you're wasting money.

>Those who do target 55+ ususally use specialized magazines (AARP, for
>example) and special interest publications (like travel magazines, finance
>magazines, etc.) since they are efficient in reaching 55+ persons.

Tell me, what ISN'T a special-interest magazine? I suppose Parade and USA Weekend qualify, but I don't know anyone who specifically subscribe to them ... they're just part of the Sunday newspaper, which the grownups subscribe to and the whole family reads. (The newspaper industry admits that newsstands account for only a small portion of total sales.) Life and Look magazines are long gone. Reader's Digest doesn't appeal to kids nearly as much as it does to Old Farts. TV Guide might qualify as a mass-appeal magazine, I suppose. People magazine may have started as a mass-appeal magazine, but these day's it's just a classier version of the gossip magazines and it appeals to much the same audience.

I subscribe to a couple dozen different magazines, and I suppose every one of them qualifies as special-interest. That includes AARP Magazine, of course. But it also includes three motorcycle magazines I get, six computer magazines, two veterans' organization magazines and two financial magazines. Sorry, I quit reading Rolling Stone years ago and I never cared for Spin. (But I do pick up several guitar- and bass-oriented magazines on newsstands, since I'm thinking about buying a new instrument or two.)

>You are an exceptional person in this group. A significant portion of
>Americans reaching retirement age have savings under $100,000 (think it is
>90% plus) and will live on $1200 in monthly SS payments.

Incorrect. reread your own statement. Hardly anyone reaching retirement age is receiving Social Security payments; it's those who have actually reached the minimum age and who have also chosen to retire (or those who are old enough to continue working while simultaneously receiving SS) who receive Social Security benefits. (And a few people like me receive Social Security Disability Income benefits, but that's not the same as the retirement benefit.)

>Most retired
>persons have extensive credit card debt, since they use the card to finance
>emergencies, and then gto for years paying it down.

Not the retirees I know. They pay off their cards every month, and have ever since they figured out how much of their debt was due to interest and other charges.

>heaping tablespoons full.

And Metamucil itself is only a tiny part of the issue, since as I have pointed out I buy a lot of the same things that younger adults do. (Actually, in my case it's Fibercon these days; I switched from Metamucil a few years ago. I also switched from Kmart to Wal-Mart for most of my "mart" shopping, and most recently began shopping at Target

also. Why Target? Because it's near several other stores where I shop -- Radio Shack, Office Max, CD Warehouse, Goody's (the clothing chain, not Sam Goody), Kroger supermarkets, and several restaurants of both the fast-foot and "regular" variety. (But now there's a new Starbucks across the street from the Wal-Mart Supercenter, so I still go in that direction quite a bit.)

Perhaps when you're older you'll understand that a lot of advertisers do recognize the economic clout of the Baby Boom generation and target us through our "specialized" media.

>
> Anyone care to speculate?

The station's been hurting ever since Mark Edwards was forced out as PD. Granted, the ratings slippage started while he was still there, he may not have reacted to changes as fast as he needed (nobody expected WNND to come out of nowhere with a more up tempo sound) and he might not have survived Clear Channel taking the station over, but for a long time he was running a great-sounding AC station.

The station seems to be like a yo-yo--going upward in the fourth quarter when they do the all-Christmas music format (which knocked WNND into their so-far unsuccessful 80s-90s oldies format) and then dropping back down after the holidays.

Meanwhile, WTMX seems to have become *the* AC station in town, even though they're modern instead of mainstream. Eric and Kathy rule in female demos in the morning and it seems like Barry James correctly anticipated back in 1994 that the target audience didn't want to hear Mariah and Rod Stewart anymore and wanted to hear more current music. It's also been helped by XRT skewing older in its music selection, the competition for the less adventurous of the XRT audience by the Drive and both Q101 and the Zone turning into boys' clubs musically and demo-wise, like most modern stations (despite those two morning drive ditzes on the Zone Brooke Hunter and Jill Egan).

John Gehron, the boss at CC Chicago who is one of the best radio minds in the biz, has been spending most of his time trying to make KISS competitive with B96 (since WNUA runs itself, 'LIT gets good numbers some of the time and Marv Dyson and Elroy Smith have autonomy over at WGCI and V103). Sooner or later, he's going to have to do something serious with the Lite.

The Northeast power outage hit my colo facility hard (my servers are housed at an ISP in Cleveland), but it looks like we're up and running.

I moderate RRB through a news server in upstate New York which also may have been affected, and posting is going a little slower than usual, but the posts do seem to be getting through.

Let me know if y'all see any weird stuff happening or do not see your posts coming through.

> No. Market forces will make this happen.

No, you mean advertising by the broadcasters will produce expectations in the minds of the consumers that digital = better, which will lead to the highly suggestible general public believing these claims whether they're true or not (certainly untrue if you take the UK's experience), this advertising creates demand, which allows manufacturing batch sizes to increase which leads to lower prices, which goes on until the prices are low and demand carries on going up as the prices fall.

This isn't market forces, this is manipulation of the market by broadcasters and consumer electronics companies to ship new products to make extra profit.

> analog cellular phones. But they're close enough that nobody cares
> about the difference.

That's mobile phones, not broadcast quality audio. Who gives a shit about the absolute audio quality of a mobile phone call so long as it is intelligible? This is very different for broadcast quality audio. And BTW, I'm not supporting analogue AM because in the UK analogue AM is shite.

> The bottom line: just because a certain degree of performance is
> possible doesn't mean it is desirable by the general public.

The bottom line is that the broadcasters are abusing their relationship with their listeners in that their listeners trust them to provide as good a service as they think is possible, when in reality in the UK we have sub-FM audio quality on DAB when there is spare capacity on nearly all DAB multiplexes left unused and going to waste, but the broadcasters just don't want to increase the bit rates to improve the audio quality (96% of stereo radio stations on DAB in the UK use 128kbps MPEG Layer 2, and Layer 2 was supposed to be used at 192kbps for stereo audio streams).

The bottom line is that CD-quality on the radio is possible, and given the choice between CD-quality or lower quality then the general public would not turn down CD-quality.

But again the reality is so far away from CD-quality it is just a bad joke. On DAB in the UK the audio quality is sub-FM, yet we hear adverts day in day out saying crap like "superb digital quality sound" and such like. This is an abuse of trust and the broadcasters should be ashamed of themselves that they're conning the general public to earn extra profit (for the commercial radio groups) or to try to hang on to market share and be seen to be more politically correct (for the BBC).

> Dare I say it: Mediocrity rules.

You've just said it.

> If it didn't, do you think Bill Gates
> would be a multi-billionare?

So basically because companies can get away with mediorcity then that should be accepted and applauded?

Basically this is all to make a very small number of people a lot richer, while the masses have to put up with crap audio quality passed off as entertainment.

The bottom line is that we'll all be dead one day and the only actual trade-off going on is people's enjoyment against fking profit for a very small number of people.

But hey, that's capitalism for ya.

Think Enron and Worldcom.

And it seems one of the main purveyors of medicority in the US is getting a bit of a backlash isn't it? Or are the reports about Clear Channel and a load of unhappy listeners just bullshit?

FM stations have never been known for news. If you want to know if
Eminem wears boxers or briefs, go there. It's "lifestyle" stuff.
Doesn't your market have a full service AM? Or, at least, an AM that's
known for its news? FMs treat news as the plague. You can't, suddenly,
expect them to put together a full news staff qualified to report on
an emergency of this magnitude.

A top story for an FM might be when socialite Lizzie Grubman ran over
a group of people in a hissy fit at a trendy night club. Wars.
Blackouts. Who needs it? That's for old people.

Now where did I put my MP3 player?

Rich

The issue is not the money. It is how much ad cost per sale it will talke to
convince mature persons to change thier established and less fluid buying
patterns. So far, the bulk of advertisers have determined that the cost is
greater than the gain.
>
> > Very, very few advertisers use radio to reach 55+ consumers, whatever

At the risk of redundancy, it is not about income. It is about how many
impressions an ad has to make on a consumer before they will consider trying
a brand or changing from thier present brand.
>

The difference is that these national publications are extremely cost
effcient with no spillage and can be target to travelers, hobbyists,
investors, etc. Radio is far broader.

50 to 60 is transitional. Social Security does not kick in before 62; ful
benefits are not available until age 65, the same age that Medicare
eligibility is established. However, there are many under-60 retirees who
have done 25 years in the military, some government services, etc... or have
been early retired. Most are on private or government pensions, and they are
still mature persons who have more established buying habits than the
younger adult demos.

When advertisers find the dollars at stake warrant a greater investment based on greater returns, the ad targets will change. First, though, manufacturers have to be sure ht9ier product targets this age via labeling, sizes, appetite appeal, style, etc. as applicable.

Most ad dictates for anything except pure local retail come form a corporate marketing level, not local.

Call it manipulation if you want. Most go in to business dreaming of
becoming the proverbial 400 pound Gorilla of their market. It's still
a legitimate market force.

>That's mobile phones, not broadcast quality audio. Who gives a shit about
>the absolute audio quality of a mobile phone call so long as it is

Look, the fact that I read news groups proves that I'll venture
through an awful lot of noise to read an intelligent thread.
Likewise, listeners will endure a lot to listen to views or music they
find interesting.

>The bottom line is that the broadcasters are abusing their relationship with
>their listeners in that their listeners trust them to provide as good a
>service as they think is possible, when in reality in the UK we have sub-FM

Look, even plain FM stereo could sound much better if the dynamic
range weren't so terribly compressed all the time. But most
broadcasters are aiming for the middle of the market.

>So basically because companies can get away with mediorcity then that should
>be accepted and applauded?

I say you need to accept it, because it's a fact. I don't applaud it.

>Basically this is all to make a very small number of people a lot richer,
>while the masses have to put up with crap audio quality passed off as
>entertainment.

Well, if you can convince the proletariat that this is the case, and
you win enough of their support to your side, you can do something
about it.

>But hey, that's capitalism for ya.
>
>Think Enron and Worldcom.

Enron and Worldcom pale in comparison to the graft, mediocrity, and
pointless wastes of most governments. It's not about capitalism.
It's not about corporations. It's about making a living.

As you pointed out, better audio is possible. So, what's stopping
you?

>And it seems one of the main purveyors of medicority in the US is getting a
>bit of a backlash isn't it? Or are the reports about Clear Channel and a
>load of unhappy listeners just bullshit?

It doesn't matter what sells. Some in this group have said they'd
play the sounds of roaring chain saws all day long if they could make
a good profit from it.

You are in the tail end of what in radio is called 'the sales demo.' When
you look at the specifications that ad agencies put on their buys, you find
that about 80% are for 25-54 or some part of this. The remainder is fror
12-24, 18-24 and a bit of 35-64 or 45-64.

That ads reach you does not mean you were specifically targeted. It just
means that the media you consume have efficiency in reaching the primary
demo advertisers usually want.

You are using principally anecdotal and personal cases. The studied
behaviour of 55+ and 65+ consumers shows a poor ROI on ad investment except
where the product has no past preferences, such as a product used only by
older folks.

Yet there are many exceptions. Many non-ethnic CHRs get excellent 25-34
female numbers. News stations deliver comeptitive 35-54, even if half the
audience is older.

The average medium US market has maybe 20 viable radio stations. The average
magazine rack has hundreds of magazines. That degree of specialization can
exist in a national magazine, which may pick up subscribers and readers in
tiny quantities locally, but is "massive" nationaly. Radio sells nearly all
its inventory locally, and can not be that specific. there is no "home
remodeling radio station."

Most people define retirment age as the time SS kicks in... 62 or 65. while
a few retire earlier, the general definition is probably some vague place
between the late 50's and 60's.
>

Anecdotes again. It may be online, but Smart Money had an article on retirement savings about 3 months ago. In it it showed the average savings of the retirement-age American. And the amount of debt, both revolving credit and mortgage debt. Most folks in their 60's have scant savings, considerable debt and not a lot of maneuvering room.

> known for its news?

In Orange County, NY AM is almost dead, especially if you speak English.

Only AM station that is alive and not lights out studio is WTBQ in Warwick.

The rest are canned, lights out remote satellite or microwave feeds or non English speaking.

Yes. They are bullshit.

Now, substitute " couple" for " load" and you would be very near the
truth.

Battery operated TV's are not in common use (and yes, I have one, too,
but just because I have something, it doesn't mean everyone else
does).

Even the TV people admit they were broadcasting to almost no one.

If we're talking FM stations, I don't know for sure but I think the FMers (what few there were) would have had to sign off. The participating am stations all switched to one of two frequencies (1 high or 1 low) theoretically to confuse enemy "signal tracers" from seeking and destroying transmitters.
I must admit Conelrad was way before my time so I am speaking from "book memory". I hit radio during EBS when the alerts were kill carrier for 5 seconds, back on for 5, off for 5, then back on with a 1khz tone (or at least I think that's how it went).

Here's an idea. Have several friends join Columbia House or some other record "club" where you "buy 3 at regular prices and get 10 free" If this is the deal they are offering, then you'll get 13 CD's for the price of 3. Of course, their prices are higher than Wal*Mart...but you still come out ahead.

TM Century is still probably a better option. Their GoldDisc library is VERY extensive, well-put together, and you don't have to buy a whole CD just to get one song. Let them know you are an educational facility, and ask for a discount.

Was anyone able to do any DXing during the blackout. With a lot of
noise gone from the Northeast I wonder if there were any good catches
(daytime or nighttime)

It's manipulation.

That doesn't make it acceptable to degrade the audio quality just because
you can in order to make extra profits.

>> The bottom line is that the broadcasters are abusing their

>
> Then turn off your radio. Find your own music and listen to it.

But I wan to listen to certain radio shows. Why should I have to deprive
myself of listening to radio shows just because some man in a suit wants to
squeeze that little extra drop of profit out of the medium? And in so doing
he is actively depriving literally millions of people of an improved
listening experience.

Why can't they just provide decent audio quality anyway?

>> The bottom line is that CD-quality on the radio is possible, and

How many does it need exactly? Lots of people have commented that the audio
quality isn't good enough. The DAB industry carry on lying. And nothing
changes.

>> But hey, that's capitalism for ya.
>>
>> Think Enron and Worldcom.
>
> Enron and Worldcom pale in comparison to the graft, mediocrity, and

> It's not about corporations. It's about making a living.

No, this is not just about making a living. If it were then the multiplexes
would not have 10% - 20% of their capacity wasted by the big commercial
radio groups. It's about taking a stance and sticking to it because you can,
and in so doing making your company more profitable at the expense of the

listener.

> As you pointed out, better audio is possible. So, what's stopping
> you?

Stopping me doing what? Turning on a CD? Nothing. But I can't afford to buy
all the CDs/vinyl to be able to listen to the latest releases because that
would cost about £100 - £200 per week.

>> And it seems one of the main purveyors of medicority in the US is

So are you agreeing that broadcast bandwidth is limited or are you saying
it's not limited or what the heck is your point. Are you saying that there
is no need to license radio stations? You're clearly (for once) saying that
Clear Channel has 5 to 7 100kW stations in _each_ market which is, of course
utter nonsense.

1890. BEST stream on the web

The BEST oldies stream on the web, BAR-NONE, is at
http://www.a-ware.com/live

You will hear songs you haven't heard in years, and it's all put together
VERY well. It's run by a company who sells music scheduling software to
radio stations and internet broadcasters around the world.

If you are an oldies fan at ALL, give it a listen.....

A 'couple' means 2. Are you sure 'load' isn't correct?

>From http://media.guardian.co.uk/mediaguardian/story/0,7558,978052,00.html

"People are flocking from radio in droves," says Michael Bracy, director of government relations at the lobby group the Future of Music Coalition. "So many people have become disenfranchised that they simply don't listen anymore. Smaller local artists are being freezed out by centralised programming. It's very damaging to the culture. There is a climate of fear surrounding Clear Channel. People will say in private, 'They did this or they did that,' but they won't speak out because they have to do business with them.

The bad publicity has made Clear Channel a political pariah. While other parts of the media industry are enjoying the relaxation of ownership laws, in radio, they were tightened up last week, despite the company hiring well-connected Washington lobbyists and appointing a former US congressman to the board."

and

"According to the US ratings service Arbitron, Americans are spending 10% less time listening to radio per annum. Radio listenership in the US is at a 27-year low."

and

"It's creative death, it's standardisation - McDonaldisation. Creativity requires diversity. If you introduce free markets without regulation, you are prescribing monopoly. The only upside to all of this is that it gets so bad that things start to develop underground on the internet or satellite

radio. That's what happened with the Floyd."

and from http://www.guardian.co.uk/uk_news/story/0,3604,943068,00.html

"Mr Dyke [Director General of the BBC] directed much of his ammunition against the global media giant Clear Channel, which owns 1,225 radio stations in the US, many of which took a staunchly pro-war line.
"We are genuinely shocked when we discover that the largest radio group in the United States was using its airwaves to organise pro-war rallies," said Mr Dyke, who is also the BBC's editor-in-chief. "We are even more shocked to discover that the same group wants to become a big radio player in the UK."

and there's been a load more stories about Clear Channel in the UK press. I realise that being American that you don't take any interest in non-American issues, but, shock-horror, we do actually look at issues beyond our shores, and especially when Mr Mays might buy a UK radio group in the not too distant future.

Living in my apartment, I'm in the middle of an electrical noise-fest. However for those few hours that the power to the entire building was off (and the spouse's computer and peripherals wasn't running and the elevators were down), I was able to get a bunch of big stations -- the usual suspects up here:

WTAM-AM 11, Cleveland; WWVA-AM 1170, Wheeling; CHML-AM 9, Hamilton Ontario; WTOP-AM 15 Washington DC; WBAL-AM 1090, Baltimore; CKLW-AM 8, Toronto; etc.

Also suburban rimshotter WVNJ-1160/Oakland NJ was coming in loud and clear for the first time in ages!!!!

Wow!!!!

Maybe we should have a few more blackouts more often!!! :-)

In the 60 and 70s every transmitter I worked with had a crystal for either 640 or 1240. As I recall there were serious requirements to be part of the system. I think they were an underground studio, generator at both studio and transmitter and a connection to a local, regional or federal emergency feed to, I think, Civil Defense.

I don't remember what the testing procedure was because everyone would have had to switch to their assigned emergency frequency. I'm just not old enough to remember.

Then something went wrong because cell service faded away within a few hours As soon as the electricity went back on , so did the cell service.

I spent a lot of time walking through the city that night and my cell phone had no signal indicator and that handset with the slash through it. The display said "no service."

When my cell phone tells me I have no service I believe it. The bill has been paid in full.

Will someone post some research that supports this? What makes Mr.
Bracy an expert on the status of radio?

It would seem to me that, if they're "flocking from radio in droves,"
it should be in his best interest. Now they'll have to buy the product
either on CD or MP3. The rest will either not listen or steal it.

I think it would be more appropriate to say new generations aren't
being attracted to radio because of the vast number of alternatives.

>"So many people have become disenfranchised that they simply don't listen
>anymore. Smaller local artists are being freezed out by centralised
>programming.

Smaller groups have been squeezed out of the business in all of the 43
years I've been in it. That's long before Clear Channel owned much
more than a station in San Antonio. Some college stations had local
talent programming but very few commercial stations ever did it. They
played the hits. And ... did you know that all the hit artists were
local at one time? It didn't seem to hurt them.

>It's very damaging to the culture.

You mean I'm culture-starved because I can't hear the latest
manufactured boy band?

>There is a climate of fear
>surrounding Clear Channel. People will say in private, 'They did this or
>they did that,' but they won't speak out because they have to do business
>with them.

As long as they say it in private, no improvement will come. Of
course, they'd better have proof that will stand up in court. Do it
the good ol' American way. Sue them. I've heard local promoters
complain that Clear Channel pays more. I can't fault the artist for
going where the money is. Let's see Mr. Bracy get all the big artists
together to boycott Clear Channel. If no one will perform for them,
the problem is solved. Then the only problem left is how to harvest
the green cheese on the moon.

>The bad publicity has made Clear Channel a political pariah. While other
>parts of the media industry are enjoying the relaxation of ownership laws,
>in radio, they were tightened up last week, despite the company hiring
>well-connected Washington lobbyists and appointing a former US congressman
>to the board."

Radio ownership rules were tightened? I was under the impression that
TV was returned to 35%. There have been many instances where Clear
Channel was prevented from buying because of the rules. This isn't
new.

>"According to the US ratings service Arbitron, Americans are spending 10%
>less time listening to radio per annum. Radio listenership in the US is at a
>27-year low."

I seriously doubt the increase in population over 27 years and the
explosion of alternative sources of music were included. 27 years ago
I didn't have a minidisc player, a CD player, an MP3 player, a DVD
portable, or even low quality Internet streaming competing for
attention.

>"It's creative death, it's standardisation - McDonaldisation. Creativity
>requires diversity.

Mr. Bracy needs to look at the dirt in his own house. Where does all
this sameness come from? Instead of blaming radio he should look at
the quality of the stuff oozing from the record companies, big and
small.

>If you introduce free markets without regulation, you
>are prescribing monopoly. The only upside to all of this is that it gets so
>bad that things start to develop underground on the internet or satellite
>radio. That's what happened with the Floyd."

Satellite radio isn't going to lead the way in local artists. They
aren't local. Satellite radio should be Mr. Bracy's vision of Hell.

>"Mr Dyke [Director General of the BBC] directed much of his ammunition
>against the global media giant Clear Channel, which owns 1,225 radio
>stations in the US, many of which took a staunchly pro-war line.
>"We are genuinely shocked when we discover that the largest radio group in

>Mr Dyke, who is also the BBC's editor-in-chief. "We are even more shocked to
>discover that the same group wants to become a big radio player in the UK."

Mr. Dyke is in the dark. Individual stations made those decisions, not
the company. I realize it's not in his best interest to accept that,
but it's true. If it were a company directive there would have been
1225 rallies - one for each station even in markets with multiple
stations. They still compete.

Of course, the BBC has no interest in American audiences. I would be
"genuinely shocked" to discover that the BBC wanted to exploit
Americans when they don't even speak our language. Who ever heard of a

bonnet on a car? My home has a john, not a loo.

>and there's been a load more stories about Clear Channel in the UK press. I
>realise that being American that you don't take any interest in non-American
>issues, but, shock-horror, we do actually look at issues beyond our shores,
>and especially when Mr Mays might buy a UK radio group in the not too
>distant future.

I think the UK said something similar when Rupert Murdoch launched Sky TV and the sky fell again when he bought British newspapers.

If we don't look beyond our shores we should be able to stop all those humanitarian aid programs that cost us so much. I'm sorry we have such little interest in the goings on with the Royal Family. I guess Mr. Dyke doesn't read the New York Times. It appears to me that the first section of the paper is heavily International. The evening news and PBS' newscasts seem to cover a lot of "foreign" news.

Mr. Dyke also doesn't seem to realize that covering 50 states is probably more difficult than covering 50 countries. After all, those of us in the 50 states have more in common than his 50 countries. We all speak a similar language. After a while, even war isn't news when it's been going on for decades, or centuries. Maybe he's feeling bad because the UK used to own most of those countries.

Let's get the Middle East fixed before he complains about how uncaring we Americans are. Maybe we're just too damned tired of watching those "across the pond" fight each other endlessly.They've been taking over each other's countries for centuries and dressing their men in ridiculous looking costumes. Isn't there something more productive they could be doing?

640 and 1240. Local areas or markets had stations assigned to one of the
two, and they would cycle on or off to further confuse RDF usage of signals.

The entire national system was tested several times in the early 60's, with
nothing on any channel except 640 and 1240 for a half-hour around 11 AM on a
weekday.

I'm old enough to remember. At the class 1B clear channel station I worked at our 10 kw auxiliary transmitter had a bunch of components that had to be jumpered and/or added. We would test it into the dummy load after we set it up on 1240. There was a large manual denoting the changes that had to be made. There was also an area test where we would get an alert from the Conelrad control point and we would have to set the aux to 1240 and turn its control over the the control point and then they would test for a half hour or so. On for 30-60 seconds and off for 3-4 minutes in a random pattern. I think this was the only exception to the union contract that we could do anything except take meter readings without a supervisor there. Of course we took about 100 meter readings and then typed them into the official log every 1/2 hour.

Later at a EBS (what was it now CSPS??-1) main station we had a 35 kw generator and 1500 gallons of diesel fuel, console, turntable, cart machines, tape machines and at least 30 days of food at the transmitter with walls 24 inches thick (8" block, 8" reinforced concrete, 8" block sealed and air conditioned. We also had two way radios between us and the State Police and the local County Sheriff/FEMA office. FCC (for FEMA I believe) came out every so often to check out our EBS readiness. Even the food and the other ends of the two way radios to be sure the links worked. Everything was also (supposedly) protected from EMP.

I asked one day how much notice we would have to man the site in the event of an attack and was told about 15 minutes and I said "Oh good! It takes me 20 minutes to get there from the studios in an emergency". The FEMA guy just shook his head and smiled.....

Nothing now.

Do you remember what the specific requirements were back in the days of conelrad?

In the 60 and 70s every transmitter I worked with had a crystal for either 640 or 1240. As I recall there were serious requirements to be part of the system. I think they were an underground studio, generator at both studio and transmitter and a connection to a local, regional or federal emergency feed to, I think, Civil Defense.

I don't remember what the testing procedure was because everyone would have had to switch to their assigned emergency frequency. I'm just not old enough to remember.

1902. Could sniffers provide way for low bandwidth broadcasting over the Internet?

Newsgroup: rec.radio.broadcasting
Date: 2003-08-22 14:47:29 UTC
From: richardhutnik@hotmail.com
Message-ID: <bi5ae1$9im$1@xuxa.iecc.com>
Source record: 7081
Cross-posted to: rec.radio.broadcasting,rec.video.professional,comp.protocols.tcp-ip

A concern of privacy over the Internet is that people will steal packets going from one IP address to another one.

Perhaps someone could illuminate me here. Wouldn't it be possible to use this ability to have a cheap way to broadcast sound or video over the Net to a large number of people, without taxing bandwidth? It would be unidirectional, but so is radio and television broadcasting. Have one machine do streaming audio and video in an unsecure VPN and have other people "tune into" this network and pull the stream packets off the network.

If anyone has more information on this than I, can you fill in the blanks for me.

Thank you for your time...
- Richard Hutnik

Rich, I have posted numerous times some figures coming from studies done in the early 50's showing radio listening per average American to be 21 hours. Today, radio listening per person is, per the Winter book, 20 hours 45 minutes a week. There was a peak in listening in the late part of the 80's, but this may have been as much due to more accurate measurement of minorities as anything else. The fact is that radio listening is very consistent.

> It would seem to me that, if they're "flocking from radio in droves,"

The art of the non sequitur seems to have been perfected at the RIAA under Hilary Rosen, and it has propagated itself to other music industry spokesrobots who have no idea how to address the change in technology that is eating them alive.

> I think it would be more appropriate to say new generations aren't
> being attracted to radio because of the vast number of alternatives.

Yet the listenership is amazingly stable despite everything form the Internet to satellite TV and Game Boys.
>
> >It's very damaging to the culture.
>
> You mean I'm culture-starved because I can't hear the latest
> manufactured boy band?

Not only that, but what an absolutely dumb statement this goofball made. I just wonder how everything from the classics to opera could have made it prior to 1922 without radio. First they claim that radio is not being listened to, and then claim radio is essential to making hits.

> >"According to the US ratings service Arbitron, Americans are spending 10%

> attention.

One interesting explanation my director of research came up with is the fact that the average American is working more hours a week than when listening was at its greatest peak, in the 1987-1988 Arbitrons. Whatever the issue, as high a percentage of Americans liten to radio as ever.

Anyone here remember the "Your Hit Parade" TV show of the late 50's with Snooky Lanson, Dorothy Collins, etc? The four staff singers of this national show did their versions of the week's top songs "all across America." Hits are nearly 100% national, and always have been. And a drive around the US in the late 50's or early 60's would have revealed hundreds and hundreds of clones of the work of Bill Stewart, Todd Storz and Gordon McLendon. Sameness? We are all Americans and tend to like the same music, same Big Macs and same Gap clothing across the nation.
>

It's interesting how the staid Bebe spawned pirate radio and was forced, screaming, into contemporary radio when they realized folks would tolerate bad signals form ships or from Luxembourg just so as to not have to listen to the BBC. I wonder what radio listening figures were in the UK before radio "relaxed."

Not lacking in news.. but lacking in local news.

There is a difference. Do I really care that the subway is broke in NYC when no friend or family lives or works in NYC... or am I more interested to know that I-84 has a backup up for 10 miles at the Newburgh-Beacon Bridge because a tractor trailer full of hazmat dumped at a toll booth? (hint, I-84 can be seen from my backyard)

Rockland County's answer to the problem was to install reverse 911 systems and create a network of low power AM stations on TIS freqs to warn the public.

Most NYC stations don't know life exists north of Yonkers.

Canned national satellite feeds on local stations that do not break in with local issues don't count.

It takes a local axe murder to get coverage from NYC stations up here.

Yes. Correct, at night. That's when I do the bulk of my "real" radio listening -- as opposed to having a local FM station (or FM Subcarrier at times) at work for background music & talk.

> BTW, CKLW is in Windsor..not Toronto (unless I missed a big switch

D'OH!!!

Correction noted. I was thinking of the other big Canadian station I like -- AM 74 in Toronto with pop standards.

You're absolutely correct -- the Big 8 is in Windsor.

That's not our experience in New York. On 9/11 WINS had an AQH of more
than 900,000. I can't help it if they're too dumb to figure out how to
change bands on their radios. WCBS had an AQH of more than 300,000.
Both are awesome figures.

These figures came directly from an Arbitron representative at an R&R
Talk convention. Such figures had never been seen before.

Maybe all those people didn't realize they were listening to AM
stations.

I don't remember it. I'm too young, though my mother told me about it.
However, its Producer was my TV Production professor at Emerson
College. He gave me an A+. Good guy. Until a few years ago I used to
see him doing commercials, usually as a butler. He had that elegant
look.

It's also been my experience that playlists through the years have
been similar thoughout the country. Rotations might change a bit, but
the library of songs was, essentially, the same nearly everywhere.

I recall buying a report on station playlists around the country in
1988 for WPIX-FM. The lists were amazingly similar. It appears "cookie
cutter" is an historical term.

I was offered several jobs in London when independent radio was
legalized. Clearly the BBC was horrified. I recall meeting one of the
founders of Radio Caroline some years later. His stories of the BBC's
efforts to stop this enthralled me. Take the NAB's efforts against
LPFM and multiply them many times. According to him, International
waters meant nothing to the UK when it came to better programming
than the BBC. Can't have that. Mrs. Farquars's Dog Training Hour was a
better service than that awful rock and roll.

I would guess that hundreds of thousands of people stranded in
sweltering heat underground is a bigger story for a New York station
than a traffic backup on I-84. That day traffic was backed up
everywhere. Friends who live in New Jersey took as long as 12 hours to
make a trip that normally lasts less than 40 minutes on a bad day.

>Most NYC stations don't know life exists north of Yonkers.

Are they supposed to? Your issue is with traffic. I recall lots of
Yonkers coverage when low income housing was proposed and the city
made lots of nimby noise.

It's rare that bedroom communities generate a lot of news. We do hear
about murders of wealthy people We still hear news about ugly,
self-centered, insensitive, PR socialite Lizzie Grubman running down
the rich and famous at a trendy nightclub on Long Island. Very, very
important news here in the city. She now has a radio show, giggly
gossip about terribly important rich people. I always tell people to
put your latest conviction at the top of your resume.

>It takes a local axe murder to get coverage from NYC stations up here.

Unfortunately, that's news.

You children don't seem to remember the "Fitch Bandwagon" from the late 30s
/ early 40s. Songs were "sung so clearly you can understand every word".
Wasn't Larry Clinton the band leader and Bea Wain one of the vocalists?
Clearly hits were thought to be national back then.

Which is only possible if either a) one is located between the source and destination systems, or b) one has control or can take control of a system located between the source and destination. That also assumes that the route between source and destination doesn't change in such a way that you're no longer located along the route.

>Perhaps someone could illuminate me here. Wouldn't it be possible to

>off the network.

What you're proposing is really no different than one source system supporting a large number of streams. The only difference is that it starts as one stream, but ultimately splits off into a large number of streams (to support your "large number of people") at one or more points somewhere downstream of the source. Doesn't really make much difference as far as overall bandwidth is concerned; the stream still has to be split to reach everyone. The old net.acronym TANSTAAFL ("there ain't no such thing as a free lunch") definitely applies here.

IP multicast has some of the properties of your scheme, and is structured in such a way as to keep bandwidth usage as small as possible. A stream subscription service that used IP multicast is conceivable technologically, but the logistics required to scale it up for true mass consumption while maintaining full efficiency would be difficult to pull off without support from the major ISPs and backbone carriers, and there's just no financial incentive for them to do so, at least not as things are structured now.

1915. Affiliate list for Joey Reynold's WOR Radio 710 show

Newsgroup: rec.radio.broadcasting
Date: 2003-08-22 18:50:53 UTC
From: sven@gordsven.com
Message-ID: <bi5omd$n1m$1@xuxa.iecc.com>
Source record: 7091

I'm looking for a list of affiliates -- I know he's got one in Buffalo, one in the NYS Capital District (Albany, Schen., Troy) and he says one in Los ANgeles. The Baltimore affil (AM 68) is gone.

The WOR Radio Net. used to have lists of affils by state for each show but not anymore.

Just curious if there were any radio stations that simulcast the tv local news in NYC?

Thanks.

Publication of affiliate lists only gives the competition a target
list to work. I'm sure it's not KFI or KABC. That leaves the third
tier KRLA (brokered) and KLAC.

>The WOR Radio Net. used to have lists of affils by state for each show but

That's when I was Webmaster. We decided to drop it because maintenance
was too time consuming. It was more important for me to run the
network rather than the web site.

The closest you'll get is WCBS simulcasting 60 Minutes.

Of course, you could always tune waaaaay down to the bottom of the FM dial
and try to pick up WABC-TV directly...

1919. Anyone impersonate "movie trailer" guy (Dick Ervasti)

Newsgroup: rec.radio.broadcasting
Date: 2003-08-23 20:08:17 UTC
From: stevegg1@hotmail.com
Message-ID: <bi8hjh$6v5$1@xuxa.iecc.com>
Source record: 7096

Hello all,

This is a long shot - but can anyone do a reasonable impersonation of Dick Ervasti - the voice over for many movie trailers, etc.

http://dickervasti.com/

My project is a very short parody animation that requires only about 6-8 sentences of voice over. Later in the year there's a chance for something much bigger, but it's still in development.

Please contact me for details and be aware that this will be a mutual "scratching of backs" project. So if you can do a good imitation, it might be well worth your while to send me a note to see what I have in mind. :)

Thanks in advance,

-Steve

It would be more accurate to say that younger listeners don't know AM exists -- especially teens. I have a young lady working in my newsroom who claims never to have listened to AM radio, even up to this day, and being aware of its existence only in the vaguest sense before starting to work in radio. (She had also never seen a 45 RPM record, and didn't know what they are until I showed her one that happened to be lying around in one of the studios). She turns 19 in a couple of months. I think she's probably typical of her age group, judging from conversations I've had over the past few years.

Might that be market-dependant?

NYC has no shortage of AM stations with adequate technical facilities to
provide good signals throughout the market. That can be very different
in other markets. For example, here in Nashville there are only two AMs
(WSM & WLAC) that have reliable coverage throughout the market at night
- and even WLAC can be flaky in places.

(it may not be a coincidence WLAC's news-talk and all-sports competitors
are both 100kw FM stations)

My issue isn't with the traffic. My issue is the hazmat debris all over the place. <grin>

My answer was a generic answer.

I listen to NYC stations for NYC or National topics.

I expect local issues and concerns to be aired on local stations, not national satellite fed pabulum.

For sale:

Partial interest in class "A" FM station in Arkansas.

The "Radio Crazy" !! Well its back!!!!!!!!

$195,000 including studio and transmitter buildings,
land, tower, etc. A steal.

Beautiful small town in NE Arkansas about 16 miles S.
of Missouri border.

Group deal (Joint venture....if you venture, you go to
the joint! Hi!)

Active or inactive investors with at least $10,000
each are welcome. All investors would be on the board
with full voting rights if desired.

You ignored the "Radio Crazy" cuz he offered AM
stations. NOW he is offering an FM station for Pete's
sake. So move on this one. It won't be around long. It
is an FM and at AM price!

Tel: (478)741-1710 in Macon, GA or email.

That would be a pretty neat trick, seeing as how the bottom of the FM dial is 88 MHz, and WABC-TV's audio carrier is at 185.75 MHz.

Take 2.

The bottom of the FM dial is at 88 MHz. WABC-TV audio is at 179.75 MHz.

You're too young to remember when skilled people wrote lyrics - Ira
Gershwin, Cole Porter. Irving Berlin and the whole lot. For your musical
education of that period I'd suggesting listening to XM-4 ;-))

On rethought - maybe the slogan was "hear" ever word. The idea being that
you could listen to the program and then start singing the songs yourself -
no need to buy records or sheet music. Remember that 78 records were VERY
expensive. Two songs for 50 cents or more, Bluebird was RCA's cheapo label
at 35 cents. Multiply by about 14 to get the equivalent in today's
dollars - very roughly the equivalent of $5 for a Bluebird 78 with two
songs..

That's about how much a modern-day 45rpm 7" single costs.....

A 12" club single (they call them extended mixes) now goes for
anywhere from U$7.00 to $20.00 depending on the artist.....

I've seen full-length LPs -- nowadays a lot of them are two-record
sets go for $30 if they're "imported" *eyeroll*

Amateur Radio Newsline(tm) Report 1358 - August 22 2003

>From the 2003 Huntsville Hamfest and from our studios in New Orleans, this is Amateur Radio Newsline report number 1358 with a release date of Friday, August 22 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. I'm Don Wilbanks, AE5DW, reporting.

We begin this weeks newscast with the sad news that one of the voices so well known to ham radio will be heard no more. This, with word that Amateur Radio Newsline's Vice President and senior anchor Roy Neal, K6DUE, has passed away.

Roy was 82 when he died on Friday, August 15th at a hospital in High Point North Carolina. He had undergone heart valve replacement surgery three days earlier. According to his family, Roy was at peace at the end and did not suffer.

In both the worlds of broadcasting and of Amateur Radio, Roy Neal was a legend. He began his career at WIBG radio in Philadelphia. After military service in World War Two, he returned and helped pioneer the emerging medium called television at station WPTZ. He then joined the National Broadcasting Company where he spent most of his career producing and reporting for Network News. His specialty was science and aerospace.

But to hams, Roy will always be remembered as the person who brought manned Amateur Radio into space through the SAREX and ARISS programs. His close friend and NBC colleague Alan Kaul, W6RCL, joins us later in the newscast with more on Roy's many contributions. (ARNewsline, Philadelphia Broadcast Pioneers)

**

IN THE NEWS: JIM HAYNIE ON BPL

Roys Death came just as the Huntsville Alabama Hamfest was getting underway. One of the major topics hams were talking about is he growing debate over B-P-L or Broadband Over Powerlines. One of the people most concerned is ARRL President Jim Haynie, W5JBP:

--

Jim Haynie, W5JBP: "Broadband Over Powerlines is important, and just as I said on our website - this is bad. This is not good for Amateur Radio and I don't know how we are going to lick it. Quite frankly, and I want to tell you that right now."

--

Haynie made his comments to a packed audience at the hamfest's ARRL Forum. He says the League is doing everything possible to try to convince the FCC to not proceed with rule making B-P-L a reality. (ARNewsline)

**

RESTRUCTURING: HAM RADIO AFTER MORSE CODE

Jim Haynie also shares his thoughts on a subject dear to many hams: Whether Amateur Radio should or should not keep Morse code. Stressing that he speaks for himself and not the League, Haynie says code should be a requirement for the Extra Class license:

--

Jim Haynie, W5JBP: "What if we were to have three classes of licenses? Entry, General and Extra and Entry got phone privileges on he current Novice bands? And that's all.

So we ask questions on the exam about just that. They could only use 100 watts store bought radio equipment. Possibly even a two-year expiration date.

Generals - same thing except no new expiration date. The same privileges they have today. But for Extra we retain the 5 words per minute code requirement."

--

Not everyone agrees with Haynie. Scotty Neustadter, W4WW, is Chairman of the Question Pool Committee for the National Conference of Volunteer Examiners and this is his personal view:

--

Scott Neustadter, W4WW: " This is not your fathers or your grandfathers ham radio. Things have changed. Technology has changed, and I think that - to an extent - that we have to change with them. We have to recognize our history and in no way am I - nor do I know of anyone else ho is advocating any abolition of the right to operate CW on any Amateur band where you can operate it today.

What I do know is that there is a whole lot of people saying that it does not make allot of sense anymore that I require that you be able to do that. I think that's the distinction that we have to keep in mind.

--

While the debate over Morse Code in amateur radio's future goes on _ Jim Haynie points out that what will be decided remains a long way off_perhaps years. (ARNewsline)

**

HAM RADIO HONORS: W6JAY RECEIVES 2003 YHOTY AWARD

As enthusiastic hams began pouring into Huntsville's Von Braun Civic Center Saturday morning _ one of the Hamfest's biggest moments was taking shape. The Huntsville Hamfest is the setting for an exciting yearly event_and that's the presentation of the annual Amateur Radio Newsline Young Ham Of The Year Award. This year's winner is 17-year-old Jay Thompson, W6JAY, of Santa Ana, California:

--

Jay Thompson, W6JAY: "When I first started I did not think that thre was allot to do in Amateur Radio, but the longer I am a part of it , I realized that there is much more that I could do. And I know that as much as I have done so far, I know that there is still kore out there for me. So I'll keep trying to acomplish more and maybe Ill become even better at Amateur Radio in the future."
--

CQ Magazine is one of the award's principal underwriters. Editor Rich Moseson, W2VU, says that_while Jay stood above fellow nominees_many other young hams are big achievers, as well:

--

Rich Moseson, W2VU: "Every year we review applications and nominations from a variety of people. The person you see standing here on the stage is not the only really good kid who has done allot. He's just risen the crop a little bit. There are a whole lot of other young people out there in ham radio doing great things, and we congratulate all of them."

--

The Amateur Radio Newsline Young Ham Of The Year Award is in its 17th year. Vertex Standard and CQ Magazine are the Award's principal corporate underwriters.

That's it from the 23003 Huntsville Hamfest. The rest of the newscast will come from our New Orleans studio, but first this. (ARNewsline)

**

Break 1

(5 sec pause here)

**

RESCUE RADIO: THE BLACKOUT

Ham radio came to the rescue as cellphone systems totaly failed during the recent North-East blackout. Bill Pasternak, WA6ITF, has more:

--

A New York Times article said it this way: When technology failed on a massive scale, some old-fashioned broadcasting stepped into the breach. This, as ham radio operators took to the airwaves to reach emergency workers.

The technology that failed was the North-East power grid that provides electricity to cities like Cleveland, Detroit and New York. This in turn lead to communications failures as numerous cellular telephone sites without generators or battery back-up - went away -- the afternoon of August 14th .

According to an ARRL Bulletin, with cellular systems overloaded or out altogether, the incident turned into a test of Amateur Radio's capabilities to operate without commercial power. The New York City-Long Island Section Emergency Coordinator is Tom Carrubba, KA2D. He estimates that ham radio operators handled 800 to 1,000 messages from Thursday afternoon until early Friday.

Diane Ortiz, K2DO, is the ARRL Public Information Coordinator for the area. She took to the air when power went down in her Suffolk County community. Ortiz called up an informal VHF net. Over the next 20 hours hams passed about 500 pieces of traffic. In addition to handling messages for people stranded in the city, amateurs also relayed other useful information. This included such items as which stores or gas stations were open.

In the Big Apple itself, ARES teams provided communication support for Red Cross Emergency Response Vehicles set up at transportation centers in Manhattan. ARES members also accompanied Emergency Response Vehicles to fire calls. RACES was activated in the greater New York City area after a state of emergency was declared.

Across the Hudson River in New Jersey, a net linked the Red Cross lead chapter N2ARC in Princeton with other chapters. Further to the West, Michigan ARES teams assisted emergency operations centers and the Red Cross.

In Ohio, Section Emergency Coordinator Larry Rain, WD8IHP, reports that all ARES organizations in the Northern tier of the stated were activated.

For millions of people in the Northeast and Midwest, the August 14th power outage took away access to wireless voice, e-mail and the Internet. The failure of the cellular system was especially evident. Nextel Communications spokesman Chris Grandis said that the company needs electricity to power its cell sites, but when you don't have that, it's out of his company's control.

The same held true for virtually every other wireless provider, few of which bother to have emergency power at cellular and wireless Internet sites.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The bottom line: The traditional forms of communications failed, but hams were there to lend a hand. (ARRL, NY Times, others)

**

RADIO LAW: FCC DECLINES TO RECONSIDER ITS HUMAN EXPOSURE TO RF RULES

The FCC has declined to open an Inquiry into updating its human exposure to RF signals rules. In particular, the petitioner in this case wanted the Commission to consider possible health hazards not covered by the current rules, including non-thermal effects and the effects of long-term low-level RF exposure.

According to the CGC Communicator the FCC dismissed the petition, arguing that any such evidence should be presented to other, more appropriate expert agencies. The Commission also noted that its current human exposure rules have recently been upheld by the Second Circuit Court of Appeals. This, in the face of similar arguments by other petitioners. The complete story is in cybrspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-191A1.doc (CGC)

**

WRC'03 FALLOUT: GERMANY GOES CODE FREE

It's another week and another country has joined the no-code revolution. Following Switzerland, the U-K, and Belgium, Germany is the latest country to announce that it is abandoning the Morse code test as a requirement for HF band operation.

According to the website of the German national amateur radio society, the DARC, from the 15th of August radio amateurs in Germany with a CEPT Class 2 license are allowed to use the High Frequency bands using their existing callsigns. Further details were to follow, the website said. (GB2RS)

**

RESCUE RADIO: OREGON HAM RECEIVES HONOR FOR GOING THE EXTRA MILE

Back on this side of the Atlantic, an Oregon ambulance dispatch coordinator, EMT and amateur radio operator has been named a recipient of a "Star of Life" award. This, from the American Ambulance Association.

Scott Waggoner, KC7DHJ, of Clackamas County was nominated for the honor by his co-workers in recognition of the many extra tasks he has undertaken at AMR's headquarters in Portland. Among other things, KC7DHJ was cited for his help in setting up portable repeaters during search and rescue operations, his treatment of minor injuries suffered by firefighters and his overtime work on an American Medical Response

ambulance. (CGC from OregonLive.com)

ENFORCEMENT: UNCOORDINATED REPEATERS TAKEN OFF THE AIR

It took three letters and allot of patience on the part of the FCC but a repeater interference problem in Stockton California has been solved. This, as Thomas G. De Lasaux, WA6SEK, removes his repeater from the air.

The matter goes back to September 9, 2002, when the FCC notified De Lasaux that his operation of uncoordinated repeaters on 224.660 and 441.275 MHz was causing interference to coordinated repeaters on the same frequencies in his are. By letter dated May 5, 2003, the FCC informed De Lasaux that the information he submitted in regard to the initial inquirey did not demonstrate coordination for either of the repeaters. Also, that until he was able to demonstrate current coordination, the primary responsibility to prevent interference.

At that time the FCC requested De Lasaux inform the agency within 20 days what steps you were taking to resolve the interference issues. On July 1, 2003, the FCC notified WA6SEK that we had not received a response to the May 5th letter, and enclosed an additional complaint. The July 1 letter afforded De Lasaux an additional 20 days to respond, and stated that if the matter were not resolved by July 25, we would initiate enforcement action against his license.

On July 22nd, De Lasaux notified the Commission that your repeaters operating on 224.660 MHz and 441.275 MHz had been shut down and would remain so. The FCC has now terminated all further action in this matter. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $10,000 FINE AGAINST NY PIRATE

The FCC has affirmed a $10,000 fine issued on July 23rd of 2002. This, against the Reverand Yvon Louis in a case the case involves an aleged series of unauthorized FM broadcasts made from Louis' Calvary Tabernacle in Brooklyn, New York.

The FCC says that over the course of several months in 2001, Reverend Louis reportedly transmitted on 93.7 MHz, then switched to 88.1 MHz after getting caught. But it was not over yet. He then used 90.1 MHz after getting caught again, then reverted to 88.1 MHz in open defiance of the FCC order to stay off the air. (FCC, CGC)

**

RADIO HAPPENINGS PAROCHIAL SCHOOLS TO REMOVE CELLULAR ANTENNAS

Bowing to health concerns from parents, sixteen schools operated by the Catholic Diocese of Brooklyn will eliminate cellular antennas mounted atop buildings and church facilities. The on-line edition of the New

York Post reports that one parish stands to lose $18,000 a year in rent money used to offset the school's operating costs as a result of the change. (CGC)

**

COMMUNICATIONS FOR THE HANDICAPPED: BLIND STUDENTS LEARN TO NAVIGATE USING NEW GPS TOOL

A group of blind high school students visiting Catholic University in Washington D.C. recently shouldered specially equipped laptop computers. This, as they navigated about the campus and visited a pizza restaurant led by voice commands and the Global Positioning System.

A $1,000 Global Positioning System add-on to the BrailleNote keypad showed the students that getting around a college campus is suddenly much easier than it used to be. The complete story is on line at www.washtimes.com/business/20030729-093916-2006r.htm (CGC)

**

WITH THE HANDI HAMS: SUMMER CAMP ON THE AIR

Handi Ham station W0EQO, will be on the air during the summer Minnesota Radio Camp from August 23rd through August 30th. You can look for W0EQO on several different bands using CW, single sideband, FM, and digital modes. Also listen in cyberspace for an EchoLink net on Monday evening at 2400 hours GMT. The HandiHams will respond to all QSL requests for all contacts, including EchoLink contacts. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - HOLLAND: NEW PREFIXES FOR THE NETHERLANDS

A New call sign prefix went into effect in the Netherlands on August 7th. On the High Frequency bands, the PA, PB, PC, PF, PG and PI prefix callsigns will now be be heard with one, two or three letter suffixes. On VHF and above, the PD, PE and PH are the prefixes, again with one, two or three letter suffixes. For example, the former PBZ0AIU, who sent in this news story, is now PC2A. (PC2A via GB2RS)

**

DX

In D-X, word that GM0GNY, is active as 4K0GNY from an oil drilling and production platform in Azerbaijan. He will be there starting the 20th of August for around a month. Look for him on daily on 40, 20, and 17 meters and QSL as directed on the air. (OPDX)

**

THAT FINAL ITEM: A FINAL 73 TO K6DUE

At the beginning of our newscast, we told you about the passing of a member of the Amateur Radio Newsline family. Roy Neal, K6DUE, died August 15th following heart surgery. One of the people who knew Roy best is Alan Kaul, W6RCL. Roy and Alan worked together at NBC News, and on projects benefitting amateur radio. Alan looks at the life of a man who was an institution in American broadcast journalis, as well as a driving force in amateur radio's conquest of space:

--

When Roy Neal, K6DUE, died last week, he was possibly the best-known ham in America. He left an indelible imprint on Amateur Radio.

Roy, more than anyone else, was responsible for getting ham radio aboard manned space craft and each new mission is testament to his legacy. His efforts earned Roy awards from the Dayton Hamvention, they designated him Ham of the Year and from CQ-Magazine, which this year named Roy to the Amateur Radio Hall of Fame. He also received honors from The American Radio Relay League, and other groups and served as chairman of two key AMSAT committees.

Roy was a good guy. He was my friend and colleague at NBC News.

I met Roy in the 1960's when I was working in Seattle and he came to town to report on aerospace giant Boeing. After I moved to Los Angeles and joined NBC News in the 70's, Roy and I collaborated on a lot of news reports.

As a correspondent Roy was best known for his coverage of the U-S Space program _ he was a friend of the original astronauts _ and often reported from both the launch site at Cape Canaverral and NASA Mission Control in Houston.

Not many people know this but Roy was also the author of a book about America's missile system_. called The Ace In The Hole. It was written at the height of the Cold War.

In the 1970's, Roy teamed with television producer Dave Bell, W6AQ, to launch the first of several documentaries about amateur radio. Number One was a 16-minute film, Moving Up to Amateur Radio. Followed a few years later by The World of Amateur Radio. Dave Bell remembers Roy as the ultimate professional:

--

Dave Bell W6AQ: "Of all the on-camera talent that I have known, Roy was the most assured and had the smallest ego of all of them.

He was a true professional when it came to the news. Everything was always true. Everything was straight from the shoulder and there was no compromise.

Roy was one of the old-school news guy. He grew up in the television business and he understood it better than anybody who is working in it today."

--

In the 1980's Roy helped convince NASA to put ham radio in Space aboard a manned flight of the Shuttle. That first ham-astronaut was Owen Garriott, W5LFL, on board STS-9. Garriott's story of the 1st DX-pedition in Orbit was told by Roy in the television documentary Amateur Radio's Newest Frontier.

--

Audio from ARNF: "This is the story of an expedition. The story of STS-9. The Columbia. And these are the explorers: John Young - the commander. Brewster Shaw the shuttle pilot. And the scientists Dr. Ulf Merbold, Byron Lichtenberg, Robert Parker and Dr. Owen Garriott -- an Astronaut who is also Amateur Radio operator W5LFL. This is an expedition to probe the outer limits of science and Amateur Radio's newest frontier.

--

Roy's next project was called SAREX - Shuttle Amateur Radio EX-periment, followed by the New World of Amateur Radio which profiled a new ham, teen-ager Kelly Howard, N6PNY. She's now all grown up, married and has kids of her own. She fondly remembers working with Roy Neal.

--

Kelly Lenhert (ne Howard) N6PNY: It was all so exciting, but it was also overwhelming. But working with Roy made me feel so comfortable. He made me feel competent in what I could do. He took me under his wing and he was really supportive and he got me to do what I needed to do to make the film and bring out the best in me."

--

Roy's last documentary was called Ham Radio in Space. Roy's interest was a natural fit with AMSAT. Roy's close friend AMSAT Vice President Frank Bauer, KA3HDO, thinks of K6DUE as his mentor.

--
Frank Bauer KA3HDO: "One of the things that Roy taught me was how to distill information into basically sound bites, if you will. I remember one time where we had to give a presentation - at Dayton - and we had 20 minutes. I told him that I did no know how he could so that, and he

said: `Frank, if I can do the whole world on the news in 30 seconds, you can do this in 20 minutes.' So Roy taught me a whole lot from an executive perspective because he was a true executive."
--

Another AMSAT officer who worked closely with Roy is Robin Haighton, VE3FRH, the President of AMSAT North America.

--

Robin Haighton VE3FRH: "The space program itself is in good hands, but there is no doubt about it that we will miss that leveling confidence that Roy always brought to the meetings and the discussions. He made friends with everybody. The moment you met him you felt that here was a man you could trust."

--

Other comments have come in from all over the world From New Zealand, the past president of NZART, Jim Meechen ZL2BHF sent his condolences. As have numerous other Newsline listeners. Another of Roy's friends, Bob Heil, K9EID, had this to say.

--

Bob Heil K9EID: "I'm going to miss his spirit. He had a spirit about him that when you heard him on the air, you stopped tuning. This was something special you were listening to. And it wasn't always the tone of his great broadcast voice. It was his spirit. He was always in an up-mode about this hobby."

--

Roy was in the first generation of television newsmen who began their craft after World War Two. He started in Philadelphia and then moved to the West Coast where he helped found the NBC News bureau in Los Angeles. That was during the days of the old John Cameron Swayzee Camel News Caravan.

Roy was at ease in front of a microphone _ and could talk to millions of television viewers as easily as he could talk to the ham across town. On camera, he had the uncanny ability to read to time, precisely to time. When I produced updates for NBC Nightly News and Roy was the on-camera talent, I would time the newscast and tell Roy how long he would have to report the story.

I'd say something like this: "Roy, can you do it in 19 seconds?"

And Roy would always reply, "You know I can old buddy."

Roy liked that phrase "old buddy." He used the phrase to address friends and co-workers for some time. As for the updates - Roy always got them right. He would stop talking just an instant before we'd have to switch back to the network.

By the time he retired in 1986, Roy had worked out of the Los Angeles news bureau for almost 35-years. He'd probably written millions of words, and brought his audience uncountable hours of news and information.

But even in retirement, Roy Neal didn't stop doing what he did best. He was no stranger to listeners of Amateur Radio Newsline who knew him as a tireless volunteer giving freely of his own time to report the latest information -- always signing off in his own stylized way.

--

"This is Roy Neal, K6DUE. Thanks for listening and 73."

--

73, Old Buddy _ I really hate to see you go.

I'm Alan Kaul, W6RCL, reporting for Amateur Radio Newsline.

--

Roy leaves his wife Pat, and sons Mark and David. Services were held August 19th at the Wesley Memorial United Methodist Church in High Point, North Carolina.

In lieu of flowers the family requests that donations in Roy's mame be made to the Astronaut Scholarship Foundation at the Astronaut Hall of Fame. The mailing address is 6225 Vectorspace Blvd, Titusville, Florida, 32780. Please mark your envelope to the attention of Linn Le Blanc.

And this final thought. Yes, we at Newsline have lost a very dear friend. More important -- so has all of Amateur Radio.

73, Roy. None of us will ever forget you. (ARNewsline, W6RCL)

The Big Blackout of 2003 led DJs on stations which kept broadcasting on backup generators, to actually pick their own music! "It was like free-form radio from the 1970s," says Mike McIntyre, assistant program director for NYC's WXKR-FM interviewed for Blade magazine. "We played Humble Pie, the J. Geuls Band, Deep Purple - stuff we're never allowed to play." (What? No Firesign Theatre???)

> The bottom of the FM dial is at 88 MHz. WABC-TV audio is at 179.75 MHz.

You can get Channel 5 audio if your FM radio's dial extends down
into the 70s.

Japanese FM is 75 or 76 to 90 megacycles (or so). VHF TV channels 1,
2 and 3 have their audio between 90 and 108. Japan uses the NTSC
system.

If you get one of those radios, you're in business. I used to have
one. It got stolen. :-(

1938. Advice wanted on digital radio

Newsgroup: rec.radio.broadcasting
Date: 2003-08-24 18:29:09 UTC
From: mocker5@flash.net
Message-ID: <bib05ljfj1@xuxa.iecc.com>
Source record: 7116

If this is the wrong n/group for this query, then sorry! and point
me off to the right one, if you will.

Thing is, I'm thinking seriously about going in for a digital radio, since
hearing a Business World programme about it on the BBC World Service recently.
(This would be used in the home, not as a car radio.)

Now, is there a Best Buy?
As I'm no longer able to see a damn thing, I'd ideally be looking
for a receiver that doesn't require you to look at a display panel
to get information on what mode or channel or whatever you're
currently in or on, as most good radios now seem to.

2. Are the channels offered really as great as the speakers on the
BBC WS program claimed? They were, after all, working for digital
broadcasters, and perhaps less than objective!

3. In your opinion, will the promised advertisements-free policy
last only until a large enough audience has been built up?

And finally, any other tips you can come up with.

BTW price is not a big problem, only I want to get the right radio
for the job first time, and not have to find I've bought something that's cheap
and cheerful but almost useless.

I'm sorry, but after being in the States nearly five years, I have
to say the radio here is really pretty awful, and I've almost
given up listening.
Maybe I was spoiled by having had BBC domestic radio up to then, of
course....

Thanks in advance for any guidance in this field.

'Tunes' I think is what you are talking about there brother R J and I would agree with you largely even though I was brought up on 60/70's AM and the good old CBC..

What - you're - talking about the increasing roll over of western culture into the dark rule of the synthetic, data modelled, vertically integrated 'popular' corporate artist.. All part of the fall of Rome brother..

Not that both Berlin and Porter didn't cough up some pretty ugly stuff to pay the bills too - but it has gotten pretty bad lately on the racks I will agree.. And I think the kids are on to it - see what happened to Justin Timberlake at that Toronto shindig?.

Run the search term - 30's - or - 40's - on my hobby bitcaster below..

When I put the search engine together for the site, I built it so you could search by lyric fragment because that is about the only way I remember a 'tune' and it really puts a load on the server model for testing purposes.. Consequently - most of the playlist is populated by lyrically memorable tunes from several eras right up to now.. Stuff I can croak and waddle (privately) along with - which in turn attracts a very interesting group of fans who, like us, like 'tunes'.

I have a number of big band covers in there from the Setzer Orchestra (which were interesting enough to push the originals off my play bank) - but - you'll probably get a bigger kick out of the some of the OEM Andrew sisters stuff - particularly with Danny Kaye..

Now I would put it squarely at the doors of the Video media, except that some of the very best 'tunes' came out of vegas/movie/stage song writing of

any given time.. Well except for my main man Bill Monroe - his stuff came out of back or a 32 ford with a 'spare' tank as near as I can figure..

Anyway - it isn't being forced to dance as well as sing that is making it all run wrong..

My take is the published financial 'decline' of the music business is more the result of bad reactive A&R calls regarding taking risks that don't match up with the sample generated demographic models that big station advertisers will support (with all due respect to brother Eduardo) - rather than - outright downloading itself.. Although I bet it's easier to get an industry fight together against it as opposed to a campaign around 'we suck - we have mostly crappy tunes right now - sorry that's what everyone's numbers tell us you want'..

Every so often however - someone sneaks a darned good 'tune' out the back door and I quickly hand over my $20 for the CD.. Check out:

En Vogue - Giving Him Everything He Can Feel
http://www.dexterdyne.org/888/118.RAM

What do you do about it? I don't know.. I'm just a propeller head..

Nobody seems to reward being a talent much anymore - well except to point out what a talent someone is between the softcore pepsi porn.. The system isn't broken at all according to most of the professionals here - it's the thieving public out downloading and sharing out their old collections that's to blame apparently..

Now I don't support downloading myself - don't use cacheable audio dataforms specifically to not support it - but I can sure see how folks are unwilling to fork over the money for most of the popular albums out there right now.. With the interesting proviso that while it's still a crummy way to make a living - most of the small Jazz and Traditional labels are doing as well as ever - better than ever actually..

I wasn't around back then, but in all my readings of OTR and listening to Chuck Schaden in Chicago, I would've sworn that it was "Manhattan Merry-Go-Round" where the announcer said that the songs were sung so clearly that you could understand every word. And people complained about rock music fifteen years later...

Along those same lines, I have to chortle when I see someone giving a tribute to Bob Hope saying how clean his comedy was instead of today's "depravity." According to the Library of Congress' extremely impressive web site on Hope's career, more than once at the height of his radio popularity in the 40s NBC execs wanted to drop him because they felt his show was too *off-color* (but obviously didn't). Plus ca change...

Are people sixty years from now going to be reminiscing about how family-friendly Howard Stern was?

Almost all the XM and SIrius tuners are not well suited to the
vision-impaired.

There is an exception. For just $70 including antenna, you can get an XM
tuner - complete - that plugs intio the serial port on your PC. The audio
comes out a 1/8-th inch stereo jack as on most XM / Serius tuners. I don't
know if anyone has written the PC side for the vision-impaired. Send an
e-mail to XM and see what they say.

I call them tuners since no XM or Sirius box includes audio amplifier and
speakers. There is a docking station with amplifier and speakers for the
Delphi XM tuner, but that tuner isn't well suited to the visually impaired
IMO.

> 2. Are the channels offered really as great as the speakers on the
> BBC WS program claimed? They were, after all, working for digital

I have stopped listening to AM/FM radio since I got XM about 18 months ago.
The exception is the local news and weather station.

> 3. In your opinion, will the promised advertisements-free policy
> last only until a large enough audience has been built up?

No one can predict.

While XM has ads on some channels, they limit the number. There are no ads
on the niche musical channels I like. That includes the older "decades"
channels, the classical channels, and some country channels and many others.
Of course the BBC World Service channel has no ads. Most of the rest of the
talk channels have ads on both XM and Sirius.

At the present time, I don't consider the ads vs no-ads to be a significant difference between Sirius and XM. There aren't many ads on XM and they are only on the channels that might attract advertisers - not the niche channels that are the real strength of sat radio.

You can listen to 3-hour loops of most of the musical channels on XM from their site www.xmradio.com. Recognize that you are listening to Internet streaming audio, not the same quality they give off-the-air. You can listen to Sirius (1) if you have a highspeed internet connection and (2) if you fill out an info form and register.

Any other questions?

Bob C.

And you are 100% correct. My memory haze is catching up with me.... Sorry.

Oh, it's happened, alright! Even among the biggies. A high-profile certain recently launched nationally syndicated program...put out by one of the major radio networks....has a few of these on its list.

For one, it lists Conneaut, OH's WWOW-AM 1360 as "Cleveland/Conneaut" (until WERE/1300 Cleveland picked up this program, it was the only "Cleveland" affiliate listed). WWOW is a 500 watt station that has trouble reaching nearby Ashtabula, OH, let alone most of Cleveland. ;)

At least they didn't try to hide it and just call WWOW a "Cleveland" (without mention of its city of license) affiliate!

Then again, Radio Shack and other stores that sell radios have a
number of "TV Audio" models, both analog and digital, that cover the
VHF band quite well. I don't know if you can get TV audio in a car,
tho...and it's been a long time since I saw a "TV audio" receiver that
would pick up the UHF band.

Yes, Dr. Lyons it was as sponsor of the "Manhattan Merry-Go-Round" where the "songs were sung so clearly you can understand every word and sing them yourself." The show ended in 1949.

The "Fitch Bandwagon" show ran for ten years on NBC (ending in 1948) sort of morphing into a situation comedy show by the end. The theme, however, was always--

Laugh a-while, Let a Song be your style,
Use Fitch Shampoo!
Don't despair, Use your head, save your hair,
Use Fitch Shampoo!

IMO, only one of the currently-available XM or Sirius radios is likely to be suitable for the vision-impaired. That is the XM tuner the plugs into the serial port on your PC. It is controlled by the PC. It would seem that a PC control program suitable for your use could exist. I have never seen this unit, which costs $70, complete with antenna. You might surf XM for info www.xmradio.com Also you could write the president of XM hugh.panero@xmradio.com - you will get a reply.

Which brings up a point about indoor reception.

XM's satellites are stationary over the equator roughly south of Florida and Arizona. They have many hundreds of ground-based repeaters. Unless you have a view to the southeast or southwest from your location in Fort Worth, you would have to hope for coverage from a repeater.

Sirius's satellites are not stationary. There will always be one somehwere north of North Dakota up as far north at Hudson's Bay. The other active satellite cross the equator well east of the US or west of the US, heading to North Dakota. Sirius has relatively few repeaters. This means that an indoor antenna that may work one hour may not the next since the satellites are moving.

My conclusion is that Sirius may have better coverage to cars, but XM is more likely to be satisfactory indoors.

> 2. Are the channels offered really as great as the speakers on the
> BBC WS program claimed? They were, after all, working for digital
> broadcasters, and perhaps less than objective!

I have had XM for 18 months and only listen to AM or FM only for our local news and traffic station. With my niche musical tastes, there is nothing on ordinary radio, but a number of XM channels. I would feel lost without satellite radio.

> 3. In your opinion, will the promised advertisements-free policy
> last only until a large enough audience has been built up?

No one can predict.

XM's ads are only on the "hot" demographic channels, and are limited to about 1/3 as many per hour as your local FM station. None of the XM channels I use carry ads. The talk channels on Sirius and XM are mostly commercial, except for XM's BBC World Service, of course.

I don't consider ads vs no-ads to be a major consideration at this point - at least for me.

The XM and Sirius units are tuners, not radios - they generally put out audio through a 1/8-th inch stereo jack. The exception is that there is a home ac-powered docking station for the Delphi XM Skyfi unit which contains an amplifier and speakers. I don't think this is likely to suit a vision-impaired person, but is certainly worth your consideration.

Any questions?

Bob Carpenter

1950. Disturbing ad

Newsgroup: rec.radio.broadcasting
Date: 2003-08-25 02:09:16 UTC
From: Doug Smith W9WI <w9wi@invalid.invalid>
Message-ID: <bibr4c$358$1@xuxa.iecc.com>
Source record: 7126

While DXing this morning, I heard an ad that, well, let's say it shouldn't have been on radio. Unfortunately the station was distant and fading, so I don't know who the culprit was - in any case I'm pretty sure it was part of a syndicated program. (and thus may well air on *your* station. I've heard similar ads on other stations (WFAW-940, for one) during syndicated programs.)

They were advertising a radar detector that "makes your car invisible to police radar". It is my understanding that these devices work by heterodyning a local oscillator against the incoming radar signal. This allows the speeder to cause the officer's radar to display whatever speed the lawbreaker wants - or at least causes it to believe it's receiving an invalid signal, and display nothing at all.

The FCC has ruled these devices to be ILLEGAL, and on appeal a federal court upheld the Commission:
http://www.fcc.gov/ogc/documents/opinions/1998/rockymtn.html .

It seems to me to be dangerous territory for a Commission licensee to be accepting ads for devices that:

- Assist people in avoiding prosecution for intentionally breaking the law and putting others' safety at risk.
- Do so by *intentionally interfering* with licensed services.
- Have already been ruled illegal.

I would hope station owners will think twice before advertising illegal activity. If I ever hear one of these ads again in a situation where I"m able to collect adequate documentary information, I *will* be filing a formal complaint with the FCC.

I think your concern for station owners is groundless.

Questionable dietary supplements, useless weight-loss elixers and fake sexual capacity enhancements are now routinely advertised even on the formerly respectable radio networks.

Anything goes during the Baby Powell era.

Er, not quite. They ruled that ONE specific jammer was illegal...whereupon the manufacturer put the same works in a different case, changed the model number, and began marketing it again. The device you heard the ad for it NOT illegal, as far as the feds are concerned. A few states ban their use.

The funniest aspect to the whole thing is that they don't work. By the time they have sent a jamming signal to the police radar unit, the radar has already displayed the vehicle's speed. Using the device also assumes that the cop is stupid. If the cop sees a car traveling considerably faster than the rest of traffic, and that car displays a speed a great deal different from the rest, he or she is going to know that something's not right.

Please pardon the dual messages. The first one escaped without a trace and I thought it was lost.

To make a slight addition. I find XM coverage in my car to be very satisfactory. It has worked in every shopping mall multistory garage I've tried - and Sirius's limited number of repeaters makes it unlikely that they would do as well. OTOH, it is at least theoretically likely that Sirius would cover better in some rare rural areas shielded from the south by very steep hills, etc.

WRXR 105.5 of Chattanooga has been advertising that ad for a few months...
An ad clearly aimed at young people I think.

RJ,

I can second your assessment of the XM coverage. I travel in rural VA quite frequently and have found very few locations where reception was a problem.

My 2001 F150 makes frequent trips to North Carolina, West Virginia and even Kentucky. And, other than a second or two under an overpass, I've had continuous coverage.

Just my two cents,

Jeremy Powell

The follow was also emailed directly to Ian:

Do you have a high speed Internet connection? If so, just listen to the BBC directly over the Internet. The BBC website isn't blind friendly, but I think all of the channels stream. I particularly like BBC 7. You can get transmitters that will broadcast the streaming audio onto FM frequencies so they can be listened to on any radio in the house.

Wow! Just for fun, I turned on the Visual accesibility and changed
the screen to 640x480. If you can read this, you can read the XMPC
guide.

XMPC is $70 plus shipping and tax from PC Connections and the $9.95
per month fee for the first radio. It is really nice in that you can
set your favorite channels and it will monitor what's on. You can
even set it to pop up you favorite shows.

I have mine connected to a set of Logitec external speakers (the kind
with the sub-woofer, but I have used the cable to feed my souncard and
Total Recorder PE to capture the history of music.

I like to listen to the NASCAR, Decades and Country, Online Tonight,
and Old-Time Radio/Sonic Theater channels the most. Online Tonight
has tons of self-promoting commercials and I've never heard it live,
so I don't know if the musical breaks fill in for commercials. Pretty
much the rest of the channels have mostly promos in place of
commercials.

XM-4 has perhaps one promo per hour and no commercials. XM-73 seems to have
neither promos nor commericals.

So they are accepting money for ads for a product that doesn't work?

When I consider the other trash that gets advertised on the radio now, I
guess that really shouldn't surprise me -- it blends right in with the
scam advertisements for weight loss products and the like.

I can't help but wonder how accepting advertising like this will impact
the long term credibility of radio?

This is wonderful news! Management is no longer responsible for what
its employees do. That'll make running stations much easier.

How can management have no responsibility when employees admit they
were part of the stunt? Let's see them get that excuse past the FCC
with a straight face. If a station producer gave the stuntman a
military uniform, that, alone, makes the station an accomplice.

I smell a big fine in the works. Unauthorized access to a miltary base
when the President is there. I wonder how nature can possibly make
someone that stupid.

Unless you have some professional broadcasters involved it's like the blind leading the blind. "DJUndahCovah" doesn't sound like you're very proud of what you're doing.

What you're doing is teaching them how to break the law. Beyond the prohibition that the government can't control what you say after you have a license, there is no free speech in broadcasting. Absolutely none. The owner of a station has the right to tell you what you can and can't say.

It's insulting to suggest that a community needs a pirate (lawbreaker) to teach them about free speech. I'm from New England where town meetings are a long tradition. That's free speech and everyone in town knows what it is.

Thank you. Thank you. Thank you. I love being called too young.
However, I have to confess that I spent many early years of my career
programming Easy Listening both on the station level and in
syndication. I was creative Chairman of the International Beautiful
Music Association. We recorded Easy Listening material when the supply
started to dry up.

I wasn't alive when they were writing it, but made a good living
spreading it around.

Not illegal, or not enforced? (the Feds never chased down and
prosecuted the pirate FM that operated in my hometown for many years.
Surely that doesn't mean the operation was legal?)

Good point. Though to a large degree the damage is done if the user
believes he can speed without risk, even if he's wrong.

Not long from now, probably within our lifetimes, the generation after her won't know what FM or Satellite Radio is. When I was her age I had never seen a 78 or an Edison cylinder until my grandfather showed me his collection of them.

That's why the delivery system isn't important. Content is. While delivery systems constantly (slowly) change, the formatting of the content hasn't changed very much. It's a linear playing of a song or two, some announce, commercials or fundraising "promo" more songs, ad nauseam. Talk hasn't changed much, either. The most significant change in talk has been the telephone.

You and I will sit on the porch in 2020 reminiscing with our grandchildren about MP3, CDs, Minidisks and digital audio systems.

We can't forget to complain, even then, about consolidation and cookie cutter radio. The kids will look at us with that "what planet is he from" look. My family has long life genes. Unless we get hit by busses we live into our late 90's, so I'll have plenty of time (I figure 2035) to educate uninterested kids.

The only talk stations that have reasonable numbers are WWTN-FM (5.1)
and WLAC-AM (4.0) What's the other FM talk/sports station? Not Salem's
"Christian Talk" with a .8? Both WLAC and WWTN dropped in the Spring
book.

In Nashville you might be right. I'm amazed that WWTN has better
numbers than WLAC. WWTN's programming is weak (IMHO), compared to
WLAC. Looking at the lineups I would assume WLAC has a signal problem.

I'd say the term "Satellite Radio" will outlast the term "FM". Listeners will always need to consider whether the programming they seek requires a special outdoor antenna, oriented to the sky. They'll want to be aware of which bands offer local weather and commercials, and which offer niche music. But they won't care to know which component of a terrestrial signal was modulated to represent the ones and zeros of digital data. Thus they're likely to say "local radio" and "satellite radio," just as they refer to cable, satellite and local, or "regular" TV.

As you note, content is what matters, and the term "satellite radio" conveys crucial information about what content to expect and how to set about receiving it. Terms like FM or the truly archaic UHF and VHF do not.

BTW, are you predicting the obsolescence of the terms or the technologies? 78's and Edisons are long out of production, a fate I don't hear you predicting for satellite or FM radio.

Jerome

In a quick band scan today in Boston MA I counted 16 -

WGBH, WPRO (Providence RI), WBOS, WQSX, WTKK, WBMX, WKKB, WKLB, WFNX (101.3),
WFNX (101.7), WODS, WBCN, WROR, WMJX, WAAF (hmm, I missed one).
Many of these went RDS in last year or so. I looks like Infinity really
jumped on the bandwagon (in this market anyway).

It is a pleasant surprise as I've had an RDS Ford radio for a while.

Now if we could only get a few AM stations to re-activate their C-Quam
Stereo (WBZ, WSNR, WCRN - we know you have the equipment). We are down
to three AM Stereo Stations: WILD, WJIB and 1360 (don't know the calls -
this one converted to stereo in the last year). My Ford Radio can do
C-Quam AM Stereo as well (not IBOC though).

Entercom has a corporate mandate to roll out RDS. Greater Media has had it almost since the beginning (certainly back before they owned half of those stations; I remember visiting the Magic studios at 330 Stuart six or seven years ago, when they had an RDS-equipped receiver in the lobby as a demonstration). I think I've heard that Infinity is indifferent to RDS at a corporate level, so it may be that whoever is their market manager these days bought a car with an RDS-equipped radio in it, and told the engineers to make it work. (If I ran Oldies I certainly wouldn't want to be without RDS when the closest competition has both RDS and a better signal downtown....)

Looks like Clear Channel and Radio One are the odd broadcasters out in this survey.

If you are interested, I hang out with mostly blind people
on the net, and they are experts at all the screen readers available,
customizing them, etc. If you have a DOS IRC program, I can tell
you where we hang out. If you would prefer, since they operate their
own radio network, I can get you the phone numbers and you can call
and talk to the show hosts.

Initially, it was entirely instrumental. One day I got a call from Jim Schulke of Schulke Radio Productions asking me to recommend 100 vocals that might be usable in the format. Other syndicators were beginning to use a vocal or 2 an hour.

Depending on the syndicator and the flavor of the format it could vary. At TM Programming we had 2 1/2 24/7 formats. The 1/2 was specifically for WCFL, Chicago.

One was a "matched flow" where an entire segment was played and the other was "category" where different categories would be mixed within a segment. That tended to use more vocals.

Most of the early stuff was "standards" where nearly everyone knew the lyrics even though the cut was instrumental.

Charles Hobbs <chobbs@socal.rr.com> had written:
|
| "Spam with an antenna".

I like that description. I'll have to remember it.

The Conventional Wisdom Crowd (you know, the folks who claim that
"radio's never been better") ignores this quite obvious sign of
radio's declining economic health: they're stooping to the radio
equivalent of spam as a source of revenues. Another sign:
Wal-Mart doesn't advertise on radio. Not that I think Wal-Mart is
so wonderful, but that's a company that's smart enough to figure
out what works to meet its goals and that will do what it takes to
meet its goals. Radio is obviously not a part of that picture,
while other media are.

It seems like in the Dallas market, every local talk
host and news reporter does testimonial ads where THEY JUST
HAPPENED to be a user of that company's

auto leasing
eat-all-you-want-and-still-lose-weight diet product
laser eye surgery
contact lenses by mail
foundation leveling
aluminum siding
storm windows
solar-tube skylights
baldness cures
hair transplant doctors
impotence cures
stomach staple doctors
stop smoking patches
stop smoking and lose weight hypnotists
fitness centers
carpet cleaning
wood floor installers

Some of these testimonials are mutually exclusive. One
local host sprouted profanity at a listener who saw him at
a station sponsored event and mentioned that he didn't
look like he had lost 35 lbs like he claimed on the radio.

A good number of these products are under investigation for
fraud at the very time they stations are still running their spots.
They only time some of these spots abuptly STOPPED was when
Body Solutions went bankrupt owing the stations lots of money.

How will radio ever have any credibility while doing these
practices?

>
> BTW, are you predicting the obsolescence of the terms or the technologies?
>78's and Edisons are long out of production, a fate I don't hear you predicting
>for satellite or FM radio.

The pace of technology is so fast that what once took a century might happen in 5 years. That's why content will always be the driving force. I do believe there will be some sort of localized "radio" of some kind. There will never be an end for the need to know what's happening around you as we discovered during the blackout.

I see fiber playing a greater part in a world of conflict. Satellites are, literally, sitting ducks. If the Cold War had continued I'd have no doubt there'd be a plan to cripple our satellite communications. At some point, I see networks going back to land lines.

One day Pago Pago will have nuclear missiles or space vehicles capable of playing bumper cars with our satellites. We'll be at war, again, as President Ulysses Rumsfeld tells us we're winning the war. Victory is at hand.

Well, that's pretty subjective. I don't buy weight loss products
based on "testimonials" on the radio anyhow. :)

Clear Channel in Cleveland used to do this when I lived there, but
they didn't go over the top. The personalities only "personally"
endorsed a few products, and only one of each type, so when Jen
the morning show producer said she was driving a car she bought at
mumble (I forget which dealer) it was pretty easy to believe her.

I forget which weight loss product was "personally" promoted by
at least one personality from each big radio station, but there was
one. Bill Lewis of WNCX-FM was one of the people promoting the
product. My brother saw Bill and said he did actually look like he lost
a significant amount of weight, so maybe there was something to the claim...

> They only time some of these spots abuptly STOPPED was when

Body Solutions. Yeah, that's the product which had one jock at each
radio station promoting it.

Actually, Wal*Mart has advertised regularly on Paul Harvey, so they do some radio advertising, albeit strictly confined. I guess you gotta know where they can deliver a clean pitch....

BTW, the affiliate list on the official Paul Harvey website still lists WDAF(AM) as their affiliate here in Kansas City.

For those that don't know, the "61 Country" format has moved over to the former KCIY(FM) on 106.5. They have changed calls to WDAF-FM.

I should also note as part of the move to FM, the top-of-the-hour newscasts are at :55, before the ID. Therefore, Paul Harvey is now at 12:00 noon, rather than the advertised 12:06, and the Rest of the Story is at 5:30.

Eventually, the AM will become sportstalk "61 Sports." Supposedly, the KMBZ sportstalk staff will move across the hall, although supposedly Soren Petro doesn't want anything to do with it.

Not to launch another AM Stereo flame war but...

I've noticed that WPGC (1580 AM) runs with C-Quam during their daytime
50Kw authorization, but then drops the C-Quam when they lower power (to
270 watts!) and change their pattern at night.

I live within 10 miles of their plant (but still inside the pattern), so
I'm not entire certain that they actually turn off the C-Quam or if the
signal is merely so poor that C-quam just isn't possible.

What would be the advantages of disabling C-Quam during protected hours?

Thanks,

Jeremy Powell

Were it not for WPOC in Baltimore and WBIG in D.C., I'd almost think that Clear Channel had something *against* RDS. RDS was used at WMZQ back when it was owned by Chancellor - abruptly disabled when bought by Clear Channel; the same for WWDC and WGAY (now WIHT). Can anyone recall what other D.C./Baltimore stations were running with RDS that now have it disabled?

Bonneville seems to have bought into the idea recently. WGMS has been using RDS for several years now, as has WTOP-FM. They recently (within the last six months) RDS enabled WWZZ as well.

Infinity uses RDS on WHFS, WQSR and WMMX, but nowhere else I can detect in the Baltimore/Washington markets - so it still seems a little hit and miss.

Best,

Jeremy Powell

Just a guess, but they may use 2 different transmitters...one for days, and
one for nights, given the large discrepancy between operating power levels.
Heck, the control circuits of the high-power 50 kW xmtr probably use more
than 270 watts of AC power just running in standby !! In any case, it may
be as simple as the low-power transmitter not being equipped with a C-QUAM
exciter (or it not being in working condition) ..... and judged not to be
worth the $$ it would take to repair/replace/install in the first place.

Curious: When did WETA and WPFW actually have RDS enabled? I don't
recall ever seeing that.

As for WGTS; I'll run out to my truck at lunch time and let you know.
The last time I checked they still were running with it. Do they have
any association with (like formatted)WAVA? As a side note - WAVA is
running with RDS as well.

Doh! This had never occurred to me for some reason. At 270 watts, in a city as RF noisy as Washington D.C., I can't imagine that they'd have a huge listenship at night in the first place - so the financials probably don't make sense to maintain the C-Quam at night.

Which begs the question: why don't these stations just throw in the towel for the after sunset crowd? Are they really generating enough revenue with their non-existant nighttime numbers to justify the AC for the xtmr? I can't count a half dozen stations in the D.C./Baltimore markets that *barely* cover their C.O. at night. And turning down all those pip-squeak stations at night *just* might lower the noise floor for everybody else...

How do AM stations with sunset flea power price their overnight inventory? Surely the sales team doesn't price these spots the same as a daypart spot, right?

A 5 watt nighttime station on AM 74 in Cambridge, Mass. does cover Boston
and Cambridge quite well..

Why is Washington DC so RF noisy?

> markets that *barely* cover their C.O. at night. And turning down all

Correct. It might. However these stations are under the impression that
they have listeners even during the daytime - period.

WETA was an RDS faithful until their chief engineer went to work for XM
about two years ago, + or -. They even had AF to allow automatic switching
to WETH. IIRC, they had RDS during their early IBOC testing.

I'm pretty sure that WPFW had RDS, turning it off quite a while ago during
one of the Pacifica bloodlettings.

Here is my RDS list from a number of years ago with those still using RDS
in June 2001 marked with *

Following from NewsMax.com via LARadio.com==Catholic Radio Network is selling KPLS, Orange/Los Angeles, 50 kw on 830 AM, to L.A. based Radio Visa LLC, for $38 million. Radio Visa is headed by Stephen Lehman, who founded Premier Networks. Station has called itself "radio on the right," and is home to Don Imus and local radio personality George Putnam. Radio Visa is a new Hispanic radio network==Ted Shireman

Hello everyone,

Perhaps several of you offshore radio fans have made a round trip from
Scheveningen to the Radioships off the Dutch coast.
If you made the trip on the mv. Dolfijn you might be on this clip.That you
can watch. See yourselve from a Mebo 2 point of view.
And a specially for this weekend you can download the last programme of the
Int. Service of R.N.I. on August 30th. 1974. And the last programme of
R.N.I. on august 31st.1974.
All this and more on www.rni220.nl

Have fun;

Peter F.

Somebody must still be doing it. Some supermarkets are running easy
listening versions of currents. When I hear something like Christina
Aguilera done in Muzak(tm) format, I get a nasty case of the giggles.

Radio One. The AM calls are still in Cleveland (my alma mater in radio, in fact) and the FM is in Richmond, VA.

Muzak and similar providers of ambient music continue to program Beautiful
Music for controlled environments. Any radio stations doing
instrumental-based formats (excluding "soft jazz") are generally using 60's
and 70's material.

The radio syndicators like Churchill, Shulke, Bonneville, Kalamusic, TM,
RPM, IGM, Peters, etc. mostly closed in the early to mid 80's when the
format ceased to be demographically attractive to advertisers. I had a
company that syndicated to Latin America with nearly 80 stations at one
point; the format evaporated in that area in about 1987 and I sold the
library to a station in Lima that continued the format for a few more years.

Even the "roll your own" stations like Jerry Lee's station in Philadelphia
went to soft AC in that same period.

When did the I-Man start doing the show in Spanish? :-)

Is the the anglo-talk format the current stuff or is this what it will be switching to?

CRN is still selling off its stations? WOW

I thought Catholic Radio Network was long gone. That's one system I was glad when it went belly up. They sold their Chicago station to Radio Unica I think -- or was it One-On-One Sports (now Sporting News Radio)?

CRN was going to buy AM 1660/Jersey City, NJ (in Elizabeth, NJ back then). The call letters were to be WBAH. No kidding!

Wonder if it was supposed be similar to the noise that sheep make: BAHHHH...

Radio Unica (the current owner of AM 1660) wisely changed those calls to WWRU.

Since April 2001 they are WIHT - hot. Owned by CC.

Quoting from DCRTV.com: http://www.dcrtv.net/mediawf.html

99.5 WIHT WASHINGTON DC contemporary
In April 2001 station owner Clear Channel flipped 99.5 from "Jammin' Oldies"
to a "hot" rhythmic urbanish contemporary hit format. The WJMO calls became
WIHT. The urban oldies format (as WJMO) only lasted two years - being born
in April 1999. Before that, 99.5 spent more than three decades playing
relaxing music as WGAY. WGAY played a laid back mix of adult contemporary
tunes which evolved from elevator music of the 1970s. The old WGAY of the
1960s and 1970s was the ultimate "relaaaaaxing" elevator music station. Its
ads featured station programmer Bob Chandler leaning way back in a recliner
with his station's "easy" music playing in the background. For a while in
the early 1990s, WGAY switched its calls and became "Bright 99.5" WEBR, but
listeners didn't accept the more up-tempo music. Clear Channel owns WIHT.
The first station on this frequency was WCFM, owned by the Cooperative
Broadcasting Association. The station went dark for a while before WGAY
arrived.
==========
Also from DCRTV:

July 21, 2003 PGC's 1st Again, TOP Jumps To 2nd

Once again urban WPGC-FM was in 1st place (up from winter's 2nd) in the
spring Arbitron quarterly radio ratings for DC, out on 7/21. In the overall
age 12+ numbers, all-news WTOP placed 2nd (up from 3rd). Adult urban WMMJ
ranked 3rd (down from 1st), with adult urban WHUR 4th (up from 6th), urban
WKYS 5th (down from 4th), classical WGMS 6th (down from 4th), news talk WMAL
7th (holding level), smooth jazz WJZW 8th (up from 9th), with a tie for 9th
between country WMZQ (up from 13th) and oldies WBIG (up from 12th). Hot talk
WJFK-FM was 11th (up from 14th), hot adult contemporary WRQX 12th (down from
8th), rhythmic contemporary WIHT 13th (down from 11th), adult contemporary
WASH 14th (down from 9th) in a tie with rocker WWDC (up from 16th).

[My comment -- WMMJ is a Class A station, the rest of the FMs are B.]

C-Quam is very sensitive to co-channel interference. At 270 watts
they'd be vulnerable to every signal. The resulting platform motion
would make every listener run for their barf bags.

I think some of it was released on vinyl years ago. It would have been
the custom stuff.

A friend of mine has all the SRP tapes. Unfortunately, they're too old
and the oxide comes off as it's played. We were hoping to dub them to
CD to save them, but it didn't work.

Anglo is current. Brokered to gain clearance "in LA" for some syndicated
shows.

Look at www.radiovisa.com for an idea about the upcoming change.

To explain==Imus is NOW on KPLS by tape delay from 5 to 9 am (having
been dumped by KLAC 570) Signal is very powerful in San Bernardino and
Riverside Counties Other programming is 'bartered and conservative.'

KPLS was intended to be anchor station for the now-defunct Catholic
Family Radio Network. (As I recall it first went on the air with 2.5
kw licensed to city of Orange.) No information has been announced on
programming plans for the new Radio Visa.

I was under the impression that CRN owned 1660 when it was run by John Lynch. They bought a few expanded band stations.

WTAO, then WCAS, then WJIB has always had an amazing signal for its power. I worked for WACE, Chicopee (Springfield, MA) on 730 with 5kw days. If we went off the air, WTAO would bomb in (over 100 miles) daytime.

The FM was WXHR which became WJIB(FM), then something else, then something else and is now WTKK. I worked there when it was WJIB. I recorded the bells. I'd love to get the master.

Correct. I don't have access to Muzak ever since they discontinued
FM-Subcarrier service shortly after the beginning of 2003.

I have Music Choice on home via the cable TV. The BM/EZ channel does
have some new stuff - I think the latest I've heard is light 80s pop
done instrumental. It's not bad at all...

I guess I'll have to stick with the cassette player hooked up to the
cable box. I was just wondering if there was something commercially
available besides 101 Strings.... :-)

> Muzak and similar providers of ambient music continue to program Beautiful
> Music for controlled environments.

There's a fast food restaurant in my area that plays Muzak as the background music. It is all instrumental versions (absolutely no vocals) of pop music hits, with somewhat of a "rocky" feel, with guitars, keyboards, and drums -- unlike what I consider to be traditional Beautiful Music, which predominantly features lush orchestral arrangements, heavy on the strings.

Anyway, Muzak has conquered and instrumentalized all sorts of pop music -- I've even heard them do songs like No Doubt's "Don't Speak", and they're probably done most of the Backstreet Boys and 'N Sync hits.

The market share for Muzak has to be dropping, though; it used to be commonplace in supermarkets, department stores, and restaurants, but now all but the most "snooty" establishments (where vocal music would be seen as "inappropriate") have replaced it with a generic AC-type format -- which in itself is a whole other discussion, because I've heard this background-music form of AC play a *much* wider variety of songs than what you hear on the radio, including many songs which didn't even make the Top 40 chart, as well as many album tracks which were never released for radio airplay.

The station that's now WTKK was WSJZ doing smooth jazz until a few years ago.

I'd get the specific dates if bleeping svartifoss2.fcc.gov was up. That thing has been up and down more often in the past two weeks than <insert least favorite politician>.

Have you ever met the owner Bob Bittner? He also owns WJTO in Bath,
Maine. I think that's one is either oan AM 73 or AM 75...

Both of them used to program instrumental music, but in the past few
months he has tweaked it into a mix of standards, instrumentals and
some very very limited soft pop. Terrific mix.

Also is the host of the two-hour long monthly "Let's Talk About Radio"
show on Sundays. Used to be a weekly hour long show.

> I was under the impression that CRN owned 1660 when it was run by John
> Lynch. They bought a few expanded band stations.

Well, AM 1660 was supposed to be the X-Band partner of Elizabeth's AM
1530 WJDM (formerly a REALLY cool all LOCAL rock oldies daytimer).

AM 1530 later went leased-access in the mid-late 90s and then started
AM 1660 which was hooked up with the kiddie-pop Radio Aahs network.
Call letters were WAHS.

When that folded, AM 1660 was supposed to be bought by Catholic Radio
Network and the calls were prematurely changed from WAHS to WBAH.

When the sale to CRN fell through, Radio Unica stepped in and bought
both AM 1530 and AM 1660.

They kept the leased access (now mostly Spanish religious) on AM 1530
and upgraded the AM 1660 night signal so that now we have a solid
signal day and night on that wavelength.

Radio Unica also moved the station closer to NYC...so now it's WWRU
Jersey City instead of WWRU, EEE-lizabeth. :-)

I just want to know if Radio Unica plans on returning the AM 1530
licence to the FCC any time soon....I think it's been longer than the
requisite five years for doing the "choose one" thing, right?

Or has the FCC forgotten about that?

KPLS started life as a talk station, owned by Danny Villanueva, the Rams
player and one of the founders of Univision.

Radiovisa has announced plans for programming. In fact, they are syndicating
their format right now, and have been doing so for nearly a year. "Gerardo
en la Ma&#65533;ana" is currently heard on a dozen or so smaller market stations,
and they have both news and other talk shows covering about 12 hours a day
at present on their satellite hookup.

The format is called "Spanish hot talk." Small point: it is Radiovisa, not
Radio Visa... sort of a copy of the Televisa name from Mexico.

Muzak, now delivered mostly by satellite, has many, many choices, ranging
form oldies to thematic (Spanish, Mexican, etc.).

Muzak also delivers some of their formats in disk form. Don't know if they're standard CDs or MP-3 disks. But knowing Muzak it's probably MP-3 disks...there's a note on the disks that say something to the effect of "for use only on Muzak equipment." I saw a couple of them lying around on the counter of a Popeye's Fried Chicken store once.

I'm sure someone with a combi MP3-disk and CD player might be able to take them for a spin.... :)

From: "t.hoehler" <t.hoehler@insightbb.com>
Message-ID: <bj067a$ca1$1@xuxa.iecc.com>
Source record: 6908

I wonder if there are any 50KW AM vacuum tube transmitters in use anymore? I read the excellent article about the Harris 50KW solid state xmtr that WLW uses, pretty neat. In the sixties, what would be the plate voltage and current for a PA running 50KW in AM? I'm sure they would use three phase input power, but how much filter capacitance would be needed to insure a quiet carrier? Always wanted to know.
Regards,
Tom

They are certainly dwindling. I've visited a few sites that still
have Continental 317s active, but for the most part these transmitters
are being retired rather rapidly now, in favor of new Harris and
Nautel solid-state units.

The situation is less clear on the UHF-TV side. Many high-power UHF
stations still use Klystron-based transmitters, and newer high-power
installations still use tube-based transmitters.

There are two types of these devices: active and passive.
Actives are illegal. Passives don't work.

But the issue that would be relevant to your complaint, is that
it IS illegal to advertise a product that is itself illegal. As it
is illegal to advertise a product that encourages an illegal activity.

Once you get lawyers flying on this one, sell tickets. It can be
quite a circus.

From the Personal Files: I programmed a station downstate, and
one afternoon heard a spot hit the air for a local head shop. The
spot was produced by the sales duck (as insisted by Manglement) and

actually used the term "head shop." As I listened the spot went on to describe the benefits of a personal roach clip, before giving the address, and closing out the spot. I pulled the spot, went to the Sales Mangler to inform him of such, and then to the sales duck and told him what I had done. Within 2 minutes the General Mangler was in my fact about the spot, the evils of programming 'geniuses' censoring spot copy, and depriving the station of needed revenue. The spot was running ROS/Standby, which meant at this station, that they were sold literally as filler, to occupy spaces in the event of a cancellation. This spot was about $5 per airing. Hell, the whole buy was less than $100.

Well, while the GM was going on, I mentioned to him that this was a spot for a head shop, advertising a roach clip, encouraging drug use, and all for $5, I didn't think it was worth jeopardizing the license. He rescheduled the spot and told me to mind my own business. And to get a law degree before I started acting as his station's counsel.

I went to corporate counsel, who told me that the spot was fine. I went to NAB, who didn't offer an opinion. I went to the IAB which didn't want to get involved, given my GM's position.

So, I went to FCC in Springfield. They told me flat out, the spot was illegal, because it encouraged an illegal activity. Further, since paraphernalia was illegal in Illinois, the spot advertised an illegal product. And that this was license threatening.

I asked if I could have that in writing sent to my General Mangler, and it was agreed that would be a good thing.

Meanwhile, I was advised, to pull the spot on advice of FCC.

Which I relayed to Sales and General Manglement, with a courtesy mention to the offending duck.

What followed was a Keystone Cops series of threats, arguments, and general disparagement of my lineage and multiplicative proclivities. This went on at work as well as well as at home, both on the phone and at my front door, for about 24 hours, until the GM received a letter from Springfield.

At this point he pulled and read the copy from the continuity office, then listened to the spot for the first time. He got the Sales mangler, and played the spot for him. Then they both got the sales duck in question and played the spot for him. And asked what the F*CK he was thinking.

After about 10 minutes the General Mangler returned to my office, thanked me for my vigilance, confirmed that I was right, and left. It was, by the Chief Engineer's observation, the first time any PD had won an argument with Steve Bellinger.

I didn't stay long at that station. Bigger things were already in the works.

I'm sure, however, had I stayed, Steve would have tied hundred dollar bills to my legs and tossed ME out of an airplane.

He was kind of known for that sort of thing by then.

But you already know THAT story......

TSC in the UK provide 8-hour long CDs for use in shops and fast food
counters, etc. They're in mono IMA ADPCM (4:1) format, and are played
on a custom CD player.

I'm sure there are still a few RCA Amplifuzz's out there.

There are a pair of RCA BTA-50Fs (high-level plate modulated) in Cleveland.

The Harris MW-50 has tubes.

With a Harris DX-50 requiring only 86 KVA for 100 percent modulation, and an RCA BTA-50F requiring about 150 KVA for 100 percent modulation, the economics are heavily weighted in favor of solid-state 50 Ks.

The DX-50 can generate 50 kW from three voltages of about 200 volts and below (see the Harris patent for details). The BTA-50F requires several kV (seven ?) to do the same.

Almost all older transmitters of 5 kW and above were three-phase.

You could run a 5 kW or 10kW on a rotary phase converter if you were desperate.

50 kW requires three-phase, usually 277/480.

Just like most FM Stereo receivers, modern AM Stereo receivers employ a Stereo Blend feature which progressively blends weak and/or unstable signals toward mono in order to improve the reception quality.

In general, considerable improvement has been made in the quality of AM Stereo reception of weaker signals. The following web site offers some sample recordings of the new Fanfare FTA-100P tuner, receiving clear, noise-free AM Stereo from stations up to 80 miles away during the *daytime*:

Especially since the older tube transmitters won't work well with IBOC
according to articles I've read in BE Radio magazine. You really need a
solid-state transmitter.

The endless proposers of AM stereo fail to keep in mind one thing.

WHO ON EARTH is going to pay US$1,700 for an AM Stereo (or even an AM/FM) tuner that has to be then connected to a stand-alone amplifier so they can listen to Michael Savage or Rush Limbaugh in stereo?

You're talking about people who buy US$10 portable off-brand radios at closeout and discount spots and also those all-in-one ministereos that cost at most a couple of hundred dollars.

Most of these things sound crappy to begin with and are mostly bought becasue the people want to either listen to their music at work or blast it with lots of bass at home for a party. And usually they're playing tapes, records or mostly CDs.

Please note that this is also my reservation towards AM (and FM) IBOC. People won't buy these things if the improvement in sound quality is practically negligible if all you're going to do is listen to the same talk and music you can get from a $20 boombox.

Explains why the government is pushing to get the analog side of things shut off....they just want to tinker with market forces and twist them to suit their convenience.

At a lot of the sites I've visited, this used to be the case but has changed in the not-too-distant past (or is scheduled to change soon). A lot of the effort is due to IBOC, but even in its absence I've been told that the advantages even of the ``Destiny'' over the original DX-50 are sufficient to make it worth stations' while to buy one and move their DX-50s to standby status. (It's a great racket for Harris, certainly....)

Ten years ago it was pretty common to see a DX-50 as the main tx with a Gates or Continental tube backup, but now -- among the full-timers at least -- the usual state is two solid-state transmitters. Some stations (particularly the ex-I-As) made a substantial investment in solid-state transmitters and bought a pair of DX-50s when they came out, or have a DX-50 and a 3DX-50, and alternate on a weekly or monthly basis.

> Radio)?

The actual trail was this: CRN sold the station to Fred Eyechaner's Metroweb (which also owns mostly-simulcast brokered stations WSBC on the Northwest side and WCFJ in Chicago Heights and until last year owned UPN station WPWR, which is now owned by Fox), who then LMAd the station to One-on-One/Sporting News Radio.

WSBC/WCFJ's most notable non-foreign language brokered show is "Miles Ahead," an afternoon drive mainstream jazz show hosted by Neil Tesser and Mark Ruffin, two former WBEZ jazz jocks who got into programming arguments with research-loving jazz PD Chris Heim and left the station. (Heim seems to favor mostly ballads and singers over uptempo songs and anything mildly avant-garde and seems to use research results to prove her beliefs.) The show's now been running for two years and even a solid advertising list (mostly record companies and jazz clubs, but it's still pretty good for a music show on AM with a genre considered a limited audience). Its web site is http://www.milesaheadjazz.com. They stream their programming 24/7 through Live 365.

Muzak in the US provides similarly long CDs (which, as best as I've been
able to determine, are *not* in MP3 format), also requiring a custom CD
player.

As recently as 1999-2000 or so Muzak was providing their proprietary CD's
and players to retail outlets such as Spencer's (which is where I was
familiar with the equipment--we had to put in that month's Muzak CD in,
it'd play for around 6-8 hours, mostly dance and novelty "Weird Al" type
stuff).

I had always wondered, as had other employees, specifically what format the
CDs were in (apparently employees had actually attempted to sneak them home
to play, without success--the tracking was off, as I recall; never had
access to a CD diagnostics util, and it'd probably have been impossible
without one of the proprietary Muzak players anyways). I'm not even sure
they were standard Red Book CD's at all, to be honest...

I'd expect the Muzak systems were similar if not identical, and I'd be
surprised if the Muzak "CD" systems weren't still in place in a lot of
places where you couldn't have a ton of satellite systems up (for example,
malls with many retail stores)...

Visit 980-Washington the same day as WTOP. They has 3 solid state rigs. A Harris DX=50 for days, a Nautel 5 kW for night, and a Nautel 10 kW for spare. Greater Media had done almost everything in at least triplicate. The station was sold shortly thereafter and I wonder about the present situation.

Message-ID: <bj62aq$k9s$1@xuxa.iecc.com>
Source record: 6928

http://www.newsmax.com/archives/ic/2003/8/29/180416.shtml

August 29, 2003

Los Angeles' KPLS Sells -- Home to Putnam, Imus, Boortz

The Southern California radio station that features broadcasting veterans George Putnam, Don Imus and Neal Boortz is being sold to a new Hispanic radio network, according to filings made Thursday with the FCC.
Subject to federal approval, the 50,000 watt KPLS (830 AM), based in the heart of Orange County and covering much of Los Angeles, will be purchased by L.A.-based RadioVisa LLC.
Radio Visa is headed by Stephen Lehman, who founded Premiere Networks -- the home of talk radio giants Rush Limbaugh and Dr. Laura Schlesinger. The conservative talk station is being sold by the Catholic Radio Network, which once planned to use KPLS as the anchor station for its defunct Catholic Family Radio Network. Catholic Radio Network has been backed by Dominos pizza magnate Tom Monaghan.
The change of station ownership may not happen quickly. It takes the FCC an average of six months to approve the sale of a radio station, although its approval timetable has lengthened recently because of protests and confusion over the FCC's new media ownership rules.
A top talk radio expert tells NewsMax that Putnam, Imus and other KPLS personalities should remain on the air awhile longer as the station moves to a new Latin format.
The sale price for KPLS is reported to be $38 million.

I am looking for a tape or audio file of Paul Harvey's "Rest of The Story" program from last Thursday (Aug 28)and Monday Sept. 1 thru Wed Sep 3. Can trade for
other shows over past year. These are NOT on Paul Harvey's website and blanked out on most streaming audio radio stations. NOTE: Please REMOVE the "NS" from my email to reply. Thanks.

> tuner that has to be then connected to a stand-alone amplifier so they
> can listen to Michael Savage or Rush Limbaugh in stereo?

The Fanfare is a reference-quality tuner. The model with AM Stereo is an update to their similarly-priced FM-only tuner. Fanfare has been selling these high-quality, high-priced tuners for years and they surely have been able to attract a sufficient amount of customers in order to sustain their business. Their products are not "consumer-grade", but rather examples of some of the highest performance that can be achieved with current analog-based AM Stereo and FM Stereo receiver technology.

> But aren't there still a lot of tube 50s in backup role? A couple of years
> ago WTOP still had a tube rig as backup.

710 WOR in New York City had a Continental 317C as their main transmitter until about 1997, when they replaced it with a Harris DX-50. The Continental is now their backup transmitter. They use it weekly during Joe Franklin's show -- the last music show left on WOR.

WOR also used the Continental during that big blackout a few weeks ago. They chose it over the Harris because it's less sensitive to power fluctuations. (Northeastern NJ had its power restored more quickly than the City itself, but people reported voltage swings of their household AC all the way from 50 to 148 volts, and I doubt the three-phase power at WOR's transmitter site was any better controlled at the time.)

2057. San Francisco: KKWV drops "The Wave"

Newsgroup: rec.radio.broadcasting
Date: 2003-09-05 03:47:45 UTC
From: markrobt@attbi.com
Message-ID: <bj9111$d00$1@xuxa.iecc.com>
Source record: 6934

Yesterday (Wednesday) at 10 am, KKWV(FM) dropped its reggae-flavored soul/AC format in favor of a simulcast of San Jose-based soft-AC station KBAY(FM). Both stations are owned by Infinity.

"The Wave" received some unwanted attention earlier this summer when a New York Times articles called it out as an example of an underperforming station owned by Infinity. There was some speculation that Infinity's "Blink" format on WNEW(FM) New York might be imported onto KKWV. However, with KLLC(FM)'s modern-AC format, it would seem that such a move would cause Infinity to be competing for its own listeners.

The simulcast appears to be permanent, in as much as anything in radio is permanent, of course, with the station's promos and web site both promoting the fact that KBAY is now available both in San Jose and in San Francisco. Infinity has also reserved the KBAA call letters, presumably for use on one of the two stations.

There is precedent for a two-station FM simulcast in the Bay Area. KFOG has simulcast for five years on South Bay station KFFG. Between the wide geographic expanse of the market and the relatively moderate power levels of most FMs, it is difficult for a single FM station, even one that is centrally located, to cover the entire market or even more than half of it. At the same time, the simulcasts are reducing the number of stations that are programming primarily for San Jose and other South Bay cities.

In addition, the KKWV signal is notorious for coverage problems due to a rather odd location on a hill in the East Bay city of San Leandro. Because of the terrain in the area, the station can't even be heard clearly in many parts of Oakland, even in those areas adjacent to San Leandro.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs

for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Can anyone tell me if radio listenership goes up and down seasonally?
Is there one time of year when more people traditionally listen, and
another time of year when less people traditionally listen?

Any info you can provide would be greatly appreciated.

Thanks!

Gregg

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Saturday, October 4, 2003 - WJTO-730, Bath, ME will conduct an equipment test from 12:00 midnight-1:00am ELT, consisting of Morse code IDs and nostalgia music. The test will run at a power of 1000 W, non-directional. Also, this test is automated and run from Bob Bittner's home.

Reception reports may be sent to:

Bob Bittner
WJTO-AM
P.O. Box 747
Rowley,Massachusetts 01969

(Arranged by Ron Musco for the NRC CPC)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

Lynn.

Amateur Radio Newsline=E2=84=A2 Report 1360=E2=80=93 September 5 2003

Amateur Radio Newsline report number 1360 with a release date of Friday,
September 5th 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T. Pro-code fights back. A petition to retain Mo=
rse
code testing is filed with the FCC and others are reportedly on the way. =
Find
out the details on Amateur Radio Newsline report number 1360 coming your =
way
right now.

(Billboard Cart Here)=20
=20
**

RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC

The proponents of retaining Morse testing for all candidates for a United
States Amateur License with high frequency operating priveleges are strik=
ing
back. This, with a petition that not only asks the F-C-C to retain the 5=
word
per minute C-W exam, but to also require that Extra class pass a 12 word =
per
minute test. And the organization that I sponsoring the measure also wan=
ts
written exams stiffened as well. Amateur Radio Newsline=E2=80=99s David =
Black,
KB4KCH, has more on this attempt to row against the deregulatory tide:

--

For the past couple of months, more and more countries have been steering
toward making amateur radio code-free. That follows the July abolition of=
Morse
code testing by the World Radiocommunications Conference. In the United
States, the Federal Communications Commission has before it six petitions
essentially seeking to remove Morse code from amateur radio in the U-S.=20
Supporters of the code have been quiet--until now. A group called FISTS-=
-said
to be the largest code advocacy organization in the world--is leading an =
effort
to make Morse code a more prominent part of ham radio and the licensing
process.

FISTS is an international Morse code preservation society based in the Un=
ited
Kingdom with chapters world-wide. Its stated objective is to further the =
use of
the Morse code in Amateur Radio communications. The group's north America=
n
chapter has delivered a detailed rule-making request to the FCC that seek=
s more
than just making sure that Morse code testing is retained.=20

FISTS asks the Commission to raise the standards in other areas of testin=
g,
too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor o=
f
Worldradio Magazine. She wrote the rule making request. Among the propo=
sals
are keeping code as a mandatory testing element for the General and Extra=
class
licenses. General licenses would require 5 words per minute and Extra cl=
ass
licenses would require 12 word per minute code proficiency.

FISTS says passing a 5 word per minute code test is no hindrance to peopl=
e
wanting to upgrade, and cites the large number of Technician class operat=
ors
upgrading to General as proof.=20

FISTS also says that those aiming for the Extra license should be able to
demonstrate Morse code skill at 12 words per minute.

Today's written exams are too easy. At least, that's what FISTS seems to
suggest in noting that the FCC sought comments before amateur radio's
restructuring about whether fewer morse code requirements should be offse=
t by
increased technical content on written questions. FISTS notes that nearl=
y
every commenter said yes, but the Commission's Report and Order failed to
address the issue.

FISTS says the commission has a chance now to make General class written =
tests
equivalent to the Advanced class written tests before restructuring. In o=
ther
words, go back to the way it was, with tests that are harder and more tho=
rough.

FISTS wants the Extra class exam to be more thorough, as well. It wants t=
he FCC
to require written knowledge of circuit design, information theory, digit=
al
methods and encoding schemes and software radio. FISTS says candidates f=
or the

Extra class ticket need to show a more thorough knowledge of propagation =
and
geophysics than current tests require.

For the Technician class operator, FISTS suggests merging the Technician =
and
Tech-Plus classes and not require a Morse code exam. But FISTS says techn=
ical
content should be emphasized and should include the digital modes. FISTS
advocates extending Technician Class privileges to include digital modes =
within
the current Novice subbands, which it says should be kept. The group say=
s that
would let Technician Class operators participate in the explosive growth =
in
digital applications occurring within the Amateur Radio Service on the hi=
gh
frequency bands.

But when it comes to giving Technicians even limited phone privileges on =
HF,
FISTS says no. The group says the rush of upgrades by Technicians to high=
er
classes following restructuring indicates that the barrier between Genera=
l and
Technician classes has already been lowered enough without needing to go =
any
further.

FISTS also suggests one other big change and that involves taking license
tests. Right now, if you fail an exam, you can go back and try again at =
the
same session. FISTS is asking the Commission to impose a 24-hour waiting
period before being able re-take either a failed written test or a failed=
code
test.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

There=E2=80=99s 14 pages to the FISTS filing. You can read it on-line at
ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to a=
ir, no
Rule Making designation has been assigned to the FISTS request.=20
(ARNewsline(tm))

RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO

Meantime, down-under the Australian Communications Authority has surprise=
d that
nations ham radio community with a proposal to totally restructure that n=

ations
Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.

--
Radical changes are being proposed for the Amateur Service in the just i=
ssued
ACA discussion paper entitled "A Review of Amateur Service Regulation.=E2=
=80=9D The
paper is sure to stimulate debate, particularly its reference to interfe=
rence
experienced by domestic television and radio receivers, and a suggestion=
that
radio amateurs should take full responsibility to resolve these problems.

A major purpose of the paper is to discuss the implementation of the cha=
nges
arising out of the World Radiocommunications Conference held in Geneva th=
is
year. These changes include the end of mandatory Morse code tests for am=
ateur
licences, amateur callsigns, third party traffic, communications during
disasters, and reciprocal and visitor licensing.

The ACA, as expected, has also taken the opportunity to discuss restruct=
uring
of amateur licensing, the regulatory controls and administration of the
Amateur Service in Australia. The paper acknowledges the WIA's proposal=
for a
new entry level licence, and the potential for it to replace the current =
Novice
licence. It discusses restructuring of the current system of seven diff=
erent
amateur licence types (five operator, plus repeater and beacon), to creat=
e only
two operator licence types - Unrestricted and Novice.

On a positive note the paper hints that the removal of Morse code tests =
for
amateur licences may occur earlier than the ACA's current timetable. It =
states
that if there is sufficient public support, the code requirement could b=
e
removed prior to its proposed implementation of regulatory changes flowi=
ng
from its discussion paper in early 2005.

In a controversial proposal, the ACA is to consider the introduction of a=
"no
interference" policy for radio amateurs. It states "The operation of an
amateur station, which is essentially a hobby, should not disturb another
person's activities, such as television viewing or radio listening, or af=
fect

commercial activities." Should the "no interference" policy be introduce=
d, it
would be a major shift from the current ACA policy that provides for a s=
hared=20
responsibility between the radio amateur and his neighbour for the resolu=
tion
of an interference problem. =20

To make it clear, the ACA explains "This would mean that an amateur must=
not
cause interference to other radiocommunication services. If causing
interference to another service, the obligation will be on the amateur to
resolve the problem."

--

The Australian Communications Authority has set a deadline of October 31s=
t as
the last day for hams to file responses to its discussion paper. The 50=
-page
discussion paper can be downloaded from www.wiavic.org.au/news or
www.wia.org.au/vk4 (Q-News)

**

RADIO LAW: THE ACADEMY OF MODEL AERONAUTICS SAYS NO TO BPL

Back here in the United States, word that the Academy of Model Aeronautic=
s is
saying no to the introduction of Broadband Over Powerline or B-P-L techno=
logy.=20
In Reply Comments to the FCC, the 175,000 member aviation hobby group say=
s that
it is concerned that B-P-L deployment could cause harmful interference to=
users
of Radio Controlled systems and pose a safety hazard to aeromodeling equ=
ipment
and spectators.

In its filing the A-M-A says that Broadband Over Powerline holds the pote=
ntial
to severely interfere with radio controlled models which operate in or ne=
ar the
27, 50, 72 and 75 MHz bands. All of these fall within the 1 point 7 thro=
ugh 80
MHz spectrum where the FCC proposes to permit B-P-L to operate. =20

To the A-M-A this means that Broadband Over Powerline may not yield the b=
enign
environment the Commission expects. Also, that it could result in an
unanticipated negative impact on Radio Controlled operations. And that=E2=
=80=99s
what it has told the FCC. (AMA release)

RADIO LAW: MARYLAND COUNTY FILES RFI CONTROL APEAL TO FCC

Still with regulatory news, the CGC Communicator reports that Anne Arunde=
l
County, Maryland has filed an Application for Review before the full
Commission. This, in the hope of reversing an order by the FCC=E2=80=99s=
 Wireless
Telecommunications Bureau that prevents the County from entering into the=
 radio
frequency interference control business through zoning laws. Laws that c=
ould
even impact on ham radio, C-B and GMRS operators.=20

In 2001 Anne Arundel County, Maryland, had enacted legislation requiring =
that,
prior to receiving a County zoning certificate, owners and users of any s=
ort of
telecommunications facility had to show that their installation would not
degrade or interfere with the County's public safety communications syste=
ms.=20
The ordinance also permitted the County to revoke a zoning certificate wh=
ere
degradation or interference was found. =20

Alarmed, telecommunications providers took the ordanance to the FCC askin=
g that
it be overturned. Last July it did just that. It In considering the cas=
e, the
Commission found that the challenged provisions of the Anne Arundel Count=
y=20
zoning Ordinance infringe on the Commission's exclusive jurisdiction over=
 RFI
and are preempted under the doctrine of field preemption. Now the county=
 is
upping the antie.=20

In its pleading, Anne Arundel County maintains that reversal of the Burea=
u's
decision is required because the Order conflicts with a controlling statu=
te of

the Communications Act. The County further states that, pending implemen=
tation
of the Commission's 800 MHz proceeding, the Bureau's decision leaves publ=
ic
safety systems of local governments such as the County's vulnerable and
powerless to deal with what it terms as -- quote: =E2=80=9C potentially =
deadly radio
frequency interference from wireless systems of commercial mobile radio s=
ervice
providers operating in the 800 MHz band.=E2=80=9D=20

The FCC has invited comments on this matter by September 26. More is on-=
line
at the U-R-L featured in this weeks Amateur Radio Newsline printed report.

(DO NOT READ: The complete story in the the FCC website at=20
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2734A1.doc) (CGC)

**

RESCUE RADIO: CELL PHONE HELPS RESCUE FCC OFFICIAL

A cellular telephone has helped to rescue two men dangling in a gondola
buffeted by severe winds near Aspen Colorado. One of them is the chief o=
f the
Federal Communications Commission's Wireless Bureau who turned to the pho=
ne
during an ordeal where he was trapped for more than two hours. Amateur R=
adio
Newsline=E2=80=99s Bruce Tennant. K-6PZW, reports:

--

According to news reports John Muleta leaned on the technology he oversee=
s when
he and Robert Pepper, an adviser to FCC Chairman Michael Powell, got stuc=
k in
the gondola on Monday, August 19th. The two men had used a break in a
telecommunications summit to take in the view from atop of 11,000 foot As=
pen
Mountain.=20

Their sightseeing trip turned into an ordeal when the tram service abrupt=
ly
shut down during their return. It stranded Muleta and Pepper n the enclo=
sed
gondola part way down the mountain. When help was slow to arrive, Muleta=
used
his cellular phone to call for assistance. But the local service provide=
r
provider apparently did not have the latest "enhanced" 911 technology and=
could
not locate him precisely. So Muleta simply directed the rescue effort ov=

er the
phone. =20

Once off the mountain Muleta told the press that he was very happy that h=
e had
remembered to carry his cellular telephone with him. He added that had h=
e not,
that it would have been a much different scenario. This, if they had bee=
n
trapped all night with the weather getting getting colder.

For the Amateur Radio Newsline, I=E2=80=99m Bruce Tennant, K6PZW, in Los =
Angeles.

--=20
=20
Ironically, just before he left for the trip Muleta told an interviewer =
that
the FCC is looking at ways to accelerate the deployment of Enhamced 911
service. This is the system that uses G-P-S technology to more precisely
locate callers. (Published News Reports)

**

ENFORCEMENT: INTERNET SALES BRING LETTER OF INQUIREY

The FCC has sent a letter of inquirey to Randy Owen, N9UOM, of Toma Wisco=
nsin
regarding his license renewal application. The Commision is asking Owen =
about
his apparent involvement in the sale of non-certified C-B transcievers an=
d
non-certified High Frequency amplifiers over the Internet in 2002. Owen =
is the
owner of Roper Electronics whose website was advertising the merchandise =
for
sale. (FCC)

**

ENFORCEMENT: FORMER HAM WARNED NOT TO CONTACT THE FCC

A brefly licensed former ham has been told not to call the FCC and wait f=
or it
to contact him. The agency=E2=80=99s Daryl Duckworth, NN0W, explains:

--

(Duckworth) =E2=80=9CJack Gerritsen of Bell California has recieved a war=
nng notice
about a violation of ex-patrte rules after his license had been set aside=
. His
repeated calls to the offices of Administrative Law Judges is a violation=
odf

the Commission=E2=80=99s rules against ex-parte communications. Ex-parte =
rules place
restrictions on contacts with Commission decision making personel.=E2=80=9D=
=20

--

Gerritsen=E2=80=99s license and KG6IRO call sign were set aside only days=
after they
were issued back in November of 2001. This after the FCC learned that he=
had
been convicted in California state court of a radio related offense. It =
also
recieved complaints alleging that Gerritsen had been on the ham bands pri=
or to
recieving his license. (FCC, RAIN)

**

NAMS IN THE NEWS: 9M2TO WINS UKDXF AZWARD

Some names in the news. The Chiltern DX Club of the U-K DX Foundation ha=
s
awarded its prestigious 'Local Heroes' Award for 2003 to Tex Izumo, 9M2TO=
. The
club=E2=80=99s awards committee recognized the commitment Izumo has shown=
in
providing many contacts and confirmations with amateurs world-wide on all=
bands
from 160 to 6 metres over a period of many years.

This annual award goes to an operator resident in a DX country who has pr=
ovided
excellent service to the DX community and who maintains a high standard o=
f
operating without the benefit of major sponsorship. The award carries a c=
ash
prize and a year's honorary membership in the Chiltern DX Club. (GB2RS)

NAMES IN THE NEWS: HAM APPEARS ON TV MOTORCYCLE SPECIAL

Bob Mastrangelo, WA6ZTA, of Thousand Oaks Californis reports that he rece=
ntly
participated in the filming of a motorcycle special that aired August 28t=
h on
The Travel Channel. The show is called Revolution on Wheels, and Bob is =
seen
in the beginning riding his yellow Honda Gold Wing and is interviewed abo=
ut 25
minutes later. Since The Travel Channel does repeat these programs, chec=
k

local listings to see when it will air again and keep an eye open for WA6=
ZTA.=20
(ARNewsline(tm))

**

NAMES IN THE NEWS: KB4KCH NEW VP OF ARNEWSLINE(TM)

The Board of Directors of the Amateur Radio Newsline has confirmed the
appointment of David Black, KB4KCH, of Helena, Alabama, as its Vice Presi=
dent.=20
Black, whom you heard earlier in this newscast will fill out the unexpire=
d term
of Roy Neal, K6DUE, who died last month following heart valve surgery.

David Black, KB4KCH, is owner First Frame Video in Birmingham, Alabama. =
He is
also a 20-year veteran of the broadcast television industry. Prior to st=
arting
First Frame Video, David worked as a television news reporter and weather
anchor at WVTM, the NBC affiliate serving Birmingham, Alabama. KB4KCH al=
so has
extensive radio and television experience while working in broadcasting i=
n
Texas.

In addition to his reporting and anchoring Amateur Radio Newsline for wel=
l over
a decade, KB4KCH is active in amateur radio Skywarn and emergency
communications. He is past President of the Birmingham Amateur Radio Clu=
b and
is one of the founders of ALERT Alabama. This is an organization of radi=
o
amateurs specializing in Skywarn communications to assist the National We=
ather
Service in the Birmingham area. (ARNewsline (tm))

VOLUNTEERISM: HCI NEEDS VOLUNTEER SCHEDULES EDITOR

If you are a Shortwave Listener, live on the West Coast and want to edit =
an
S-W-L newsletter, listen up. This one is for you.

Duane Fischer who heads up the Hallicrafters Collectors International nee=
ds a
volunteer editor who can post the annual schedules of worldwide Shortwav=
e
radio stations. The site, located in cyberspace at www.w9wze.org/SWL con=
tains
loggings, current news, tidbits and program schedules. If you would like =
to
become the Schedules Editor, please contact Duane as soon as possible at=20
dfischer@usol.com and tell him you heard about it on the Amateur Radio
Newsline. (ASWLC, WDX6AA)

**

HAM RADIO IN SPACE: ARISS PACKET UPDATE

An update to last weeks story on the wayward packet radio system on board=
the
International Space Station. Those of you who were on the air on Sunday,
August 24 are aware that the packet system was re-activated around 12:00 =
UTC.=20
Shortly thereafter, the ARISS team received reports from the general ham
community that the packet system was operational. =20

Over the next 9 hours, many hams around the world sent digital signals th=
rough
the packet system. But later that day, at around 21:22 U-T-C, the packet
system abruptly stopped operating while traveling over the Western part o=
f the
U.S.

According to AMSAT=E2=80=99s Frank Bauer, KA3HDO, the ARISS team has had=
several
discussions on next steps to get the system back up and running properly.=
But
it may be some time before this can be accomplished. This is because the=
debug
efforts may be delayed further due to the arrival of the Progress 12P re-=
supply
ship which will be keeping the two man crew very busy. =20

Once time is available, the plan is to have the crew report out on the st=
atus
of the packet module and then to recycle the power. This should bring t=
he
packet system back up. If the system abruptly shuts down again after a f=
ew
hours the ARISS team will then ask the crew to attach a computer to the p=
acket

module, download the current parameters to the ground and reset the modul=
e.

Stay tuned. ARISS promises to pass along word of progress as it happens.=
=20
(AMSAT, ARISS)

**

INTERNATIONAL - AUSTRALIA: NEW BANDSPACE FOR VK HAMS

On the international beat, word than all-Australian radio amateurs will b=
e
allowed to operate between 3.776 and 3.800 Mhz effective from the 1st of
January 2004. The move follows a proposal put to the Australian Communica=
tions
Authority by the Wireless Institute of Australia several years ago. (GB2=
RS)

**

INTERNATIONAL - WORLDWIDE: LIGHTHOUSE WEEKEND A BIG HIT

Meantime, reports from the around the world indicate that there was allot=
of
activity in this years International Lighthouse and Lightship Weekend ope=
rating
event. Jeramy Boot, of the GB2RS News Service has the details:

--

Mike Dalrymple, GM4SUC, the organiser of the International Lighthouse /
Lightship Weekend reports that a record number of stations - 369 - were
established at lighthouses and lightships in 48 countries - another recor=
d -
over the weekend of the 16th and 17th of August.=20

The official list of participants can be found on the ILLW website. Next=
year
the event will be on the 21 and 22nd of August 2004, and Mike invites
individuals and groups to join in with a weekend of enjoying radio from a
lighthouse or lightship.=20

Jeramy Boot, G4NJH

--

The International Lighthouse website is in cyberspace at http://illw.net.=
=20
GM4SUC adds that as soon as you have your plans for participatiin in the =
2004
Lighthouse Weekend made to let him know. You can contact Mike by e-mail =
to
GM4SUC@compuserve.com (GB2RS)

**

DX

In D-X, word that IN3VZE will be active once more as 7Q7CE from Malawi t=
hrough
the 21st of September. QSL as directed on the air. (GB2RS)

And the K3EOD Contest Team will be active in the September VHF UHF conte=
st
September 13th to the 14th. The group consists of W3EFH, K3EGE, WR3P, W2=
SJ and
K3EOD. They will be on all bands from 6 meters RF through visible light =
using
SSB, CW and laser communications. For more information please e-mail=20
k3eod@juno.com (VHF REflector)

Lastly, HL1IWD reports that he will be visiting Honolulu through the 12th=
of
September, and will operate as KH6 stroke KB1AIM on 20 metres, mainly CW.=
QSL
is via HL1IWD. (Modern DX)

**

THAT FINAL ITEM: NO MORE USE OF THE WORD E-MAIL IN FRANCE

And finally this week, a note from France where the governmet has said go=
odbye
to the term e-mail in favor of the native language term courriel. A word=
that
linguistically sensitive France is now using to refer to electronic mail =
in all
official documents and hopes that the public will adopt as well.

Frances=E2=80=99 Culture Ministry announced a ban on the use of e-mail in=
all
government ministries, documents, publications or Web sites on July 18th.=
=20
This, as the latest step to stem what it sees as an incursion of English =
words
into the French language. =20

Courriel is a contraction of the two words and is a term that has often b=
een
used in French speaking Quebec Canada. The ministry's General Commission=
on
Terminology and Neology insists Internet surfers in France are broadly us=
ing
the term =E2=80=9Ccourrier electronique'' instead of e-mail - a claim som=
e industry
experts dispute.=20

And we thought that you would like to know! (Published reports)

**

2064. Dynamax CTR100 cart info needed, arcade restoration

Newsgroup: rec.radio.broadcasting
Date: 2003-09-07 19:19:07 UTC
From: Michael <google2@sandsmuseum.com>
Message-ID: <bjg0bb$g38$1@xuxa.iecc.com>
Source record: 6941

I am restoring an old arcade game called Top Gun. It sumulates a quick draw contest where the player draws against a full size manikin.

http://www.sandsmuseum.com/test/topgun/topgun.html

The game is controlled by a Fidelipac or jingle cart. The tape head in the original Viking Deck is bad. So I bid on and bought a Dynamax stereo recorder of eBay in the hopes of using the tape head. Talk about going to extremes to repair a game!

Once the deck arrived, I found the tape head records and plays back three tracks. I assume the third track is for queing.

Now all my questions:

1. Is the individual head spacing the same as a reel-to-reel deck? Can I record the material on the reel-to-reel deck and then play it back using the Dynamax tape heads?

2. Are there line in and out on the Dynamax deck? I found the pins on the RJ15 or RJ25 like(?) input and output jacks in the back that allow for input and output. However there are two for each channel that run first to a inductance coil. Can I just use one lead or do I need to tap into the circuit farther downstream? Where do I connect line level inputs and outputs?

3. What are the SEC and TER buttons for?

4. Is there an easy way to record my material using the Dynamax itself instead of a reel-to-reel deck, relating to number 2 or will the balance be wrong on the inputs? (I will also need to figure out how to load more tape than necessary first, record the material, and then shorten the tape to the correct length...)

5. Anyone have any old tape heads they are willng to part with? I bought the Dynamax thinking I would just steal the tape head and junk the rest of the machine. They were so nicely built and it seems both record and playback worked that I could not bring myself to trashing the unit!

Any help will be greatly appreciated,

Michael

I would think the summer months would show a greater radio listenership, as people get off their duffs and spend time outdoors or in their cars traveling. I wish the group that sponsored the "Who Listens To Radio" promotion back in the eighties would do it again. It was done with class and intellegence, a rare combination on broadcast AM and FM today. They even banded several hundred stations together (probably AM) one weekday morning to pause all broadcasting for 30 seconds in the middle of the spot. It was rather a telling moment. I suppose some stats were gathered back then, but have no idea where to find that data.
Regards,
Tom

==========
Tom:

Don't know about the 50 kW tube transmitters, but the RCA BTA-5F (5 kW) transmitter at KTSA in San Antonio Texas ran 9 kV on the plates of the RF final (single 892R) and modulator (pair of 892R's). The RF final plate current was around 780 mA. This transmitter was in use from 1949 until well into the 1970s. I worked there from 1958 to 1961, so I don't know exactly when it was phased out of operation. The BTA-5F used three-phase power and a full-wave rectifier with 6-each 8008 mercury-vapor rectifier tubes. Don't remember the size of the filter capacitors, but they weren't extraordinary as I recall. The filter choke was about as big as a full-sized microwave oven. Full-wave rectified, three-phase power isn't hard to filter.

Best Regards,

Ed

Radio's pretty steady throughout the year, unlike television (broadcast and cable/satellite) whose viewership decreases during warmer weather months - a good reason why you see a lot of re-runs during the summer months.

There are some in-format differences within radio...for example, the
summer book is usually close to insignificant to a news/talk format
station. But CHR/Top 40 stations do a lot during the summer.

>Somebody must have come up with a good all-purpose exemption by now, no?

No - but it doesn't apply to 1530/1660 Elizabeth, which was created under a separate set of rules from most of the X-banders out there. The "Elizabeth rule" automatically granted an X-band allocation to any AM daytimer that was the sole local service for a community of more than 100,000 people. It was originally meant to apply to WJDM and only WJDM (and was a tribute to John Quinn's pull with his representatives in Washington), but was eventually applied to 1190/1640 Vallejo CA as well.

Stations created under the "Elizabeth rule" don't have a five-year sunset.

Oh, and Sven - 1660 was never "WAHS." It used the WJDM calls in its Radio Aahs days before becoming WBAH and then WWRU.

I guess it's one of those cases where "you had to be there."

According to the rfb folks, the FCC agents on-scene asked to see their "license or authority to broadcast." The station (and their lawyer) has opted for choice 2: no license possible (obviously), so they're showing "authority to broadcast" through the petition.

The FCC will, obviously, not buy this. But it's been shown that stations with high-profile support within the community they serve tend to take longer to get shut down; I think this is both a manpower and publicity issue for the FCC. I honestly don't think there's anybody at rfb who actually thinks they will keep the feds at bay indefinitely...the question is making the feds work to enforce the law.

And while there are legal issues at play with this whole unlicensed broadcasting thing, rfb's case is not one where the station began with the express purpose of engaging the FCC in court, a la Dunifer, so its chances in court are admittedly slim. I don't think there's any legal action in the pipeline now where the station has met the myriad requirements detailed by the courts for standing to challenge the FCC's licensing policy on its merits.

That being said, 107.9 remains live in Brattleboro as I type this...

Seaonal?

In many ways it is.

When weather is bad....or in areas where they depend on closings, parking bands, etc....listenership goes up.

But one thing we always count on, is that radio habits/listenership is a little more "out of sorts" in the summer.

Radio is seasonal in that whenever peoples regular habits are turn upside down...their radio listening gets skewed one way or the other.

By LARRY BONKO, The Virginian-Pilot
© September 19, 2003 | Last updated 8:29 PM Sep. 18

Thank heaven for good old-fashioned radio.

With the approach of Hurricane Isabel on Thursday morning, power was lost in thousands of homes in Hampton Roads -- thousands of television-owning households.

That meant no Triple Doppler TV forecasts and no updates from The Weather Channel, which had dispatched Mike Seidel to the Virginia Beach Oceanfront as early as Wednesday evening.

How did TV-deprived Hampton Roads keep up with the storm and the damage it was inflicting? R-A-D-I-O.

As early as 4 a.m. Thursday morning, AM radio station WNIS was on the air with reports of the storm's approach. Later on Thursday morning, when the electricity cut off, local radio stations joined with the three Hampton Roads television stations (WAVY, WVEC and WTKR) to get the story out to residents with battery-equipped radios.

WVEC's storm coverage was heard on WCMS-FM and WWSO-FM.

``Let's go now to Channel 13's coverage . . .''

WAVY's live team reporting was fed to WNOR-FM and four other stations. WTKR had hooked up with WKOC-FM.

About 2 p.m., WAVY weather reporter Don Slater, aware that he was speaking to a large radio audience, began to provide talking pictures of windswept scenes that residents could not see.

``I realize that a lot of you are listening to us on the radio,'' he said.

Jeff Lawson on WVEC also became a TV meteorologist-turned-radio-reporter.

``Don't forget that we're under a tornado watch . . .''

Channel 10 reporter Patty Culhane was heard by radio listeners describing the stormy scene at the Oceanfront as ``getting uglier and uglier.''

Most of us had to picture it. It was theater of the mind.

At WWDE-FM, program director Don London said the staff was aware that TV signals might be lost and radio would become the eyes and ears of storm coverage.

``Led by our old warhorse, Dick Lamb, we were prepared to pass along updates and information with no hype,'' London said.

On WAVY late Wednesday night, Slater had outlined the projected path of Isabel, saying, ``Tomorrow will not be a fun day.''

It was indeed a horrid day, but made less so by the merging of radio and television.

Reach Larry Bonko at larry.bonko@pilotonline.com or call 446-2486.

Well AkamaiGHost is *sort of* doing this now:

http://www.derkeiler.com/Mailing-Lists/securityfocus/pen-test/2003-07/0082.html

I don't know though - I've been able to get fairly good quality fixed
stream 20kbs RealAudio directly off my new media prototype here such that
it reliably supports about 40 'live' streams per 1mbs of outbound pipe -
theoretically good to 256 http streams per IP - with no 'bottom of the
well', no buffering, no cache copy left on the listener's drive and about 6
seconds to stream lock from anywhere on the planet..

If you have RealAudio 8 or better on anything with a 28.8 modem or better,
you are welcome to test it from where you are.. There's no subscription or
sign up required and it should spin out about 8 hours of tunes before it
decides you've had enough..

It feeding about 20 streams right now (about half my bandwidth) so you can
get a feel for how it works in production if you want to. I'm using it to
hard test secure W2K thin server Apache configuration and services load
balancing..

Just how many simultaneous streams are you thinking of addressing? Local IP
range or International?

Another quote from the clueless. Radio is listened to by 95% of the US
population over 12. This is the same as historic figures.

Average listening per person is around 21 hours per week, the same as it was
in the 1950-1952 period.

The "Music Coalition" is simply upset because radio figured out that most
people don't want to hear unknown songs by unknown artists. That was the
basis for the Top 40 format, going back to the early 50's. Nothing new,
nothing unusual.

They were not tightened. All that happened in the recent Philadelphia
decision was that the most recent (2003) deregulation steps were put on
hold; the 1996 deregulation is very much intact.
>
> and
>
> "According to the US ratings service Arbitron, Americans are spending 10%

a
> 27-year low."

Not so. Radio listening today is lower than the late 80's peak, but very
much compatible with levels from the 50's, 60's and 70's. Radio circultation

is not falling at all. Time spent listening is off about 15% since 1988, or about 0.5% annually. Arbitron has never issued a statement even remotely similar to the "10% a year" claim because this is not true.

Interestingly, people who have studied playlists nationally don't see any more standardization than in the 50's.

Actually, only some talk hosts on the Clear Channel talk stations took such a line. The company took no position. Talk hosts on other, non Clear Channel stations, took similar positions.

> "We are genuinely shocked when we discover that the largest radio group in

There is a reason why we broke away form the Brits. They don't always get it.

Clear Channel held no rallies. One of the talk hosts syndicated on many Clear Channel talk stations held such rallies... in maybe 10 cities.

2080. First attempt at an all-news or an "all-news-and-talk" station in Canada?

Newsgroup: rec.radio.broadcasting
Date: 2003-09-19 19:58:13 UTC
From: Mark Harvey <ATandTRules9836NOPSAM@aol.com>

Hello, everybody! :)

I would like to know if anybody knows what was the first attempt, in Canada, to establish either an all-news or an "all-news-and-talk" radio station?

I always used to think that it was the CKO Radio Network, which flourished from 1977 to 1989.

However, I recently found out that Vancouver Radio station CKNW made a brief flirtation with an all-news format, from 1969 to 1970. Therefore, this was more than seven years before CKO went on the air!

In fact, when they switched to the all-news format, they even changed their call letters to CKVN (the "VN" standing for Voice of News)! This new format did not last long; within less than two years, they decided to go back to being a music radio station, and they changed their call letter back to CFUN. Nevertheless, I give them credit for trying! It certainly was a noble experiment!

Does anybody know, was there even an attempt to establish an all-news or "all-news-and-talk" station in Canada even *before* CFUN made that attempt to become one? If so, could someone please provide me with the details?

Thanks in advance for answering my question! :)

Talk to y'all later! :)
--

Keep smiling! Have a nice day!

Mark Harvey

Maintenance, not sound is the reason. Very soon there will be a new
transmitter site across the street from the current one. As I recall,
the new site will have 2 DX-50s.

Art Bell Returns to Radio
as Weekend Host of Coast to Coast AM

Press Release

LOS ANGELES, Sept. 17, 2003- Art Bell, the radio personality known for his spontaneous and compelling conversations about all things unexplained, will replace Barbara Simpson as weekend host of Coast to Coast AM - the program he made famous. He will broadcast live from 1-5 a.m. ET Saturdays and Sundays with a refeed from 5-9 a.m. ET from his home studio in Pahrump, Nev., beginning Sept. 20.

Bell stated, "For me, a return to radio is both mysterious and reassuring."

"We welcome Art back to the weekend microphone," said Kraig Kitchin, president/COO Premiere Radio Networks. "His return reflects his long-standing bond with this audience and his undying passion for radio."

By Anitha Reddy, Washington Post Staff Writer

XM Satellite Radio Holdings Inc. completed a secondary stock offering yesterday to pay for a spare satellite in case it does not receive insurance money for its two malfunctioning satellites that are in orbit.

washingtonpost.com

The company, based in the District, netted $150 million from its sale of more than 11 million shares of stock to divisions of Legg Mason Inc., the Baltimore investment firm, and another unnamed institutional investor.

XM will use the proceeds to pay for XM-4, a $130 million spare satellite that the company has ordered from Boeing, "if insurance proceeds are not received in a timely manner," the company said in a statement yesterday.

Shares of XM rose 27 cents yesterday, to $15.84. Including the new shares, XM has 135 million shares outstanding.

The company chose to place its shares directly with investment firms to avoid "several million dollars" in underwriting fees, said XM spokesman Chance Patterson.

The company's two orbiting satellites, nicknamed "Rock" and "Roll," are not generating adequate power because their defective mirrors are not reflecting enough light onto their solar panels.

XM's insurer has denied the company's initial $400 million claim on the two satellites. It contends that the satellites are still operating above their insured level and that XM has violated certain policy provisions, according to XM.

Negotiations with the insurer are still in progress, Patterson said. Last month, Hugh Panero, XM's chief executive, said the company is prepared to pursue arbitration or litigation to settle its claim.

The satellites, launched in 2001, have life spans of 17 years if working properly, but their defects will force the company to bring them down in 2008. XM also plans to launch its existing spare satellite, XM-3, in late 2004 or early 2005 to supplement its failing satellites.

The satellites' problems are not affecting the quality of XM's radio broadcast, the company said.

2086. DX tests Summary

Newsgroup: rec.radio.broadcasting
Date: 2003-09-19 19:59:19 UTC
From: ircamember@ircaonline.org
Message-ID: <bkfn6n$t6k$1@xuxa.iecc.com>

For anyone interested, here's a reminder of upcoming DX tests; if anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Saturday, October 4, 2003 - WJTO-730, Bath, ME 12:00am-1:00am ELT.

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

2087. Remote Radio Voicetracking

Newsgroup: rec.radio.broadcasting
Date: 2003-09-19 19:59:30 UTC
From: Barton <barton@nospam.com>
Message-ID: <bkfn72$3e$1@xuxa.iecc.com>
Source record: 6970

How does one get into remote radio broadcasting? I'm a 30 year radio veteran and would, love to have a couple of shifts to keep my feet in the business. I presently do voiceovers all around the world, but no radio..and I miss it.

The catch 22 is the stations that use remote voice tracking don't want anyone to know, so there's no way to know who to call unless you just line up a list of markets and start e-mailing.

Any ideas? (that don't invlove killing myself or shoving a large object in a small hole?) <g>

Thanks!

2088. AM audio quality: analog vs. digital

Newsgroup: rec.radio.broadcasting

After universal complaints about horrendously poor audio quality, iBiquity has revamped their IBOC digital AM system by switching to the "HDC" codec -- a slightly warmed-over version of AAC Plus, as used by Digital Radio Mondial (DRM).

iBiquity claims a large improvement in quality -- but can IBOC, now with HDC, even match up to the quality that analog AM Stereo has offered for decades? Listen, compare, and judge for yourself:

> > you are our community too!

Hey, I have seen judges get mad when people cite the constitution, so nothing like that is going to help you. If you are in court against the government, the government is going to win. If they say you have weapons of mass destruction, it doesn't matter if you don't, you will die.

> 1. you can never have too many lawyers. get some more!

Lawyers only help when it is one citizen or company against another citizen or company. The side with the most expensive lawyer wins, regardless of who is right.

But when fighting the government, lawyers will not help you, nothing can. If you cause too much problems, off to the concentration camps at Guantanamo Bay never to be heard or seen from again.

> 6. forget the 1st amendment!....

Might as well, the government has.

> 7. General appeals to Constitutional rights and precepts invariably fail
> in the real world courts.

They get mad and threaten to hold you in contempt of court if you mention the constitution at all.

> goodluck........you will need it!

Worthless. You will LOSE if you are up against the government.

By Brooke Shelby Biggs, The Nation
September 18, 2003

Clear Channel is destroying radio. At least, that's the popular mantra these days. Radio consolidation - which shifted into high gear with the Telecommunications Act of 1996 and has been fostered by a pro-big-media majority at the Federal Communications Commission - has resulted in the Wal-Martification of radio. Across the nation, stations are being gobbled up by huge chains like Clear Channel, which then monocrop their playlists. It's the same fifty mindless cookie-cutter songs played in an endless, soul-numbing loop, the same conservative talk shows, even the same deejays doing the same shows for simultaneous broadcast in a half-dozen markets nationwide. Jockeys are losing their jobs as the big chains consolidate and centralize their work forces. There, in the distance, is the faint swan song of independent radio. Abandon all hope, ye who flip thy radio dial...

You may not have heard of it, as it was a VERY recent format change -
just last week IIRC. WGFX-104.5 (licensed to Gallatin) flipped from
classic hits to all-sports. There hasn't been a book since they
flipped, so I've no idea how they're doing.

(which station are they listing with Salem "Christian Talk"? I thought
Salem's only stations in the market were religious AC simulcast pair
WYYB/WRLG. But I work in TV so am not fully up to date on who owns what.)

(oh, I meant competitors strictly in the sense of offering similar
formats - not necessarily in the sense that they were having any
relative success<grin>)

> In Nashville you might be right. I'm amazed that WWTN has better
> numbers than WLAC. WWTN's programming is weak (IMHO), compared to
> WLAC. Looking at the lineups I would assume WLAC has a signal problem.

Up here north of town WLAC definitely has nighttime signal problems.
I've heard the Joliet, Illinois daytimer on the same frequency on the
car radio at sunset, while driving within 20 miles of the WLAC
transmitter. They are directional at night, though their nulls don't
fall into any extremely important areas. I suspect the high dial
position is the big problem. My personal impression is that, averaged
across the market, WWTN's signal is considerably better than WLAC's,
especially at night.

Too, by comparison to NYC, Nashville's FMs have considerably better
coverage. Less interference, more power, higher towers.

This is a fascinating discussion. I remember when AM transistor radios
had the little triangles on the dial denoting 640 and 1240, but that's
as far back as my memory goes on the subject.
There is a station in Fayetteville NC (WFNC) on 640 centrally located
amidst several military bases. Does anybody know if this station had
some sort of central role with CONELRAD back in the day?
For that matter, did the heritage AMs currently on 640 or 1240 fulltime
have any history with it?

GELLER MEDIA INTERNATIONAL NEWSLETTER
September 2003

WHICH ONE GETS TO INTERVIEW THE GOOD GUESTS?

Do you remember the bible story, the one where two women fight over which is=
=20
the true mother of a baby? And King Solomon offers to solve the problem by=20
slicing the child in half? On a strange level this is not an unfamiliar dyn=
amic=20
to many program directors and executive producers at radio and TV stations=20
with interactive talk programming. =20

The question: Who decides, of the many talented interviewers and hosts you=20
have on the station, which of your on-air talent gets to interview the "hot"=
=20
guest?

You may be familiar with the situation. A big name celebrity, politician,=20
sports figure or author is in town, or available to be on the station. Ever=
yone=20
wants to do the interview. But the guest is only going to be able to do ONE=
=20
interview? Or, say, even if you can get the interviewee on more than one sho=
w,=20
it may not be good programming to overkill with overexposure or "too much"=20=
of=20
this guest, even though the hosts or presenters may REALLY want to do it.

Think about the listener. Ask: What am I offering my audience that he/she=20
cannot get elsewhere? Also take a look at the entire media landscape. We d=
o=20
not work in a vacuum. The audience also gets their news and information fro=
m=20
OTHER sources. Has this person been all OVER the other TV, radio and newspa=
per=20
in the market this week? Are we just one more stop on a long list of "media=
=20
exposure" for this subject or person? If a subject is overexposed, though i=
t=20
may be fun for the people at the station to interview a high profile=20
```

personality or political mover, ask: Will it be boring to the listener?

If this has NOT happened at your station, consider yourself fortunate. =20
Otherwise, here are a couple of proven ideas to try to work it out internall=
y. =20
NOTE: None of these are particularly fair, but they are time tested and can=20=
work=20
to create powerful radio.

PROBLEM: Everyone fights over wanting to interview the same guest:

Who is the "King Solomon" in the station? =20
Whether it is the PD, executive producer, or even the general manager,=20
someone has to make the call and everyone must agree and take directive from=
the=20
final deciding voice. The talent must defer to and follow. You don't want=20=
to=20
run into the "ask mom, then if you don't like the answer, ask dad=E2=80=A6"=20=
syndrome=E2=80=A6
I've seen it happen more than once, if a talent doesn't like an answer or=20
decision, he or she will go up a level and take it to someone else. This c=
auses a=20
multitude of management problems. Try to avoid this by setting rules and=20
systems in place and explaining the thought process BEFORE the situation occ=
urs.. =20

GUIDELINES:

It makes sense to put the "hottest" guests/experts in morning or afternoon=20
drive times, traditionally when most people are listening. If the producers=
and=20
hosts cannot agree on who gets the guest, then the one with the biggest=20
audience/daypart wins.

To appease the other hosts, and recycle content for the audience, one way=20
that might satisfy disgruntled hosts, presenters and producers is to take th=
e=20
interview with the high profile celebrity, politician, author, sports figure=
,=20
etc. and take three small key sound bites
That can serve as open phone talking points for discussion for OTHER shows.=20=
=20
When the other show hosts air these "pieces" of the interview from this=20
morning, it can be introduced with "If you did not happen to catch this morn=
ing's=20
interview with J-Lo, The Pope, or whomever, here's a bit of what he/she said=
on=20
our morning show=E2=80=A6Then the host, through powerful radio techniques (f=
ocus,=20
engage, opinion, position and storytelling) can use those sound bite comment=
s as=20
content to "spark" a unique discussion now.

If a few of the topics the person hit upon included powerful storytelling,=20
authentic self revelation, strong opinion or position, or something about=20
health, heart, money or simply talkable topics that can be continued within=20=
THIS=20
show=E2=80=A6then it can work and the audience feels they've "heard" the big=
guest. =20
It's not the guest, it is the CONTENT. So if the show is riveting, powerful=
=20
radio, and works. Then everyone is happy.

If a host or producer has a special prior relationship with the interviewee,=
=20
or a personal connection to either the guest or the public relations person,=
=20
that host gets to do the interview. Again, this may not seem "fair" but thi=
s=20
works.

Again, in principle, I am against this, however, in the rare instance when a=
=20
guest MIGHT appear on two shows on the station or network, it is vital that=20
the interviews be COMPLETELY different. So if he/she goes on in the morning=
=20
talking politics, then shows up again at night, try to do something ELSE, or=
=20
unexpected content with the subject say, "desert island discs," romantic adv=
ice or=20
storytelling or even favorite recipes. Anything, fresh, relatable and new,=20
NOT repeating exactly what happened this morning.

10th ANNUAL GELLER MEDIA INTERNATIONAL PRODUCER'S WORKSHOP in NEW YORK:

If you've faced this or any other "producer" dilemmas, you may benefit from=20
our upcoming Producer's Workshop! It takes place in New York, on Saturday,=20
October 11th (we do this on a Saturday so producers and programmers and host=
s can=20
actually COME to it without missing work) there are student or between gig=20
rates available and if you come in on Friday, you might also want to come al=
ong=20
on the New York station tours, which are included in the workshop at no extr=
a=20
cost. Each participant of the workshop receives a complimentary copy of THE=
=20
POWERFUL RADIO WORKBOOK and is a unique opportunity to meet other people who=
se=20
work has them "facing the blank page" from around the USA and around the=20
world.
If you would like to attend, early registration is $189. BEFORE Sept. 16th,=20
then $225 after that. If you are interested, you can contact us by phone at=
=20
1212-580-3385 or fax at 1212-787-6279 or you'll find more information on th=
e=20

workshop and can register online at www.gellermedia.com

NAB/ PHILADELPHIA - If you are planning to attend the NAB in Philadelphia, I=
=20
hope you'll come say hello. I will be presenting LifeStage Demographics on=20
Friday, October 3rd at 1:45 PM. =20

NAB EUROPE/ and a few weeks later in London, if you are planning to attend=20
the European NAB, October 19-21, they've invited me to do a session for prog=
ram=20
directors on Powerful Airchecking - and talent development. There are still=
=20
places available for that closed session, however you do have to sign up, (n=
o=20
extra cost to NAB registrants) by contacting Mark Rebholz at mrebholz@nab.or=
g
Also in London, I'll be moderating the "case study" looking at the successfu=
l=20
relaunch of LBC's talk format, LBC is the oldest commercial radio station in=
=20
London, they relaunched the talk format last January. (www.lbc.co.uk)

Grow your audience and increase ratings!

*Includes Luncheon and- all registrants will receive a complimentary copy of=
=20
Valerie Geller's book: THE POWERFUL RADIO WORKBOOK-The Prep, Performance &=20
Post Production Planning ($39.95) =20

This annual worldwide broadcast creativity workshop in New York is for you i=
f=20
your work has you "facing the blank page..."

Don't miss this unique day in New York! Take your opportunity to network,=20
meet and share ideas with producers, on air presenters, managers and program=
mers=20
from radio from around the world!

And don't be fooled by the title for "Producers." This workshop in New Yor=
k=20
is for programmers, on air talent, producers and news. Any one who has to=20
come up with ideas to get an audience, on air, is welcome. We include both=20=
TV=20
and radio in the mix. The theme: "Facing the Blank Page=E2=80=A6" The focu=
s is on=20
creative content, NEVER BE BORING, and powerful promotions.

=C2=B7 FACING THE BLANK PAGE
=C2=B7 KEEPING IT "POWERFUL - EVEN ON A DULL DAY
=C2=B7 IDEAS, IDEAS, IDEAS!
=C2=B7 HANDLING "CHALLENGING ON-AIR PERSONALITIES
=C2=B7 PROMOTING EFFECTIVELY AT LITTLE OR NO COST
=C2=B7 NEVER BE BORING

Take this opportunity to learn, and meet top broadcasters who work every day=
=20
to come up with ideas to get and keep audiences! From all formats, from all=
=20
over the world. Plus GREAT Seminar sessions, idea swap, network, plus learn=20
techniques that work to make it powerful=E2=80=A6 from an amazing slate of w=
orkshop=20
leaders! =20

Including: "Creative Animal" and promotions expert Doug Harris, offering=20
ideas on low cost practical promotions to get the word out about your show=
=E2=80=A6The=20
creativity sessions will feature Lifetime Cable TV Program Director Alan=20
Sternfeld on targeting, 1010 WINS news personality Lee Harris, Syndicated Ho=
st and=20
WOR/NY Personality Lionel, Former - Airplay Monitor's Editor now head of=20
programming for Edison Research, Sean Ross, KEYNOTE LUNCHEON SPEAKER: Talker=
s Magazine=20
Publisher Michael Harrison; AM 770 WABC New York top rated "Curtis & Kuby"=20
Producer Erik Hastings on show prep, powerful call screening and developing=20
humor, Valerie Geller, author and international talk consultant: "What work=
s=20
around the world..." and much much more. Don't miss it. Early Registration=
is=20
$189. USD. includes luncheon and a complimentary copy of The Powerful Radio=20
Workbook. Registration $225. after September 16th.

Ask about student or "between gig" rates. And if you are interested, on=20
Friday, prior to the workshop, October 10th, New York area radio station to=
urs are=20
offered free of charge for workshop participants

For more contact Geller Media International at www.gellermedia.com, email=20
vgeller@aol.com or phone 1 212 580 3385 or fax 1 212 787 6279.

Here's what a few of last year's attendees had to say about the workshop:

WMCA/NY Drive presenter Kevin McCullough says: "Don't miss this day! I tell=
=20
everyone I talk media with to attend!"

Uunco Cerfontaine, former PD of Radio 538, now with Radio Veronica in the=20
Netherlands says:" This annual producers seminar draws talent from all corne=
rs of=20
the globe to the city that lives and breathes radio: New York. Valerie Gelle=
r=20
is an inspiring coach and is unique in showing how to make radio powerful.=20
Whether you work at a CHR or a talk station, this is a radio event you simpl=
y=20
cannot miss!"

Clear Channel's WGST/Atlanta JOBTALK host Margot King: " I've had proven=20
results with increased audiences from working with ideas from this workshop.=
..All=20
in all, a valuable day." =20

Come, if you can, meet people, connect for the next gig if you need to or=20
just exchange great usable ideas with broadcasters from all over the world,=20=
who=20
are working with the Powerful Radio Methods! You won't want to miss this uni=
que=20
day in New York City. =20

GELLER MEDIA INTERNATI=
ONAL NEWSLETTER

September 2003

WHICH ONE GETS TO INTERVIEW THE GOOD GUESTS?

Do you remember the bible story, the one where two women fight over which is=
the true mother of a baby? And King Solomon offers to solve the probl=
em by slicing the child in half? On a strange level this is not an unf=

amiliar dynamic to many program directors and executive producers at radio a=
nd TV stations with interactive talk programming.

The question: Who decides, of the many talented interviewers and hosts you h=
ave on the station, which of your on-air talent gets to interview the "hot"=20=
guest?

You may be familiar with the situation. A big name celebrity, politician, sp=
orts figure or author is in town, or available to be on the station. E=
veryone wants to do the interview. But the guest is only going to be a=
ble to do ONE interview? Or, say, even if you can get the interviewee on mor=
e than one show, it may not be good programming to overkill with overe=
xposure or "too much" of this guest, even though the hosts or presenters may=
REALLY want to do it.

Think about the listener. Ask: What am I offering my audience that he/=
she cannot get elsewhere? Also take a look at the entire media landsca=
pe. We do not work in a vacuum. The audience also gets their new=
s and information from OTHER sources. Has this person been all OVER th=
e other TV, radio and newspaper in the market this week? Are we just o=
ne more stop on a long list of "media exposure" for this subject or person?&=
nbsp; If a subject is overexposed, though it may be fun for the people at th=
e station to interview a high profile personality or political mover, ask: W=
ill it be boring to the listener?

If this has NOT happened at your station, consider yourself fortunate. =
Otherwise, here are a couple of proven ideas to try to work it out internal=
ly. NOTE: None of these are particularly fair, but they are time teste=
d and can work to create powerful radio.

PROBLEM: Everyone fights over wanting to interview the same guest:

Who is the "King Solomon" in the station?

Whether it is the PD, executive producer, or even the general manager, someo=
ne has to make the call and everyone must agree and take directive from the=20=
final deciding voice. The talent must defer to and follow. You d=
on't want to run into the "ask mom, then if you don't like the answer, ask d=
ad=E2=80=A6" syndrome=E2=80=A6I've seen it happen more than once, if a talen=
t doesn't like an answer or decision, he or she will go up a level and take=20=
it to someone else. This causes a multitude of management proble=
ms. Try to avoid this by setting rules and systems in place and explai=
ning the thought process BEFORE the situation occurs..

GUIDELINES:

It makes sense to put the "hottest" guests/experts in morning or afternoon d=
rive times, traditionally when most people are listening. If the produ=
cers and hosts cannot agree on who gets the guest, then the one with the big=
gest audience/daypart wins.

To appease the other hosts, and recycle content for the audience, one way th=
at might satisfy disgruntled hosts, presenters and producers is to take the=20=

interview with the high profile celebrity, politician, author, sports figure=
, etc. and take three small key sound bites

That can serve as open phone talking points for discussion for OTHER shows.&=
nbsp; When the other show hosts air these "pieces" of the interview from thi=
s morning, it can be introduced with "If you did not happen to catch this mo=
rning's interview with J-Lo, The Pope, or whomever, here's a bit of what he/=
she said on our morning show=E2=80=A6Then the host, through powerful radio t=
echniques (focus, engage, opinion, position and storytelling) can use those=20=
sound bite comments as content to "spark" a unique discussion now.

If a few of the topics the person hit upon included powerful storytell=
ing, authentic self revelation, strong opinion or position, or something abo=
ut health, heart, money or simply talkable topics that can be continued with=
in THIS show=E2=80=A6then it can work and the audience feels they've "heard"=
the big guest. It's not the guest, it is the CONTENT. So if the=
show is riveting, powerful radio, and works. Then everyone is happy.<=
BR>

If a host or producer has a special prior relationship with the interviewee,=
or a personal connection to either the guest or the public relations person=
, that host gets to do the interview. Again, this may not seem "fair"=20=
but this works.

Again, in principle, I am against this, however, in the rare instance when a=
guest MIGHT appear on two shows on the station or network, it is vital that=
the interviews be COMPLETELY different. So if he/she goes on in the m=
orning talking politics, then shows up again at night, try to do something E=
LSE, or unexpected content with the subject say, "desert island discs," roma=
ntic advice or storytelling or even favorite recipes. Anything, fresh,=
relatable and new, NOT repeating exactly what happened this morning.

10th ANNUAL GELLER MEDIA INTERNATIONAL PRODUCER'S WORKSHOP in NEW YORK:

If you've faced this or any other "producer" dilemmas, you may benefit from=20=
our upcoming Producer's Workshop! It takes place in New York, on Satur=

Why get new transmitters? Aren't the existing ones still good (and one of them is pretty modern?)

Wouldn't it be easier to just move the existing transmitters, one by one to the new site?

Why is WOR changing transmitter sites ... again?

>When did it become a regular thing and how is it done ?

IIRC it began in the Reagan administration. President Reagan, who began his working life in radio, was granted five minutes per week by the national radio networks to address the nation, "unfiltered" as it were. Democrats were then granted equal time to reply. Every president since then has continued the tradition, and the opposition party has continued to provide responses. But fewer stations carry them nowadays.

Mark Howell

2105. WVNY-TV Burlington, VT last newscast

Newsgroup: rec.radio.broadcasting

Anyone in the Burlington, VT area tape the last TV newscast of WVNY? If so, I'd appreciate a copy. See below clip from the NE Radio website of Scott Fybush.
****

VERMONT is down to two TV newsrooms (one of which is really across the lake in Plattsburgh, N.Y.) with the shutdown on Friday of the news operation at WVNY (Channel 22) in Burlington.

WVNY's latest stab at doing local news lasted about four years, and it was a pretty classy attempt right up to the end. The last newscast Friday night began, we're told, with a series of teases that included one for "the fat lady sings" - and it ended with the theme from Newhart playing over an outside view of the studios as anchor Eric Greene paraphrased Bob Newhart's signoff, telling viewers "I had the strangest dream; for the past four years, I've been hosting a newscast in Vermont."

Greene is one of about two dozen WVNY staffers out of work; we wish them all the best as they search for new jobs.

>>
The BTA-5F used three-phase power and a full-wave rectifier with 6-each 8008 mercury-vapor rectifier tubes. Don't remember the size of the filter capacitors, but they weren't extraordinary as I recall. The filter choke was about as big as a full-sized microwave oven. Full-wave rectified, three-phase power isn't hard to filter.
>>

Some RCA 5Ks and 10Ks were designed as two-phase, and, consequently, have four rectumfier (sic) tubes.

This might be called a "four phase" rectifier in the same way as a three-phase, full-wave rectifier is called a "six phase" rectifier.

Oh, these 5Ks and 5Ks actually run on three-phase feeders, as the primaries are connected in a Scott-T, while the secondaries are connected as two-phase.

Buffalo and Philadelphia (including Camden, and undoubtedly RCA's plant as well) were the last hold-outs of two-phase power in the U.S.

That's providing there's anyone in that tiny area. This may work in a high-population density city like Boston/Cambridge....

How crowded is Hopkinsville, Kent.?

--
Sven Weil
New York City, U.S.A.

[Moderator's note: I have family in Hopkinsville, KY. The area is fairly well populated... Fort Campbell straddles the city and state lines, with half of the base sitting in Hopkinsville, and the rest sitting in Clarksville, Tennessee. The base itself is pretty big.]

So no hope of the screaming and yelling Spanish preachers on AM 1530 ever going away? Too bad.

Who owns AM 1530? Is it the same folks that own WWRU - Radio Unica or have they unloaded it on someone else? Is it possible to separate the stations?

> Oh, and Sven - 1660 was never "WAHS." It used the WJDM calls in its Radio
> Aahs days before becoming WBAH and then WWRU.

Ahhh...OK. Sorry about that one. Thanks very much!! :-)

Amateur Radio Newsline™ Report 1362– September 19 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE

As you are aware, Amateur Radio Newsline is, primarily, an audio news service and this weeks newscast is very audio intensive. While reading gives the basic facts, we advise you to download the audio file at http://www.arnewsline.org/quincy to get the most out of the newscast in relation to our coverage of Hurricane Isabel and the role Amateur Radio played and continues to play in storm communications efforts. This is a story told in “sound” from the scene that really cannot be reported in any other way.

**

Amateur Radio Newsline report number 1362 with a release date of Friday, September 19th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is there as a hurricane pounds the U-S east coast, the ARRL holds tight on Morse and more petitions are on their way to the FCC. Find out the details on Amateur Radio Newsline report number 1362 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM ADIO AND HURRICANE ISABEL

Her name is Isabel. She is a hurricane that slammed into the United States East coast with gale force winds. Emergency services including ham radio were ready and waiting as we hear in this report:

--

Roaring ashore with winds of more than 100 miles an hour, Isabel made landfall along North Carolina's Ocracoke Island, crossing the Outer Banks around midday September 18th. On the west end of Ocracoke Island, sustained winds were measured at 80 miles an hour. Storm surge of 12 feet was reported I

Bernard Nobles, WA4MOK, is a Section Emergency Coordinator in North Carolina. He says hams mobilized over a large part of the state:

4:07 IN In emergency operations centers
OUT in the eastern part of the state

The action wasn't just in North Carolina. Hams throughout the eastern seaboard were in position, ready to provide backup communications. Only a few hours after the storm had moved ashore, more than 800-thousand customers were without power in North Carolina and Virginia. Bill Moraine, N2COP, is a Public

Information Officer in southeastern North Carolina. He says hams were providing a variety of communications services:

--

IN they really run the range of
OUT in northeastern North Carolina.

--

Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome H-F problem. All along the storms projected path ham radio operators trained in emergency communications were in service or on stand-by alert. The Hurricane Watch Net was busy on 14-point-325 MHz. At the National Hurricane Center in Florida, amateur station WX4NHC helped with relaying storm reports. With hams throughout the mid-Atlantic region helping in the communications effort, Morraine said putting a number on those assisting would be tough:

--

IN We don't have a handle
OUT in this particular disaster One bit of good news.

--

Morraine says Isabel is no Hugo, referring to the devastating hurricane that slammed into North Carolina in 1989:

--

IN Thanksfully, Isabel
OUT about 105.

--

Hams were scheduled to staff the North Carolina Emergency Management Eastern Branch headquarters in Kinston. The amateur station at the state emergency operations center in Raleigh was also activating, with an umbrella of liaison stations being organized to monitor the 146.88 MHz repeater and the Tarheel Net.

The National Weather Service had hurricane warnings posted for parts of North Carolina and Virginia. Forecasters warned hurricane force winds were possible 150 miles inland, along with tornadoes.

As Isabel began moving north after landfall, flooding became a serious threat. At least one hotel in Kill Devil Hills collapsed into the ocean. Evacuations were being ordered along Chesapeake Bay.

In the hurricane's first day ashore, nearly 900 flights had to be cancelled, with some airports closing or limiting service. Up to a foot of rain was possible in West Virginia's hilly Eastern Panhandle, with between 6 and 9 inches of rain expected over parts of Pennsylvania. Amateur radio operators say

they will stay on the air helping--as long as needed.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham Alabama.

+++

As David said, it was North Carolina that was the first to feel Isabel’s fury. Gay Pearce, KN4AQ, is in Raleigh with that part of the story.

+++

Amateur Radio was in full swing in eastern North Carolina as Hurricane Isabel made landfall on Thursday. For hams and everyone else, the term "made landfall" was a confusing one. High winds, rain and power failures reached the Raleigh-Durham area, 150 miles inland, well before the hurricane eye crossed the coastline.

--

IN: WAKE EOC POWER FAIL AUDIO]

--

The Tarheel Emergency Net, North Carolina's ARES net, was in operation, splitting duty between 3923 and 7232 kHz, depending on propagation

--

IN: HF COUNTY CHECK-IN AUDIO],

--

The North Carolina ARES group has not yet begun to use 60 meters.

Most traffic between the coast and the states Eastern Branch headquarters in Kinston was being handled on linked repeater systems.

Several hams have remained on Hatteras Island on the Outer Banks, and for a time, hams across the world could listen to them via Echolink and IRLP connections. That ended as power and phone service failed near the coast.

The National Hurricane Center in Miami continued to use the Internet links to take reports from areas where connections remained in place.

--

[K4JVP AUDIO]

--

There was some confusion early as too many sources of input were mixed together on one combined Echoink/IRLP conference. The National Hurricane Center's liaison station commented:

--

[HNC CONFUSION AUDIO]

--

Control operators were able to clear up that confusion, but locally, repeater operators are finding that they can't mix local emergency and logistics traffic with a full-time Internet connection that's carrying similar traffic on other repeaters. That's a lesson for the next emergency.

Repeaters were used inland as well. The wide coverage 146.88 repeater in Raleigh linked the State EOC with surrounding counties and the Eastern Branch headquarters.

--

[VHF COUNTY CHECK-IN AUDIO]

--

Shelters began filling up as the storm moved inland, but with most shelters located in counties that would receive at least Tropical Storm force winds and a possible loss of power and telephone service, Amateurs were dispatched to provide communications.

--

[SHELTER VOLUNTEER AUDIO]

--

Reporting for Newsline from the fringe of Hurricane Isabel, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

More on Hurricane Isabel and the role of ham radio in future Amateur Radio Newsline reports. (Numerous sources)

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater serving Eastern Kentucky.

(5 sec pause here)

**

RESTRUCTURING: THE ARRL POSITION - WAIT TO HEAR FROM OUR MEMBERS

Why hasn't the ARRL joined those who have already filed petitions to the FCC on the topics of Morse Code testing and changes to license priveleges? In a note to his constituancy the League’s Southwestern Division Director Art Goddard, W6XD, explains it this way:

“After determining that the FCC will be handling these matters in due course, your ARRL has set a timetable that includes ample opportunity to

collect member input before determining its direction at the January 2004 Board meeting."

Goddard says to say tuned for further developments. He also tells ARRL members to contact their own ARRL Director and make known their views on these vital issues.

Goddard also suppled a brief overview of a meeting in St. Louis this past weekend, where ARRL Directors and Officers took what he calls the next step to define the ARRL's future role in Advancing and Advocating Amateur Radio. Although the details of ARRL's Long Range Plan aren't yet complete, W6XD says that hams can expect to see bold new actions in several key areas. These include advocacy in key regulatory and legislative issues, lifetime learning, certification and personal achievement and public recognition of Amateur Radio as a valuable service. Goddard adds that there will also be financial stability to implement all of these strategies. (ARRL SW Div. Report)

**

RESTRUCTURING: MORE CODE PETITIONS COMING

The ARRL may be taking the correct road on this one. This is because the latest ham radio restructuring show appears to be only in its opening act. In fact, it looks as if the six petitions favoring abolishing Morse testing and the one from FISTS favoring its retention may be only the beginning of a deluge of requests from both sides in the issue. We have heard that there are a number of other petitions already at the FCC or on their way but know little about them. Our Bruce Tennant, K6PZW has more:

As we go to air we believe there are as many as another half dozen petitions being filed on both sides of this contriversial restructuring issue. Amateur Radio Newsline will keep following this story and will have more fore you in upcoming reports. (Various sources)

**

RESTRUCTURING: FILE ON EACH PETITION

Still with this latest round of restructuring. If you are among those planning to file comments on one or more of the Morse petitions already before the FCC then listen up. If you want to make known your feelings on all of them, then you will have to file separate comments on each one.

As of this moment, a comment filed on any one particular petition will be considered for that specific rule making request alone and not on all. And having read the petitions, we can understand why. Each one asks for a specific approach in handling the Morse question and it would be impossible to provide a one comment that would fit all.

By the way, as we go to air the FISTS pro-code request has still not been assigned a rule making designation by the FCC. (ARNewsline(tm))

**

RADIO LAW: CONGRESS MAY INCREASE FCC AUTHORITY TO ISSUE FINES

The Federal Communications Commission would be given the authority to levy significantly higher fines. This, if a bill being considered by the Commerce Committee of the U.S. Senate becomes law. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The Wall Street Journal reports that fines for violating FCC rules could jump tenfold, and activities of lobbyists would be further restricted under a bill introduced in mid-June by Senator John McCain who chairs the Committee that authorizes the agency's funding. In addition to the increase in the Commission's authority to levy fines, the proposed legislation would also extend the statute of limitations on violations of the agency's rules from one year to two.

Other provisions include restrictions that would prevent top staffers from lobbying the agency for one year after leaving their positions, and a ban on the payment of travel expenses of FCC officials by companies and private interest groups. In other words, if the FCC were to send out a representative to any gathering the cost must be borne by the agency and not the events sponsor. Its far to early to know if such a prohibition would impact on the FCC ability to attend hamfests, conventions and other hobby radio gatherings.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

McCain's bill reportedly has the support of Senator Ernest Hollings increasing its chances of gaining broader support. Even so, it is still expected to face tough opposition as it makes its way through the regulatory aproval process. (Published news reports)

**

REMEMBERING : THE 2ND ANNUAL N2LEN 9/11 NET

The second annual N2LEN nine eleven net took place on Thursday, September 11tth. The gathering used voice over I P technology to link repeaters world wide over the Internet. This allowed radio amateurs and non-ham listeners to reflect on the terrorist attacks of two years ago and the role that radio amateurs played in the aftermath.

ARRL President Jim Haynie, W5JBP, was this years keynote speaker. He addressed the role of Amateur Radio in homeland security and urged each amateur to develop his or her emergency communication skills.

As with the 2002 net, this year's cyberspace and radio meting relied on EchoLink and eQSO Internet software connections as well as repeaters and simplex links around the world. (N2LEN Net News Release)

**

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTED FROM ITS HOME

The University of Central Florida Amateur Radio Club station K4UCF has been evicted. This, from the campus location that it had occupied for 30 years. Mert Garlick, N6AWE, reports:

--

According to a qrz.com website posting from Matt Collins, KG4JYD, the eviction took place last June but seems only now to have been made public. It reportedly resulted from faculty complaints about the radio club who concluded that damage to computer equipment was from a lightning strike that entered the building through the club's antenna system. University's plant personnel also complained that club members worked on the roof of the building without authorization.

But Matt Kassawara KG4FEQ , has a differing view. Kassawar who is with the club says that the ham station is the closest equipment to the antenna system. He says that neither that equipment nor the club repeaters were damaged by a lightning strike, indicating that the clubs antenna could not have been the source of the damage.

The club requested that University of Central Florida provide comparable space from which to operate. So far UCF administrators have refused.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE.

--

More information is on the web at qrz.com and

**

ENFORCEMENT: NY COURT DISMISSES HAM SCANNER CASE

Some good news for a New York State ham as a court dismisses a misdemeanor charge against Richard C. Lalone, KC5GAX. This for allegedly for violating an anti-scanner provision that state's Vehicle and Traffic Law.

According to the ARRL Letter, in a 1300-word decision, Judge John J. Hallet said it was clear the legislature never intended the provisions of traffic law 397 from applying to licensed Amateur Radio operators. He then dismissed the charge against Lalone August 5th.

The law in question prohibits individuals in New York state -- other than law officers -- from equipping their vehicles with radios capable of receiving signals on the frequencies allocated for police use without first securing a permit. The section also contains an explicit exemption for any person who holds a valid amateur radio operator's license. (ARRL)

**

ENFORCEMENT: FCC ASKS POWER COMPANY TO TRY HARDER TO RESOLVE NOISE COMPLAINTS

The FCC has asked American Electric Power Company of Columbus, Ohio to take a closer look at several power line noise complaints and try harder to resolve them. This in relation to complaints filed by four Amateur Radio operators in

Ohio, Indiana and Oklahoma.

According to the ARRL Letter AEP responded February 10th to the FCC's initial correspondence regarding the four cases. But the agencys' Special Counsel Riley Hollingsworth says that follow-up reports from the complainants suggest discrepancies exist between what AEP told the FCC and what the complainants report.

Hollingsworth said evidence to date indicates that none of the cases has been satisfactorily resolved. In one case, AEP erroneously identified the amateur's own antenna as the source of the noise.

Now, Hollingsworth has asked AEP to revisit each of these issues and to update the FCC within 45 days of any progress in each case. He also referred the power company to ARRL RFI Specialist Mike Gruber, W1MG, for technical assistance. (ARRL, FCC)

**

ENFORCEMENT: PAGING FINE

The FCC has affirmed a $9,000 fine against Air Paging, Inc.. This for failure to operate its Wireless Radio Station in accordance with its station authorization, continuous radiation of an unmodulated carrier, and failure to provide station identification by the assigned call sign.

Air Paging did not file a response to the initial Notice of Liability, so the $9,000 figure was affirmed. In addition, the Commission does not know if Air Paging has corrected the various violations, so Air Paging has been given 30 days to outline what measures it has taken or will take to correct the violations and ensure that they do not recur. The entire mater is in cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2741A1.doc (CGC)

**

ENFORCEMENT: TWO MORE TOWER FINES ISSUED

The FCC has issued two more broadcasters hefty fines because of tower related violations. A monetary forfeiture in the amount of $10,000 was issued to Pinnacle Towers, Inc., owner of a tower in Des Moines, Iowa, for failing to clean and repaint its antenna structure to maintain good visibility. Dinged with a $3000 fine is Best Country Broadcasting, LLC, owner of the antenna structure located in Bogalusa, Louisiana. No reason for this fine was mentioned in the FCC digest for the Best Country fine. (CGC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - AUSTRALIA: BPL COMING TO VK-LAND

The problem of Broadband over Powerlines or BPL is about to hit dwn-under. This as Australia makes ready to give it a go. Q-News Graham Kemp, VK4BB, has the latest:

--

PLT, PLC, BPL. What ever way you say it it means noise. Now, the Wireless Institute of Australia - Victoria says there is now clear evidence of a PLT-C/PBL push in Australia. That no-one can continue to be in denial mode.

>From the Q-NEWS perspective Barry VK2AAB will no longer be a "voice in the wilderness." Many of us will soon be asking "why didn't we act sooner".

You'll recall months ago we mentioned the little units being sold by DSE. Well these are small fry compared to the same basics being applied to our 240 volt mains supply, or worse, the High voltage distribution system.

--

It appears as id BPL is quickly becoming a world-wide problem for Amateur Radio. (Q-News)

**

RADIO LAW FOLLOW-UP: NEVADA TOLD TO SCRAP NEW RADIO SYSTEM

Here’s a follow up on a story we brought to you several months ago regarding a new state wide radio system in Nevada and an oversight by the regulators planning it. As previousy reported, the Nevada Highway Patrol had spent $14 million on a contract with Motorola to build a computerized radio system. It was activated back in 2000 but nobody from the state ever applied to the FCC for licenses for the frequencies. As a result, the FCC had told the Nevada Highway Patrol and other state agencies to stop using the 140 frequencies by last June.

To comply with the federal order, Nevada has had to scrap a costly radio system that's less than two yeas old. So on Tuesday, September 9th the Nevada state Board of Examiners voted to spend $16.1 million on new radio gear for the Nevada Highway Patrol. (Published news reports)

**

NAMES IN THE NEWS: W4FAL AND K2AD ELECTED NEW NFCC DIRECTORS

Some names in the news. They are Frank Lynch, W4FAL and Doug Sharp, K2AD who have been elected as Directors of the National Frequency Coordinators Council.

The NFCC made known the results on September 6th. This, after twenty-eigh of its member councils took part in the vote.

The National Frequency Coordinators Council is an umbrella group of recognized repeater coordinators. It was formed as the result of a meeting held in St. Charls Missouri in the late 1990's. (ARNewsline(tm))

**

HAMFESTS AND CONVENTIONS: QUEENSLAND AUSTRALIA ON SEPTEMBER 19-21

On the hamfest scene, the 30th annual North Queensland Amateur Radio Convention takes place September 19th to the 21st. The venue is down-under at James Cook University in the state of Queensland Australia. For details please e-mail vk4zz@wia.org.au (Q-News)

**

HAMFESTS AND CONVENTIONS: THE DX BASH IN TEXAS IN OCTOBER

Back on this side of the Pacific, the 13th Annual DX BASH will be held on Oct 10th to the 11 at Lake Buchanan near Austin, Texas. Icom has provided a IC-746 Pro and IC-756 Pro II that will be in use at the W5KFT contest station for attendees to try out in actual "on the air" conditions. Also planned are programs on operating, contesting, towers and antennas. More nformation is on-line at www.dxbash.com (W5KFT)

**

SWL-FESTS: SCADS IN HUNTINGTON BEACH IN SEPTEMBER

And short-wave hobbyists, this one is for you. Word that the Annual Southern California Area D-X'ers Picnic will be held on September 20th from 8am to 4pm. This, at the Huntington Beach Central Park in Huntington Beach California.

Huntington Beach is a suburb of Los Angeles. Further information available from Stewart MacKenzie, WDX6AA, at 714-846-1685 from about 9 a.m. to 8 p.m. - Pacific coast time. (SCADS)

**

DX

In D-X, if you are waiting for a Q-S-L card for last June's WB8XX operation on Antigua, you will have to be patient a bit longer. According to Kevin, cards ordered 2 months ago from PY2TNT never did show up and now it appears that the company maybe out of business. Kevin says that the website is suspended and E-mails bounce. WB8XX adds that he will be ordering more cards from a stateside supplier, and will have all of the cards out as soon as the 2nd order arrives. (VHF Reflector)

**

THAT FINAL ITEM: TEACHING HAM RADIO IN ALBANIA

And finaly this week, how would one of you like to teach ham radio in Albania? Yes, we said Albania. Well you can if you know the British Radio Amateur Examination course and like to travel. Here R-S-G-B Newsreader Jeramy Boot,

G4NJH, with the rest of the story:

--

A radio amateur lecturer is required to help give a radio amateur course in the Technical University of Tirana, Albania, this coming November. The course will integrate amateur radio communications theory and practice into the University's normal study programme.

The course is organised in coordination with the Ministry of Telecommunications in Albania, in conjunction with the IARU, and using RSGB documentation. Several agencies and companies are providing financial support. The applicant should have experience of
teaching electronics and telecommunications at the amateur radio level in a UK setting. The course material is based on the UK RAE at the Full licence level and will lead to a CEPT-recognised qualification for the successful students. The successful amateur will help to coordinate the other visiting lecturers, and the assignment will take three weeks out of a six-week program.

This is a unique opportunity to join a multi-national amateur radio team helping to create a new group of telecommunication engineers to benefit the Albanian economy. It will provide a rich experience, not to mention the opportunity to operate ZA1A from the hotel in any spare moments.

--

For more details, please contact Roger, G3LQP, by e-mail to g3lqp@aol.com (GB2RS)

>
>
>When did it become a regular thing and how is it done ?

>From a 2002 CBS News article on one of President Bush's addresses:

"The president's weekly radio address is a descendant of Franklin D. Roosevelt's fireside chats. It was resurrected by Richard Nixon and perfected by Ronald Reagan and used by Bill Clinton throughout his administration."

The radio address was a natural for Reagan, of course, given his movie/media background and even his radio work early on.

The address is not associated with any particular station or even network. All of the major radio news networks (ABC, CBS, CNNRadio, etc.) feed it on Saturday mornings, and C-SPAN televises it (with just a picture of the president) later that day.

Some stations actually run it in full...mostly all-news or news/talk stations that have some significant news-related programming on Saturdays. We used to air it on "The KFBK Saturday Morning News" in Sacramento when I was co-host...then KFBK discontinued it. The station recently picked it up again, and now airs it at 8:20 AM PT on the show now co-hosted by Marna Davis and Steve Kelley.

I haven't been there in nearly 2 years, so I have no idea if they air the Democratic response or air the address again during the "News at Noon".

In record company jargon, it means "artists & repertoire" and refers to executives who decide which artists to record, and what they will record. I've never heard it used in radio, although I would never say categorically that it hasn't been.

Artistry & Repertoire, the department (and guys) who sign new acts, and sometimes find stuff for them to perform - though that was more in the earlier days than now.

I recommend the novel "A&R" but I can't locate the name of the author right now. Good insight into that end of the recording industry.

I would like to know what everyone thinks of Lenny Kahn's AM digital system.

He says that his system won't have the hash on the sidebands that interferes with first-channel stations and won't compromise the fidelity of the existing analog audio.

And that it will make the station sound better (rather than worse) on existing radio sets.

Comments? I'm really interested in this system but considering the "muscle" behind Ibiquity's HD-Radio system, I think Kahn's system is bound for the wastebasket of electronic history.

Do the words "Burns on line go ahead" mean anything to you?? Jimmy Pattison eventually destroyed CJOR when his religious zealotry got the best of him as it often does, and he turned it into a christian rock station which was a predictable failure.

Does anyone have an audio clip of this segment of the show (or the whole
show)? I checked NPR's site, they have the playable segment on Johnny Cash,
but not a mention of Daws Butler. I am a big fan of Daws, wish I had read
this posting earlier!! I guess if all mpeg files fail, I can bite the bullet
and buy the cassette. $24 jeeze louise!!!
Regards,
Tom

Never mind on the previous post of needing the sound file. You can find the clip on the Daws Butler web site, they already have the playable clip.

2120. New to XM, and liking it so far

Newsgroup: rec.radio.broadcasting
Date: 2003-09-25 14:45:17 UTC
From: mocker5@flash.net
Message-ID: <bkuv1tpli1@xuxa.iecc.com>
Source record: 7000

Encouraged by the info and feedback I got in here recently, I went
out and got me a tuner for XM last week.
As I wanted to listen to it at home and not in a car, I got the home
conversion kit and was able to get it operating easily enough.
I'm getting a first class signal, and am highly delighted with the
output they offer. The ordinary radio will not be much used from
now on, I suspect....

One thing did puzzle me, and I wonder if anyone else has experienced
this.
I was happily listening to one of the classical music channels when
there was suddenly total silence. Checked that the power supply
hadn't failed, and a few minutes later, the sound came back on.
Then a few minutes later, the same thing happened: no music, nothing.
Further investigation revealed that the missus had toddled into the
kitchen and operated one of the two microwave ovens. While this was
on, XM was silent.
This microwave is a bit different from the normal, in that it has a
voice that echoes keypresses, advises on current state of cooking,
time remaining and so on.
The layout of window, antenna, tuner and microwave are like this:

```
T
|
A |
|
|
|
M
```

The window on right faces due east, the microwave sits with its back
to a west facing wall very roughly about 15 feet from the tuner,
and of course in a separate room with plasterboard and timber walls separating
them.
Can anyone knowledgeable on radio signals and frequencies shed any
light on this?

Hi.

Has anybody heard about the new access radio licences that are about to be started here in the UK?

How easy are they to get and what sort of costs are involved?

Peter

>>
Why is WOR changing transmitter sites ... again?
>>

The state is taking the site for a freeway.

The new pattern is quite different from the old one, although both are asymmetric, three tower arrays.

WOR is being "ratcheted", even though the move is supposedly within established limits for "walking" an array without such ratcheting.

(Another array design by the same engineer, Cynthia Jacobs, is also being ratcheted, and under the same conditions).

WOR's nulls will be deeper, and will protect "notified" Canadian stations which actually no longer exist.

What a pile of crap!

They were actually Thyratrons used as rectifiers, the plate voltage, and hence power output could be adjusted by varying the firing angle of the grid, sort of like the modern light dimmer in your dining room.

> This might be called a "four phase" rectifier in the same way as a
> three-phase, full-wave rectifier is called a "six phase" rectifier.

To avoid confusion I call it a 4 pulse, or 6 pulse rectifier, as the case may be.

> Oh, these 5Ks and 5Ks actually run on three-phase feeders, as the primaries
> are connected in a Scott-T, while the secondaries are connected as two-phase.

Yes.

> Buffalo and Philadelphia (including Camden, and undoubtedly RCA's plant as
> well) were the last hold-outs of two-phase power in the U.S.

Are you saying that is what inspired RCA to build these transmitters with a two phase feed to the rectifiers, I think they were the BTA-5G, BTA-10G, BTA-5H, and BTA-10H?

A friend worked for Pattison in pr when he owned the Vancouver Blazers
of the WHA. One day he went into work and didn't recognize any of the
concession workers or ticket and program sellers. He found out Pattison
had fired all his paid staff and recruited members of his church as volunteers
to work the games. The next week the paid organist was history, replaced of
course by the unpaid volunteer organist from his church. It was at this point
my friend quit, he had a feeling the pastor would be sending out press
releases in the near future :-)

Jimmy Pattison is so phony, professing to be a Christian, all the while
committing the most un-Christian of acts. The irony is he of all people
better hope there ain't a God. <g>

Mine hasn't changed. I frequently drive a route that has a couple of
weak-signal problems. They are no different than they were a year ago. I
drove that route today.

Maybe you have a receiver / antenna problem.

2130. Ken Hamblin back on the air?

Newsgroup: rec.radio.broadcasting
Date: 2003-09-30 04:54:59 UTC
From: "G.T TYSON" <gtyson@nc.rr.nospamcom>
Message-ID: <blb2b3$f1m$1@xuxa.iecc.com>
Source record: 6856

I was tuning past our local news-talk AM and noticed Ken Hamblin, aka The Black Avenger, is back on the air. A couple of months back people in this newsgroup were saying he had committed career suicide by having an ugly parting of the ways with his network and/or syndicator. Several people said he would likely never work in radio again, but he's back, five days a week, and nothing sounds different. Did he sign on with a different network, or did his lawyers win out over their lawyers? I'd be interested to know what went down.

GTT

2131. How to improve reception

Newsgroup: rec.radio.broadcasting

Are you saying that is what inspired RCA to build these transmitters with a two phase feed to the rectifiers, I think they were the BTA-5G, BTA-10G, BTA-5H, and BTA-10H?
>>

I am hypothesizing that RCA utilized some ingenuity and well-known (to two-phase aficionados) engineering techniques to make an unusual box which had some unique cost-savings features.

>>
To avoid confusion I call it a 4 pulse, or 6 pulse rectifier, as the case may be.
>>

However "incorrect" it may be, the literature calls these "four phase" and "six phase".

"Twelve phase" is also employed. This is really three-phase, full-wave, using a "zig zag" transformer.

Those of you in the radio game ought to have an award and give it out at the NAB party in Nevada -- call it the Aimee Semple McPherson award. Make it a nice glass or crystal trophy.

Perhaps, the head of a clown with one of those "crazee arrows" thorugh it.

Aimee Semple McPherson was probably the first radio stuntress in history. Ms. McPherson was also one of the first radio preacher/hucksters. She founded the Angelus Temple in Los Angeles and ran it with her mother (or former mother-in-law?) -- a woman named Kennedy. She also had a radio station - KFSG.

In 1926, Aimee disappeared, and was supposedly swept under the waves while swimming at the beach. Rescue workers could find nothing. Unfortunately, a man died during the search and rescue. Several days later, after an intense radio campaign over KFSG praying for Aimee's return, she turned up - staggered out of the desert -- and claimed she had been beaten, drugged, and raped, and had walked six hours through the desert sun to be rescued. This incident of weirdness was topped by the fact that her clothing and condition did not reflect six hours of walking through the desert.

There were also indications that she had been seen in the company of one of the station's engineers in a trip up the California coast while she was "kidnapped". However, both he and McPherson denied it, and she was acquitted of perjury.

She returned to the Angelus Temple, but did not enjoy her pre-stunt publicity.

McPherson died of an overdose of barbituates in 1944.

I've not heard of this happening and haven't experienced it myself.
My in-home receiver is a Sky Fi in a room next to our kitchen and
reception is perfect, at all times.

Once in a blue moon there will be a little dead air or a dropout of
some kind from XM -- highly unusual though to have ANY kind of
interference. Bet you won't see it regularly.

Have you tried to make it happen again with the microwave?

Amateur Radio Newsline™ Report 1363 – September 26 2003

Amateur Radio Newsline report number 1363 with a release date of Friday, September 26th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Two more nations go code free and if you wanted to go to Albania to teach ham radio, you are to late. Find out the details on Amateur Radio Newsline report number 1363 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: TWO MORE NATIONS GO NO-CODE

Two more countries have dropped the Morse code requirement for operation on the High Frequency bands. Amateur Rado Newsline's Don Wilbanks, AE5DW, has the details:

--

Two nations on opposite sides of the world have opted to join the growing no-code brigade. On September 15th, Ireland announced that they no longer require a Morse test. As a result, all Irish B licensees now have Full license privileges. But with a few caveats.

At this point there will be no change to existing callsigns. But Class B licensees may apply for a Class A callsign but to do so they will be required to pass a Morse test. New license applicants who have passed the Theory Test will continue to be issued with a callsign having a three letter suffix ending in B, unless they also pass a Morse Test. Also, because not all countries operating under the CEPT agreement have yet removed the mandatory Morse requirement, operation abroad on the HF Bands by Irish Class B licenses is confined to those countries that have done so.

Meantime, the Singapore Amateur Radio Transmitting Society has been advised by the nations Info-comm Development Authority that, as of the 15th of September, the requirement for a Morse code examination for High Frequency operating privileges in Singapore has been removed. And as from the 16th of September all current and future licenses became convertible to the Singapore General Class. This, with full High Frequency operating privileges.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

By the way; Singapore is thought to be the first country in Asia to adopt the recent amendments of Article 25 of the ITU Radio Regulations. Many others

around the world are expected to follow in coming days. (GB2RS, Q-News)

**

RESTRUCTURING: CQ READERS FAVOR HF PRIVILEGES FOR TECHS BUT ARE SPLIT ON CODE TESTS

A survey of CQ magazine readers shows respondents are strongly in favor of granting at least some high-frequency operating privileges to already-licensed hams who have not taken a Morse code test, but are evenly split over the question of continued Morse code exams for amateur licenses. Amateur Radio Newsline's Mark Abramovitz, NT3V, took a look at the survey results and has more:

--

According to CQ Editor Rich Moseson, W2VU, nearly two-thirds of the CQ readers who responded to the survey favor giving limited High Frequency privileges to currently-licensed Technician Class hams who have not taken a code test. Another 36% of those responding said there should be no changes in operating privileges.

Among those who favor changes, 43% support merging the current Novice and Technician licenses and combining the privileges of both, while another 26% favor expanded privileges for both classes, including High Frequency subbands offering voice, CW and data at limited power levels. In addition, 14% supported giving Novice High Frequency privileges to Technicians, but not giving full VHF privileges to Novices. The remaining 17% were split between giving current Technicians only current Novice voice privileges and only current Novice code privileges.

Moseson says that readers were split, 50-50, on the question of whether the FCC should change its current code test requirements. Of those who favored change, 50% called for the elimination of code tests for both General and Extra Class licenses, while 42% favored eliminating the General Class code exam but keeping it for the Extra Class license. The remaining 8% supported replacing the current code test with a code recognition test similar to the exam used for the Foundation class license in the United Kingdom.

And heres a big surprise. While only half the CQ readers want the FCC to change the current code test requirements, three quarters of those who sent in the survey said they agreed with the decision at the 2003 World Radiocommunication Conference to leave the question of code tests up to each country to decide.

Finally, the ARRL and International Amateur Radio Union got a strong vote of support for the time and money they invested in securing the compromise agreement on 40 meters. One that will eventually double the size of the band for amateurs in Europe, Asia, Africa and Oceania, while removing broadcasters from the 7 point 100 to 7 point 200 MHz segment by 2009. Seventy-eight per cent of C-Q readers responding to this question said the effort was a worthwhile investment of member dues and staff time. On the other side only 9% said the benefit was not worth the cost. 13% had no opinion on the issue.

According to Moseson, a significant aspect of these survey results is that 84% of the readers responding already have High Frequency operating privileges, 75% report being active on HF, and 58% hold Extra Class licenses.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, in Philadelphia.

--

The survey was included in the September, 2003 issue of the magazine. CQ Editor Rich Moseson, W2VU, said over 400 CQ readers responded to it. Moseson admits that it was in no way a scientific poll but he says that it does provide a "snapshot" of reader views on various topics. (ARNewsline(tm))

RADIO LAW: A BPL DOCUMENT FOR HAM RADIO

Turning to the latest in ham radios war against the introductuion of Bradband Over Powerlines or BPL, the Wireless Institute of Australia has prepared a document detailing the pros and cons. Phil White, VK2DKN, is its author:

--

White: “The purpose of the document was not only to advise the WIA of the exact position of BPL in Australia, but also to educate the general Amateur fraturnity on the situation wth BPL that was likely to affect them.”

--

White said that he tried to present a balanced view of the BPL situation, covering both sides:

--

White: “I tied to present a fairly balanced view in the document so Amateurs can see both sides of the argument. And there are some very strong arguments for and against the adoption Broadband Over Powerlines.”

--

How best to fight the introduction of this technology? White says hams need to forge alliances with others who will be affected:

--

White: “My opinion is that Amateurs need to for an associatoon wih other HF users, and those users may include people like defense, four-wheel-drive groups, CB’ers -- any people who are affected by the introductuion of BPL technology.”

--

According to White, alliances like this will put Amateur Radio in a much stronger position to gain access to any standards committees working on the introduction of BPL. (Q-News)

RESCUE RADIO: TEXT MESSAGE RESCUE

If you think that Morse code is still needed for a successful rescue at sea, guess again. Three men who were rescued from the hull of a capsized boat on Saturday, September 13th definately know this. You see, they were saved after one of the sailors sent an electronic text message to his father using a two-way pager.

Caught in what the British Coastguard later described as rough seas and gusts up to 45 knots, the men used a combination of a mobile phone and VHF radio to call for help. The Coastguard first received an emergency assistance request at 4:50 pm UTC but that call was dropped due to poor signal strength.

Then came a signal from an emergency locating beacon triggered by the men. It showed the vessel to be south-west of St. Catherine's point on the Isle of Wight. But it wasn't until the Coastguard received a call from one man's father - calling from his home, near Southampton - that the position was confirmed. His son had dent him a text message that he passed onytto the Coastguard. A helocopter was dispatched and the men were plucked to safety.

Commenting on the rescue, and the way text messaging can often make it through when coverage is patchy was Watch Manager Colin Griffiths. He said that the incident adds to the number of times the Coastguard has been alerted to a marine incident by just such a text message. (silicon.com via KB4KCH)

HAM RADIO BUSINESS: ROHN FILES CHAPTER 11

A company that literally as well as figuratively supports more ham radio antennas than any other is fighting for its survival. This as tower manufacturer Rohn Industries announces that it and five of its subsidiaries have filed for Chapter 11 bankruptcy relief in federal court.

Subject to the provisions of the Bankruptcy Code, the September 16th filing means that Rohn remains in possession of its properties and continues to operate its business. The company says that the objective of the Chapter 11 proceeding is to maximize recovery to creditors by facilitating an orderly sale of its assets. (QRZ.com)

ENFORCEMENT: SEATTLE CB’ER FINED FOR REFUSING STATION INSPECTION

A Citizens Band radio operator has been ordered to pay the FCC $500 for his refusal to permit agency inspection of his station. Amateur Radio Newsline’s

Mert Garlick, N6AWE, has the rest of the story.

--

Tacoma Washington resident William A. Woods is the CB operator in question. According to the FCC, Woods was initially fined $7000 for failure to make his CB radio station available for inspection at the request of authorized Commission personnel.

On September 3, 2002, the Seattle FCC Office received a report from the City of Tacoma, Washington, concerning complaints about interference to home entertainment equipment in the 3000 block of South Madison Street. A few weeks later agents determined that an interfering signal on 27.025 MHz was coming from Woods home. The agents also observed that the signal strength levels were significantly higher than those expected from an authorized CB transmitter.

After a second observation on November 5th, 2002, the agents, who were accompanied by two police officers, requested that Woods make his CB station available for inspection. After a delay, Woods allowed the agents but not the police officers to enter his residence. Once the agents began the inspection of the CB station, Woods changed his mind and refused to allow the examination to continue. The agents then informed Woods that his refusal to allow an inspection could result in a monetary forfeiture.

On December 30, 2002, the Seattle Office issued a Notice of Apparent Liability to Monetary Forfeiture in the amount of $7,000 for refusing to allow an inspection of his station. In his response Woods claims that the agents who came to his residence on November 5, 2002, did not present any identification and that he did not refuse to allow the agents to inspect his station. He also stated that he had taken medication before the agents arrived at his house. Woods also submitted financial documentation concerning his inability to pay the proposed monetary forfeiture. After considering his response the FCC elected to reduce the fine to the $500 level and gave Woods the customary 30 days to pay.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE, reporting.

--

No word if Woods plans to pay the $500 fine, or file a further appeal. (FCC)

**

ENFORCEMENT: FAILURE TO REGISTER TOWER BRINGS $3000 FINE
The FCC has fined Dewey D. Lankford $3000 for his failure to register his broadcast tower. Lankford is the licensee of station WANA-AM in Anniston, Alabama, and owns that station’s antenna structure.
According to the Commission’s records, the towers height above ground is over 200 feet. On June 26, 2002, an agent from the Atlanta Office inspected the antenna structure. A recent check of the of the Commission’s tower registration records indicates that WANA’s tower still remains unregistered. In his defense Lankford asserted that the previous owner of the station told him that everything regarding the station was “in order” and there was a

“variance” regarding registration. Lankford further states that he believed, on the basis of a telegram from the FCC received by the previous licensee of WANA, that the tower was not required to be registered because it has no marking or lighting requirements.
But in imposing the fine the FCC says that Section 17.4(a) of the Rules requires the registration of antenna structures which require notice to the Federal Aviation Administration. FAA notification is required for towers whose height above ground level exceeds 200 feet. According to the Commission’s records, the height of Mr. Lankford’s antenna structure is over 200 feet. The antenna structure is, therefore, required to be registered. The FCC adds that the lack of marking and lighting requirements does not negate the tower registration requirement. (FCC)
**
HAM ENTERTAINMENT: UPDATE ON THE HUMAN RACE

Remember the proposed television show The Human Race. The one which would pit two teams of hams against one another in a race around the world? Well, the producers have announced the availability of a short video to that they have produced to accompany grant applications and have also posted it on the shows website. The mini show is an 8 megabyte file. You can download and view it www.humanrace.fr.st or
www.qsl.net/w1zy/archive/july/video.html (Q-News)

**

NAMES IN THE NEWS: W6OBB RETURNS TO COAST TO COAST AM

Some names in the news. First up is Art Bell, W6OBB, who has returned to the radio show he made famous, but only for two days – or should I say two nights -- a week. According to an announcement from Premiere Radio Networks, Bell has agreed to replace Barbara Simpson as weekend host of Coast to Coast AM.

W-6-O-B-B began broadcasting live on Saturday night September 20th. His new version of weekend Coast to Coast AM is live from 1-5 a.m. Eastern Time on Saturdays and Sundays with a re-feed from 5 from 9 a.m.

Bell broadcasts from a studio in his home studio in Pahrump, Nevada. According to Premiere Netwoks Bell staid that for him, a return to radio is both mysterious and reassuring. (Premiere Radio)

**

NAMES IN THE NEWS: PRODUCTION COMPANY SUES WALTER CRONKITE, KB2GSD

And a Florida company has sued Walter Cronkite, KB2GSD, for $75,000. WJMK, Inc. claims that the former CBS anchorman illegally backed out of a contract to film what amounted to infomercials.

According to the Charleston Post-Courrier, Cronkite had agreed to show up for two days of taping with WJMK Inc.. This is a company which provides segments for TV stations on health care and the drug industry. Cronkite backed out in May after a New York Times article questioned whether he was being paid to help produce commercials designed to look like news.

The lawsuit was filed Wednesday September 17th by WJMK in Manhattan federal court. It claims the 86-year-old Cronkite and his production company knew his name and image could be used for any and all media. But Cronkite's lawyers insist he was misled into believing he was filming educational programming when in fact WJMK was taking money from health care companies to produce segments on their products.

As most hams are aware, late last year Cronkite volunteered his services to the not-for-proft Amarican Radio elay League as host of its new video Amateur Radio Today. As reported here on Nerwsline, that show was recently honored with a third place award at the Chicago Film Festival in Illinois. The story is in cyberspace at http://www.charleston.net/stories/092003/wor_20people.shtml (Charleston Post-Courrier)

HAM RADIO EDUCATION: ALBANIA HAM TEACHING POSITION FILLED

A follow up to last weeks story on the search for a ham radio instructor willing to teach Amateur Radio in Albania. Well, if you wanted the position and waited to respond, forget it. Word from the planners is that hey had quite a few responses. They are now assessing the candidates and the person chosen will be announced shortly.

The Albanian ham radio training course will be presented at the Technical University of Tirana in November. It is being organized in coordination with the Albanian Ministry of Telecommunications in conjunction with the IARU using Radio Society of Great Britain Radio Amateur Examination documentation. (Various sources)

**

WITH THE ARRL: 160 METER CW PRACTICE SHIFT

Starting Monday, September 29th, ARRL headquarters station W1AW will shift its 160-meter code practice and bulletin transmission frequency to 1817.5 kHz. The frequency shift not only brings W1AW's Top Band frequency in line with those the station uses on other bands, it also should help to eliminate possible interference from broadcast station harmonics and birdies.

W1AW has been conducting code practice and bulletin transmissions on its current 1818 kHz since 1982. Prior to that, W1AW transmitted both CW and phone bulletins on 1835 kHz. The frequency change is effective starting with the September 29th 2000 UTC code practice run. (ARRL)

**

HAM ANIVERSARIES: THE WS9CAN REPEATER AT 25

The Southern Counties Amateur Network Harrisburg Il. is celebrating the 25th Anniversary of its 146.880 repeater. To share his milestone the club plans to operate a special event station on October 5th 2003. W-S-9-C-A-N will oprate from 1800 to 2300z UTC on 40 through 15 meters. If you work them, Q-S-L with a self addressed stamped envelope to Vic Maue Jr., WD9EMF, RR#1 Box 102, Simpson Illinois. The zipcode is 62985. (VHF Reflector)

**

CONFERENCES: 2003 MID ATLANTIC STATES VHF CONFERENCE IN PA

Make your reservations now for the upcoming Mid Atlantic States VHF Conference, this year at the Radisson North East in Trevose, Pennsylvania. The date is Saturday, October 11th. The conference is sponsored by the Mt. Airy Radio Club and everyone is invited to attend. **

RADIOSPORTS: ARDF REGION 3 GAMES THIS FALL

Planning for the 5th annual IARU Region 3 Amateur Radio Direction Finding Championships is reportedly progressing well. The games are slated to be held in the town of Ballarat Australia this November and December. To register, e-mail registration@ardf.org.au. Full details are on the web at www.ardf.org.au (News release)

**

DX

In D-X S57CQ, is very active slash YI from Iraq, especially around 14.270 MHz SSB. He expects to be in Iraq until mid-October. QSL via S57DX. (GB2RS)

And YA1D in Afghanistan is active almost daily after 1230 UTC on 80 to 10 meters. His operation is mainly on SSB but with some slow CW. (GB2RS)

Lastly, G4VGO, reports that he will be active for about two years from Singapore as 9V1GO. His activity will be mainly on the low bands on CW, especially 30, 80 and 160 meters, at his sunset and sunrise. QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: TURNING BACK THE SANDS OF TIME

And finally, we began this weeks newscast with a restructuring story and we will end it on the same note. In this case a look at some petitions for rule making that are reportedly on their way to the FCC. And when it comes to opening up ham radio to more people, one appears to want to turn back the hands of time. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with a little

bit of information on two of the stranger ones being talked about in cybrspace:

--

Audio report only. Hear it by downloding the newscast at
http://www.arnewsline.org

--

Just before going to air we checked the FCC’s website and could not find a Rule Making designation for either of these. But it does not end here. More petitions, both for and against continuing Morse testing are believed in route to the FCC. (Listener reports)

If you can get access to any location outside your apartment try an active
antenna. Such a device consists of a high gain rf amplifier and a 2 to 3
foot long whip. Go to Grove Enteprises' web site www.grove-ent.com

2140. Re: AM audio quality: analog vs. digital

Newsgroup: rec.radio.broadcasting
Date: 2003-10-03 03:34:28 UTC
From: donotreply@spamblock.com
Message-ID: <bliqo4epm1@xuxa.iecc.com>
Source record: 6868
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting,alt.radio.digital

Since the HDC codec provides 15 kHz bandwidth in stereo, while analog AM stereo is limited to perhaps 9.5 kHz (given an ideal receiver and understanding the absolute need for a 10 kHz carrier-beat filter), the digital signal will sound far better to anyone whose hearing acuity extends to 15 kHz, which is the bandwidth commonly accepted as being necessary for an impression of high fidelity.

The digital signal will also have a noise floor in excess of 90 dB below 100% modulation, making it immune to the static and manmade noise that has caused so many problems on the band in the last few decades.

Even disregarding the subtleties (of which there are many), these two factors alone make HD AM dramatically superior to analog AM stereo.

In article <bkfn7d$5f$1@xuxa.iecc.com>, wbrw@radiomailbox.com says...
>
>
>After universal complaints about horrendously poor audio quality,
>iBiquity has revamped their IBOC digital AM system by switching to the
>"HDC" codec -- a slightly warmed-over version of AAC Plus, as used by
>Digital Radio Mondial (DRM).
>
>iBiquity claims a large improvement in quality -- but can IBOC, now
>with HDC, even match up to the quality that analog AM Stereo has
>offered for decades? Listen, compare, and judge for yourself:

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

> enough to respond. Thanks!

There's two effects to be overcome.

1. Your radio is not sensitive enough, in which case it can be fixed by a MW loop (Select-a-tenna or Terk MW loop are the two easily obtainable; get the passive (cheap) versions, not the active ones; the cheap ones run $40-$60, a huge profit margin but worth it after you consider doing it yourself having to scrounge materials and pack it neatly.)

A MW loop impedance matches the radio's internal loop antenna to free space and raises the sensitivity of most radios enough so that external noise is louder than internal noise, which is to say no radio will be more sensitive. All will hear the same noise no matter how much more sensitive they're made, at that point.

That may be enough to hear your station.

2. Which brings up the second effect, you're surrounded by noise-making devices like dimmers, in which case you'll only hear them more clearly rather than the station you want. Other than aiming the radio (and MW loop if you got one) so as to minimize that noise, and aiming matters a great deal so try it, there's nothing you can do short of moving the radio or its antenna, if the radio allows you to attach an external antenna, or if you arrange an external antenna anyway, which is possible but not described here.

A final alternative is a local FM transmitter: put AM radio and FM transmitter near a window, and play the AM radio into the FM transmitter. Listen to the FM transmitter inside the building. CCrane sells them, probably among others.

CCA Parts and Schematics

For over 30 years, CCA was an industry leader in the manufacturing of FM Transmitters. Because of their dependability, quality craftsmanship, and simplicity these transmitters are easy to operate and repair. Recently the company fell victim to a slow economy and was forced to file for Chapter 7 Bankruptcy.

VBEngineering stepped in and has been authorized to begin selling replacement parts for most CCA Transmitters. VBE can supply a full line of hard to find replacement parts for CCA Transmitters.

Many parts are in stock now and ready for shipment. We also have all the Schematics and Manuals available for your Engineer.

Easiest way: Put the RADIO right there on the windowsill.

Most radios these days don't have connections for AM antennae. They use a loopstick (powdered iron bar wrapped with fine wire) inside the case to "pick up" the signal. Good enough for local reception.

Also, go to this website:

http://www.selectatenna.com/

This type of antenna is just a big coil that you tune to match the frequency your radio is tuned to. No connections. Just sit both of them next to each other and play with the positioning until you find the spot that best works for THAT particular station.

2149. CRL processing - advice?

Newsgroup: rec.radio.broadcasting
Date: 2003-10-03 03:37:40 UTC
From: wbrw@radiomailbox.com
Message-ID: <bliqu4fkt1@xuxa.iecc.com>
Source record: 6866
Cross-posted to: alt.radio.broadcasting,rec.radio.broadcasting

I have a CRL processing chain that I'm setting up and I'm just wondering if anybody has any advice or experience regarding these units. I have the SGC-800 Stereo Gain Controller, SEC-800 Spectral Energy Compressor, and the SMP-950 AM Stereo Matrix Processor. I'm setting this up on an AM station (and yes, it will be in full-fledged AM Stereo!), but the first two units apparently can be used for FM processing as well.

I know these are all late '80s units so they won't be as smooth or as loud as a modern Optimod, but I would at least like to achieve a reasonably "polished" sound, similar to the other CRL-equipped stations I've heard. The manuals list a whole page of suggested settings for each unit, but I have yet to discover a configuration that provides the ideal compromise between loudness and fidelity.

I may experiment with using additional processing in front of or in combination with these CRL boxes, but if anybody has their favorite "magic" settings which help this CRL trio perform at its best, I would appreciate your advice and recommendations (other than "toss it all out and spend the $$$ on an Optimod 9100-B2!).

> on one side, but it is clear for quite a bit outside my window.

An antenna outside your highrise isn't likely to do you much good, but placing a radio with a large ferrite coil/receiving loop in your window and turning said radio to increase the AM signal might greatly help. Radio Shack also sells a loop that can increase signals you receive by coupling to the present loop you have. I assume that you have a decent radio like for example the approximately $50 GE Super Radio with a large loop. If you're for example trying to use your stereo or tuner, it likely lacks a good enough AM antenna

Judging by the samples on...
http://www.wor710.com/Engineering/iboc/audio_samples.htm

...and from current tends in audio coding, it's almost certain that
the HDC codec is using spectral band replication. In which case, all
that bandwidth up to 15kHz is fake. There's a genuine 5kHz or 7.5kHz
audio bandwidth, and the rest is synthesised. Quite badly, to my ears.

> The digital signal will also have a noise floor in excess of 90 dB below

> has caused so many problems on the band in the last few decades.

The fact that silence is silence will please some people, as will the
lack of crackle and hiss. But the (hopefully inaudible) coding noise
is only 20-30dB below the signal in a good, high bitrate
psychoacoustic codec. Things will be even worse in low bitrate digital
AM. I didn't know a 90dB dynamic range was part of Orban's business
plan? ;-)

> Even disregarding the subtleties (of which there are many), these two
> factors alone make HD AM dramatically superior to analog AM stereo.

Some people may be superficially pleased with the silence moments, and
bright sound. However, listening to the samples, it sounds really
quite nasty. IME, people can be very unforgiving of that kind of
artificial, metallic, "computer" sound.

btw - I'm in Europe, so can't listen to AM stereo, or IBOC HD radio
off air. Our digital AM plans, if any, seem to be based on DRM. I
doubt we'll see IBOC over here. It's sad that the world's radio
standards will probably be split in the same way that the world's TV
has been. That's if any consumers actually want digital radio at all.

Cheers,
David.

US 103.1 is WQUS, officially licensed to Lapeer.

Club 93.7 is WRCL, Frankenmuth.

If IBOC were running pure compressed digital audio, that would be true!! However, IBOC on AM is only 36 kbps, and only maintains accurate frequency response up to _5 kHz_ -- all audio above that point is "spectrally replicated", i.e. "faked" based on harmonics of lower frequencies. To my ears, it sounds like the treble has been run through a cheese grater!

Analog AM may have a more limited high frequency response, but at least it is ACCURATE treble response -- not screechy, gritty, heavily artifacted treble that is about as pleasing to the ears as fingernails scratching on a chalkboard.

A new comparison between analog AM Stereo and digital IBOC/"HD Radio" AM can be found on this site:

http://www.geocities.com/kevtronics

Download the audio samples of both, and compare!

p.s. One thing I can say, however, is that your Optimod 9100-B2 is the best-sounding analog AM audio processor that has ever been built -- and, of course, it really shines with AM Stereo. Stations which just want to be LOUD use the 9200... but stations which want to be both loud AND good-sounding almost universally use the 9100.

I'd rather put up with some noise and limited bandwidth so long as the
program sounds RIGHT and natural... rather than a strange unnatural
swishing
sound that just happens to have wide bandwidth and low noise floor.

The brain filters out noise and ignores lack of 'highs'.. but when the
whole
sound of the thing is as if it's all come through a satellite
videophone.. yuk!
I've given up on broadcasting as a source of good audio, the only way
to get
good sound is to buy music. And, since I refuse to pay a penny to the
record
companies unless I really can't help myself, this means things have
gotten depressingly limited. Modern life is indeed rubbish.

I have developed an automation system that rotates and plays music by catagory, randomly playes jingles and promos, schedules/plays commercials and logging them when played. It can be run on 1(for air), 2(for production), 3(for office), or more networked computers. It can do full automation, live assist, or manual playback. For a demo go to www.streamaudio.com, search for and click on WPRX. After midnight(eastern) they're fully automated.

Send me an email for more details.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the

Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 50 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

According to the US 101 website (http://www.us103.com/) it's WQUS.

Best guess on Club 93.7 is WRCL, licensed to Frankenmuth, based on a search on the frequency at the FCC (and the ownership being "Regent Broadcasting of Flint, Inc."; apparently they own both stations, as well as two other FMs and an AM ... look at the bottom of http://www.wcrz.com/employment.htm).

Ahem ... I may have been a little hasty in blaming the microwave. I ran it
a few times after midnight (when no other sources of interference are likely to
be running, I hope) a few times, and the signal was unaffected.
However, at varying times in the afternoon, 1:30 pm, 3:30 or 4:00 pm
local time the sound "blinks". A second or two of silence, then the
signal returns for a short time before it blinks off again.
This lasts an hour or two, then all is well again. I'm still
monitoring it, trying to establish a pattern of come kind.

Used the same units when we first went AM stereo in 1984. Was in use till a
new chief engineer arrived with his fancy new processor. We're now using
the Optimod 9100B-2 with the LED metering. If you do look for an optimod,
find a 9100B with the 'real' meters.

Hello,

The CRL chain was always my favorite for AM Stereo, over the Optimod
9100, which favors mono loudness at the expense of stereo quality.
If you are after a clean, smooth sound, I have a few modifications
(nothing major)that help those units.

I'd be happy to share setup tips on the CRL boxes, although it's been
a few years since I had my hands on the set you describe.

Can't recommend anything from own experience, but you'll get a list
with 13 links about Radio Station Automation software (most of them
mentioned in this group over the years) at the URL mentioned below -
search for automation, and limit the search to the category
"Software".

Gee....CRLs. Wow.

Properly set up, I think CRLs can still beat anything currently available. I know I had a couple, a stereo set on both AM and FM (and this before AM Stereo was rype-accepted) and I just killed the competition.

The trick is to work the gain control (as in processing) in such a way that clues are introduced in the envelope which "inform" the listener about how loud the audio was before the CRLs crunched the hell out of it. As such, gating, speed and slope all have to be set in such a way that the audio is loosely, not tightly, controlled, the latter being all to easy to do with the CRL set you have.

Bottom line....the lights need to blink a lot, and only on the loudest sections should they be on all the time. But here's the thing....my settings were never even close to the suggested settings. Those settings are too aggressive, and you can get a result that sounds louder but is less processed if you set it up with finesse, not sledgehammers.

Beyond that, it's still a process of trial and error....if your source material is particularly bright, then you'll want to have less gain on the high band section on the SEC. There's also a lot of fiddling with the NAB filter (in that the curve, and rolloff, need to be respected...don't push the high end too much, 'cos the SMP's going to clip it before filtering).

Good luck. I've really never had anything good to say about Orban products, unless they've been modified or are used very gently as the last box before it hits the transmitter. High priced junk, really.

There's no doubt in my mind that IBOC on AM is, at best, a con. If it works at all, it will be only in the metro coverage, as the digital sidebands, down 39db from carrier if I read the document linked below correctly.

FM won't be much better. If your digital stream is in the noise, it won't be available to the receiver.

It's fairly apparent that most decisionmakers in radio these days don't know what to listen for (otherwise radio would sound better), so when they hear "digital" or "high-definition" (a misnomer if there ever was one) they're all ears and wallets.

Barnum was right. A shame, really. The Canadians have a better way to do it, and it ain't IBOC.

And for what it's worth, so was Nyquist. You can't get 15kHz through a channel only designed to properly sample 5kHz.

For your reading pleasure.....
AM IBOC Standards: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-02-286A3.pdf
FM IBOC Standards: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-02-286A2.pdf

Their format is Spanish.
Also you can check out the campus station at "Southern CT State Univ."
You can go to:

http://radio.southernct.edu/livebroadcast.htm

Let me add that commercials can be scheduled well into the future or
to the next break. Every commercial scheduled has an account# and $
associated to it. At the end of the billing period a separate
printable list can be made for every account/client showing when their
spots ran, which of their spots ran, and the total $.

A remote start for "Live Assist" and Manual Playpack" can be
connected.

There is no satellite receiver interface(yet).
There is no automatic scheduled recording(yet).

The software is not provided on its own. It's to be provided as part
of a computer/software turnkey product.

I agree with your review.

I have BOTH services and ended up canceling XM. Sirius has a far better selection of music.
The only station I really listened to on XM was Ethel, on Sirius they have about 5 Ethels!

I read in the past about Sirius sound quality not being as good as XM, well all I have to say is no way, Sirius has better sound than my XM , its crisp and clean. XM always sounded muffled.

I am so glad I tried out Sirius, it won me over with quality and great music selection.

Amateur Radio Newsline™ Report 1365 – October 10 2003

Amateur Radio Newsline report number 1365 with a release date of Friday, October 10th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Deciding the future of ham radio was not an easy task in Geneva and the problem of Broadband over Powelines continues to grow world-wide. Find out the details on Amateur Radio Newsline report number 1365 coming your way right now.

(Billboard Cart Here)

**

IARU: HOW RADIO REVISIONS CAME TO PASS

The word is out. Some of those who attended last springs World Radiocommunications Conference in Geneva Switzerland are now saying it was not all that easy to reach decisions. Q-News Graham Kemp, VK4BB, has the rest of the story:

--

Just now some of the background work done at WRC-03 is coming to light. The work was intensive. The main conference hall had over 1500 seats, simultaneous translation in 7 languages often more than 10 meetings going on at the same time, distributed in three adjacent buildings.

Some meetings went on till the wee hours of the morning and resumed at the usual time the next morning!

The growing number of completely new radio services clamouring for spectrum allocation, such as for example space borne radars for terrestrial observation, high altitude platforms together with the ever increasing number of new ITU Member States with active participation made the deliberations that much more difficult.

For Q-News Australia, I’m Graham Kemp. VK4BB, reporting for the Amateur Radio Newsline.

--

It was the decisions made at this conference that lead some nations to abandon C-W testing of radio amateurs and also spur the ongoing, world-wide Morse code debate. (Q-News)

**

RADIO LAW: BPL BECOMMING A HOT ISSUE WORLD-WIDE

Meantime, down here in Kiwi-Land as well as around the world, the debate is heating up over Broadband Over Powerline or BPL as its called in North America. This is the technology that claims to provide broadband high-speed Internet services using domestic power lines for system wide transmission and Internet connectivity.

For those not aware, BPL works by injecting the data signal into the powerline near the electricic substation and it travels along the line to the user. In some proposed systems, it interconnects cities using existing long distance power distribution grids.

The problem, of course, is that powerlines are not radio frequency cables. They are not shielded and leak RF energy causing a level of wideband noise in the vicinity of the cable. And as tests conducted by the ARRL have graphically proven, powerlines radiate for long distances.

AC powerlines are a very noisy transmission medium, with spikes and other noise. To make it work, BPL operators have to use higher injection powers to get their data signals to propagate along the cable. Higher injection power mean higher emissions, and this is bad news for all High Frequency radio operators.

By way of example, current proposals in Europe would raise the level of the background noise level on H-F by some 60-70 dB within 3 meters of the cable. Further away, the rise would be less, but still considerable.

Because of this, Broadband Over Powerlines poses a threat not only to amateur radio. Users of many low power devices such as security systems that tag products in shops are very concerned. And High Frequency broadcasters world-wide are fighting to support sensible emission limits for powerline breoadband communications.

But that’s not where it ends. In many places security services are worried. Unfortunately, in some countries, government departments involved in security have been told to not object to BPL as the government policy is to support it.

Civil Aviation communication and aero-navigation can be threatened by BPL. There are reports of an air accident in Canada being directly attributable to interference from broadband cable systems.

And this is only the beginning. New plans for BPL will attempt to use much higher frequencies which could immediately pose a threat to some nations emergency service communications. This is an extremely serious issue for amateur radio world-wide and for other users of the High Frequency spectrum as well. (NZART)

RADIO AIDS: NOAA PROPAGATION SERVICE TO GO QRT

Amateurs around the globe may soon loose the propagation information system operated by the United States National Oceanic and Atmospheric Administration. This includes real time data on the state of the interaction of the earth's

magnetosphere with the solar wind and state of the earth's magnetic field.

These tools have been invaluable to ham radio operators world-wide for many years. The reasons it may be going away? Budgetary cutbacks and lack of future funding. (Published news reports)

**

ENFORCENMENT: HAM REPEATERS ARE NOT FOR BUSINESS

Back in the United States, the FCC has written to a Lakewood New Jersey to ask him why a repeater bearing his his call sign is being used as an adjunct to a business band radio system. The FCC’s Daryl Duckworth, NN0W explains:

--

Duckworth: “Martin Gross, N2DCG, of Lakewod New Jersey, has 20 days to reply to an inquirey about a repeater on 448.825/443.825 MHz and is used as an adjunct to WNVF 627, a business radio system for the Hatzolah Emergency Medical Services, rather than for Amateur Radio purposes as set forth in Section 97.1 of the Commission’s rules.”

--

In a September 11th letter, the FCC notes that Gross’s repeater is not coordinated. (FCC)

**

AT THE FCC: THE FCC's MASTER SEARCH ENGINE

The CGC Communicator reports that there is an obscure but very important search engine at the FCC website. One that allows you to comb through most of the Commission's licensing systems for specific information.

According to CGC, member databases include Universal Licensing System, Experimental, Cable Operations, Mass Media and International Bureau. Queries can be set up by frequency range, state, county, location call sign and licensee name. More information is in the cyperspace address found at http://gullfoss2.fcc.gov/reports/index.cfm or the backup site at http://svartifoss2.fcc.gov/reports/index.cfm (CGC)

**

RADIO LAW: CABLE TOLD TO SOLVE ITS OWN PROBLEMS

FCC Chairman Michael Powell has told the cable industry that it needs to work out its own problems before appealing to regulators for remedies. At a recent appearance at the annual cable sector conference Powell highlighted issues that have driven a wedge between cable companies and local broadcasters. Specifically, the rules that dictate what over the air channels cable outlets must carry on their systems.

Currently, cable companies are required by law to carry local broadcast channels. But broadcasters are also hoping regulators will eventually force cable companies to carry both digital and analog signals during the broadcasters' transition period to all digital transmission. But cable companies argue that if they were forced to carry both a broadcaster's regular analog signal and digital signals, it would significantly deplete their capacity to air other channels. (Published reports)

RESCUE RADIO: ORGANIZING 60 METERS IN VA

Bringing emergency communications to 60 meters is the theme of a new net organized by Virginia RACES, Inc. This, by providing a twice monthly opportunity for equipment tests in the new spectrum asllocation.

The Mid-Atlantic Emergency Net began opeeration on October 1st. It now takes place the first and third Wednesdays of every month at 2000 hours Eastern Time on 5330.5 using upper sideband.

All ARES, RACES and other emergency communications organizations within reliable communication range of the net are encouraged to participate. Liaisons are also invited with similar groups in neighboring states. (Via e-mail)

GETTING YOUR E-MAIL: AOL BLOCKS QRZ.COM

If you use America Online as an internet service provider and are waiting for e-mail or a password from QRZ.com, this is for you. A-O-L has decided to unilaterally block delivery QRZ.com e-mails unless a specific A-O-L user goes to the trouble of unblocking his or her own account.

According to QRZ, they have been getting up to 50 emails a week from America Online users who have not received their QRZ passwords or Links. QRZ advises that it is A-O-L and not them that has placed spam filters on incoming e-mail. To fix the problem, users must log onto A-O-L, go to “SPAM CONTROL” and set it so that e-mail from QRZ.com as an allowable e-mail address.

QRZ adds that it has no other way of sending America Online users a password or log on information as A-O-L has QRZ e-mail filtered out. (qrz.com)

HAMVENTION 2004: YOUR IDEAS ARE SOLICITED

Turning to the convention scene, the planners of Hamvention 2004 are putting out a call to the world-wide ham radio community. They say give us your input

and we will listen.

According to the Hamvention website, those in charge of next years gathering have implemented what they call a new "open door policy.” In other words, they want to hear your suggestions or comments on how to improve their show. They also promise to consider your ideas, discuss them, and implement them if possible.

If you want to help make Hamvention even bigger and better, now’s your chance. Sit down at your keyboard and write the 2004 Hamvention team directly at w-mail to info@hamvention.org. And yes, they promise a personal response to every e-note that’s received. (Hamvention)

**

CONVENTIONS AND HAMFESTS: DENVER COLORADO IN OCTOBER

Still with hamfets and conventions, the Rocky Mountain Radio League welcomes everyone to the 2003 R-M-R-L Hamfest slated for October 18th at the Jefferson County Fairgrounds in Golden Colorado. For more information e-mail Ron Rose to N0MQJ@rose3.com. (Press release)

**

CONVENTIONS AND HAMFESTS: SOCORRO N.M. ON OCT 25

Also, mark down Saturday October 25th for New Mexico’s Socorro Hamfest. Socorro is about 80 miles South of Albuquerque. This year the venue is the Firefighters Training Academy with R-V parking available. For information by e-mail please write to ac5bx@arrl.net. (e-mail)

WITH THE SCOUTS: A SPECIAL ON JOTA

Last reporter Mark Abramovich, NT3V, told you that the 46th annual Boy Scouts of America Jamboree on the Air will take place on October 18th and 19th. Now Mark has prepared a special report that details the Jamboree on the Air and the very unique relationship between scouting and ham radio.

--
AUDIO HERE
--

Mark’s report is our September Newsline Extra. It can be downloaded as an M P 3 file from our website at www.arnewsline.org/quincy. Just scroll down to the bottom of the page, click on ARNewsline Extra, turn your speakers up and enjoy. (ARNewsline(tm))

**

PROMOTING HAM RADIO: JOTA VIDEO NEEDED

Are if you are planning to take part in this years scouting Jamboree on the Air and own a good quality home video camera, your help is needed. As you know,

Dave Bell W6AQ, Alan Kaul W6RCL and Bill Pasternak, WA6ITF, are always looking for good video of ham radio happenings that they might be able to incorporate into a presentation about the hobby. As scouting and ham radio enjoy a very unique relationship, this is an event that is sure to make it into one of their shows, but only if they have the pictures and sound.

Since the Jamboree on the Air happens only once a year, that's where you come in. What's needed are volunteer camera people to take their gear to where the scouts are holding their JOTA gatherings and videotape them in action. Pictures and sound of them setting up their JOTA campsites, ham stations and their on-the-air operations. Also wanted is video of licensed scout hams introducing non-ham scouts to our very special new world of Amateur Radio.

If you can help in this project, or want more information, e-mail the production team to hamvideo@juno.com. (The Producers)

CHANGING OF THE GUARD: DANNY WEIL, EX-VP2VP - S.K.

The changing of the guard in ham radio continues. This with word from the San Antonio Radio Club that Danny Weil, the former VP2VP, has passed away October 3rd at age 86.

Weil is best known for his post World War 2 DX operations. During the 1950's and 1960's Weil took to the ham radio airwaves from numerous exotic locations that he sailed to in a boat named the YASME.

Born in the UK in 1918, Weil had been living in a managed care facility in Texas since suffering a stroke in 2001. But during his lifetime his voyages lead to the setting up ham radio stations on remote islands around the world and contacts with over 100,000 amateur radio enthusiasts. His exploits are credited with giving birth to the terms D-X'er and D-Xpedition.

Weil's adventures and those of the Colvin's -- Lloyd W6KG-and Iris W6QL -- lead to the formation of the famed YASME Foundation that assists DX operations world wide. Services for Weil were held in San Antonio Texas on Wednesday, October 8th.

More about the life and death of Danny Weil is on-liner at http://obit.porterloring.com/obit_display.cgi?id=82269&clientid=porterloring (San Antonio Radio Club, Paul Guido)

RADIO TRAGEDY: HAM KILLED TRYING TO ACTIVATE DX STATION

A ham radio operator has died while trying to put a rare location on the air. RSGB News Reader Jeramy Boot, G4NJH, has the tragic details:

--

We are sad to have to report the death of Richard Baker, M3RWB, who died as the result of injuries sustained while climbing Aran Fawddwy in North Wales. He was intending to activate the summit for the Summits on the Air, or SOTA, award programme.

The Summits on the Air management team has released a statement which says, "Richard was an experienced hillwalker who saw SOTA as a good opportunity to re-ascend many summits that he had climbed in the past. His death is an untimely reminder that while accidents can happen anywhere, the mountains can present special dangers to those who are experienced as well as those new to mountain travel."

Jeramy Boot, G4NJH

--

The Summits on the Air management team went on to stress that in all cases, the safety of those travelling must come above the desire to ascend to the mountain. (GB2RSO)

**

RADIO RECORDS: US TO CZECH REPUBLIC ON 24 GHZ

Shooting for the moon has provided two hams the first-ever United States to Czech Republic E-M-E contact on 24-Ghz. The ARRL Letter reports that Amateur Radio moonbounce and microwave history was made September 24 at 1400 U-T-C when Josef Sveceny, OK1UWA, and Al Ward, W5LUA, completed the 24-GHz EME QSO between the two nations.

Sveceny used a 3-meter Prime Focus dish with 35 watts at the feed, vertically polarized. Ward’s station also utilized a 3-meter Prime Focus dish with but with 70 Watts at the feed. Ward was horizontally polarized to account for the spatial offset between North America and Europe. Previous international 24 GHz EME QSO’s have taken place between the US and Canada, the US and Russia and Canada and Russia. (ARRL)

**

INTERNATIONAL - INDIA: ECHOLINK COMES TO VU

News out of India is that a new EchoLink VHF Repeater has been installed at the Indian National Institute of Amateur Radio. The new system allows local hams in Hyderabad to contact Amateur stations all over the world twenty-four hours a day. According to Jose Jacob, VU2JOS of the National Institute of Amateur Radio, this is the second such repeater to go into service in India. (GB2RS)

**

INTERNATIONAL - UK: RAYNET AT 50

The Radio Society of Great Britain is hosting RAYNET’s 50th Annniversary Emergency Communications Convention in Birmingham, England on Saturday the 25th of October. RAYNET is the U-K equivlant to our RACES an d ARES combined. Paul Gaskell, G4MWO, tells Newsline that in addition to the convention, a special event station will be taking to the airwaves as GB50RAEN. It will be on the air from October 20th till the 31st. QSL’s go via RSGB Bureau. Further information is in cyberspace at www.rsgb.org/emergency (GB2RS)

**

ON THE AIR

On the air, HE2GR is a special event call for the USKA club station HB9GR. It’s on the air to celebrate the 200th anniversary of the Swiss Cantons of St Gallen and Graubuenden. HE2GR will be active on CW, SSB and digital modes until the 30th of December. QSL as directed on the air. (VHF Reflector)

**

DX

In DX, ZL3CW will be active as ZM8CW from Raoul Island in the Kermadecs through the 18th of October. Jack says that he will be there doing maintenance work for the Department of Conservation and hopes to be active in his spare time. This is actually not a DXpedition, but ZL3CW is considered to be one of the better Morse operators and enjoys the challenge of the pile-ups. (Modern DX’er)

And a D-Xpadition to Annobon Island was forced to shut down prematurely. This after authorities ordered operations curtailed on October 4th local time. According to the various D-X remailers, no reason was given for ordering the 3CZ0V ham radio operation off the air. (Via Internet)

**

THAT FINAL ITEM: HAM RADIO AT THE NYC MARATHON

For this weeks final story we turn the ham radio sports page and one of the biggest events of the year thats about to take place. And its Amateur Radio that makes it happen. We have the details in this report:

--

If you want to see a shining example of how valuable amateur radio can be as a public service, look no further than New York City the first week in November. Providing communications for the marathon is no small job. Just ask Communications Director Steve Mendelsohn, W2ML. When the marathon was run back in 1976, 26 hams provided communications assistance. This year, 425 hams will help, and they'll do it using 9 repeaters on 2 meters and 440. Mendelson says it's a source of pride for the ham volunteers who come from across the country:
--
Mendelsohn: “Just like Disney's fantasy land, once you hav e been there you want to come back over, over and over again.”
--

The marathon isn't just for New York area hams. Mendelsohn says amateur radio operators show up from more than half a dozen states to help:

--
Mendelsohn: “We have people coming back from Colorado, coming back from Vermont, from florida. They come in from all over. Seven states, twenty-six miles, no waiting.”
--

New York's boroughs will be flooded with over 30-thousand runners this year. The hams helping will be part of more than 9-thousand people volunteering. How you manage that many people could be a massive challenge -- but Mendelsohn says race organizers figured out how to do it:

--
Mendelsohn: “You break the nets up into sizable chunks. You name a Mile Captain for each of the miles, and the Mile Captain manages a staff of anywhere from 3 to 15 people. Oncve you get further along in the race where there is more of a chance of the runners falling and dropping out because thery are tired, you increase your manpower.”
--

18 net controllers with 2 standby operators will be on duty. Communications start at 3 a.m. race day and go until 6 o'clock that evening. 35 hams will be on hand at the starting line alone. Once the race is done, Mendelsohn says the hams' work doesn't end. For this many runners and their family members to reunite takes up an area of more than five blocks.

Hams help there, too. And they'll tag along not just with race organizers, but with translators who will need amateur radio operators by their side, too. It's a huge undertaking that takes a lot of planning and makes for a very long day. But the hams helping out with New York City's marathon wouldn't trade it, because Mendelsohn says, it's just plain fun.

>From Birmingham Alabama, I’m David Black, KB4KCH, for the Amateur Radio Newsline.

--

For those of you in North America who might want to grab a glimpse of ham radio in action, NBC Sports will broadcast a one hour New York City Marathon highlights show nationwide beginning at 2:00 p.m. EST on November 2nd. Check your local listings for details.

Also, the full interview with Steve Mendelsohn, W2ML, can be heard on this weeks RAIN Report. Its as close as your telephone at 847-827-7246 or on-line at www.rainreport.com. You can find more information on the race in cyberspace at www.ingnycmarathon.org. (ARNewsline(tm))

Not trying to start an argument (really!!) but ***why would a broadcast station even bother with these tests, other than maybe nostalgia or some sort of uber-techno-geekiness on the part of the Chief Engineer or GM*** ?

I don't have any problem with DX tests (in fact, they're kind of neat) but I guess I'm asking what really motivated stations to start doing them way back when ? Sheer curiosity ?

Along the same lines, how many broadcast stations respond to reception reports nowadays ?

Just wondering......

2183. DX tests

Newsgroup: rec.radio.broadcasting

First, the KTNS-1060 test that was scheduled for 10/10 has been rescheduled for 10/18 (Saturday) from midnight-1am PDT (3am-4am 10/19/03 EDT). KTNS's format is MOYL, and some Morse IDs will be played. KTNS would especially like to hear from those in the East that hear their test! You can send reception reports to:

Mr. Larry W. Gamble
General Manager
KTNS-AM
40356 Oak Park Way
Oakhurst, CA 9364

or

email mtkaat@sierratel.com (or see their web page at http://www.ktnsradio.com)

[Moderator's Note: Typo - that zip is 93644. sjs]

AND...

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Saturday, November 1, 2003 - WJNT-1180, Jackson, MS will conduct a DX test from 12:00 am - 1:00 am CST. The test will consist of regular programming (talk programming) and Morse code IDs. WJNT will be operating with 50 kW non-directional.

Reception reports(with return postage) may be sent to:

Stan Carter
Chief Engineer
WJNT-AM
P.O. Box 1248
Jackson, MS 39215-1248

WWW: http://www.wjnt.com
E-Mail: slcarter@wjnt.com

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your

report...

Lynn.

From: Colin <cb@myisp.com>
Message-ID: <bmncj2$l9n$1@xuxa.iecc.com>
Source record: 6815

>From Canada, when trying to tune in a weak signal from the USA to get National Public Radio I find that at night and on cloudy days the signal is clear and fine. I am using a Showgun TV antenna and amplifying it through a Trisonic 10db 10-900 MHz box.

On bright sunny days, at about 10 am when the sun is rising higher in the sky the signal gets
gradually worse until there is so much interference that the signal is as good as lost. In the evening it comes back and is clear again. It appears to affect only weak stations, the local stronger stations have no interference.

Can anyone tell me what may be triggering this noise? Is there anything I can do about it?

Thanks

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

> that plays music from the UK and around the globe I immediately got xm this
> past friday. I love it!!! One of the best gadgets I have ever bought!
>
> Candy

I think it's the better choice of the two. I've had XM for about
four weeks, and the AM/FM radio is almost never used now, except
that I've connected the XM unit to its auxiliary so as to feed XM
into a radio in the kitchen so as not to miss anything!
I'd recommend XM to anyone wondering about going in for satellite
radio. (No, I have no connection with them: just a customer).

Cloud bounce, or atmosphere bounce. I used to get 102.3 from Cape May NJ in certain parts of Baltimore in the 7am-9am range during days with foggy mornings. As the fog burned off the reception vanished.

Regards,

Ty Ford

RESTRUCTURING: MORSE CODE AND THE FCC - ROUND II

Well we told you it was going to happen and it has. We are talking
about the next round of rule making requests to the FCC on the topic
of what to do about Morse code testing. Most of this group want to
keep some form of CW test. Amateur Radio Newsline's Bruce Tennant,
K6PZW, takes a look at what the FCC wants you to read and comment on:

--

If you were not happy with the first round of Morse code rule making
requests, maybe you will find something more to your liking in this
latest batch of seven that the FCC has released for public comment.

We have already covered the most prominent of them. That being the
one from FISTS -- the international Morse code preservation society.
FISTS wants the code retained and all aspects of the ham radio exam
process made allot tougher. And in this area, FISTS is not alone.

In is petition, Frank Napurano, K2OKA, calls Morse the purest, most
accurate, efficient, reliable and economical form of radio
communications ever devised. He tells the FCC that its essential to
keep at least the current 5 word per minute CW test in the interest
of public safety, the preservation of a radio art and as a tribute of
support for a prized and respected avocation.

Also in favor of keeping some form of Morse exam is the Puerto Rico
Amateur Radio League. While it wants the FCC to do away with the
current 5 word per minute test for General class it says to keep it
for those going for an Extra ticket.

James Roux, W4YA, wants the FCC to eliminate the 5 word per minute
code test for a General class license, but like the Puerto Rico
Amateur Radio League would require Extra class applicants prove they

can do Morse at 15 words per minute. Roux also wants to cut the number of licenses to only two. Under his proposal nobody would loose current privileges but only the General and Extra class would continue to be issued.

Meantime, Robert Rightsell, AE4FA and Harry Kholer, NZ0PU also want 5 word per minute Morse testing continued but would institute a points score system for passing a ham radio exam. Under the Rightsell / Kholer plan, an applicant could earn up to 24 points on Morse testing.

And Joseph Speroni, AH0A, has a novel idea. Only test hams in Morse who want to use the mode. Speroni would have the FCC delete the CW exam for those who want to operate only phone. If a ham wants to operate High Frequency Morse, Speroni says they should pass the current 5 word per minute exam.

Last but by no means least comes Charles Young Jr, AG4YO. He is asking the FCC to delete the 5 word per minute Morse exam for the Technician Plus license, but keep it as a requirement for General and Amateur Extra exams. And like the other petitioners, Young has some specific ideas regarding other aspects of ham radio licensing as well.

These seven petitions have been designated as RM 10805 through 10811. Commentary cutoff on all of them is Friday, November 7th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

You can comment on one or all of these rule making petitions by taking your browser to the FCC Electronic Comment Filing System. Its in cyberspace at www.fcc.gov/cgb/ecfs. (ARNewsline™ from FCC website)

**

RESTRUCTURING: QRZ SAYS KEEP THE DISCUSSION ON TRACK

In a related story, the operators of the QRZ.com website have drawn a proverbial line in the sand. They say that any attempts to take a Forum discussion that is not directly related to the code versus no code debate and turn it into such will result in those posting being removed. The operators of the website say that this is not a stance by QRZ.com either for or against Morse code. Rather it is a their way to keep a given subject being discussed on track. The QRZed website is in cyberspace at www.qrz.com. (QRZ)

**

RESTRUCTURING: PNG GOES CODE-FREE

I'm Don Wilbanks, AE5DW, with breaking news out of the South Pacific. Dateline Papua New Guinea where that nations Telecommunications Administration, PANGTEL, has declared Papua New

Guinea to be the latest nation to become code free. This as it orders the deletion of Morse Code from the qualifications necessary for its amateurs to have access to the High Frequency bands.

According to Rick Warnett, P29KFS, the decision to drop Morse was actually made back on June 10 th but not widely publicized until now. June 10 th was before the 2003 World Radiocommunications Conference that decided Morse testing was no longer mandatory world wide and retaining it would be the decision of each individual administration.

Warnett, who is the IARU representative for the Papua New Guinea Amateur Radio Society says that the official announcement will take place within the next few days. When it comes, Warnett says that some 30 to 40 new Papua New Guinea full call hams will have international communication available to them. (Q-News)

**

DX PROBLEMS: A FOLLOW-UP ON ANNOBON ISLAND - 3C0V

A little more information has surfaced on why a long awaited Dxpedition suddenly left the air. Jeramy Boot, G4NJH, has the details:

--

The Spanish and German group that had been operating as 3C0V from Annobon Island off the West Coast of Africa were forced to close down early in the morning of last Saturday, the 4th of October. The DXpedition was scheduled to have continued until the 10th of October.

Gabriel 'Gaby' Mardiros, OD5NJ, the 'pilot' for the 3C0V DXpedition, says that the group is "fine" but that they had received "a serious warning not to use any of their radios". The reason for the enforced closure was not yet known."

--

Some reports indicated that local authorities had given the DXpeditioners less than 24 hours to pack up and get off the island. More on this story as information is made available. (GB2RS)

**

**

WRTC: 2006 GAMES IN BRAZIL

It has been announced that the next World Radiosport Team Championship, or 'WRTC', will be held in Brazil in 2006. The last WRTC event took place in Finland in July last year.

WRTC brings together the top HF contesters from all over the world to compete on - as far as is possible - a 'level playing field'. WRTC 2006 will take place in Florianopolis, capital of Santa Catarina State in southern Brazil. The event is open to everyone: competitors and spectators alike.

I'm Jeramy Boot, G4NJH, in Nottingham. (GB2RS)

**

RADIO RULES: WORLD'S BROADCASTERS JOIN ANTI-BPL CHORUS

A subcommittee of an International Telecommunication Union panel of technical experts responsible for terrestrial broadcasting issues has joined a growing chorus of concerned parties about the interference potential of power line telecommunication. According to the ARRL Letter, ITU Radiocommunication Sector Sub Working Group 6E1 has been looking at BPL. Now it has expressed the view that interference produced by systems employing powerline data transmission as well as by Industrial, Scientific and Medical equipment and short-range devices, will compromise broadcast reception. (ARRL, CGC)

**

RESCUE RADIO: BPL VS. FIRE RADIO COMMUNICATIONS

Meantime, hams who are also firefighters or have access to the local fire Department should consider enlisting their help in fighting the rollout of Broadband over Powerlines. This, due to the heavy use of the 33 and 45 MHz radio bands by fire departments.

Writing to the QRZ.com super site, Jim Walsh, K3JIM, says that some fire departments are not technically savvy and think that interference is really blind spots in the radio coverage. Walsh, who is a firefighter and truck engineer Red Lion, Pennsylvania, says that broadband interference is not easily recognizable to fire personnel as say an interfering DX station may be to the trained ear of a ham radio operator. He says that the fire service is used to dead spots and may not know why they exist.

Walsh cites one situation in the area where he lives and works. He says that it is well known that when in the vicinity of certain gas station convenience stores in his area that one cannot use the radio for a few hundred meters. He says that in this case the problem is the Point of Sale system that records the gas transactions and that the lines running to the pumps are not shielded and radiate computer hash like an antenna.

K3JIM has lots more to say about the problem BPL can be to low-band fire radio systems. You can read it all on line at www.qrz.com (K3JIM via qrz.com)

**

ENFORCEMENT: YOU ARE NOT SUPPOSED TO OPERATE THERE

In regulatory news, two hams have been asked to explain why they have been heard operating on law enforcement frequencies. The FC's Daryl Duckworth, NN0W, has more:

--

Duckworth: "Tom Christman, KB2NAV, of Albany New York, has received an inquirey as to operations on the Albany County Sheriff's Department emergency frequencies without legitimate purpose last December.

Along similar lines, Joseph Hutchins, KG4SXD, of Swannanoa, North Carolina, is being asked about operations on police frequencies in February of this year. That of the Black Mountain Police Department in Black Mountain North Carolina."

--

Both hams were given 20 days to respond to the FCC's query. If the agency finds that rules have been violated, each ham could face a fine of $7,500 to $10,000, license suspension and revocation.

**

ENFORCEMENT: AMATEUR TOLD TO KEEP HAM GEAR OFF CB

The FCC has written to James Perryman, KC8KOU, of Toledo Ohio. This, regarding continued complaints involving his alleged operation of non type accepted radio gear on the 11 meter band. Again, the FCC's Daryl Duckworth, NN0W:

--

Duckworth: "The letter went on to say that the operation of non-certified equipment on CB frequencies, such as Amateur equipment and linear amplifiers will result in a monetary forfeiture in the $7500 to $10,000 area, as well as the in-reim seizure of all non-certified equipment in cooperation with the United States Attorney in his jurisdiction."

--

The FCC also told Perryman that his station is subject to inspection at any time by Commission personnel.

**

ENFORCEMENT: YOU CANNOT SAY THAT ON THE RADIO

Meantime, Federal regulators have announced plans to fine a Detroit radio station $27,500. This, for an allegedly indecent broadcast on a popular afterboon show back in January of 2002.

In a Notice of Apparent Liability to Monetary Forfeiture, the FCC said a broadcast on Infinity Broadcasting's WKRK-FM included explicit and graphic sexual and excretory references during separate discussions with nine separate people. Such language is banned under FCC rules.

Infinity was given 30 days to contest the notice. In earlier filings with the FCC, the company argued that no penalty could be assessed. This is because Infinity believes that the FCC's definition of indecency is unconstitutional.

**

ENFORCEMENT: LA REPEATER OWNERS ORGANIZE AGAINST ALLEGED UNLICENSED OPERATOR

Repeater owner operators in the Los Angeles Californias area are taking action to keep transmissions allegedly coming from Jack Gerritsen, the former KG6IRO, from being retransmitted. In are rare show of cooperation, system owners and their control operators are taking repeaters off of the air rather than permit the signals from a station identifying with the call sign KG6IRO call sign from being rebroadcast.

If the name Jack Gerritsen sounds familiar its because we have reported on hin several times before. Gerritsen was licensed for a very brief period back in 2001. His ham ticket was set aside by the FCC's Wireless Telecommunications Bureau after the agency learned that Gerritsen had been convicted in 2000 on charges of interfering with Los Angeles Police Department radio transmissions. Gerritsen recieved a jail term for the interference conviction. He was paroled but sent back to prison after allegations surfaced that he had been operating a radio transmitter without a license. He was released before serving his full sentence as the result of a Federal court order dealing with overcrowding in California state prisons. His application for a ham radio license remains in the FCC's pending file and a hearing on the matter will be scheduled at some future date.

Be that as it may, Los Angeles area repeater owners are not waiting for the FCC to move in the matter. They have taken matters into their own hands and are acting to keep the signal claiming to be KG6IRO from being repeated. (ARNewsline™)

HAM RADIO BUSINESS: 73 MAGAZINE FOLDS

73 Magazine is the latest casulty in the weak world-wide ham radio business economy. On Monday, October 6th, founder Wayne Green, W2NSD, e-mail several friends to tell them that 73 Magazine has

ceased publication after completing 43 years.

The reason for 73 going away? Green claims that the hobby is slowly dying as a result of a lack of new hams. In turn the the industry that supports Amateur Radio is fading away as well. Green says that without sufficient advertising the magazine couldn't continue.

--

Green: "The book sales have kept 73 going for the last few years, but book sales have dwindeled way, way down and there was no way to keep 73 going. The ad sales are down and the reciepts from the ad sales are down even weorse than the ads."

--

W2NSD says that it was an interesting 43 years and that he hopes to write about it some time. In the meantime he plans to continuing his essays on his website for those subscribers who mainly bought the magazine to read them. Thats in cyberspace at www.waynegreen.com.

No word what will happen to those with outstanding subscriptions to 73, especially hams who bought lifetime subs at a bargain price when the magazine first started up. Green always said it would last through his lifetime or that of the purchaser, but it looks as if W2NSD and a number of lifetime subscribers may have outlived 73. We expected it of Green. His phonetics are W-2-Never-Say-Die.

You can hear W2NSD talk about the demise of 73 on this weeks RAIN Report. Its available on-line at www dot rainreport dot com or by telephone at 847-827-7246. (ARNewsline™)

**

HAM RADIO BUSINESS: NEW KIDS HAM RADIO MAGAZINE TO BE PUBLISHED

If the ham business is as bad as Wayne Green says, you would not know it by Larry Mahlberg AA0BY. As 73 sails into the sunset, Mahlberg has announced his own new ham radio magazine targeting the younger generation.

According to Mahlberg, he and his crew are putting together a brand new monthly publication called "Hamtastic Kids" that will debuet on November 15th and be available by subscription. To get it started, AA0BY is asking your help by submitting material for publicatoon such as Amateur Radfio poems, stories, puzzles and even ham radio recipes. He is also looking for articles written by kids on such topics as Morse code, DX'ing, ragchewing, fox hunting, contesting and hamfests.

But thats not all. The Hamtastic Kids is offering a free years subscription for best logo that a youngster submits for use in the Magazine. Submissions of logos, articles and information requests go to Hamtastic Kids, in care of Larry Mahlberg, AA0BY, P.O Box 1634

Eugene, Oregon, 97440 (W8HDU)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RESCUE RADIO: APRS JOINS THE CHARLES REGATTA

Almost two decades after it was developed by an Amateur Radio operator, Automatic Position Reporting System equipment is being used for the first time by the hams on board the rescue launches at the Head of the Charles Regatta. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--
Bob Bruninga, WB4APR, is considered the father of the Automatic Position Reporting System thats known in ham radio circles by the acronym of four letters APRS. And from October 17th through the 19th a team of up to 30 operators will be on the air using it and other modes to operate a safety communications net for the annual Head of the Charles Regatta.

According to Bruce Pigott, KC1US, the addition of APRS is very significant because it allows automatic tracking of a ham radio station by sending Global Positioning Satellite information along with the voice or other data on the radio signal. This should permit precise dispatch of land and river emergency units to rendezvous with the launches.

KC1US says that communications coverage begins three hours before the first race on Saturday and an hour before the first race on Sunday. This, will allow medical and public safety communications coverage of practice runs and gathering crowds of spectators.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

This year's communications support covers all aspects of the regatta. This includes preparations, practice and competition for all three days of the event. (KC1US)

**

HAM RADIO CONFERENCES: SVHFS IN GEORGIA IN 2004

The 8th Annual Southeastern VHF Society Conference will be held in Georgia on April 23 and 24, 2004. This, at the Holiday Inn Hotel & Suites in Marietta on the outskirts of Atlanta. More information will be posted the Society webpage. The u-r-l is www.svhfs.org. Qustions go by e-mail to rover@wireco.netb (SEVHFS)

**

HAM RADIO IN SPACE: VU-SAT LAUNCH DELAYED

Turning to ham radio in space, the expected launch of India's VU-Sat has been delayed indefinitely. The AMSAT News Service quoting a release from the launch agency says that during the thermo vacuum test deviations in the performance of the ham radio payload were. Because of the need to correct these abnormalities, the launch will take place at some later date. VU-Sat was to be a passenger with a remote sensing satellite being orbited onboard from Sriharikota launch range later this month. (AMSAT)

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-40

AMSAT is sponsoring an AO40 Birthday Bash to celebrate the satellites 3rd Birthday. The party continues through November 17th. Email Bruce Paige, KK5DO, for more details. His e-mail address kk5do@amsat.org (AMSAT)

**

INTERNATIONAL - GERMANY: DL3KWF RESIGNS AS DARC VP

On the international scene, word from Germany that Hardy Zenker, DL3KWF has resigned from his post as Deutscher Amateur Radio Club vice president He has been replaced by Ingobert Dittrich, DK9MD, who was elected to the post. Dittrich is well known as a former representative of the broadcasters to numerous committees across Europe. The Deutscher Amateur Radio Club which is Germany's natioonal ham radio society holds elections every two years. (DARC)

**

INTERNATIONAL - HOLLAND: ARTIFICIAL BROADCAST ISLAND TO DISAPPEAR

A significant piece of Dutch broadcasting history may soon cease to exist. Media Network reports that the Hollands Department of Public Works has announced its decision to dismantle the artificial platform in the North Sea known as R-E-M Island. The island was constructed in 1964 at a cost of 9 million guilders by a team of entrepreneurs who used it to broadcast radio and television programs to the Netherlands under the name Radio Noordzee and TV Noordzee.
The full story is on-line at http://www.rnw.nl/realradio/features/html/rem031009.html (Media Network)

**

INTERNATIONAL - BRAZIL: CELEBRATING SCOUTING ON THE AIR

And Brazillian club station PY3ARD is on the air as ZW90S for the renmainder 2003. This, to celebrate the 90th anniversary of the Gerge Black Scout Group which happens to be the oldest Scout Group in Brazil. According to the RSGB, the ZW90S call will be aired for the first time during the upcoming CQ World Wide contest. If you work it, QSL via PY3ARD. (G2RS)

**

ON THE AIR: W6AQ AND K6IPV TO RAROTONGA OCT. 21

Hollywood producer Dave Bell, W6AQ and his close friend Don Lisle, K6IPV are headed to Rarotomga. This for a combined mini-D-Xpedition and contest operation. The pair will arrive on the island at about 9:00 PM local time on October 20th. They hope to be on the air by the afternoon of the 21st operating mostly SSB with some CW and possibly RTTY and PSK-31.:

--

Bell: "They will hear us calling CQ on whatever the highest frequency where there is propagation which is going to be during the daytime perhapps 10 meters; 15 meters hopefully and 20 meters certainly. Nighttime we will probably be dealing with 20 meters, 40 meters, 80 meters and perhapps even 160 meters. We will see if we can talk to anybody on that band."

--

Bell will operate as ZK1AQT and Lisle will be on using ZK1IPV. Both will be on as ZK1SSB for the CQ World Wide SSB Contest and will tear everything down on the afternoon of October 28th. Their QSL Manager is Norm Friedman W6ORD whose address is good in just about any Callbook. (ARNewsline™)

**

DX

In D-X, TM9AF will be on the air through October 26th to celebrate the 25rh anniversary of the Auxerre Ham-Expo. About 20 operators will be on the air with the special callsign on 160 to 6 metres using CW, SSB, PSK, RTTY, and Slow Scan TV. They will also operate 2 meters to 1.2GHz on CW, SSB FM, RTTY, and ATV. If you make contact, Q-S-L as directed on the air. (GB2RS)

Stefano Frau, IS0WBT, says by way of e-mail that special event station ISZ0A will be on air during the upcoming CQ World Wide SSB contest. This on the on 25th and 26th of October. Stefano says that the operation will take place from Mt. Cresia in grid square JM49QG. Operation will be in the multi-multi catagory and the operators will

be looking to talk to all of you. QSL direct to IS0MYN. (GB2RS)

**

THAT FINAL ITEM: DUTCH STUDY SUGGESTS ISSUES ACCOMPANY 3G CELL STATIONS

And finally, can cellular telephones make you more alert? Some researchers in the Netherlands think so. Bill Pasternak, WA6ITF, has more:

--
A study by Dutch researchers has found some interesting side effects from certain cellular telephone base station radiation. Initial results show that electromagnetic energy transmitted by base stations for the new third generation or 3 G wireless networks caused subjects in double-blind test groups to experience tingling sensations, get headaches and have feelings of nausea. On the other hand, when the same subjects were exposed to signals from current mobile networks, no negative impacts were found.

But here's the kicker. When the same people were exposed to both types of fields -- that being 3 G plus current networks -- cognitive functions including memory and response times showed measurable improvement. Put simply, the subjects became more alert when exposed to both fields. The report did not discuss the modulation schemes nor the specific RF power densities that were involved in the study, and obviously allot more research needs to be done before anything conclusive can be known.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

Now it has to be pointed out that these are early results. As such, while they are interesting, are yet to be confirmed. You can read more in cyberspace at www.msnbc.com/news/974005.asp (CGC)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Ken Butler, W1NNR, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

2196. DX tests Summary

Newsgroup: rec.radio.broadcasting

For anyone interested, here's a reminder of upcoming DX tests; if anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Sunday, October 19, 2003 - KTNS-1060, Oakhurst, CA 12:00 am-1:00 am PST (3-4am EST).
E-mail: mtkaat@sierratel.com
WWW: http://www.ktnsradio.com

Saturday, November 1, 2003 - WJNT-1180, Pearl, MS 12:00 am-1:00 am CST (1-2am EST).
E-Mail: slcarter@wjnt.com
WWW: http://www.wjnt.com

Please remember, what's listed as being on, say, Monday *may* be what you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting
me know, and please, drop the station personnel a note, via e-mail or snail
mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

Maybe there's an intermittent connection that's worsened by the
heat of the sun (when heated, most metals tend to expand. This might
be partially loosening a connection to, or even within, the antenna,
causing the signal to weaken).

2198. CCA Radio Transmitter Parts

Newsgroup: rec.radio.broadcasting

Thank you for the feedback on this issue. Here are some more discoveries:

The power supply for this radio is a 175 watt inverter powered from a 12 volt battery, which in turn is charged by a set of solar panels, the charge from which is regulated by a Morningstar Sunsaver charge controller. If I unplug the radio from the inverter and plug into the regular power supply from the grid, the noisy signal becomes clear. Additionally, after I unplug from the inverter, for a second or so as the fields in the system die down the signal becomes clear before the radio stops working.

This seems to indicate that the antenna is ok, and that the interference is in the solar system somewhere, but not the inverter (otherwise the night time reception would be bad) but perhaps the charge controller is having an effect on the Trisonic amplifier?

2200. FAQ: Old Time Radio (OTR)

Newsgroup: rec.radio.broadcasting
Date: 2003-10-25 20:13:32 UTC

The Official Old-Time Radio (OTR) FAQ
Frequently Asked Questions (FAQ) File
for OTR
(Old-Time Radio)

Last Modified: Monday, September 25, 2003

---------------------------------------------------------------------
Copies of this FAQ are distributed quarterly to rec.answers,
rec.radio.info, rec.radio.broadcasting, rec.antiques.radio+phono and
other news groups; and are on file at bloom-picayune.mit.edu in the
file: /pub/usenet-by-group/news.answers/radio/old-time-faq or
http://www.faqs.org/faqs/
The most recent HTML-ized version is at
http://www.old-time.com/otrfaq.html

---------------------------------------------------------------------
Table of contents:

Q01. What is "OTR"?
Q02. You haven't mentioned OTR music, why not?
Q03. Where can I buy recordings of old radio shows?
Q04. Which vendors have (lower prices) (higher quality) (faster
response)?
Q05. Are OTR shows rebroadcast? If so, where and when?
Q06. I remember a great show called (x). When was it aired?
Q07. Are there any books about OTR?
Q08. Does anybody trade tapes of OTR shows?
Q09. What's this stuff about Copyright?
Q10. How can I get my local radio or TV station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the plots or
themes of OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
```

Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. What ever happened to the person that played [insert character] on [insert name of show]?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. (deleted)
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. (Deleted)
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at\ the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?
Q42. Where can I find OTR to download?
Q43. I bought some CDs with OTR MP3s. Some of the programs sound pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html

---

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

Just to get a little perspective in this
controversy, copyrights do expire. Under the old
copyright law, a copyright was good for 28 years
from the date of first publication, renewable for
another 28 years, for a total of 56. Under the 1976
act, those copyrights were extended to 75 years,
provided they were renewed. Copyrights under the new
law, which took effect on 1 January 1978, are good
for the life of the author plus 50 years. Copyrights
on anonymous works, works made for hire, etc. are
good for 75 years after first publication.

So, since otr has just barely been around for 75
years, little or none of it is in the public domain
yet by reason of having been around for a long time.
The question of what constitutes publication, and
the fact that sound recordings could not be
independently copyrighted until the new law took
effect add additional complications.

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

The days of radio being ruled by the artisans is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors

on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.

The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.

Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!

Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!

You need to keep in mind that some types of stations are more likely to air OTR than others. If your local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog)

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

Also check Frank Passage's logs at the old-time WWW site; most contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The major OTR WWW sites all have links or pointers to each other, so you can explore many topical areas within old time radio. Good places to start exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

An excellent database of OTR-related WWW sites, with an explanation of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very popular and freely available electronic newsletter, delivered nightly. Its purpose is to foster general discussions about the hobby of collecting, preserving and listening to OTR. To subscribe, send an email

TO: old.time.radio-request@oldradio.net
SUBJECT: subscribe
(The body of the message is ignored)

Q18. What ever happened to the person that played [insert character] on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home pages of several well-known OTR personalities. Also check the Where Are They Now pages at www.440int.com.

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in

the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: andy@vintagebroadcasts.com (Andy Blatt)

I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But

not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request

to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it is
played. I tried it. Although temporary, it does indeed work! I'd
recommend it for those squeaky tapes that you wish to re-record onto
newer reels.]

Richard Fish (lodeston@bluemarble.net) also left this helpful info
about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the magnetic
particles to the plastic backing -- has absorbed water
from the air. The water molecules actually make the tape
expand a bit, so it doesn't fit the machined tape-guides
properly anymore; and they can interfere with the
lubrication impregnated into the tape; and it is theorized
they can even interfere with the polished smoothness of
the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70s, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-'80s. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono news group, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) - Focuses on radios, phonos, and related materials made before the 60s - Avoids "ham" radio gear (the Boat Anchors group covers that) - Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through the old-time WWW site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

---

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios.

Some readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Some pointers to instructions on how to build them are at http://www.old-time.com. Also, Dan Hughes (dan@soltec.net) left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, visit my website
at http://members.soltec.net/~dan

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164

Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you.

Here is a list of some of the WWW sites for modern audio drama:

Jim French Productions (Imagination Theatre):
http://jimfrenchproductions.com/
Atlanta Radio Theatre Company:
http://www.artc.org
ZBS Media:
http://www.zbs.org/zbs.html
LodesTone Productions:
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop:
http://www.mrtw.org/mrtw

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

end

Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system. There is also a news group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR shows (news groups are notoriously inefficient at transferring large binary files, however).

You can select from many moderate-length soundbytes at Jerry Haendiges' Preview Listening Lounge at www.otrsite.com/ra/preview.html
---

Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.
[Polyline has a website at www.polylinecorp.com, and their new address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

(Q27. deleted)

Q28. I am interested in re-creating some OTR drama. Where can I get scripts?

A28. Check your local or national OTR clubs. Many have a "print library" that includes scripts. You can also point your browser at the University of Maryland's script page, at www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

One excellent source is the book. "One Hundred Non-Royalty Radio Plays" compiled by William Kozlenko, Greenberg Publ of NYC 1941. It's certainly out of print now, but many libraries would have a copy. I bought mine at a used book store a few years ago. The 100 radio plays in the book include adventure, mystery, fantasy, comedy and historical. Most were originally produced on educational stations in the 30s. Authors include Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages dedicated to on-line OTR scripts at http://www.genericradio.com
---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970s & early '80s when most collectors traded on open reel tapes which were quarter-track mono -- there were different (separate) programs on left & right channels. This allowed 6 hours of shows to be placed on one reel. Unfortunately, many collectors would duplicate L & R shows simultaneously. Depending on the quality of the

equipment (and its condition) it was common for one
program to bleed into the opposite channel...especially
if the collector was careless and allowed over-modulation.

Crosstalk results when a tape is recorded (or played
back) on a machine with mis-aligned tape heads. It can
also occur when trying to record over a 1/2 track
recording with a 1/4 track machine with dirty or
mis-aligned erase head. You usually will hear another
program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or
track at a time. As for crosstalk, make certain your
machines are kept in proper alignment. Use a high quality
BULK ERASER if you re-use old tapes... this is especially
true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws
once they are there.

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet
every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the
StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please
get software and instructions from your favorite Internet Service
Provider or shareware/freeware software site, or connect to
www.old-time.com/irc.html for basic instructions.

(Q31. Deleted)

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since
many news servers ignore alt.groups, you may need to contact your ISP
to get that news group listed locally. See
www.old-time.com/newsgroups.html for more information. Also try
www.groups.google.com to sample some of the messages.

Q33. OTR network shows were usually heard at the same local time, no
matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show
from the studio to transmitter sites. The show was done live at least
twice - once for the East coast, once for the West. After Bing Crosby
spearheaded the introduction of recorded shows (about 1948), the East
coast show was recorded for later telephone transmission to the West
coast.

Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed on pieces of processed dead tree) written about what we now call "OTR". See answers A7 and A37. If you would like to contribute an original article about one or more facets of OTR, many of the webmasters of on-line OTR sites would be happy to consider archiving it.

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
* Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
* Radio Classics Live, Brockton MA (May)
* Annual Lum and Abner Society Convention (June)
* REPS Radio Showcase (June)
* Friends of Old-Time Radio (October)
* SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy

them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material.

Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.

Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees, Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter. You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)

It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional

clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money than with the entity which has done more for the physical preservation of broadcasting history than any other organization in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless to say, you may not make any commercial use of the recording in whole or in part -- and you had to sign a contract to that effect in order to get access to it. Commercial permissions are a whole separate case.

Like I said, this is not for everyone -- but if you're working on a serious project, it can be a valuable resource for getting access to material that simply isn't available anywhere else and which is unlikely ever to be released on the commercial market.

Elizabeth

Q42. Where can I find OTR to download?

A42. The number and location of FTP sites that provide OTR changes more rapidly than does this FAQ. Your best bet is to check the backissues of the various alt.binaries.sound(s).radio.oldtime groups on USENET.

Hint: point your browser to www.groups.google.com and try your search from there

---

Q43. I bought some CDs with OTR MP3s. Some of the programs sound pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

A43. Wow. The answer to that question could fill a whole FAQ by itself. I'll try to keep it short.

Poor-sounding audio can be due to several causes. The audio on the tape from which the MP3 was made could have been poor, or the person that converted the analog audio to digital audio could have done a bad job. The statement: "remastered to digital audio" doesn't mean much, if the person doing the remastering does not pay attention to enhancing the source material.

MP3 and other digital compression techniques are lossy. That means the encoding process throws away data in order to make the file smaller. Although digital copies may not have noticeable loss, re-encoding, or encoding in a different digital format will lose even more data. Example: If somebody took a 32/22 MP3 and encoded it as a 64/44, it would sound no better than the 32/22, since data was lost in the original encode. Similarly, making a 128/44 MP3 out of an old, high-compression RealAudio(R) file would not improve the sound. The advantage to the higher bitrate is the possibility that the new encode will play in a larger number of MP3 players.

Some people record their RAs or MP3s onto cassette, and then trade the cassettes. At some time in the future, somebody else might try making an MP3 from the cassette. This analog - digital - analog - digital conversion results in a very quick deterioration of the sound because of the lossy compression I mentioned before. The new encode is a "sample of a sample". The sound deteriorates much more rapidly than does the "generation loss" experienced when duplicating tapes.

How can one tell if an MP3 was originally made with a high bitrate, or merely upsampled to a high bitrate? Listen to it, and compare it with a low bitrate sample. After all, the objective is to get as good an audio rendition as possible.

NOTE: URLs mentioned in this FAQ may have changed. For the latest information, point your browser to www.old-time.com, or join one of the internet mailgroups mentioned above. Email addresses listed here may have changed as well.

If you find errors in this document, please report them to faqmaintainer@old-time.com, with Use the title "FAQ Error" to pass spam filters.

10:30 Oct 19, '03

(IsraelNN.com) The weekly cabinet meeting began a short time ago. One of the items on the agenda is the proposed Pirate Radio Station Law, making it illegal to pay for advertisement on a pirate (illegal) station. According to the law, anyone advertising on a station would be hit with a stiff fine.

The supporters of the law, Shinui party ministers, are confident that by eliminating income from sponsors, the illegal stations will be compelled to close. Shinui ministers insist their agenda is not targeting the many Orthodox radio stations or Arutz-7, but aimed at eliminating the radio broadcast interference with airport control towers, the result of the illegal broadcasts.

Ministers Benny Elon and Effie Eitam have expressed their opposition to the proposed law.

Here's the results of the most recent DX test that have been received here:

Sunday, October 19, 2003 - KTNS-1060, Oakhurst, CA 12:00 am-1:00 am PST (3-4am EST):

This time, the test was heard mainly by those in the west, but there WAS a reception as far east as IL! Hearing the test were Bob Karchevski of Sunnyvale, CA, Frank Aden of Boise, ID, Bob Pietsch of Foster City, CA, Patrick Martin of Seaside, OR, and Neil Kazaross in Barrington, IL! Rick Dau in Omaha, NE metioned that he thought he might've heard some brief, weak code from the test, but there were a lot of mixing products and images interfering with his reception. Les Rayburn in Helena, AL (near Birmingham) also thought he might've heard KTNS, but after a careful review of a tape of the DX test, he decided that he did not successfully receive the test.

Also, there were those reporting that they tried for the test but weren't able to hear it; these included Saul Chernos in Burnt River, ON, Adam Myrow in Memphis, TN, Pete Dernbach in Manchester, MO (outside St. Louis)(Pete DID, however, pick up a 31-watt station from MS!), Gerry Bishop in Niceville, FL, and Chuck Boehnke in Keaau, HI.

That's all for now...

Lynn.

For anyone interested, here's a reminder of upcoming DX tests; if anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Saturday, November 1, 2003 - WJNT-1180, Pearl, MS 12:00 am-1:00 am CST
(1-2am EST).
E-Mail: slcarter@wjnt.com
WWW: http://www.wjnt.com

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

Sirius blows, and every audio magazine out there agrees. Sirius is heading for Chapter 11, while XM is about to pick up its 1,000,000th customer.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I'm guessing that the inverter or charge controller are throwing out RF noise that's interfering. Since it's "heliotropic," maybe the latter. Have you tried unplugging the solar cell from the charge controller during the day and seeing if it clears up? If not, give it a go and see what you learn...

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the

Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

You know, I've been listening to Toto's cd "Mindfields" from 1999. This cd is every bit as good as their Emmy Award winning album "Toto IV" from 1982. Why didn't this cd get airplay? The only reason I was able to hear the Mindfield cd was via MP3 file sharing over the Internet, and now I'm buying the CD.
Are the classic rock stations so deaf to new rock they won't play the same style of music unless it's at least 20 years old? Are tone deaf street thugs from the slums of L.A. who can't even play any instruments really that interesting?

-Michael Rawls

3 MX5050 BIII machines available, your choice, $200.
All have NAB hub adaptors, one has the roll-around stand.

1 MTR-10 with hub adaptors, $400.

1 MTR-15 in roller stand, recent service check, with remote auto locator (new). $600.

All in good working and cosmetic condition, Used in-studio, no travel, no smoking, well maintained.

Shipping would be expensive, we would have to hire a contractor to do it. Pick-up preferred.

within the hallowed think tank known as:bnfa6h$n5i$1@xuxa.iecc.com,
JL <jl@hotmail.com> employed much intellect to add:
> Sirius blows, and every audio magazine out there agrees. Sirius is
> heading for Chapter 11, while XM is about to pick up its 1,000,000th
> customer.
>
Based on just what I've heard I agree Sirius blows. They use 'PAC' which
the standards committee rejected for IBOC because it is substandard for the
lower bitrates Sirius uses. Doesn't take a genius to take those facts and
spell Sirius as DOA.

Oh, and I've heard both and XM does sound better.

You must be reading different audio magazines than I am. Mine say
Sirius sounds cleaner.

I chose Sirius because it sounds less compressed to my ears.

Rich

That would turn me against Sirius.

With a limited number of music channels, it seems like a bad choice to waste 5 of them on very similar genres. Sinking 10% of your music channels in one genre is wrong.

One of the great strengths I see / want in satellite radio is a wide choice of genres.

>>
Curious to see what kind of a warped nighttime pattern it will have. Consider everything it will have to protect: co-channels in Boise, Chicago, Simi Valley, and possibly Commerce City. First-adjacents in Window Rock and San Francisco.
>>

1) Only Class A first-adjacents get any protection, and that is KNBR/680 ... KTNN/660 get NO protection from a first-adjacent as it is a station of the same class,

2) Obviously, ex-WMAQ will get co-channel protection, as it is an ex-Class I-A, but so also will the ex-Class I-N in Alaska, which KBOI has always protected,

3) Simi (KIRN) is close enough to require protection as that station is the same class,

4) however ... the protection required to be given to the ex-Class I-N in Alaska will implicitly protect KIRN and KBOI, the latter which has already redesigned its night pattern (paid for by KIRN's owner, Lotus, BTW) so there is no protectable radiation towards the NE, E, SE, S and SW.

Therefore, this new station is only required to protect the two Class As ... the ex-Class I-A in Chicago, and the ex-Class I-N in Alaska.

And, any other protection to stations of equal class will implicitly be provided by the protection afforded to the Class As.

(There are no stations of lesser class).

Bottom line ... the night pattern will be a simple, symmetrical pattern, provided by four in-line towers.

(The required day pattern is somewhat more complicated as the day power is nearly fifteen times higher than the night power).

This week on Kweevak Radio: Don't miss our special Halloween show on Thursday October 30, 2003 from 8 p.m. to 11 p.m. on RocklandWorldRadio.com. We will have special guests including Tony Amato from Asbury Park, New Jersey talking about his band "Boccigalupe and the Badboys" and their many latest achievements. Also, in the studio we'll have "The Joe Mystery Group" spinning songs from their new record 'Classic Rock Songs for The New Millennium' and we will be talking about UFOs, ghosts and other bizarre anomalies with noted UFOologist, Emilio Reeves. Finally, we will have plenty of music-related prizes to give away during the show including CDs, books & t-shirts - so please tune in!

The Kweevak.com "Top-10" Countdown for this week features the following bands and artists who have been chosen by the viewers of the Kweevak.com Music Promotion web site and listeners of the Kweevak.com Radio programs:

10. Charlie Souza
9. Bobby Fuller Drive
8. The Second Self
7. Fallen From Grace
6. Shelley Dael Walker
5. Ten Ton Chicken
4. Beth Thornley
3. 40 Ft. Ringo
2. Glass Harp
1. Bobby Fuller Drive

Listeners can vote for artists who are currently in the "heavy rotation" list on the Kweevak.com Radio Show which airs live on the Internet every Thursday night from 8 p.m. to 11 p.m. (EST). The Kweevak.com "Top-10" Countdown airs live every Monday at 11:00 a.m. (EST) and is re-broadcast five nights a week, Monday through Friday, at 7 p.m. (EST). Both shows are aired exclusively on RocklandWorldRadio.com.

Details on how to vote for the weekly "Top-10" countdown, how to submit your music to the show, and information on affordable sponsorship packages is available at the Kweevak.com Radio Show page at:
http://www.kweevak.com/rd_radio_show.htm

Please don't forget to tune in to all of our programming and please spread the word about the Kweevak.com Music Promotion web site!

SPONSORS: Special thanks go to this week's sponsors Charlie Souza (http://www.charliesouza.com) and Ray Ecke Songwriting for helping support the Kweevak Radio Show webcasts!

MORE NEWS FROM THE RADIO SHOW:
- More details about the "Top-10" & upcoming show is on the radio show page at:

Okay this is a longshot...

But I'm looking for any kind of recording (pref mp3) of "the greatest jingle of all-time" for Welders Supply in Dallas. Performed by the same fellow who did "Hey Mr. Greenfields"...

Picture a warehouse loaded
With torches, specials and parts
Picture several locations
And well-trained people with hearts
Remember Welders
When time is short
We've got the people
We've got the parts
We've got the know-how
To serve you right now
Call us at Welders Supply

BS

FOR IMMEDIATE RELEASE
Contact: Lorie Kellogg (845) 647-9475
lorie@waterlogg.com

FREE VOICE ACTING WORKSHOP AT NEW YORK'S DRAMA BOOK SHOP
Monday, November 3rd - 6:00 P.M.

JOE BEVILACQUA TO TEACH WHAT HE LEARNED FROM THE VOICE OF YOGI BEAR AND SIGN COPIES OF THE NEW BOOK: SCENES FOR ACTORS AND VOICES

As part of THE SIMON STUDIO'S 25th Anniversary Celebration, join studio member Joe Bevilacqua (veteran NPR Producer/ Writer/Actor) in a workshop/demonstration from his new book Scenes For Actors and Voices. The evening will include audience participation and a book signing. A reception follows.

The voice acting workshop will be held Monday, November 3rd, from 6:00 to 8:00 P.M., at the Drama Book Shop, 250 West 40th at 7th Ave., NYC.

Scenes For Actors and Voices is a compilation of original scripts by Daws Butler, who spoke the words for most of the classic Hanna-Barbera characters: Yogi Bear, Huckleberry Hound, Quick Draw McGraw, Elroy Jetson, and a hundred others. His significant work both as a writer and actor with Stan Freberg in the 1950s on "The Stan Freberg Show" and multi-million-selling records such as St. George and the Dragonet are still held in reverence today.

Edited by radio historian and author Ben Ohmart and veteran public radio producer Joe Bevilacqua, "Scenes For Actors and Voices" is comprised of rare never-before published material from a man known as some of animation's most beloved cartoon voices but who was also a prolific writer.

"Most people are unaware of this," laments Bevilacqua, who studied voice acting with Butler for 13 years, as part of Butler's Beverly Hills, California workshop. "Daws co-wrote the Dragonet spoofs and many other of Freberg's most successful records. He wrote for 'Time for Beany,' Bob Clampett's TV puppet feast which ran live five days a week for five years. And he wrote and voiced some of TV's funniest animated commercials." In 1975, Daws Butler began an acting workshop from his audio studio/converted garage and soon after wrote hundreds of scenes for his students to perform.Among Butler's many successful students were Nancy Cartwright (the voice of Bart Simpson and author of the L.A. Times best seller, My Life as a 10-Year-Old Boy), and Corey Burton (Disney's Atlantis; Captain Hook in Return to Neverland; Brainiac in the Superman/Justice League cartoons; the Old Navy 'logo voice'). Burton also wrote the book's insightful foreword.

Nancy Cartwright says the book is "a romp in a garden of characters. Each monologue, dialogue or scene study is a taste of some of the 'juicy fruits' that Daws left as his legacy. They fed me. They fed Corey Burton. They fed Joe Bevilacqua. And they fed dozens of other voice talent in Hollywood and beyond."

"More than a voice actor, Daws was an artist," explains Bevilacqua. "To him, playing a talking dog or bear was as real as playing Hamlet or Mac Beth. The techniques he taught are all represented in these scenes, which are not cartoony but realistic examples of human interaction."

Corey Burton adds, "His writing was purposely difficult to get a 'handle' on; carefully crafted to be open to a nearly infinite range of interpretation. A genuine exercise which actors must first struggle to decode, then apply great depth of imagination and creativity in a complex exploration of character and emotion, through a virtual rainbow of possibilities."

The book was a longtime dream of Butler, who died in 1988. With the cooperation of Butler's widow, Ohmart and Bevilacqua chose the best monologues, dialogues and exercises from hundreds of scripts found in file cabinets in the Butler family garage. They wrote introductions for each filled with the advice Butler gave his students during a typical workshop. The result is a scene book for anyone interested in improving how they use their voice. But actors, in particular, will find it as useful as a painter would find a life drawing class.

"Plus, it's a very entertaining read. 'Better than the average scene book,' as Yogi would say," concludes Bevilacqua.

Scenes For Actors and Voices focuses on one, two and three character scenes short enough for use in any acting class or audition. Future Daws Butler scene books are planned, and Ohmart and Bevilacqua are currently working on the authorized biography of the voice legend for publication Christmas 2004.

Scenes For Actors and Voices by Daws Butler
Release date: July 14, 2003.

Greatings,

I want a way to put multiple FM tuners to a PC, and get audio from several radio stations at the same time using windows media encoder, but I don't wanna have several sound cards, instead i'm looking for a USB or pci card fm tuner wich can input audio into the pc without a sound card.

Thanks in advance,

Jose Suero

I was thinking that too. In fact I had tried "implement" and then deleted in favor of "execute."

I've always thought "implement" is to put in place. "execute" is to carry out.

I think in reading the comments to date on this subject, it's quite apparent that it's all in the mind (or ears?) or the beholder. To my ears (which have admittedly been assaulted by over 35 years of shortwave listening), the audio quality and signal reliability of each service is quite similar. The decision for me to go with Sirius rested on the non-commercial and proprietary nature of their music channels and the presence of more public radio options (ie: BBC, WRN, two NPR, one PRI and C-SPAN) including access to more international broadcasters (BBC and WRN). The $3 differential in monthly charges was no factor and in my judgement the allocation of channels to differing aspects of the musical spectrum was a wash between the two.

Quite frankly, I think--especially in light of the terrible state of AM and FM radio--a listener would be pleased regardless of which service were chosen. But, as they say, your mileage may vary.

Thanks for the thoughts, Eric - I did as you suggest, there was no
difference. As noted, if I switch to grid power the interference is gone.
However the solar array is still sending a charge to the controller at this
point, so if it was simply RF noise from something in the 'solar chain' the
noise should persist even when plugged into the grid. I'm suspecting
something about the link between the inverter and the radio power supply.
The radio is an ancient Sony from 1975. Yes, it is time I replaced the
radio...

Not necessarily. The current flowing from solar cell to controller is
likely to be nearly zero when not feeding the radio. You won't be
interrupting much current in that case, and would generate little if any
noise.

> I'm suspecting
> something about the link between the inverter and the radio power supply.

Have you done any common-mode filtering of the leads from the inverter and
the radio? I have an inverter - claimed to be very radio-quiet - that makes
a mess of the FM band. I never bothered to try filtering since I seldom use
the setup. It was powering a laptop computer, but once the battery charged,
I could run for 2 or 3 hours without the inverter.

> The radio is an ancient Sony from 1975. Yes, it is time I replaced the
> radio...

Why? I don't see that as being part of your problem.

Thank you. You're one of the few people who lives in a world of color
and shades of grey. Neither service is absolutely better than the
other. I'd love to have a receiver that received both.

What we're forgetting is the incredible accomplishments of the people
who created these services. I'm very fortunate in knowing many of them
as friends. Just the fact that they were able to design, fund and
construct them is a testiment to their willingness to go very far out
on a limb and take risks.

My hat is off to them and I'm very happy to call them friends. Many of
the shows I've been involved with are now on one or both services. I
hope they both succeed. They deserve it.

Rich

This is a great tip! I was primarily interested in talk/news, not music. I love radio, and I want to get away from right-wing talk on AM. Still, it doesn't sound like there are very many talk/news stations on Sirius. Do you (or anyone) have any idea what kind of satellite service would bring me all those international broadcasters that I seem to remember claim satellite presence? Or, what about more NPR stations? How can I get those (other than on my computer, which is too old for that)?

For sale:

Partial interest in AM radio station. The "Radio Crazy", it's back!!!

Joint venture. Active or inactive investors welcome with at least $10,000 each. No individual may hold over 49 percent. This applies to me too. All investors would be on the board with full voting rights if desired.

Total asking price is only $90,000 and real estate is included.

Station is in Georgia. 1 KW days and less than 50 watts at night but sufficient to cover city of license. City is about 4800 population. This is the only AM in that county.

Tel: (478)741-1710 in Macon, GA. I am NOT a broker, shill, owner, part owner or agent. I am NOT a crook!

73,

Meyer Gottesman aka "The Radio Crazy" aka W6GIV

I see your point. I will try to relate the noise to the state of charge of
the battery. I would think that if the state of charge is low then the array
will be firing all kinds of current at the battery through the controller
even if the radio is not trying to draw it down.

WorldSpace satellite radio has more international broadcaster channels, but it does not cover the USA and could probably never get a license to do so. Oddly, WorldSpace is headquartered in Washington, DC, and at least some of their roughly 10 proprietary music channels originate from Washington. They have a web site.

Most of WorldSpace is free to the listener.

I recently read that they are in the process of establishing at least a few subscription channels aimed at US & British expatriates scattered around their coverage areas in Africa and Asia.

For anyone interested, here's a reminder of upcoming DX tests; if
anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Saturday, November 1, 2003 - WJNT-1180, Pearl, MS 12:00 am-1:00 am CST
(1-2am EST).
E-Mail: slcarter@wjnt.com
WWW: http://www.wjnt.com

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

Bicyclists take on radio empire

three stations made on-air comments they say encouraged drivers to
throw bottles at bike riders or hit them with open car doors

Bicyclists take on radio empire

CLEVELAND, Ohio (AP) --Bicyclists are demanding that the nation's largest radio group be punished because disc jockeys at three stations made on-air comments they say encouraged drivers to throw bottles at bike riders or hit them with open car doors.

They say the morning show hosts at Clear Channel Communications stations in Cleveland, Houston and Raleigh, North Carolina, also suggested motorists blast horns at cyclists, and speed past them and slam on their brakes in front of them.

"DJs encouraging the masses to hurt people in any form is insipid, and should not go unpunished," said Edwin D. Reeves, 30, a cyclist and ceramic engineer in St. Louis.

Clear Channel, based in San Antonio, owns roughly 1,200 radio stations in the United States.

The company won't release transcripts or tapes of the broadcasts, but the three stations apologized on the air and Clear Channel donated $10,000 and air time to promote bicycle safety.

"We deeply regret that comments made by on-air personalities were misinterpreted. Clear Channel does not condone violence in any form and we are committed to working with the cycling community to improve cycling safety," chief executive John Hogan said in a statement.

Clear Channel, which said it was coincidental that similar comments came from three stations, said it told the stations to refer questions to corporate headquarters. It wouldn't say if the disc jockeys were disciplined.

The comments started June 30 on WMJI in Cleveland when one of the morning show personalities complained that a group of bicyclists had held him up in traffic near his home.

"The other guys started chiming in," said listener Don Barnett, service manager at Century Cycles in Medina. "Then it escalated. People started calling in."

Similar remarks came weeks later on WDCG-FM in Raleigh and KLOL-FM in Houston.

Lois Cowan, 42, who owns the Century Cycles shops in the Cleveland area, filed a complaint with the Federal Communications Commission asking it to fine the company or take away the licenses of the three stations.

"They shouldn't be advocating things that kill people," Cowan said.

She says she's received more than 5,000 e-mails from cyclists about the issue.

Dorothy Nance of Raleigh said she and her husband sold their Clear Channel stock after she heard the bicycle comments on WDCG on September 22.

Nance said the announcers were "egging listeners on, by encouraging harm to cyclists." Suggestions included throwing soft drink bottles, she said.

Thomas F. Valone, owner of seven outdoor clothing and equipment stores in North Carolina, pulled "a few thousand dollars" worth of advertising from the Raleigh station because of the comments.

FCC lawyers refuse to comment on specific complaints.

"We got a complaint about that and we are acting on that," FCC Chairman Michael K. Powell told the cyclists.

"RL" is an arcane DXers' abbreviation for "religious." Of course, there are
about 700 AM DXers left in the whole country, so it is normal that no one
else understand their abbreviations.

Dear all,

at 09:00 PM MEST there will be a Mike Oldfield Special on the 24 hours live radio station Radio Mi Amigo.

There homepage is http://www.radio-miamigo.com
You can listen live on http://dein-Radio.com:6700/listen.pls with e.g. Winamp.
They are broadcasting 24 hours a day live in mp3pro. You can listen without an mp3pro decoder but the music quality is much better (FM-Quality) with the plugin.

Best regards,

Guido

P.S.: on their homepage you will also find a chat ... here you can ask for your favorite songs to be played within minutes ;-)

2263. For sale: Partial ownership in Oregon fulltime 1 KW AM radio station.

Newsgroup: rec.radio.broadcasting
Date: 2003-11-03 14:39:38 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bo5pba$11b$1@xuxa.iecc.com>

For sale:

The biggest boatanchor of them all! An AM radio station in Oregon. Fulltime, 1 KW. Non-directional.

JOINT VENTURE! (If you venture, you go to the joint! HI!)

Active or inactive investors with at least $10,000 each are welcome. No individual can own more than 49 percent including me.

The asking price WITHOUT real estate (must move in 3 years!)is $100,000. WITH real estate, the asking price is $900,000. Very valuable land right in the heart of the city.

City of over 20,000 with county population being over 100,000. Station is on the air over 60 years.

The station grossed over $262,000 in 1999 and over $230,000 in 2000. I do not have the figures for 2001 and 2002, sorry. All are UNAUDITED.

Now the morning invocation: May the good Lord curse and darken the transmitters for "Queer Channel", "Sit-in-Hell", "Cum-on-Us" and "Measley". You know who you really are. (Frown!)

Please, no "AM bashers" or other negative nabobs.

Tel: (478)741-1710 in Macon, GA

Amateur Radio Newsline™ Report 1368 – October 31 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our website by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

Amateur Radio Newsline report number 1368 with a release date of Friday, October 31st 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio comes to the rescue as southern California is swept by wildfires and a new Amateur Radio satellite will be launched early next year. Find out the details on Amateur Radio Newsline report number 1368 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND THE SOCAL FIRES

>From the Mexican border to the suburbs north of Los Angeles, large sections of the Southern California were under siege the past week. This, as ten major and several smaller wildfires blazed their way across the area.

Fanned by hot, dry Santa Ana winds gusting to 60 miles an hour, the wildfires dervored everything it their path. At least a eighteen people are dead and over 1500 homes and businesses have been destroyed. And as we go to air, well over 1 million acres have burned.

Gordon West, WB6NOA, has been at one of the busiest Red Cross evacuation centers for the past several days. He took time out to file this first hand report on how hams are aiding in fire relief efforts:

--
Audio report only. Hear it at www.arnewsline.org/quincy
--

As we go to air, ham radio operators continue their firefighting communications support efforts. More on their role in future Amateur Radio Newsline reports. (ARNewsline(tm))

**

RESCUE RADIO: KCOP REPORTS ON HAMS DOING FIRE DUTY

Los Angeles television station KCOP appears to be the only one so far to mention the role the role ham radio operators are playing in fighting the Southern California wildfires.

On Monday night October 27th, the stations 11 P.M. newscast showed video of a group of unidentified hams at their radios in the Los Angeles western suburb of Simi Valley. At the same time anchorman Rick Garcia read a brief synopsys of what the radio amateurs were doing. It explained how the hams could provide communications between the various relief agencies that could not speak directly with one another.

While short and simple, the report was well written, accurate and nicely done. KCOP is one of two Fox owned stations serving the Los Angeles area. (ARNewsline(tm))

**

RESCUE RADIO: CALIFORNIA WILDFIRES FROM SPACE

The wildfires that ravaged southern California were even impressive from space. Just before returning to Earth, NASA astronaut Ed Lu took photographs from 240 miles above the fires through the windows of the International Space Station. The photos taken on Sunday October 26th are on-line at www.spaceflight.nasa.gov/station. (NASA)

**

RADIO LAW: AUTHORITIES LOOKING FOR ALLEGED TOWER TERRORIST

Law enforcement authorities in northern California and southern Oregon are searching for a man seen tampering with electrical towers. This, as one official says that the incident smacks of being an act of domestic terrorism.

According to the CGC Communicator, the latest incident took place the week of October 20th just south of Redding California. It involved a heav-set man who used large wrenches to completely unbolt one leg of a four legged transmission tower.

Authorities say that he had half the bolts removed from a second leg when he was spotted and fled. Witnesses chased the suspect onto Interstate 5, where he

sped south into Tehama County and disappeared. As we go to air he is still at large.

According to a news release from the Federal Bureau of Investigation, the suspect is similar in description to a man seen removing bolts at another tower near Klamath Falls, Oregon earlier in the day. He is described as a white male, in his early 60's with long, blackish-gray hair and a salt-and-pepper beard.

More details on this story and the suspect are in cyberspace at: http://redding.com/top_stories/local/20031022toplo043.shtml (CGC Communicator)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world and this week recognizing the support of the Quarter Century Wireless Association and its chapters world-wide.

(5 sec pause here)

**

HAM RADIO IN SPACE: ECHO LAUNCH ANNOUNCED

Ham radio will soon have another new bird on orbit. This as AMSAT-North America announced that launch of the AMSAT OSCAR-E will take place on March 31st. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

That's right. Some really good news on the ham radio space front. This, as word comes that the Echo ham radio microsat is now scheduled to launch on March 31, 2004.

Earlier plans had called for a May 2004 launch for the tiny bird. Echo Project team member Richard Hambly, W2GPS, reported at AMSAT-North America's Annual Meeting that the project has made significant progress in recent months. So much so that advancing the launch date was possible.

Echo is a fairly simple ham radio by todays standards. It has two UHF transmitters. Each one runs from 1 to 8 watts and the bird is capable of simultaneous operation. Also on board are four VHF receivers and a multiband, multimode receiver capable of operation on the 10 meters, 2 meter, 70 cm and 23 cm bands. This means all sorts of transmit and receive band combinations will be possible once the tiny ham-sat is in space. This includes PSK31 on a 10-meter SSB uplink.

Hambly says that the project team powered up the Echo flight hardware in late summer at Space Quest. Data communications, command and control, and attitude control subsystems were tested. Also checked out were the radio equipment, power systems and cabling. It all checked out and that's good news for hams waiting for this latest addition to its family of birds in space.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.

A Russian rocket will carry the 10-inch-square satellite into a low-Earth orbit from the famed Baikonur Cosmodrome in Kazakhstan. (ANS)

**

PROPAGATION: ANOTHER CME AT SUNSPOT 486

More solar activity affecting ham radio. This, as one of the most powerful solar flares ever recorded erupted on the Sun the morning of October 28th.

It happened near giant sunspot 486. That’s the sunspot we reported on last week and this latest explosion hurled a coronal mass ejection or C-M-E directly toward Earth.

Based on the speed and recordings it was expected to to impact the Earth’s Magnetosphere at about 1500 U-T-C on October 29th. When it hit, the shock alone wold produce a G 3 level geomagnetic activity. A level high enough to produce bright auroras at high latitude sites such as Scandinavia, Alaska, and Canada.

As hams are well aware, a solar storm can fully disrupt communications on some bands while creating unexpected propagation on others. What this one is doing is still developing as we go to air. More on this story as the reports come in. (ASWLC)

DX DEBACLE: ANNABON ISLAND TEAM SPEAKS OUT

An update to the plight of the plight of the Dxpedition group forced to flea Annabon Island a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England with the rest of the story.

--

We reported two weeks ago that the 3C0V DXpedition to Annobon Island - off the west coast of Africa - had been forced to close down but at that time the reason for the enforced closure was not known. A press release has now been issued by the 3C0V team which says that all four operators - DJ9ZB, EA5YN, EA5FO and EA5BYP - are now back home safe and sound.

The press release says that each operator had proper individual licences and the group had written authorisation to import and operate amateur radio equipment on the island. However, on the 4th of October the military authorities there demanded that the group should dismantle the stations and leave for the Equatorial Guinea capital. Two days later DJ9ZB and EA5FO were allowed to leave the country but the other two team members remained in the capital until the 10th, when they were eventually able to return to Spain.

Jeramy Boot, G4NJH.

--

The complete press release is in cyberspace at www.tabarca.es.mn Wew will have more DX news later on in this weeks program. (GB2RS)

**

ENFORCEMENT: FCC WRITES TWO CITIES ABOUT INTERFERENCE TO THEIR HAMS

The FCC has contacted officials in two cities about interference to their local ham radio operators. The Agency’s Daryl Duckworth, NN0W, explains:

--

Duckworth: “The mayor of Lubbock Texas, along with copies to the Lubbock City Manager, the Lubbock City Attorney and Lubbock Power and Light have been sent a letter concerning interference to Brian Edwards, W5KFT. This interference, possibly from equipment operated by Lubbock Power and Light, dates back to 1998.

Along similar lines, the mayor of Gouverneur, New York, has a follow-up letter concerning the lack of response to a previous FCC notification of RFI to Morton Howard, W2ATO. The mayor has 15 days from receipt to reply.

This has been Daryl Duckworth, NN0W, reporting.”

--

Both mayors were invited to contact FCC Special Counsel Riley Hollingsworth if they have any questions concerning these matters. (FCC, RAIN)

**

ENFORCEMENT: FCC RAIDS SAN FRANCISCO UNLICENSED STATION

The Federal Communications Commission has raided the San Francisco couple's home and shut down an unlicensed radio station. The action removed Liberation Radio, a low-power alternative FM station that broadcasts political views and independent music programs from the airwaves.

The operation took place at the residence of Jim and Charlotte Hatch. The Hatch's had been told to take the station off the air before the raid. Their first warning came in July, when FCC investigators showed up at the couple's home and asked to inspect the equipment. They refused the FCC entry and were warned that they faced a potential $17,000 fine.

Instead, agents returned on Wednesday October 15th with a search warrant and more than a dozen federal marshals and confiscated the stations’ broadcast equipment. This included the transmitter, mixing console, computers, tape and CD players, turntables and even the rooftop antenna.

No charges have yet been filed against anyone associated with the station but further enforcement action is expected in this case. (Published news reports)

**

ENFORCEMENT: TEXAS FIRMS CITED FOR CB RADIO VIOLATIONS

The FCC has cited David P. Pace Jr of Nacogoches, Texas, for alleged violations of its rules dealing with the sale of 11 meter C-B gear. According to ther agency, Pace, doing business as Pacetronics and Pace Marketing was offering for sale more than three dozen types of non certificated CB transceivers under the guise of them being ham radio transceivers.

According to the ARRL Letter, the FCC evaluated similar radios and found that the devices at issue are not only amateur radios but can easily be altered for use as Citizens Band devices as well. The regulatory agency says that dual use CB and amateur radio gear cannot be certificated under its rules.

The FCC also warned Pace that its rules requires certification for external RF power amplifiers or amplifier kits capable of operation between 24 and 35 MHz. The FCC asked Pace to submit a written statement describing actions taken to correct the apparent violations. The FCC's Dallas office issued the citation. (ARRL)

COMMUNICATIONS CRIMES: FLORIDA MAN CONVICTED OF VIOLATING DMCA

A Boca Raton Florida man has been convicted of selling hardware to illegally tap into DirecTV satellite broadcasts. Following a four-day trial in federal court, a jury has found that Thomas Michael Whitehead guilty of one count of conspiracy, two counts of selling devices designed to unlawfully decrypt satellite television programming and three counts of violating the Digital Millennium Copyright Act.

The Digital Millennium Copyright Act is a 1998 federal law that makes it illegal to make or sell any technology designed to get around copy protection measures such as the electronic cards used by DirecTV to give consumers access to its programming. With his conviction, Whitehead becomes the first person to be found guilty by a jury under it. He faces a maximum sentence of 30 years in federal prison and up to up to $2.75 million in fines. (Published news reports)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: GET READY FOR BOOK RFI

Remember those Radio Frequency I-D tags that are of such concern to ham radio? Well you will never guess where they are about to show up. Ken Butler, W1NNR, tells us:

--
The San Francisco Public Library's plans to track books by inserting an RFID

tag to each one. These are the same radio tags that hams tried to get the FCC to not deplioy earlier this year.

Now, library officials in the Bay area say that they will install the RFID's, into the roughly two million books, CDs and audio visual materials patrons can borrow. The system still needs funding and probably will not be ready for deployment until at least 2005.

--

So in a few years when you receive QRM to your ham radio operations, you might find that its coming from that novel you are reading late at night. (Science Today)

**

CONVENTIONS AND HAMFESTS: HAMVENTION 2004 WILL BE AT THE HARA

The Hamvention will remain at the HARA Arena through 2004. This, according to an announcement from the Dayton Amateur Radio Association which says that it has signed a one year contract that will keep Hamvention at the facility through next years outing.

The Hamvention planners are also looking for volunteers that want to help make Hambention 2004 a big success. To help gather support a new volunteer your services form is available at the Hamvention website. Its an on-line, fill in the blank form and you will find it at www.hamvention.org/volunteer.html. Just fill it out and the Hamvention folks will get back and let you know how you can assist.

The 53rd annual Hamvention will be held May 14th through the 16th, 2004, at the HARA Arena in the Dayton suburb of Trotwood Ohio. (DARA)

**

CONVENTIONS AND HAMFESTS: MICROWAVE MEET IN THE UK

Meantime, word that the Martlesham Microwave Round Table will take place on Saturday the 8th and Sunday the 9th of November. This, at the B-T Adastral Park, near the city of Ipswich in the United Kingdom. Featured will be a full program of talks and seminars including speakers from Europe and the United States along with a giant flea market. Full information is on-line at http://mmrt.homedns.org. There is no www in this URL address. (GB2RS)

**

ON THE AIR: THE 2003 SIX METER SPRINT

Last weekends 6 meter Sprint brought quite a bit of operation to the Magic Band. NEZ0P, one of the stations posting to the VHF Reflector says that he heard or contacted several semi rare stations for this time of the year. This included AA7J in grid DN-30, VE3CDP portable W9 in EM-58 and a couple of others. John adds that he held 34 Q-S-O's with stations in 25 grid squares during the short operating event. This included contacts into Maine, New Hampshire and Vermont. Not bad for a band that usually produces little

excitement at this time of year. (VHF eflector)

**

ON THE AIR: THE BAJA NET INVITES YOU

Berand Kirschner, WB0YCQ, reminds everyone that the The Baja Net meets daily at 08: 00 local California time on 7.238 Mhz. Kirschner describes the Baja Net as a friendly gathering spot for boaters. RV'ers and others who carry ham radio as they roam. (WB0YCQ)

**

DX

In D-X, word that ES1FB plans to be active as XW1FB. This, from Vientiane, Laos, threough the 4th of November. No word on times, frequencies or modes. (GB2RS)

Also on through November 4th will be K3BYV and N3CXM. They will are active as PZ5DX and PZ5JR respectively from Suriname. For both operations,. QSL as directed on the air. (GB2RS)

And GB50RAEN is on the air to celebrate the 50th anniversary of the founding of Raynet. Raynet is Great Britain'd equivlant of our ARES and RACES combined. The station is being operated by groups from West Midlands Raynet in the UK. (GB2RS)

Lastly, VK8NSB reports via Q-News that the Darwin Amateur Radio Club in Ausrtralia's Northern Territory will be operating a special event station to celebrate 25 years of self government. The station signing VI8NT will be on through the 31st of December. QSL directly to VK6NE or via the bureau. (Q-News)

**

THAT FINAL ITEM: ARNEWSLINE(tm) NAMES NT3V NEW CHAIR OF YHOTY COMMITTEE

And finally this week, we at the Amateur Radio Newsline are happy to announce the appointment of Mark Abramowicz, NT3V, as the new Chairman of our Young Ham of the Year Award Committee. Abramowicz replaces Larry Zettwoch, KR4IF, who served in that position the past 9 years.

For those of you not familiar with NT3V, Mark hails from Reading Pennsylvania, and happens to be the father of our 2002 Young Ham of the Year award recipient, Josh Abramowicz, KB3GWY. But Mark and Josh are not the only hams in the Abramowicz family. Mark's wife Suzanna is NZ3G and his daughter Amy holds the call sign KB3IJW. Only the two youngest members of the Amramowicz family -- sons Jonathan and Jordan are not licensed. At least not yet.

By profession, Mark is a news reporter and anchor at KYW radio in Philadelphia where he is known professionally as Mark Abrams. He is also is an adjunct professor at Temple University where he teaches writing for mass media and broadcast newswriting. And like his predecessor, Mark is very involved with the scouts and scouting program as are his two older children.

A very nice bio on Mark Anramowicz, NT3V, can be found at the KYW website. That U-R-L is http://www.kywam.com/staff/bios_detail.cfm?biosid=53 (ARNewsline(tm))

From: "Paul (Erie)" <none@none.invalid>
Message-ID: <bo8dkk$j5n$1@xuxa.iecc.com>
Source record: 6798

What do you think is better, Sirius or XM radio?

Sirius now has a plan that it costs $399 for the life of your receiver. So if my receiver lasts for over 2 1/2 years, I would get the service free of charge from that pouint on. I've had receivers...not satelite, for 5 to 12 years. no receiver I have has ever died before 5 ywears. Is it a good deal? What do you think.

In terms of Quality, Sirius or XM...any comments suggestions you can give would be great!

thanks

2269. Delphi XM Roady question

Newsgroup: rec.radio.broadcasting
Date: 2003-11-04 14:38:13 UTC
From: szymczuk@my-deja.com
Message-ID: <bo8dkl$j67$1@xuxa.iecc.com>

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Sunday, December 14, 2003 - WILM-1450, Wilmington, DE will conduct a DX test from 1:05 am - 3:00 am EST. The test will consist of Morse code IDs, regular IDs, recognizable music and various sound effects. On-air calls will be accepted at 302-656-9800 (Fax:302-655-1450). Reception will be verified with a letter and full-data anniversary QSL card.

Reception reports(with return postage) may be sent to:

Allan R. Loudell
Program Manager
WILM-AM
1215 French Street
Wilmington, Delaware 19801

(Arranged by Ron Musco for the NRC CPC.)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

Lynn.

I just purchased the Delphi XM Radio Roady. Connected to car radio
via the cassette. Absolutely no degradation to any radio function.
Sound quality from the XM unit better than on air stero FM. If you
like radio, you will love the Roady!!. For what its worth, my Roady
is connected to a 2002 Honda that has in addtion to the cassette
player a 6 disc CD changer.

Hope that helps. Enjoy XM Radio

I am using the Delphi XM Sky-Fi, which works the same way. The sound
is definitely Superior to that of FM in my car. Your alternative,
other than replacing your radio, is to buy a wireless FM modulator,
which is available from CCrane.

I chose XM Radio about a month ago, partly from the advice received
in this n/group, and partly after
looking at both outfits' list of channels.
I wanted drama, audio book readings, BBC World Service, and certain
kinds of music (50s, 60s, classical etc). XM had these and the
layout of the channels seemed
more specific - or do I mean thematic? - than that of Sirius.
So, I can't give any opinion on what Sirius is like, but I can tell
you I'm delighted with most of what I get on XM.
Haven't had the FM/AM radio on for more than a few minutes since getting the
satellite receiver connected!
I use the equipment only in the house, not in a vehicle;
the sound quality is good enough for my undemanding needs, but I
do notice the volume level is only about 60 per cent of the FM radio's; not
a problem as I just turn up the volume. I don't know if this is
something peculiar to my particular setup or not, though.

My pessimism alarm just went off, me thinks Sirius knows the end is near.

> In terms of Quality, Sirius or XM...any comments suggestions you can
> give would be great!
>
I've heard both and think XM has the advantage in terms of audio quality.
Sirius sounded a little sloppier and, after all, is using the old PAC codec.

However, as always YMMV.

I've not had very good results with my portable cd player running thru the cassette player via a dummy cassette. Sometimes it sounds ok, and sometimes it is muffled, I guess because of misalignment of the two heads. Not a good system, IMHO. However, if you have an input jack on your car radio, that works great.
regards,
Tom

There _IS_ another alternative, the "XM Commander", which has the modulator
built-in. See the www.xmradio.com site. It's somewhat like the old Pioneer
XM unit, but brought up to date.

One __warning__ about using a modulator. Unlike FM stations, XM doesn't
heavily process their audio. You have to run the modulator audio at a
considerably lower modulation level than you hear on over-the-air stations.
Otherwise you will overdeviate / overmodulate on peaks.

I have a Roady. I was real skeptical about the sound quality I'd get
by something plugged into the cassette player as its interface.
However, I am VERY satisfied with it!

I'm still working with Don LaFontaine's voice.

>However, I am VERY satisfied with it!

I used to use the cassette adapter with the Kenwood Here2Anywhere tuner. I heard distortion. I now have a Pioneer "XM Ready" radio/CD player with the XM tuner under the rear seat and the Sirius tuner plugged (with an adapter) into the AUX input. No distortion. Great sound, especially on the Sirius Jazz channels.

I'd be eternally grateful if XM would get rid of those screaming jocks on the oldies channels. It makes me feel like I'm listening to terrestrial radio and paying for it.

I also have the Kenwood modulator. Input levels are touchy, so I'm thinking of using it for my cell phone "hands free" function.

Looking for Automation, Traffic and Billing, or program delay
software?

Manufacturer of digital audio automation systems and traffic & billing
accounting software packages for the Radio industry.

The Phantom Digital Audio System. The Phantom is a complete
self-contained digital audio automation system for use with radio
station automation of satellite program sources, live assist, and
music directly from hard disk.

The Replicator. The Replicator is a multi-event digital audio long
form program recorder capable of recording multiple audio feeds and
GPI control signals with simualtaneous playpack and GPI replication.

Traffic & Billing Systems. DOS & Windows95-based Traffic & Billing
software packages. Products range from basic Traffic and Accounts
Receivable on a single-user PC to multi-user network systems.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

2288. DX test Results

Newsgroup: rec.radio.broadcasting
Date: 2003-11-07 23:37:55 UTC
From: ircamember@ircaonline.org
Message-ID: <bohacj$ft1$1@xuxa.iecc.com>

Here's the results of the most recent DX test that have been received here:

Saturday, November 1, 2003 - WJNT-1180, Jackson, MS 12:00 am-1:00 am CST:

DXers in various areas of the country were able to hear this test - the Morse code, at least. Adam Myrow in Memphis, TN says he had figured that he'd have no trouble receiving the test, and he was correct - WJNT boomed in for him, over the usual interference from WHAM, KGOL, and Radio Rebelde. Les Rayburn in Helena (Birmingham), AL said the situation was much the same for him at his QTH; he noted a clear switch to day power on WJNT. Dave Hochfelder in Highland Park, NJ heard a weak but copyable Morse ID from WJNT, but that was all the audio that made it thru WHAM and the Cuban. Bruce Collier in York, PA reports he heard a snippet of Morse from WJNT, but he didn't feel that was enough for a veri. James Niven in Moody, TX detailed his reception of the WJNT test, saying he was able to hear both the Morse ID and the Bruce William's Show, WJNT's regular programming. Willis Monk in Old Fort, TN mentioned that he also heard a few code IDs from the WJNT test, but mentioned interference from WHAM and the Cuban. Partick Matin in Seaside, OR also caught the Morse ID, and noted that it was weaker than in the past, but said that he felt that was due to all the solar activity of later. He also reported that Jason Brose in Kansas City, KS had told Patrick that he'd picked up the test. Also, Frank Aden in Boise, ID heard a few tones, but he wasn't sure that it was WJNT - KOFI was dominant for him. But Bruce Winkelman in Tulsa, OK says the test, both code IDs and the regular programming, were heard well at his QTH. Gerry Bishop in Niceville, FL heard several code IDs from the test. and in Winnipeg, MB, Shawn Axelrod was also able to hear several code IDs from WJNT under WHAM and Radio Rebelde.

However, Don Kaskey in San Franciso, CA says he checked and found the usual dominant station on that frequency, KERI-Wasco, to be off or on much reduced power at the time of the test, but didn't hear WJNT. Andy Gardner tried for the test from Cancun, MX, but heard nothing but Radio Marti and the Cuban. Robert Wien in Azuza, CA sat on 1180 kHz for the full hour, but heard a presumed Mexican station on the frequency, which he felt was XEDCH. Kevin Redding in Mesa, AZ, also heard XEDCH, KOFI, and KERI at times, but he didn't receive the WJNT test. Bob Karchevski in Sunnyvale, CA tried for WJNT and got KLAY-WA instead. And there were some places in the East that didn't hear the test - Gordon Bell in Troy, NY reports WHAM predominated at his QTH. RC Watts in Louisville, KY reports that both he and fellow DXer Randy

Davis, also in Louisville, were unable to hear the test - there was too much interference from a Latin station.

That's all for now...

Lynn.

For sale:

(The "Radio Crazy" is back!)

Partial interest in 1 KW fulltime AM radio station in Oregon. City of about 20,000 population. County population exceeds 100,000. This station is on the air over 60 years.

They are asking only $100,000 for the station WITHOUT real estate and $900,000 WITH REAL ESTATE. Very valuable land on a main drag and near an Interstate.

Joint venture. Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights if desired.

The station billed over $262,000 in 1999.

Tel: (478)741-1710. I am NOT a crook! I am also NOT a shill, broker, agent, owner or part owner.

Only those fully identifying themselves will be told the callsign and city of license.

73,

Meyer Gottesman, W6GIV

Amateur Radio Newsline™ Report 1369 – November 7, 2003

Amateur Radio Newsline report number 1369 with a release date of Friday, November 7, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Rain brings the California wildfires under control but ham radio stays on the job. A report from the scene on Amateur Radio Newsline report number 1369 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: CALIFORNIA WILDFIRE COMMS WINDING DOWN

The Southern California wildfires are on their way to full control. This as the winter rains come early to the region. As a result, many hams who had been full time fire communications volunteers have gone back to their regular jobs and ham radio emergency communications efforts are winding down. Others are still on the front lines and now its time for assessment. Gordon West, W-B-6-N-O-A, spent most of last week at a Red Cross Shelter in the city of Fontana. He takes a look at the contributions made by the regions Amateur Radio communicators:

--
Audio report only. Hear it by downloading this weeks audio newscast file at http://www.arnewsline.org
--

Emergency service officials agree that having ham radio made a big difference in successfully handling this disaster situation. (ARNewsline(tm))

**

RESCUE RADIO: REPEATERS LOST IN SOCAL WILDFIRES

We all heard the grim statistics of the homes and businesses were destroyed by this years California wildfires over a million acres of land has been scorched. But there is one total that the mass media won’t report. That’s the number of ham radio repeaters knocked off the air by the blazes. While exact call signs are not yet available, we did ask reporter Matt Lechleiter, W6KGB, to find out which radio sites were most affected.

--
It's estimated that close to 30 repeater or remote base systems have been affected by the recent Southern California firestorm. These systems are either off-air, were before switching to backup power, or were destroyed by the fires. The number of systems actually destroyed by the fires is unknown - we'll follow

up on this in a subsequent report.

Communications sites affected include Oat Mountain just north of Los Angeles, Sunset Ridge and Heaps Peak to the East, and Mount Otay near San Diego to name a few. Each of these major sites lost power due to one of the fires. News reports say that it could be over a month before power is restored to these locations. Until then, battery and generator power are keeping the commercial and amateurs two-way systems on the air.

There are also several repeaters that are believed to be safe but which are still off the air. This is because they live at more remote mountaintop sites that also lost electrical service to the flames. And just like the more accessible sites that I mentioned, it might be a quite a while before commercial power is returned.

For the Amateur Radio Newsline, I'm Matt Lechliter, W6KGB reporting.

--

If you are a Southern California repeater operator whose system was affected by the firestorms, or if you know of one that was, please send the details to us. We will include it in an upcoming report. Our address in cyberspace is nerwsline@arnewsline.org (ARNewsline(tm))

HAM RADIO IN SPACE: NEW GEAR FOR THE ISS

Radio gear from some well known ham radio manufacturers is in space. This, as the group known as Amateur Radio on the International Space Station announces the delivery of the so-called Phase 2 ham equipment to the ISS. Norm Seeley, KI7UP, has the details in this report:

--
A Russian Progress supply rocket has delivered a Kenwood TM-D700E, dual band transceiver to the International Space Station. The installation of this new radio will mean a significant boost to the power output of the ARISS station from 5 watts to 25 watts.

The Chairman of Amateur Radio on the International Space Station is Frank Bauer, KA3HDO. He says that the software for the D700 has been programmed for five modes of operation. These are for standard F-M phone, crossband repeater, APRS, packet and an emergency mode. Bauer predicted that APRS probably will be the default mode when a crew member is not actively using the ham station.

Next up will be gear from Vertex-Standard, the Yaesu brand folks. Bauer says that a Yaesu FT-100D, some SSTV equipment, along with new headsets, will be taken to the space outpost on Progress Flight 14P. Look for it to launch in January.

But says Bauer, that will be the endof the transport of any more ham radio gear for quite a while. At least until the space shuttle returns to flight in September 2004.

But that in itself could be a blessing in disguise. KA3HDO says that the equipment still on the ground will be tested this month at the Service Module facility in Moscow. This will permit making sure that the Phase 1 and 2 systems are compatible. RF testing will also take place.

According to Bauer, current plans call for the current Expedition 8 crew of Mike Foale, KB5UAC, and Alex Kaleri, U8MIR, to install the new hardware after ground tests are complete. Previous crews already installed four Amateur Radio antennas to cover HF, 2 meters, 70 cm and microwave frequencies.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

What about hams on the ground getting more chances to talk to the crew on the ISS? Bauer says he's been working with U-S and Russian space officials to have them dedicate a few additional hours each month for operation and amateur station maintenance. (ANS, ARISS K7CCC)

**

HAM RADIO IN SPACE: SPAIN SCHOOL CONTACT A BIG SUCCESS

Still with news of ham radio on board the International Space Station, word that the Ourense, Spain school contact on October 23 was very successful. 75 children and 25 parents gathered at Ceip Seixalbo school as European Space Agency astronaut Pedro Duque answered sixteen questions in Spanish using the ARISS radio system. All nationwide radio, TV broadcasters, and newspapers were present. Duque has since returned to Earth along with the Expedition 7 crew. (ANS, ARISS)

RADIO LAW: HAM ACCUSED OF AIRPORT SECURITY BEACH GETS CONGRESSIONAL SUPPORT

The ham who is accused of breaching airport security has gotten some unexpected congressional support. Amateur Radio Newsline’s Mark Abramovich, NT3V, has the rest of the story:

--
Leading Democrats have openly criticized federal authorities for prosecuting Nathaniel Heatwole, W-Zed-3-A-R. Hes the ham who admits to planting banned items on airliners, allegedly to show flaws in airport security. And some in congress think he is almost a hero for pointing out the Transportation Security Authority's inability to properly protect airline travelers.

Minority Leader Nancy Pelosi is quoted in print as saying: " "I don't think he had criminal intent. I think what he was trying to do was to show how exposed we are and what our vulnerability was, and he tried to tell TSA and he gave a trail to them."

Pelosi said that if theres any penalty imposed, it should be some kind of community service. And Representative Ed Markey, a powerful Democrat from Massachusetts agrees. In fact, Markey says that any community service sentence imposed on Heatwole should be with the TSA. And Markey adds that TSA officials should listen to him so that they know exactly how to prevent a terrorist from doing the very same thing.

And even the Republicans are getting into the act. Representative John Mica of Florida is chairman of the House aviation subcommittee. He said that prosecutors should concentrate on people who actually pose a threat, adding that Heatwole should not be the fall guy.

None of the politicians are not trying to excuse Heatwole’s action, but they more and more are beginning to agree with Pelosi and Markey who apparently believes that the punishment should fit the crime.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, in Philadelphia.

--

Heatwole is headed back to court on November 10th for a preliminary hearing. What was not expected is the level of support of some in congress and the obvious pressure that puts on prosecutors working on the case. (From published news reports)

**

RADIO LAW: THE BPL WAR - THE ARRL VS. MANASSAS VA.

The ARRL has put officials in Manassas, Virginia, on notice that the League will act on behalf of its members. This, to ensure full compliance with FCC regulations when the city's Broadband over Power Line system starts up in a few months.

Manassas is a suburb of Washington, DC. The League said that it was responding to media reports that Manassas has approved plans for a citywide B-P-L rollout in the near future. As such, ARRL Executive Vice President David Sumner, K1ZZ, has faxed the Mayor of Manassas to point out the potential for RF interference from and to any Broadband over Power Line data distribution system. (ARRL)

**

ENFORCEMENT: FCC ISSUES 2ND LARGEST FINE IN HISTORY

Meantime, the FCC has proposed issuing the second largest fine ever for on a broadcast indecency issue. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has the details:

--
The FCC wants to force Infinity Broadcasting to pay a fine of $357,000. This, for airing a shock jock radio segment in which a couple was said to been

involved in the most intimate of human experiences in New York City’s famed St. Patrick's Cathedral.

According to news reports, the FCC proposed record forfeiture is in response to complaints from the public following an August 2002 broadcast of the "Opie and Anthony" show and aired over thirteen Infinity owned radio stations. The nationally syndicated show was canceled a week later and hosts were fired.

Four commissioners voted for the fine. The fifth said the agency should have taken even stronger action. He said that the FCC should have gone after Infinity's radio licenses and taken their stations off the air.

Infinity has 30 days to pay the fine or appeal. The company has indicated that it will use the legal recourse.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

If upheld the amount paid would be second only to the $1.7 million dollars Infinity paid in 1995 to settle several cases against shock-jock Howard Stern. (FCC)

**

ENFORCEMENT: USERS RESPONSIBLE FOR REPEATER INTERFERENCE

Users and not the operator of a repeater are responsible for interference problems to another New Jersey repeater system. This is the gist of a September 12th letter to Andrew Woerner, K2ETN, who operates a repeater bearing his callsign.

Back on July 7th the agency notified Woerner that it had received complaints that his repeater, operating on the 146.355/146.955 MHz channel pair, was causing interference to the coordinated W2RAP repeater on the same frequencies. The complaints alleged that Woerner’s repeater was previously coordinated but that it has relocated since the coordination was issued.

The FCC requested that Woerner provide information in response to the complaints. He did, and in a follow-up letter, the FCC said that it has reviewed his information as well as detailed reports provided by the Metropolitan Coordination Association and the Area Repeater Coordination Council.

The FCC says that coordination does not appear to be an issue in this case. Rather, the interference problem seems to result from users of the K2ETN repeater, which is located in Northern New Jersey, attempting to access that repeater from locations in Southern N/ew Jersey. As such its repeater users who are interfering with the W2RAP repeater and not the person running the K2ETN machine.

The bottom line. The regulatory agency says that this situation does not appear to warrant its intervention. Instead its calling on everybody to work together to minimize any interference to the W2RAP machine. (FCC)

**

ENFORCEMENT: FCC PROPOSES $120,500 FOR ANTENNA STRUCTURE VIOLATIONS

Meantime, its the fine of all fines for radio tower violations. This, as the Federal Communications Commission releases a Notice of Apparent Liability on October 31st. One proposing a $120,500 forfeiture against SpectraSite Communications, Inc., of Cary, North Carolina for safety-related violations of the Communications Act and the Commission’s antenna structure rules.

Specifically, the FCC is going after SpectraSite for its failure to register and light its antenna structures following an investigation conducted by the Commission’s Norfolk, Virginia Field Office.

The FCC says that the amount of the proposed fine represents the statutory maximum available. The Commission says that it decided to propose a significantly higher forfeiture than generally used in such cases because SpectraSite has a prior history of antenna structure rules violations. It says that SpectraSite has received three previous forfeitures in less than three years for at least 13 instances of failure to comply with the antenna structure rules. (FCC)

**

RADO LAW: EMDERGENCY OFFICIALS CONCERNED ABOUT PUBLIC ACCESS TO "MIRT"

Emergency responders are concerned that MIRT, or mobile infra red transmitters are falling into the wrong hands. Mainly, into the hands of people not willing to obey traffic laws.

A mobile infra red transmitter allows personnel aboard emergency vehicles responding to emergency calls to quickly change specially-equipped traffic signals in their favor. That was fine until Internet websites began offering the same devices for use by the public for around $300 a pop.

Unlike radar jammers and certain laser detectors that emit radio signals, the mobile infra red transmitter and other signal changers send out a beam of invisible light. Since light is not controlled by the FCC the devices do not run afoul of the agency’s rules.

Needless to say that this is causing concern for those who rely on the technology for legitimate needs. Don’t be to surprised if states begin enacting their own laws to control the sale and purchase of the units.

More on the situation and the device is in cybrspace at www.detnews.com/2003/commuting/0310/26/a01-307303.htm and http://www.themirt.com (CGC, others)

**

COMMUNICATIONS CRIMES: INDUSTRY VS. IDENTITY THEFT

Microsoft and other technology giants have launched an industry alliance to thwart identity theft and boost confidence in e-commerce. The Coalition on Online Identity Theft will campaign to improve e-commerce record-keeping, beef up Internet security and enforce penalties against identity thieves. The

formation of this group comes in response to growing concern over the growing tine of identity theft crimes and government pressure on industry to help to thwart it. (Published news reports)

T-HUNTING NEWS: THE BIRDS OF FALL

If you are into hidden transmitter hunting, listen up. This one is for you. Keeping track of over 300 migrating radio tagged birds. Joe Moell, K0OV, is here with the details.

--

Since 1998, you've heard me reporting on hams and scanner fans tracking Burrowing Owls that migrate from Canada to southern states and Mexico. Researchers are so impressed by the capabilities of hams to do this sort of thing that they are asking for help with other critters. Right now, we're starting our biggest ever project, with more birds and more states involved. Nick Myatt of the Arkansas Cooperative Fish and Wildlife Research unit has radio-tagged 360 American Woodcock in Minnesota, Wisconsin, and Michigan, and he wants hams to help him find out where they're going. They're heading out now, and the list of possible stopover and destination states is big, including Southern Minnesota, Southern Wisconsin, Southern Michigan, Iowa, Illinois, Indiana, Kentucky, Missouri, Eastern Kansas, Eastern Oklahoma, Arkansas, Tennessee, Mississippi, Alabama, Louisiana, and Eastern Texas. If that's where you live or travel, please check my Web site for the list of active frequencies, all between 150 and 152 MHz.

Also at this time, Dave Sherman, a Biologist with the Ohio Division of Wildlife, is looking for help in keeping track of two radio-tagged Sandhill Cranes that should be leaving Ohio about the time you hear this. More information, including the frequencies, is on the Web. Go to www.homingin.com

Besides the frequencies, you'll learn how to identify the special characteristics of a radio tag signal, and you can subscribe to an e-mail list for fastest notification of these studies. That's homingin -- one word -- homingin.com

>From southern California, this is Joe Moell K-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Again, more information is at Joe's website. Its in cyberspace at www.homingin.com. And remember: homingin is one word. (K0OV, ARNewsline(tm))

**

NAMES IN THE NEWS: QCWA SEEKS NEW G.M.

In other news, word that Jim Walsh, W7VLN is resigning as the General Manager of the Quarter Century Wireless Association and the groups Board of Directors is looking for a replacement. Among the responsibilities are attending all meetings of the QCWA board, keeping full records for the organization and conducting the general correspondence. A solicitation for nominees is on line. You will find it in cyberspace at www.qcwa.org/manager.htm (QCWA)

**

CONFERENCES: 30TH ANNUAL EASTERN VHF/UHF CONFERENCE

The 30th Annual Eastern VHF/UHF conference will be held next April 16th to the 18th, at the Radisson Hotel in Enfield, Connecticut. Planners say that the conference has been moved to the spring time to help alleviate numerous conflicts with other ham radio activities and vacation schedules in August. Guest speakers, proceedings, articles and overall volunteers are being solicited to help out. Prize donations are also being solicited from vendors and members. More information is available from conference chairman Bruce Wood, N2LIV, by e-mail to bdwood@erols.com (VHF Reflector)

**

BEACON NEWS: C6AFP COMING BACK ON THE AIR

Steve Rutledge, N4JQQ says over the VHF Reflector that the C6AFP beacon in grid square FL16, should be operational soon. This, thanks to W4WSR who rebuilt the old one that WZ8D originally supplied.

That one took a lightning hit last summer. Rutledge says that he was able to salvage the RF board but that was it.

Rutledge thanks C6AGN, whose Q-T-H the beacon now lives at. This is in Coco Bay, Green Turtle Cay, Abaco, The Bahamas. He says that Bill should be back on the island on or about the time this newscast hits air. Hopefully we will hear the beacon sometime later this month. (VHF Reflector)

**

INTERNATIONAL - INTRUDER WATCH: PIRATES OF THE PACIFIC

On the intruder watch scene, VK6XW in Albany Australia reports over 130 of them in the ham bands in recent days. The majority are foundd on 20 meters and appear to be Indonesians, with the rest being Asian Intruders including a number of fishing boats. VK6XW says that the boats also use Amateur Radio VHF frequencies for ship-to ship communication.

Meantime, Chris Wright, VK2UW in Lighthouse Beach New South Wales Australia reports on other pirates in the Pacific. This group is using Amateur Radio calls such as VK4ZLY, several Zed L calls and American calls -- portable VK.

These are also on 20 meters and Chris says that they have become a major headache to a number of regularly schedule ham radio nets. (Q-News)

**

DX

In D-X, word that XV9DT is active as 3W22S now until the 31st of December. The special callsign is to celebrate the 22nd South East Asian Games, hosted by Vietnam. (GB2RS)

Also, HB0/HA0HW/P and two other stations will be operating from a location 1350 meters above sea level in Liechtenstein through the 10th of November. The three operators will be active on 160 to 10 meters, with an emphasis on the low bands. Modes used will be CW, SSB and RTTY. QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: NYC HAMS RUN THE RACE

Kenya again ruled the New York City Marathon but it was ham radio that kept the race running. Amateur Radio Newsline's Henry Feinberg, K2SSQ, takes a look at the November 2nd event and the radio amateurs who kept it moving along:

--

Steve Mendelsohn, W2ML: "When people say 'why do you do it' my answer is always the same. I'm in it for the T-shirts."

--

And after 27 years as Communications Director for the New York City Marathon, Steve Mendelsohn W2ML, has to have quite a collection. But Mendelsohn is also the first to tell you that he is only a small part of a big ham radio organization that keeps all the races within the New York City Marathon moving. And 2003 was no exception:

--
Mendelsohn: "At about 8 o'clock we went to the actual starting line at the Verrazno Narrows Bridge and Alan fired the air-horn that's starts the race for the athletes with disabilities. And, 15 minutes after that it was the start of the wheel-chair race; and 15 minutes after that was the start of the hand-cranked race and fifteen minutes after that the elite women. And finally, at 10:07 our operators climbed into vehicles -- because we maintain control of all of the vehicles on the course for safety purposes -- and we use Amateur Radio to do it -- and down the course we went.

At the other end, we climbed out of the vehicles; everyone went to do their next assignment and from the time that the male winner cross the finish line at roughly 12:15 p.m. until the time that we closed down the Family Reunion at 6:30 at night and started to tear down, 411 hams worked with the other 12,000 volunteers to make this the smoothest, best marathon ever."
--

The Alan that Steve referred to is Race Director Alan Steinfeld, W-2-T-N. They were but two of the 400 plus Amateur Radio volunteers who came out this year. And Mendelsohn says that the hams were kept very busy, especially in assisting in medical communications as runners fell by the wayside:

--

Mendelsohn: “We had people went down virtually everywhere on the course. The hams were there with the doctors to help and provided a great deal of medical communications back to the Family Reunion area. This allowed the families to know that a runner had dropped out: That they may have been taken to a hospital or that they were simply going home.”

--

Mendelsohn says that between 800 to 900 pieces of health and welfare traffic was passed between 10:07 a.m. and 4:40 p.m. He also says that 2003 was the years of APRS at the New York City Marathon. Ill have that part of the story next week.

With part of the course of the New York City Marathon in sight, I’m Henry Feinberg, K2SSQ, reporting for the Amateur Radio Newsline.

--

As for the race results. Kenya’s Martin Lel, running his first ever marathon won the Mens division. He timed in 2:10:30 beating out defending champion Rodgers Rop. Meantime Margaret Okayo smashed the course record. She won the race for the second time after crossing the line in 2 hours, 22 minutes, 31 seconds, shattering her own record by almost two minutes.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. Continental Electronics Has a New Owner
Broadcast transmitter manufacturer Continental Electronics has a new owner.

Few people in the broadcast industry took note this week when it happened, but the Dallas-based company was part of the $543 million purchase of Integrated Defense Technologies Inc. by defense electronics supplier DRS Technologies Inc., headquartered in Parsippany, N.J.

The transaction was completed following approval by a majority of IDT stockholders, the buyer said.

A Continental spokesman told Radio World Online Thursday that the impact of the sale on Continental is not yet known; but, he said, "I think it can only be positive." Continental has 140 employees.

The company has had a varied ownership history. Continental was founded in 1946 by James O. Weldon and later became part of LTV Corp. In 1972, Weldon bought it back.

In 1985, the company became a division of Varian Associates; in 1990, it was acquired by Tech-Sym Corp., which was bought in turn by IDT in 2000.

DRS, the new parent company, employs 5,700 people. Its announcement of the acquisition of IDT did not mention Continental. A spokeswoman did not immediately return a call about the company's plans for the broadcast marketplace.

Mark S. Newman, DRS Technologies' chairman, president and CEO, said in a statement, "This transaction has enhanced our content on key U.S. Army and Navy weapons programs, contributed a significant new base of U.S. Air Force programs and greatly expanded DRS's intelligence agency business, creating a formidable, defense electronics industry competitor."

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs

for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Are you sure you want a silver plating? Tin is the common plating,
and it does have a silver color. Silver will oxidize quicker, and will
dissolve into the solder, and can cause electromigration problems, and
weak joints.

I hope the company isn't using that name, since there is a
telecommunications company officially named IDT in Newark, NJ. I
worked for them for a while. They love to litigate.

Rich

2304. For sale: Partial ownership in 1 KW fulltime AM in Oregon.

Newsgroup: rec.radio.broadcasting
Date: 2003-11-14 15:13:59 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bp2rfn$r9p$1@xuxa.iecc.com>
Source record: 6732

For sale:

(The "Radio Crazy", it's back!)

Partial ownership in 1 KW fulltime AM in S. Oregon.
Oldest AM in county. On air over 60 years. Only
$100,000 full price without real estate. $900,000 with
very VALUABLE real estate. (Optional).

Joint venture. Active/inactive investors with at least
$10,000 each (ten grand)are welcome. No individual may
own more that 49 percent. That applies to me too!
("Anti-bully" legislation, hi!)

This station grossed over $227,000 in 2002. (Unaudited
financials).

I am not a crook nor am I a broker, agent, shill,
owner or part owner.

No "AM bashers" or other "negative nabobs" please.

If you have some sick twisted idea that I am a
criminal because I want to put together a legit.
business situation, please do your flaming elsewhere.

The "Radio Crazy" may be crazy but he is not a crook!
Hi!

Tel: (478)741-1710 in Macon, GA or email.

73,

Meyer Gottesman, W6GIV

I believe that the Collins broadcast transmitter line was a relatively
recent acquisition, early on the acquired Western Electric's AM
transmitter business, which I think set the tone for their future
transmitter business. The Western Electric divestiture is interesting, I
don't know that anyone picked up the FM line, probably because FM was
going down the tubes at the time? A company whose name I don't remember
seems to have picked up the Western Electric Television transmitter line,
which may never have been sold under the Western Electric name. Anyone
have more info on this?

SEL got WECo's VHF TV transmitter line.

The merger of the Collins line into CE was done many decades after the creation of CE from the spin-off of WECo's AM line.

CE also made UHF TV transmitters in the 1950s. Whether any of these were WECo inspired, I can't say. They sure resembled WECo boxes, however.

WECo's non-telco assets were spread all over the place.

Litton Industries, my former employer, bought the Westrex Corporation assets from WECo, and these assets included all film production equipment, and all disk recording equipment ... IOW any equipment which handled "principal recording elements".

Litton also got the Westrex trademark, and began to market this equipment under the Li/Westrex name, with Westrex Corp itself being a subsidiary of a supsidiary of Litton Industries, Inc.

You can buy a chemical compound from www.partsexpress.com that you just
mix up and put your board into for tin plating. You don`t want silver
plating as the other fellow told you as it would tarnish. Rob

2314. Bizzare Car AM Radio Reception Problem

Newsgroup: rec.radio.broadcasting
Date: 2003-11-16 22:04:49 UTC
From: kennyp14@yahoo.com
Message-ID: <bp8sa1gqb1@xuxa.iecc.com>
Source record: 6740

This one is driving me nuts. I had a decent JVC Car stereo. When it starts getting cold here the reception of most AM stations gets horrible - a high pitched whine accompanies most signals. Thinking the JVC was at fault, I purchased a top of the line Pioneer unit. SAME PROBLEM! It gets weirder. If I take a portable radio into my car, with the car running, and the Pioneer turned off, no problem with the signal on the portable. As soon as I turn on the Pioneer, the portable makes the same high pitched whine!

To recap:
-No problems in the summer, only when it is cold outside!
-Taking a portable radio into the running car does not exhibit the problem, so I don't believe that there is interference from the car.
-Turning on the car radio causes the exact same interference on a portable radio in the car.
-I have tried 2 different brands and both had the problem.

Any help or ideas would be greatly appreciated.

Hello
I am getting the feeling that Sirius et al will have dull announcers like the satellite radio station. Is this true?

Also I hear complaints the Drake style announcers lacked personality. Granted they weren't like WABC but they weren't just readers of liners. They were quite enjoyable compared to the crud we have now.

One more note; if I go on a weekend shift at a low watt radio station, posts on here say they want writers of comic material. Do you think this is a good idea for beginners? If you convey a sense of having fun and crack a few jokes isn't that good enough?

I did demo tapes fifteen years back and attempted to be funny. They stunk. Of course my voice was no help (it helps little being Southern and having R and T pose difficulty to the tongue).
Thanks
Ken

Hello
I have an aircheck I'd love to share but I am afraid nobody will touch it. Granted I'm not a political correctness freak but I don't want to submit something that will be rejected.

It is from WNKS-FM 102.9 in 1987 or so. It has Bear O'Brian, Marcia Shipley (black news personality), "Dr Dave" and a character known as "Willie Lee McGee". Willie Lee is a black man, done likely by a white staffer. He lives in a dumpster and has severe alcoholism. The tape details his life story.

This reprise of Amos N' Andy may be shot down despite it being representative of Eighties radio content and containing music.

Should I waste my time?
Thanks
Ken

I'm wondering if the heater is interacting with the car radio and a portable is probably far enough away from the source of the "noise" that it can't pick up the noise...just radio signals.

Greetings From Cosmic Connection,

I am the host of Cosmic Connection. A Ufo Television Series. Since 1993 we have covered the ufo phenomenon with interviews from Betty Hill to Stanton T. Friedman and on subject topics ranging from Roswell, Area 51, Alien Abductions, & Crop Circle formations. On Cosmic Connection we discuss the latest in World sightings and local coverage. We share the film of our audience that send us their video recorded events and tales of their past experiences. I am inviting you to join our program every Monday night at 10 PM CH # 16 SNCAT Reno, Nevada. So you may catch up on some of our past series programs. If you would like updated information on Cosmic Connection please write to Cosmo at ufotvshow@hotmail.com If you know of a friend that may enjoy our programming please pass this letter on.

Thank You

Missing Fisherman of October, 1989
After dwelling on this case for 13 years, I still find it very puzzling. Fishermen are a unique bunch with the ocean being front and foremost in their lives. They have their superstitions about the ocean, combined with a great deal of knowledge and respect.
Oscar Schultz, 70 years old with 30 years of experience as a commercial fisherman, left his home in Port of Charleston on Oct. 9, 1989 at 6am for a 1 day fishing trip alone. Fred Buck, 57 years old with 10 years of experience as a commercial fisherman, left his home in Port at Yaquina Bay on Oct. 10, 1989 for a 1 to 2 day fishing trip. Both men were known to go out alone, and with the slow fishing season that year, lone fishing was a common occurrence for most, as they couldn't afford to pay help with the small catches.
The weather was mild all that week, and the ocean was calm. Accidents do happen on fishing boats. Being washed overboard by sneaker waves, or from slipping on a wet deck, are risks all to familiar for those in the business.
We know that Oscar Schultz had a heart attack in 1983, but hadn't had any problem since. Oscars 28ft troller, the Gloria L, was found 40 miles off the mouth of the Umpqua River with the engine running on Oct 12th. Oscar was nowhere to be found.
Fred Buck's 38ft troller, the Acie-O, was found 50 miles off Winchester Bay. The engine running, in gear, going in circles, and like Oscar, Fred was nowhere to be found.
The boats were 20 miles apart in a straight line.
The Coast Guards scenario was that Oscar may have had a heart attack and fell overboard, and Fred happened to come onto his body floating in the ocean and tried to retrieve his body, and he in turn fell

overboard and could not get back on his boat.
This puzzles me in that an experienced fisherman would never leave his boat in gear and try to retrieve anything from the ocean. I think this is very unlikely. Would he not have reported to the Coast Guard or other authorities that he had found a body floating in the ocean?
Fred's cooking stove was also left on as if he was ready to make himself some dinner and something had interrupted his meal.
Both men were missing from their boats, with the boat engines running and one boat in gear.
Newport Marine Surveyor Tom Curry was quoted in the Oregonian. "I don't think a wave could have swept either man overboard, because the ocean had been relatively calm all week". Brent Hamstreet in a Northwest magazine article said."People saw flashing lights over the ocean all week", and Bruce Pimental of the Coast Guard Station in Seattle said in a Statement to the Oregonian "I don't know if Intelligence people are looking into it or people interested in celestial visitor's are thinking about it. I'm sure somebody is asking the question. Why and how come?""
Now this is a very interesting quote from a spokesman of the Coast Guard to have made on record. Why would he have made such a quote if he was convinced of the Coast Guards earlier scenario?
Investigation from the Coast Guard and local Officials found no foul play with their investigations. 2500 square miles of ocean had been searched looking for the boats and fisherman. Neither body was found, they just vanished.
12 days before Oscar's departure from his port there had been a major sighting in Tillamook. Approximately 50 people, some of whom were law enforcement and the local newspaper owner. The sighting had been observed along the Oregon and Washington coast. On Nov. 29th 2 hunters reported an additional sighting of a large white object in the Tillamook area. So we had UFO activity from Sept. 28th through Nov. 29th, putting the fisherman right in the middle of this activity.
This mystery has intrigued me for 13 years. I am not aware of anyone else looking into this mystery. Oscar is not related to me so that is not a factor in my interest. But there are just too many circumstances relating to this case that don't make sense to me. The statement by Bruce Pimental of the Coast Guard comes to mind every time I think about this case.
Did Oscar and Fred fall overboard? Or did celestial visitors have a hand in their disappearances? Perhaps we will never know.

No. It isn't a reprise of Amos and Andy. Even though the show was done
by white personalities, the characters were portrayed as good natured
ordinary people. The characters, as I envisioned them, were the black
versions of Ralph Kramden and Ed Norton. Always looking for a quick
buck in get rich quick schemes.

There isn't much that's funny about a white personality playing a
seriouusly dysfunctional black character. If you know anything about
either homelessness or alcoholism you'll have a very hard time pulling
much humor out of them. Both conditions are horrible.

Revisit the amp. If it's not the stereo head (you've changed it), it has to be something connected to the stereo head which would be the amp. More likely, it's probably a bad cable or bad connector on the cables going between the stereo head and the amp.

There has a been anew station in the Dallas-Fort Worth market testing KNOR, the station I think use to be in Norman, Oklahoma. They have been playing Jazz, some of it being more like Coltrane, Miles Davis than the smooth jazz played on KOAI. I hope it doesn't turn out to be just another Country and'or rock station, or worse a Christian station.

Councillor Majorie C Decker, Chair Cable TV, Telecommunications and Public Utilities Committee
http://www.cambridgema.gov/cityClerk/CommitteeReport.cfm?instance_id=74

Committee Reports
Communications and Reports from City Officers

City Council Office
Committee Report

Committee Report #3
CABLE TV, TELECOMMUNICATIONS AND PUBLIC UTILITIES COMMITTEE MEMBERS

In City Council November 17, 2003
Councillor Majorie C Decker, Chair
Councillor Anthony D Galluccio
Councillor David P Maher

The Cable TV, Telecommunications and Public Utilities Committee held a public meeting on
Wednesday, October 22, 2003 at
twelve o'clock and forty-five minutes p. m. in the
Ackermann Room.

The purpose of the meeting was to continue discussing coordination of resources between the Municipal Cable, CCTV and the School Department cable.

Present at the meeting were
Councillor Marjorie C. Decker, Chair of the Committee,
Calvin Lindsay, Jr., Director, Municipal Cable,
Dhonyale Jones, Municipal Cable,
Joan Stern, Coordinator of Library Media Services, School Department,
Susan Fleishman, Executive Director, CCTV,
Ginny Berkowitz, CCTV and
Donna P. Lopez, Deputy City Clerk.

Councillor Decker opened the meeting and explained the purpose.

Councillor Decker stated that a survey is being formulated to see what the general public expects from cable, are needs being met and what else could be done.

She would like to strengthen cable through a collaborative effort and to review the allocation of resources.

The survey would be sent to department heads and opinion leaders.

Suggestions for the survey were submitted to the committee by Municipal Cable (ATTACHMENT A) and CCTV (ATTACHMENT B).

Councillor Decker asked if open-ended questions should the format of the survey.

Ms. Fleishman suggested starting with an educational part outlining what each entity does.

Ms. Stern informed the committee that a decision is being made by the Superintendent of Schools and this would make the expectation of the School Department collaborative different.

The creation of a studio that would be shared and funding for educational access has not yet been received are some of the issues.

Ms. Berkowitz stated that the Superintendent of Schools needed to decide if he wants the educational access as part of the School Department.

A leadership position and an education access department needed to also be created.

Educational access in the School Department has not grown and this is an opportunity, stated Ms. Berkowitz.

Councillor Decker stated that she would forward a letter of support by her to the Superintendent of Schools.

Councillor Decker stated that she wanted to get to the root of what the public thinks is the responsibility of each cable entity.

Ms. Jones responded that whom the survey should be sent to should be decided first.

Councillor Decker stated that at the last meeting is was decided that the survey should be sent to the city family and the city leaders.

Ms. Berkowitz asked if all arenas needed to be addressed by each entity.

Ms. Stern asked what event would require coverage by the three entities.

Ms. Jones responded the World's Fair and the Block Party.

Ms. Fleishman informed the committee that these events are not the responsibility of Channel 8.

Mr. Lindsay expressed his concern about false expectations due to the survey.

The issue comes down to how are decisions made and what events get coverage.

Councillor Decker stated that she would like to hear from the public on what the public would like to view on cable, and find out what is available.

Municipal Cable, CCTV and School Department cable needed to be explained in detail.

She would like to bring in people to explain the cable possibilities.

Cambridge, she said, is supposed to be a technologically savvy city.

She is attempting to get support and interest in the issues of what is expected and what are the possibilities.

If the educational portion generates excitement then maybe a forum could be held.

She stated that she wanted to ensure that the resources are being used efficiently.

Ms. Berkowitz stated that the survey is a way to educate the public about what is available, what are the local channels and what is designated for these channels.

She suggested that each entity list what they do.

Mr. Lindsay agreed with this suggestion.

Ms. Fleishman stated that CCTV has a brochure entitled GUIDE TO LOCAL PROGRAMMING ON CABLE TELEVISION IN CAMBRIDGE (ATTACHMENT C).

Ms. Berkowitz suggested that the survey should be comprised of the Guide and a page of questions about what people wanted to view on cable (ATTACHMENT D).

She also favored a master calendar.

Councillor Decker stated that the survey should contain a comment that resources are limited.

A question should also be phrased in the survey to seek departmental interest and participation and ask for a department contact.

Ms. Fleishman stated that the survey should contain questions on issue-oriented formats.

Councillor Decker responded that she would like to be specific on the issue-oriented matters.

What issue-oriented matters, such as environment, political or literacy, would the public like more to view?

Councillor Decker questioned Mr. Lindsay that if a program were done on environment would there be studio space available.

Mr. Lindsay stated that it depended upon who would cover the program and if it were a studio-based program.

Ms. Berkowitz stated that regular weekly programming requires organization for space, studio and content organization.

Ms. Stern stated that she wanted students to work with a professor in an environment such as this.

There are personnel in cable who wanted to work with the School Department.

Ms. Jones asked if all the schools have live cable.

Only one school does not have live cable, stated Ms. Stern.

The high school needed more live cable drops.

Councillor Decker asked who covers the Kennedy School of Government.

Ms. Jones stated that the Kennedy School does their own programming.

A discussion ensued about sports coverage.

Councillor Decker stated that it is a challenge for CCTV and Municipal Cable to cover sports programming.

Possibly students could cover the sporting events.

Ms. Stern stated that students are covering sporting events now.

Ms. Berkowitz stated that there are school-based and community-based sports.

Cambridge has a lot of sports and sports are not easily covered.

There at 95 soccer games in Cambridge each week.

She suggested a specific time slot around sports or a game in each sport for each gender should be cablecast.

Councillor Decker asked who covers sports.

Mr. Lindsay responded no one.

Municipal Cable does cover the game at Thanksgiving and the Mayor's Cup.

Ms. Berkowitz stated that the School Department should cover school sports; Municipal Cable should cover city sports.

Sports coverage is not the mandate of CCTV, however one hour of sports is covered.

Councillor Decker suggested scheduling a future meeting with the Athletic Department to have a discussion about the challenges encountered covering sporting events.

The point is to figure out how to get sports on cable stated Ms. Fleishman.

Ms. Berkowitz told of a program entitled "Bring Your Own Camera," but there was no interest from the public in the program.

Councillor Decker stated that at the sports meeting the following organizations should be invited:
* Cambridge Youth Soccer;
* Cambridge Little League;
* School Department Athletic Department;
* Pop Warner football and cheerleaders;
* Cambridge Youth Hockey; and
* Representatives of basketball.

This sports meeting would also serve to educate the sporting leagues about the challenges faced by the cable entities to cover the events.

In conclusion Councillor Decker requested Mr. Lindsay and Ms. Stern to review the CCTV Guide, make amendments and provide "sign offs" on the Guide.

Ms. Fleishman suggested to Ms. Stern that information be placed on the School Department bulletin board.

The next meeting was scheduled for
Thursday, November 6, 2003 at
twelve o'clock and thirty minutes p. m.

Councillor Decker thanked those present for their attendance.

The meeting adjourned at one o'clock and fifty minutes p. m.

For the Committee,
Councillor Marjorie C. Decker, Chair

ATTACHMENT D

* 1.What are the opportunities for collaboration between Municipal Cable (Channel 8), CCTV and the School Department?

* 2.With the limited resources what events should be designated as "must coverage"?

* 3.Should school based or community based sporting events be covered and what entity should cover these sporting events?

* 4.What issue oriented formats, such as environment, politics and literacy should be covered.

Most communities -- mine is no exception -- has at least three "public service" channels.

One is the Community Access station. Anyone who wants a show can be a TV star. He/she must take a course and learn how to use the equipment properly, and the show cannot be commercial in nature or have an 'aroma' leading back to a commercial venture. In my town a lot of that broadcast time goes unused.

There is also a government access channel. Events such as city council, school committee, cable TV committee meetings, etc. are carried there, as are a few governmental ceremonial functions.

There is also a school department channel. The high school has a studio. There are, two problems with cable TV and high school sports --

1) There has to be a production team willing to do the work -- usually within the school itself and students will not commit to it

2) Here in Massachusetts, those that control high school athletics are a little antsy about live television of high school events. They harken back to the 1950s, when the NFL wouldn't put sold out home games on TV, fearful that attendance would eventually erode. Times have changed. Those that run high school athletics have not.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues,

hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

2331. Technical Radio Broadcasting Questions

Newsgroup: rec.radio.broadcasting
Date: 2003-11-19 15:16:45 UTC
From: johnfxwest@yahoo.co.uk
Message-ID: <bpg1gt$8rc$1@xuxa.iecc.com>
Source record: 6658

I am the director of an NGO building out independent radio networks in Afghanistan. The combination of geography and security problems, as you can imagine, are ferocious. As a result, we need to examine a lot of different technical options and I would like to ask the group some questions:

1) How can AM be made more one directional than another? We might want to put strong AM signals in towns near Afghanistan's borders but cannot antagonise neighbours by having large signal spillage into their territory. What are cost implications of channelling an AM signal in this way?

2) How far can an STL wireless transmission reliably broadcast? I understand most STLs are wire, but there are also wireless STLs using the 940-950 Khz band. Could we use this wireless STL to spread signal to repeater networks across mountains where FM would be difficult?

3) How far could a big FM signal reach, assuming little constraint on power?

4) In FM repeater networks, how many links down a chain can a signal reliably be put through? Are repeaters normally only a one stage phenomenon, used like spokes in a wheel, or can you set up a chain up and down a long valley for example?

5) Does anyone know about renting space on satellites? How much it would cost to have a 24 hour audio channel beaming down to receivers? How much a single uplink mechanism might cost, and receiver dishes?

Many Thanks

John

> over 60 years.
>

Meyer, I am not interested in stake but have just posted on the group technical questions about both AM and FM. I wonder if you could tell me how far your signal reaches with 1 KW and over what kind of terrain? My name is John West, I am Director of a media non-profit based in Afghanistan called Internews, and you can see my post on the main board for the group.

Thanks

John

2333. For sale: Partial ownership of fulltime 1 KW AM in Oregon.

Newsgroup: rec.radio.broadcasting

For sale:

The "Radio Crazy", it's back!

Partial ownership of fulltime 1 KW AM in Oregon. City of about 20,000. On the air over 60 years. Billed over $227,000 in 2002.

They are asking only $100,000 WITHOUT real estate.

Joint venture. (If you venture, you land in the joint! Hi!)

Active or inactive investors with at least $10,000 each are welcome. Nobody can own over 49 percent and that includes me!

All investors would be on the board with full voting rights if desired.

I am a semi-retired radio engineer. The "Radio Crazy" ain't THAT crazy! I was Chief Engineer for a 5 KW fulltime AM in New York City in 2001. Ham since 1950.

Tel: (478)741-1710 in Macon, GA.

Only those willing to fully identify themselves will be told the callsign and city of license.

Please, no "AM bashers" or other negative nabobs. If you are the type that has seen too many movies and assumes I have a one way ticket to Brazil, please don't waste my time and insult me! I worked for the Feds in 1972 and held a secret level security clearance.

All monies would be held in the escrow account of a Washington DC communications attorney. I don't touch a dime. I could not if I WANTED to!

Subject to FCC approval of the license transfer, of course.

Standard stupid legally required disclaimer: The is an element of risk and you could lose all or part of your investment.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"
aka Moron Gottesman
aka Moronic Gottesman (grin!)

2334. Optimod question.

Newsgroup: rec.radio.broadcasting
Date: 2003-11-19 17:30:48 UTC
From: ads@wexcfm.com
Message-ID: <bpg9c9aor1@xuxa.iecc.com>
Source record: 6660

I some how had a 3000W FM Radio station handed to me, and i have a few quick questions.

The station currently has an ORBAN Model 8100A OPTIMOD-FM. I noticed that my station sounds 'very flat' compaired to other stations playing the same music. My question is this:

I would like to make the music 'thump'. Can i do some audio processing before the optimod? (ie add a bit more .. *unf*), or would the optimod just strip that anyways? All i would like is for the drums and bass to hit just a little harder, i've dorked with the optimod and had the engineer in there, and i think we have it sounding as good as its going to get by itself, but want more, but to poor to buy even a newer one for now.

Sorry if this question seems silly, or retarded, i know nothing about any of this, like i said i fell backwords onto the station and i'm just trying my best to keep it operational.

I appreicate your time!

Best of luck with the station! Where is the transmitter located in relation
to the studios? How are they connected? Where in this chain is the Optimod
located? The Optimod is capable of limiting and maybe some compression,
but it will not compare to processors that have come along since the 8100
rolled out of the factory.

There are a lot of things that have been done with Optimod 8100's;
the best I've heard involved changing some of the chips in the
Optimod and installing an Aphex Compellor and a set of Gentner
Audio Prisms in front of it. Some folks have used replacement cards
like Glen Clark's Cobalt Blue card in the Optimod.

However, today it's much easier just to replace the 8100 with one of
the latest digital boxes such as the Optimod 8400 or Omnia 6.

We just replaced an Optimod at one of our stations with an Inovonics
Omega FM processor; it's an excellent box that's almost infinitely
configurable. And it's only $4500.

johnfxwest@yahoo.co.uk (John) writes:

>1) How can AM be made more one directional than another?

The usual method is to put up two or more towers approximately
1/4 wavelength tall and vary the phase and amplitude of the signal
fed to each to produce the desired directional pattern.

>2) How far can an STL wireless transmission reliably broadcast?

Up to about 40 miles depending on the height of the antennas, their
gain, and the power used. The terrain must be favorable.

>3) How far could a big FM signal reach, assuming little constraint on
>power?

The reach will depend on the antenna height and the surrounding
terrain. A California FM where I used to work ran 18,500 watts from
the top of a 3,000-foot mountain and had regular listeners 100 miles
away.

>4) In FM repeater networks, how many links down a chain can a signal
>reliably be put through? Are repeaters normally only a one stage
>phenomenon, used like spokes in a wheel, or can you set up a chain up
>and down a long valley for example?

I don't do repeaters, but there used to be a network of public radio
stations in New England that relayed "Morning Pro Musica" from one
station to another. The farthest station was 3 or 4 stations down
the chain and sounded pretty grungy, according to what I was told.
But this was 20 years agio, and technology has come a ways since.

>5) Does anyone know about renting space on satellites?

Yes; we're doing that right now.

>How much it
>would cost to have a 24 hour audio channel beaming down to receivers?

We're paying $2,200 a month to lease channel space on Galaxy 4R from
National Public Radio. We use the channel 24 hours a day to feed
a dozen or so affiliates from Maine to California.

>How much a single uplink mechanism might cost, and receiver dishes?

The uplink cost us about $50,000 to set up. The receive dish I set up
at one affiliate cost about $10,000, including the dish, the receiver,
and installation.

But of course we're not in Afghanistan.

I hosted "Morning Pro Musica" with Bill Cavness in the days of of air networking. Until microwave came in the signal from WGBH, Boston to WFCR, Amherst, MA was pretty bad. It was known as the Eastern Educational Radio Network.

Just imagine the quality from stations taking WFCR off the air.

Rich

2339. For sale: Partial ownership in 1 KW fulltime AM in Oregon.

Newsgroup: rec.radio.broadcasting
Date: 2003-11-20 15:08:55 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bpile7$h3m$1@xuxa.iecc.com>
Source record: 6668

For sale:

The "Radio Crazy", IT'S back!!!!

Partial ownership in 1 KW fulltime AM radio station in small Oregon city of about 20,000 population. About 100,000 in that county. Station is on the air over 60 years. Oldest station in that county.

Total asking price is only $100,000 WITHOUT real estate. Station billed over $227,000 in 2002.

This is a JOINT VENTURE. There is an element of risk and you could lose all or part of your investment. Given the insanely low selling price, this is not very likely!

Active or inactive investors with at least $10,000 (Ten thousand dollars) each are welcome. The first two investors will get 1.25 ratios. In other words an extra 25 percent over what you SHOULD have. Instead of 10 percent you'd have 12.5 percent for same investment and so on. This is to reward the risk-takers. We need to get going on this!

I am a semi-retired radio engineer. My last position was Chief Engineer (2001)for a 5 KW fulltime directional AM in New York City. The "Radio Crazy" ain't THAT crazy! Hi!

I am no broker, agent, shill, owner or part owner. I am also no crook! That should go without saying.

Please, no "AM bashers" or other negative nabobs. Yes, I don't know what the hell a "nabob" is either! (grin!)

Email or call please (478)741-1710 in Macon, GA.

Do not respond if you are not a US citizen or have any felony convictions as an adult. The FCC will screen you!

73,

Meyer Gottesman, W6GIV

The optimod is in the chain as follows:

!MUSIC! --> BOARD --> OPTIMOD --> STL > Beamed to the transmitter.
Where the other STL is located.

I was advised perhaps I could do some audio processing on the
otherside of the optimod so it would go MUSIC - BOARD -OPTIMOD -
PROCESSING - STL. But to me, this sounds like trouble. And i think I
would have to convert composite audio into analog audio, and then back
again -- pain in ass, I'm looking for some good deals now on an aphex
compellor, donations always are welcome! HAH!

Thanks alot,

Keith

You've all been very helpful!

Amateur Radio Newsline=E2=84=A2 Report 1370 - November 14, 2003

Amateur Radio Newsline report number 1370 with a release date of Friday,=20
November 14, 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T.=20

Internationally sponsored ham radio training begins in Albania, UOSat-14=20
goes QRT for good and ARISS honors the late Roy Neal, K6DUE, with an on=20
the air -- space to ground event. The details on Amateur Radio Newsline=20
report number 1370 coming your way right now.

(Billboard Cart Here)=20
=20
**

BREAKING NEWS: AUSTRALIA TO BE CODE FREE

The Australian Communications Authority has announced to QNEWS that as=20
of January First 2004 CW will no longer be a requirement for Amateurs to=20
operate on the HF bands. From Monday November 17th, the ACA website=20
will have the press release under the signature of Dr. Bob Horton. Full=20
details on next weeks Amateur Radio Newsline report. (Q-News)

**

RADIO EDUCATION: AMATEUR RADIO PROGRAM OPENS IN ALBANIA

We told you a few weeks ago that it was going to happen and now it has. =20
Ham radio training is now available in Albania. Jeramy Boot, G4NJH, in=20
the U.K. takes an in-depth look at the new internationally sponsored=20
training program:

--

A unique amateur radio program started in Tirana, Albania the 9th of=20
November. Thirty-four third and fourth-year university students began a=20
five-week amateur radio course using RSGB study material as the=20
reference books.

The course will culminate in CEPT license examinations. It is being run=20
in cooperation with Mr. Spartak Poci, the Albanian Minister of=20
Telecommunications, and the Polytechnic University of Tirana.=20

A unique part of the program is the way in which amateur radio is being=20
integrated into the regular university courses. The course will not=20
only teach amateur radio up to the RAE Full-license standard, but also=20
the role of amateur radio in society, QSL'ing practices and successful=20

Dxpeditioning.

During the five-week period, ZA1A will be active on many bands and modes=20
while demonstrating amateur radio to local telecom and education =20
administrators, as well as to the students. Multiple locations will be=20
used and several stations may be active at the same time. After the=20
course, all the donated equipment will serve the amateur community.

Jeramy Boot, G4NJH, in Nottingham, the U.K.
--

This unique, one-of-a-kind ham radio training program is supported by=20
Region 1 of the International Amateur Radio Union. Additional=20
assistance comes from several national ham radio societies, the Northern=20
California D-X Foundation, Vertex Standard, Fluidmotion Corporation,=20
Malev Airlines and the Rogner Europark Hotel in Tirana Albania. (RSGB,=20
OH2BH)

**

RESTRUCTURING: SWEDEN MAY GO CODEFREE

Sweden could be next nation to drop the Morse requirement for ham radio=20
licensing and end C-W testing. =20

The November issue of the Swedish national amateur radio society's=20
magazine, QTC, says -- and we quote: "Soon - very soon - the=20
requirement for knowledge of C-W for High Frequency band access will be=20
dropped for the country's would-be amateurs and current Class 2=20
amateurs".=20

SM0SMK is the President of the Swedish national society. He says that=20
they hope the Morse code test requirement will be removed at the end of=20
the year. (GB2RS)

**

HAM RADIO IN SPACE: OSCAR 14 GOES SILENT

One of ham radios most popular emergency communications Easy Sats has=20
gone Q-R-T. This with word from the Surrey Space Center that U-Oh-Sat=20
Oscar 14 has finally reached the end of its mission after an amazing 14=20
years in day to day service. =20

Launched in January of 1990, U-Oh-14 was the first 9.6 kilobit per=20
second amateur digital communications satellite. It literally pioneered=20
the packet satellite or PacSat concept. =20

After about 14 months on-orbit, U-Oh-14 was switched to commercial=20
frequencies for humanitarian service by an organization called Satelife. =
=20
It was used by them until 1997 when it was returned to Amateur Radio=20
service and configured as an F-M repeater in space. =20

A failure of one of the cells of its on-board battery supply is keeping=20
the entire pack from recharging from the satellites solar array. This=20
causes the transmitter to shut down shortly after it is commanded on. =20
This situation lead to the decision by controllers to terminate the=20
micro satellites mission after more than 72,000 orbits of the planet. =20
(RSGB)

**

RADIO HONORS: ARISS TO CELEBRATE THE LEGACY OF ROY NEAL, K6DUE

The Amateur Radio on the International Space Station team will be=20
honoring the memory and the legacy of the late Roy Neal, K6DUE. This,=20
with an operating event involving the crew on the orbiting outpost and=20
hams on the ground. Amateur Radio Newsline's Norm Seeley is here with=20
the details:

-- =20

In a joint release, Frank Bauer, KA3HDO and Sergej Samburov, RV3DR of=20
the ARISS International team say that the event is being held to=20
commemorate Roy Neal's vision and dedication. This, in the development=20
of manned Amateur Radio space communications. =20

And as a celebration of Roy's contributions ARISS has requested that the=20
current I-S-S crew take to the airwaves the weekend of November 29th and=20
30th to communicate with as many ground based amateur radio operators=20
as they can. After the initial two days, the operation will continue=20
through the month of December using both voice and packet. =20

Ham radio from the International Space Station signals will be on the=20
usual frequencies. These are 145.80 MHz as the worldwide voice and=20
packet downlink. That's where you listen. =20

The worldwide packet radio uplink channel is 145.99 MHz. 144.49 MHz is=20
the voice uplink for the America's and the Pacific while 145.20 MHz is=20
where to call if you are in Europe, Central Asia and Africa.

Roy Neal, K6DUE, died last August 15th due to complications following=20
heart valve replacement surgery. He is very much missed by everyone in=20
the world wide ham radio community especially by us here it the Amateur=20
Radio Newsline where he was a friend and colleague.

The full text of the ARISS International release about this special=20
operation commemorating Roy Neal's contributions to manned ham radio in=20
space is now at our website. That URL is www.arnewsline.org. Scroll=20
down to the new "This Just In" area and you will find it there.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

According to Bauer and Samburov hams making contact with the Roy Neal=20
Commemorative Operation will be eligible for a special certificate. =20
More ham radio in space news later on in this weeks report. (ARISS)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline,=20
heard on bulletin stations around the world including the W9EAR repeater=20
of the EARS Repeater Network serving Indiana, Kentucky and Illinois.

(5 sec pause here)

**
AN ARNEWSLINE(tm) EDITORIAL: AN ANONYMOUS NOTES OR E-MAIL PLEASE =20

I'm Bill Pasternak, WA6ITF, with a short editorial comment. Actually,=20
its more of a reminder that the Amateur Radio Newsline does not accept=20
anonymous letters and e-mail as valid information or story leads. =20

Every so often, a letter or e-mail will arrive making all sorts of=20
claims. It might deal will allegations that a ham radio test session is=20
corrupt, or identifying someone as the purported jammer of a net or that=20
a ham is doing business over a local repeater. This past week we=20
received two such notes. One claimed that a repeater was discriminating=20
against a group of individuals. The other claimed corruption in the=20
management of a ham radio convention. Both had something in common --=20
they were unsigned. And here's our policy in dealing with unsigned=20
correspondence. Ready?

(Sound of actual letters being torn up and toss in the trash basket.)

That's right, you just heard me rip it up and toss it in the garbage=20
can. And the reason is simple. If the person sending the letter or the=20
e-mail does not have the courage to sign it, then the chances are that=20
he or she is attempting to use us and you in a personal vendetta. And=20
friends, we are not going to let ourselves or you to be used in=20
someone's private war. That's been our policy since our days as the=20
Westlink Radio Network and it is still our policy today.

The bottom line. If you are going to send us information you must=20
provide identification and be ready to take responsibility for your=20
words and actions. I you are not willing to do so, please save us the=20
time and effort of doing this -- and tossing it in the trash. =20

This has been an infrequent Amateur Radio Newsline editorial. In Los=20
Angeles, I'm Bill Pasternak, WA6ITF. (ARNewsline(tm)) =20

**

ENFORCEMENT: ALLEGED TOWER UNBOLTER CAUGHT

A follow-up to a story we aired two weeks ago about a man trying to=20
unbolt power transmission towers in three western states. He has now=20
been captured.

According to news reports, the suspect is identified as Michael Poulin. =20
He claims that his actions illustrate how vulnerable the power grid=20
might be to acts of terrorism. At airtime, charges against him are=20

pending. (Published news reports)

**

ENFORCEMENT: IRLP HARASSMENT

A pair of mid-West hams are being asked to explain their actions their=20
on the air activities. The FCC's Daryl Duckworth, NN0W, tells us who=20
and why:

--

Duckworth: "Two Oklahoma amateurs; Johnny Adams, KD5QJG, of Dell City=20
and Jack Stokes, KE5KR, of Oklahoma City have been queried regarding=20
complaints of deliberate interference and harassment of repeater users=20
on W5QO, 144.650 and 145.250 MHz."=20

--

The FCC says that at the time the incident occurred, the W5QO repeater=20
was functioning as an IRLP node. Adams and Stokes were given 20 days=20
from the day that they received the FCC's letter to answer the charges. =20
They were also warned that failure to respond could result in the=20
revocation of Amateur station license and suspension of operator=20
privileges. (FCC, RAIN)

**

ENFORCEMENT: HEY YOU LEFT THE RADIO ON

The FCC also wants to know why a ham may have walked away from his car=20
with his rig running as a cross band repeater. Again, the FCC's Daryl=20
Duckworth, NN0V:

--

Duckworth: "A complaint of two hours of interference on September 16th,=20
coming from an amateur transceiver unit, in a car, unidentified,=20
unattended, and operating in crossband mode has prompted the Enforcement=20
Bureau to inquire of the vehicle's owner, KG6QKR, Angel Carballo, of=20
Freemont California. The vehicles was located at Hamilton and Bascon=20
Avenue's in San Jose (California) at the time of the interference to=20
145.23 and 146.94 MHz."

--

Like Adams and Stokes, Carballo was also given 20 days from the date he=20
received the FCC's letter to file a response. (FCC, RAIN)
=20
**

RADIO LAW: A CLARIFICATION ON EQUIPMENT SEIZURES

Phil Kane, K2ASP, says in the CGC Communicator that the FCC does not=20
confiscate equipment. =20

Kane, now an attorney in Oregon is the retired District Director of the=20
FCC in San Francisco California. He says that he served many times as=20
an on-scene supervisor during events such as the recent raid on an=20
unlicensed broadcaster where equipment was taken. According to Kane,=20
seizures are made by the U.S. Marshal Service executing an order of the=20
Federal District Court. Any items taken are held pending court action=20
of forfeiture of the equipment to the Government. =20

According to Kane, the FCC agents on scene are there only as technical=20
experts. They identify to the Marshals what equipment falls under the=20
purview of the seizure warrant. (CGC)

**

RADIO RULES: THE FEDS ON FRS

Federal government entities have been authorized to purchase and operate=20
radios certified by the FCC in the Family Radio Service. This,=20
according to the May 2003 Manual of Regulations and Procedures for=20
Federal Radio Frequency Management.

The manual says that pursuant to Part 95 Subpart B of the FCC Rules and=20
Regulations, government users will be accorded the same privileges as=20
non-federal users. Also, since FRS users must share each channel and no=20
user is assured protection from interference caused by another=20
authorized user, federal entities may not purchase and operate F-R-S=20
radios for planned communications operations that safeguard human life=20
or property.

The Manual of Regulations and Procedures for Federal Radio Frequency=20
Management is a great publication that has a ton of useful information. =20
The only drawback is that it costs $342.00 new. However it is available=20
for viewing and download, chapter by chapter, at=20
www.ntia.doc.gov/osmhome/redbook/redbook.html (CGC)

**

HAM EDUCATION: NEW ON-LINE HELP FOR INSTRUCTORS

The American Radio Relay League's Field and Educational Services branch=20
has announced a new resource for active Volunteer Instructors. Titled=20
the Online Instructor Primer, it's a new compilation by Linda Mullally,=20
KB1HSV, that's jam-packed with helpful tips, links, and tutorials sure=20
to help instructors eager to try new ideas and approaches. More=20
information about it is at the ARRL website. Just take the link to=20
www.arrl.org/FandES/ead/instructor/oip (ARRL)

**

NAMES IN THE NEWS: PATRIOT NAME CHANGE

Turning to this weeks names in the news. Word that the Patriot DX=20
Association has changed its name to the New England DXCC with a new=20
mission. That of fostering participation in DX'ing and the DXCC=20
program. =20

The group has also announced the creation of a new operating event=20 called the N-E-D-X-C-C Challenge. According to an October 27th press=20 release the purpose of the Challenge is to stimulate on-the-air=20 operating activity among club members to make contact with many DXCC=20 countries as possible during the prescribed activity periods. More=20 information is on the web at www.nedxcc.org (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United=20 States of America, We are the Amateur Radio Newsline with links to the=20 world from our only official website at www.arnewsline.org and being=20 relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: SOUND OF A BLACK HOLE

>From the science page this question. Did you know that the voice of a=20 black hole is a deep, deep bass? In fact, its 57 octaves below middle=20 C. It is and Jim Meachen, ZL2BHF, has more:

--

The Chandra X-ray Observatory has picked up sound waves for the first=20 time from a cluster of galaxies 250 million light years away. =20 Astronomers at the Institute of Astronomy in Cambridge, England,=20 discovered the sound waves while analyzing the Chandra images of the=20 Perseus cluster. This is an immense grouping of galaxies held in=20 formation by the powerful tug of a super massive black hole.

Andy Fabian is a professor at the Institute of Astronomy. He says that=20 a close study of the fine detail collected by Chandra shows ripples in=20 the X-ray pattern that are caused by sound waves excited by the energy=20 from the black hole. =20

Fabiam says that the sound produced by the black hole is a B flat, the=20 same pitch as a key near middle C on the piano. But the song of the=20 Presses Black Hole is 57 octaves below that middle C. This is a tone or=20 frequency more than a million, billion times deeper than the limits of=20 the human ear,. Fabian says that makes it the lowest note known in the=20 universe.

For the Amateur Radio Newsline I'm Jim Meachen, ZL2BHF, in New Zealand.

--

Scientists expect more insight on this as the experiments progress. =20 (Science Today)

**

EMERGING TECHNOLOGY: NEW FRACTILE ANTENNA DESIGN

Engineers at Pennsylvania State have developed innovative design methods=20
for a new class of antennas. One composed of an array of fractal-shaped=20
tiles that offer anywhere from a 4 to 1 to 8 to 1 improvement in=20
bandwidth compared to their conventional counterparts. =20

According to Space Daily, the new broadband antennas are composed of=20
irregular but self-similar, repeated fractal-shaped unit tiles called=20
"fractiles." These "fractiles" cover an entire plane without any gaps=20
or overlaps. =20

While fractal concepts have been used previously in antenna design, the=20
Penn State research team are the first to introduce a design approach=20
for broadband phased array antenna systems. One that combines aspects=20
of tiling theory with fractal geometry. (ANS, Space Daily)

**

HAM RADIO IN SPACE: AMSAT UK DONATES TO LAUNCH FUNDS

AMSAT-UK is funding the development of two new amateur radio satellites=20
by donating =C5=9310,000 to each of two projects in the USA and Germany. =
In=20
accordance with their constitution, at their meeting on Saturday October=20
25th, AMSAT UK decided to make an immediate donation of =C5=9310,000 to t=
he=20
AMSAT North America's Project Echo Launch Campaign Fund. =20

Also at the meeting AMSAT U-K decided to earmark another =C5=9310,000 for=
=20
transfer to AMSAT Germany to support the Phase 3 Express project. This,=20
when a suitable component for funding can be identified.

Project Echo satellite is due to be launched next March 31st. The Phase=20
3 E Express ham satellite is likely to get a ride to orbit in the 2005=20
to 2006 time frame. (ANS)

**

BEACON NEWS: UK PROP BEACONS BACK ON

If you are a microwave D-X'er, listen up. This one is for you. It=20
comes from the United Kingdom and says that two of that nations highest=20
frequency beacons are back in full time operation.

Both are part of the South Coast microwave beacon complex. GB3SCX=20
operates on 10 GHz and GB3SCK on 24 Ghz. The two units are again=20
operational following a major rebuild. Both have had their output power=20
increased, raising them at least 10 dB above their previous levels. And=20
there's more. =20

GB3SCK has been retuned to transmit on 24,048.905 MHz in order to comply=20
with the new 24 GHz bandplan, which will come into force at the=20
beginning of 2004. Also, the GB3SCC which is on 5760.905 MHz has had=20

its keying duty cycle adjusted. It now transmits callsign and location=20
details, followed by plain carrier for a total of 45 seconds. It then=20
stops transmitting for 15 seconds to permit cooling before resuming its=20
operation. Reception reports on any of these beacons go to John Fell,=20
G0API, at his Callbook address. (GB2RS)

**

DX

In D-X, MW0USK reports over QRZ.com that M1DAZ, who is on active duty=20
with the British Forces Broadcast Services in Iraq, has obtained=20
official authority to operate with the callsign YI9DAZ. Darran will be=20
active around the bands for the next couple of weeks using a Yaesu FT-
100 and Atas aerial from the Southern part of the country. Most of his=20
operation will be on P-S-K 31 so that he does not disturb his room mate=20
who is the presenter of the early morning radio show. QSL direct to=20
M1DAZ at his home address. (qrz.com)

F6BUM will be active on CW, SSB and RTTY from various regions of Peru. =20
This, between the 5th of November and the 5th of December. He will be=20
using the callsign OA, followed by a district number, stroke F6BUM. =20
(GB2RS)

Also, three operators from Japan will be active from Kathmandu, Nepal,=20
between the 16th and 22nd of November. The callsigns will be 9N7AU,=20
9N7LN and 9N7SZ. They will operate on 40 to 6 metres using two HF rigs=20
and a 6-metre rig. (GB2RS)

And, a VHF DXpedition to La Palma in Square IL18, should be active=20
through November 19th. This, with DJ6JJ and DL1EJA operating during the=20
ARRL EME Contest and scatter during the Leonids meteor shower. Their =20
station is reportedly using use high power to four 12-element Yagis with=20
full elevation control. For all of these operations please QSL as=20
directed on the air. (GB2RS)

**

THAT FINAL ITEM: THE TECH SIDE OF THE NYC MARATHON

And finally this week a look at two other ham radio aspect of the New=20
York City Marathon. The way hams organize and the technology that they=20
use. Here's Henry Feinberg, K2SSQ:

--
Last week Communications Coordinator Steve Mendelsohn, W2ML, told us=20
that it takes 411 radio amateurs to keep the New York City Marathon=20
moving along. This week W2ML says that it also takes a lot of well=20
organized ham radio networks to keep the messages flowing:

--

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

According to Mendelsohn, ham radio communicators are aided by a lot of=20
modern technology. Its science that literally gives them a leg up on=20
the contestants:

-- =20

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

And this year ham radio expanded the use of its own kind of digital=20
positioning technology:

--

Audio only. Hear the newscast in mp3 at www.arnewsline.org

--

According to Mendelsohn, it's human beings -- trained ham radio=20
communicators that makes for a smooth race.

In New York, I'm Henry Feinberg, K2SSQ, for the Amateur Radio Newsline.

--

Next week, how it all gets put together. Please be with us. =20
(ARNewsline)

> 950 mHz Aural STLs can go a lot farther than 40 miles.

With US power limits, you can get pretty dicey even at 35 miles and up; I have worked on a 50 mile one in Puerto Rico, and we had to put up two antennas about 60 feet apart on the receiving tower and use diversity reception to overcome variances in the arrival of the signal. A classic is 740-AM in LA, with studios in LA and transmitter on Santa Catalina Island. The over-the water propagation varies so that a single receiving antenna will loose the signal often. This was written up in the 70's in one of the engineering magazines.

Want it to crank? Put two Texar Audio Prisms and a Stereo Max in front of the 8100. Set them properly, and it will crank!

Isn't a Compellor just a limiter? I have not problem adding yet another
compression stage as that's the sound of radio these days, but if you want
o process your sound, shouldn't you add an EQ in there too? The newer
Optimods have Eq stages in them.

I would put any processors you add before the Optimod.

Yeah - don't put any processing between the Optimod and the STL. The Optimod does a nice job of keeping the STL from becoming overloaded. umarc mentioned a pair of Audio Prisms - those sound very nice and you could put those in front of the 8100. I had that setup about 12 years ago and it worked well. Since the Prisms are pretty old technology, you could probably find those somewhere for a good price.

2347. Plea from the "Radio Crazy" Last chance to help me bake my cake (and buy my AM)

Newsgroup: rec.radio.broadcasting
Date: 2003-11-21 16:47:19 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bplfin$k16$1@xuxa.iecc.com>
Source record: 6672

LAST CHANCE!

The "Radio Crazy", it's back!!! You heard it first here, kiddies!

Last chance to invest in my zany scheme to acquire a "legacy" 1 KW fulltime AM station in S. Oregon.

Active or inactive investors with at least $10,000 each are welcome. No individual (including me!)can own over 49 percent of the stock. This is to prevent "bullies" from taking the helm!

Full asking price is only $100,000 WITHOUT real estate. The station billed over $227,000 in 2002.

City of over 20,000. County of over 100,000. Station is on the air for over 60 years. Country format.

An extra 25 percent (For example you buy 10 percent, you get 12.5 percent)for the first two investors. We want to show our gratitude to the risk-takers/founding Fathers!

All monies would be safely held in the escrow account of a communications attorney in the Washington DC area. I have no ticket to Brazil in hand! HI!

The "Radio Crazy" ain't THAT crazy. My last job in radio (2001)was Chief Engineer for a 5 KW fulltime directional AM in New York City.

Tel. (478)741-1710 in Macon, GA or email please. Only those fully identifying themselves will be told callsign and city of license.

Please, no "AM bashers" or other "negative nabobs" !!!

I am not only a genius but am modest. Contact my parole officer for references! (teasing!)

"Going out of business sale"

Yippee, my parole officer has given me permission to run this posting and I have my one-way ticket to Brazil in hand!!!!

The "Radio Crazy", IT'S baaaaaaak!!!!

Part ownership in fulltime 1 KW AM in Oregon for sale. This is a joint venture. (You venture in, you go to the joint! Hi!)

Callsign and city of license will be disclosed to those fully identifying themselves. Please mention if you have a parole officer and/or have recently purchased ticket(s) to Brazil!

Active or inactive investors with at least $10,000 each are welcome. No individual can own over 49 percent and this includes me. We don't want no stinking bullies (grin!)

They are asking $100,000 WITHOUT real estate. Station is on the air for over 60 years. It billed over $227,000 in 2002. Amazing for a city that small.

Call (478)741-1710 or email please. I live in Macon, GA.

Please, no "AM bashers" or other "negative nabobs". Flame somebody else.

My parole officer says all monies have to be deposited in the escrow account of a communications attorney. Wonder why? (Frown!)

Not an advertisement, no, I'm not the PD, WSAI is simply one great kick ass oldies 50 KW rock n roll flamethrower!
Live DJ's, no music past 1968 or so, a tolerable commercial load, all in all very listenable. Clear Channel owned, but that hasn't seemed to screw it up yet. Hope you can hear it where you live, pattern must turn northward at night as Louisville reception goes to hell at sundown.
/regards,
Tom

Regular users of Passport are familiar with the publication's
editorial scope and rationale, but we would like to see a brief
mention of the alternatives to "World Band" when such options exist.

Larry Magne should think of another alternative and acceptable words
other than "World Band" to all the shortwave aficionados around the
world. The word "World Band" is only used for commercial
advertisements that describes a radio that has the capability to
receive foreign broadcasts in shortwave medium.

receive foreign broadcasts in shortwave medium.

The marketing people at Sony came up with the term World Band as a
"sexier" alternative to shortwave, but the technology stayed the same.

2355. Amateur Radio Newsline™ Report 1371 - November 21, 2003

Newsgroup: rec.radio.broadcasting
Date: 2003-11-23 15:51:00 UTC
From: radionews@aol.com
Message-ID: <bpql14$k16$1@xuxa.iecc.com>
Source record: 6686

Amateur Radio Newsline=E2=84=A2 Report 1371 - November 21, 2003

Amateur Radio Newsline report number 1371 with a release date of Friday,=20
November 21, 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T. Australia says goodbye to the Morse code and=20
the FCC says hello to a new way to regulate interference. Find out the=20
details on Amateur Radio Newsline report number 1371 coming your way=20
right now.

(Billboard Cart Here)=20
=20
**

RESTRUCTURING: AUSTRALIA GOES CODE FREE

Australia is joining the no-code revolution. Q-News Graham Kemp, VK4BB=20
is down-under with the details:

--

The Australian Communications Authority (ACA) is reviewing regulatory=20
and licensing arrangements for the amateur service. A discussion paper=20
was released in August 2003, and public meetings were held in 10 cities=20
around Australia. As a result of this extensive public consultation=20
process, the ACA has decided to discontinue the Morse code proficiency=20
requirement for the amateur service.

Background: Article 25 of the Radio Regulations of the International=20
Telecommunication Union sets out the international arrangements for the=20
amateur service.=20

The World Radiocommunication Conference (WRC) held from 9 June to 4 July=20
2003 in Geneva fundamentally changed Article 25. The changes to Article=20
25 have provided the ACA with an opportunity to review and simplify the=20
current regulatory and licensing arrangements for the amateur service.=20
In August 2003 the ACA released a discussion paper that looked at the=20
changes made to Article 25, as well as exploring future options for the=20
amateur service in Australia.
Morse code proficiency requirement to be removed As a result of an=20
extensive public consultation process, the ACA has decided to=20
discontinue the Morse code proficiency requirement for the amateur=20
service. This decision was made considering public comments at the=20
meetings and initial analysis of submissions to the discussion paper.

The ACA will make interim changes to legislative instruments which will=20
immediately allow access to privileges previously available only to=20

those satisfying Morse code proficiency requirements. The ACA is in the=20
process of amending the amateur radio licence conditions specified in=20
the Radiocommunications Licence Conditions (Amateur Licence)=20
Determination No. 1 of 1997 to reflect this decision. The amendments=20
will give holders of Intermediate and Limited Amateur licences access to=20
the same frequency bands as Unrestricted Amateur licensees; and holders=20
of the Novice Limited Amateur licence access to the same frequency bands=20
as Novice licensees.

The interim arrangements are expected to come into force on 1 January=20
2004.

I'm Graham Kemp, VK4BB, of Q-News Australia for the Amateur Radio=20
Newsline.

--

More on this in future Amateur Radio Newsline reports. (Q-News: Note: =20
Print version is expanded from audio report)

**

RADIO LAW: FCC LOOKING AT NEW INTERFERENCE STANDARD

Turning to regulatory news here at home, word that the FCC is looking at=20
another way of determining what it calls acceptable interference levels. =
=20
Termed "interference temperature," the Commission says that this is a=20
new model for addressing interference that takes into account the actual=20
cumulative R-F energy from transmissions of spectrum-based devices. It=20
would also set a maximum cap on the aggregate of these transmissions. =20

To test the potential usefulness and applicability of this approach the=20
agency has issued a Notice of Proposed Rulemaking. FCC docket item 03-
289 seeks comment on various technical rules that would establish=20
procedures and use the interference temperature model on a limited basis=20
in the 6525 to 6700 MHz and portions of the 12.75 to 13.25 GHz bands.=20

According to the FCC, the "interference temperature" approach may=20
facilitate more intensive use of the radio spectrum, creating the=20
opportunities for new services and improving the predictability of any=20
interference to existing services. The current approach for managing=20
interference focuses on specifying and limiting the transmit powers of=20
individual spectrum based devices. What impact the adoption of an=20
"interference temperature" standard might have on Amateur Radio=20
operations has yet to be determined. (CGC Communicator, ARNewsline(tm),=20
other published reports)

**

REGULATORY NEWS: FCC APPROVES WIRELESS INTERNET IN HAM SPACE BAND

The FCC has turned down an ARRL request to keep so-called wireless=20
Internet connections out of the 5.650 to 5.670 Gigahertz to avoid=20

interference with the Amateur Satellite Service. This, as the regulatory=20
agency makes another 255 MHz of spectrum available for Wi Fi use. Bill=20
Pasternak, WA6ITF, reports:

--

In a Report and Order in ET Docket 03-122 released on November 18th, the=20
FCC says it was taking action to alleviate crowding in existing wireless=20
Internet allocations. Also, that it wanted to align wireless Internet=20
connectivity here in the United States with the rest of the world.

Amateur Radio has a secondary allocation from 5.650 to 5.925 Gigahertz.=20
That includes a 20 Megahertz wide satellite downlink segment from 5.830=20
to 5.850 Gigahertz.

An ARRL Bulletin says that back in September the League expressed=20
concerns about the potential for interference from these wireless=20
devices to Amateur Radio space operations. But in releasing its=20
decision, the FCC says that its dynamic frequency selection and=20
transmitter power control requirements should be adequate to protect=20
amateur operations. This, even though the FCC admits that they are not=20
specifically designed to do so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los=20
Angeles.

--
=20
In rendering its decision the FCC said that it was not persuaded that it=20
should either add to or modify its proposed rules as requested by ARRL. =20
The Federal government itself is the primary user of the entire band. =20
(ARRL Bulletin, FCC)

**

RADIO LAW: FCC COMMISSIONER'S OFFICE CLARIFIES HER "BROADBAND NIRVANA"=20
REMARKS

The office of FCC Commissioner Kathleen Abernathy has expressed regrets=20
that her remarks in a September speech may have failed to make her=20
concerns about potential interference from Broadband over Power Line=20
sufficiently clear. Responding to complaints from the ARRL and=20
individual amateurs, Abernathy's Senior Legal Adviser Matthew A. Brill=20
said that her office is sorry that the Commissioner's remarks may have=20
been interpreted as suggesting an absence of concern over harmful=20
interference.

The ARRL Letter says Brill has assured the League that ensuring that B-
P-L and all new technologies avoids causing harmful interference to=20
licensed R-F users is important to Abernathy. Brill termed it as a=20
bedrock position for the Commissioner. =20

Last September 22nd, in a speech to the United Powerline Council's=20
annual conference Abernathy expressed personal enthusiasm for B-P-L=20

calling it a Broadband nirvana. That position was quickly challenged by=20
the ARRL and others in the ham radio community. (ARRL)

BREAKING NEWS: EARTH HIT BY SEVERE GEOMAGNETIC STORM

A severe G-4 class geomagnetic storm is in progress as we go to air. =20
This, due to the arrival of coronal hole mass ejections related to the=20
returning sunspot group 484, now numbered 501 astronomers. =20

Thomas Hood, N-W-7-U-S, is the Propagation Editor for C-Q Magazine. In=20
a November 20th posting to the V-H-F Reflector, Hood says that some=20
reporting stations show a K index of 9. The current planetary K index=20
is 8 and the Aurora index is 10. This means that there could be visual=20
Aurora is possible at low-latitudes. =20

What does this mean to ham radio operations? During the storm HF=20
conditions are poor. So will those on the Medium Wave broadcast bands. =20
But in the world of 50 Mhz and above anything could happen and usually=20
does. Keep your ears open, your radio on and enjoy it while you can. =20

Now long will this geomagnetic storm last and are more sunspots on the=20
way? Ongoing information is in cyberspace at http://prop.hfradio.org=20
and on the W6YX VHF Reflector.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF. (VHF=20
REflector)

**

ENFORCEMENT: HAM ACCUSED IN WISCONSIN INTERFERENCE CASE

A peason described by authorities as a Wisconsin ham has been arrested=20
and charged with some high tech interference to public service=20
communications. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the=20
rest of the story:

--

The Wisconsin State Journal reports that a ham radio operator is being=20
accused of interfering with emergency radio channels in the city of=20
Madison over the past nine months. According to the Journal,=20
authorities charge that twenty-five year old Rajib K. Mitra, a=20
University of Wisconsin Madison student, may have broadcast audio from=20
pornographic movies over the Madison Police Department airwaves.

The news article describes Mitra is a ham radio operator with a degree=20
in computer science. He was arrested Thursday November 13th after police=20
showed up at his apartment with a search warrant looking for radio and=20
computer equipment and pornographic audio.=20

According to a Madison police spokesperson, the interference usually=20
left the radio system dead for stretches from a few seconds to about 20=20
minutes but never on a regular schedule. Al Schwoegler, the Madison=20
Communication Operations Supervisor said that this intermittant=20
operation added to the difficulty of tracking the source. =20

The interference came at times when police were dispatched on calls. =20
Authorities believe that the person jamming may have monitored police=20
radio traffic.

Helping to track down Mitra was Ralph Pellegrini. The newspaper article=20
identified Pellegrini is a ham operator and technician for Sprint PCS=20
who assisted police. Authorities approached Pellegrini for assistance=20
when they thought the interference might be coming from a Sprint=20
cellular tower. Pellegrini in turn gave a lot of credit for Mitra's=20
capture to those he termed as the Madison radio guys. He notes that=20
they were able to hunt down Mitra in a city R-F environment that's=20
pretty bad.

Mitra was in the Dane County Wisconson jail as of Friday November 14th. =20
He has been tentatively charged with 16 felony counts of computer crimes=20
and could also face federal charges, according to Madison police.=20

For the Amateur Radio newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Authorities hope that Mitra's arrest will end months of frustrating=20
interference to their radio communications system. The complete story=20
is on-line at=20
http://www.madison.com/wisconsinstatejournal/local/61321.php (Wisconsin=20
State Journal, QRZ.com, others)

**

ENFORCEMENT: SKYWARN INTERFERENCE

The FCC has told an Indiana ham that he is to stay off of a 2 meter=20
repeater dedicated to emergency alerting operations. This, in a letter=20
to Christopher Smith, KC9CAU, of South Bend.

In the note, the agency says that it has received a complaint about=20
Smith's on the air operation on a repeater system participating in the=20
St. Joseph County Skywarn system. The complaint alleges deliberate=20
interference and harassment to the repeater and refusal to refrain from=20
attempting communications on that system.=20

The FCC's letter tells Smith that it expects him to abide by any demand=20
that he stay off the repeater, as well as any other repeater where such=20
request is made by a repeater control operator or the system licensee. =20

Smith was given the customary 20 days from the date of the FCC's letter=20
to reply. (FCC)

**

ENFORCEMENT: ECHOLINK EXPLANATION SOUGHT

A Florida ham has some explaining to do for comments made over a linked=20
repeater system. The FCC's Daryl Duckworth, NN0W, explains:

--

Duckworth: "An inquiry went to WA3QCV, Timothy Horvath, of Flagler=20
Beeach, Florida, concerning operation on two repeaters: WB2IXR at=20
157.015 Mhz and KG4IDD at 145.47 Mhz that are linked through the=20
Echolink system. The inquiry involves alleged threats and obscene=20
language."

--

The FCC also gave Horvath 20 days from the date of its letter for him to=20
respond. (FCC)

**

RADIO LAW: ANTI-PIRACT BROADCAST FLAG APPROVED

The government has approved a new anti-piracy system that will=20
theoretically make it harder for computer users to illegally distribute=20
digital TV programs on the Internet. This, with the goal is to speed the=20
transition to higher quality digital broadcasts and ensure such=20
programming remains free.=20

The five-member FCC voted unanimously to allow a "broadcast flag" to be=20
added to digital programming to block broader distribution on the=20
Internet on November 4th. Broadcasters and the movie industry had urged=20
the Federal Communications Commission to take such action, while=20
consumer groups said it will force some people to purchase new=20
electronics. (FCC, others)

**
=20
ON THE MOVE: HF NET RELOCATING TO IRLP

Call it a sign of the times we live in. This as Tom Mc Glinn, KO6HA,=20
reports over QRZ.com website on big change for a long established high=20
frequency net that's taking to a different way to communicate.

Mc Glinn says that due to the urban lifestyle of many of the members of=20
the USS Hornet Amateur Radio Club, the group has decided to move its=20
weekly Net from 80 Meters to repeaters that are interconnected using I-
R-L-P. That's the Internet Radio Linking Project which permits the=20
world wide interconnecting of repeaters over the World Wide Web.=20

According to Mc Glinn, the net has been conducting tests and they have=20
worked out most of the bugs involved with such a move. Once completed,=20
the U-S-S Hornet Net will hold the weekly gathering in the San Francisco=20
Bay Area using the facilities of the 147.210 repeater in near-by=20
Oakland. Those outside the area we will be linked in using the I-R-L-P=20
Western Reflector.
=20
Mc Glinn adds that anyone on the planet who has I-R-L-P access to link=20
to the Western Reflector Subchannel 1, node 9251, on Mondays at 2030=20
Pacific time is invited to check in on the Net. He says that you do not=20
need to be a member of the club to take part. (QRZ.com)

**=20

CONFERENCES: CSVHFS IN ONTARIO CANADA NEXT JULY

The Ontario VHF Association and the Toronto VHF Society will be hosting=20
the 38th annual Central States VHF Society Conference. The dates are=20
July 22nd to the 25th at the Delta Meadowvale Resort and Conference=20
Center in Mississauga, Ontario, Canada. =20

2004 marks only the second time that this conference has been held=20
outside of the USA. More information and a registration form will be=20
available shortly in cyberspace at www.csvhfs.org and www.ovhfa.com =20
(VHF REflector)

**

HAMVENTION 2004: AWARD NOMINATING PERIOD OPENS

Meantime, the planners of Hamvention 2004 say that the nominating period=20
is now open for its Radio Amateur of the Year, Technical Excellence and=20
Special Achievement awards program. The Radio Amateur of the Year is=20
described as that special person who has made a long term commitment to=20
the advancement of amateur radio. A well-rounded individual who has=20
contributed most of his or her lifetime to our hobby in some very=20
outstanding way.=20

A nominee for the Technical Excellence award should be a person who has=20
made an outstanding technical advancement in the field of amateur radio. =
=20
Something like a revolutionary new equipment design or mode of operation=20
that has impacted positively on the day to day operation of many hams.

Last but by no means least, a nominee for the Hamvention's Special=20
Achievement is the kind of special person who has made an outstanding=20
contribution to the advancement of amateur radio. This award is usually=20
given to a respected amateur who spearheaded a single significant=20
project.=20

Documentation is beneficial. Magazine articles, newsletters, newspaper=20
clippings, videos, etc. will better inform the Awards Committee of your=20
candidate's accomplishments. All materials become the property of the=20
Hamvention and cannot be returned.=20

The nomination deadline is January 31 2004. You can fill out the on-
line form found at www.hamvention.org by clicking your mouse on the=20
words award nominations. Printed nominations go to the Awards=20
Committee, Hamvention 2004, PO Box 964, Dayton Ohio, 45401.

And oh yes. The deadline for all submissions is January 31st, 2004 =20
(Dayton Hamvention)

BREAK 2

This is ham radio news for today's radio amateur. From the United=20
States of America, We are the Amateur Radio Newsline with links to the=20
world from our only official website at www.arnewsline.org and being=20
relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: KB2GSD VS. WJMK - PART 2

A follow up to an earlier story involving retired CBS newsman Walter=20
Cronkite, KB2GSD, and a Florida television production company that he=20
says misled him and tarnished his reputation. This, when it persuaded=20
him to appear in videos that promoted prescription drugs and other=20
products. =20

The company, WJMK, filed suit last September after Cronkite tried to end=20
a contract he had signed to appear as the host of a series of videos,=20
including some called American Medical Review. In their legal brief=20
responding to the WJMK action, Cronkite's lawyers say WJMK had assured=20
him that the videos would be educational and would not promote corporate=20
products. These are claims that his lawyers say Cronkite subsequently=20
learned were false.

An attorney representing W-J-M-K, says that Cronkite's charges had no=20
merit and that Cronkite's lawyers were trying to disparage the other=20
side in the media. Meantime, KB2GSD has filed a counter claim seeking=20
$25 million in damages from WJMK. (Published news reports)=20

**

NAMES IN THE NEWS: LONG TO AMSAT JOURNAL

Ed Long, WA4SWJ, is the new Editor in Chief of the AMSAT Journal. A=20
licensed amateur since 1970, Ed holds a BSEE from West Virginia=20
University and an MBA from Duke. He is currently employed by SPX=20
Process Equipment in Delavan, Wisconsin. He can be reached by e-mail to=20
wa4swj@amsat.org (AMSAT-NA)

**

EMERGING TECHNOLOGY: SAFETYCAST BROADCAST TO YOUR CAR

Police or fire engines may soon be able to override the radio in your=20
car. This, as Jacksonville Florida based SafetyCast announces that it=20
will soon test a new mobile alert system. One that will allow a police=20
officer or ambulance driver to take over a car radio within a distance=20
of about 1000 feet and broadcast a brief alert tone and warning message.

Emergency services officials are praising the development. They claim=20
that there is a warning crisis because motorists in today's sound-
proofed vehicles can't hear sirens, or just aren't paying attention.

But the CGC Communicator reports hearing from one engineer who's worried=20
about the Special Temporary Authority the FCC gave for the trial. He=20
says his studios and E-A-S receivers are located 100 feet from a highway=20
and one block from a hospital. He feels that SafetyCast might jam an=20
Emergency Alert System messages that are coming in. (CGC Communicator)

**

SPACE: FRENCH AND RUSSIAN LAUNCH ACCORD

France and Russia approved an accord intended to pave the way for the=20
eventual launch of Russian rockets from a French launch pad in South=20
America. The agreement, signed on November 11th is the first of its=20
kind between Russia and a European Union country and is a step toward=20
the launch of Russian Soyuz-ST rockets from the E-S-A Kourou launch pad=20
in French Guyana. Most ham radio satellites are orbited from the Kourou=20
facility. (Published reports)

**

INTERNATIONAL - HOLLAND: RADIO NETHERLANDS BROADCAST CHANGE

Radio Netherlands says that its shifting the frequency of its Dutch=20
language transmission to the Far East, East and Southeast Asia at 1300=20
U-T-C. This broadcast can now be heard on 7 point 380 MHz. The reason=20
for the change is to avoid interference to the transmission. (Media=20
Network)

**

DX

In D-X, word that ON4LAC, is active portable 3B8 from Marutius through=20
November 23rd. His activity has been mainly on 20 and 15 meters using=20
SSB and PSK, but is expected to be on RTTY as well. He will leave=20
Msrutius and head to Reunion Island to be active as FR5 stroke ON4LAC=20
during the period of November 26th and December 15th. After this=20
activity, he will head back to Mauritius and will be active again=20
between December 17th and 27th. QSL direct to his home callsign. =20
(OPDX)

Also, K5LB has announced that he will be going to Swaziland next March=20
and is looking for several operators to tag along. His plans include a=20
trip through the Kruger Game Park. If interested, contact him at=20
frosty1@pdq.net (OPDX)

**

THAT FINAL ITEM: VOLUNTEERISM AND THE NYC MARATHON

For the last two weeks New York City Marathon Communications Coordinator=20
Steve Mendelsohn, W2ML, has been sharing with us the behind the scenes=20
story of how 411 hams move the race along. In our final part in this=20
series Henry Feinberg, K2SSQ, takes a look at the volunteers that make=20
it all hapen:

--

The ham radio communications effort for the New York City Marathon is=20
volunteer driven. And, as with any event, volunteers do come and go. =20
We asked the lead volunteer, Steve Merndelsohn, W2ML, to explain how=20
this situation gets covered:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

It's primerally the local clubs that supply the volunteer ham radio=20
communicators. W2ML says that he has a special way of introducing them=20
to what Marathon communications is all about:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

And speaking about volunteers, we asked Steve what about his own role in=20
all this. How much of his life does he devote to setting up this all=20
volunteer communications effort? His answer may astound you:

--
Audio only. Hear the newscast in mp3 at www.arnewsline.org
--

And there you have it. An insiders look at the massive all volunteer=20
ham radio communications network that literally runs the New York City=20
Marathon. It's a view that only someone who has been there every year=20
since Amateur Radio has been involved, can give. =20

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ

--

Our thanks to Steve Mendelsohn, W2ML, for sharing his experiences with=20
us, and with you.
=20
**

Steve,

What are you talking about old man? This is the reports of Radio Nederland regarding about "world band" on their websites, the links below:

http://www.rnw.nl/realradio/booklist/html/passport.html

http://www.rnw.nl/realradio/features/html/cr031106.html

Why don't you read those articles first before you make any comments or postings in this newsgroup so you wont humiliate yourself. It will be too embarrassing for you that you have a low comprehension and a low IQ. Perhaps you don't realize that in Google shortwave newsgroup, this is the most popular site being read all over the world to get information. Your comments or postings reflects you own personality and also who you are.
In this newsgroup, you definitely going to have a high blood pressure, so take it easy and don't forget to take your meds as soon as you get up in the morning. You, and the ones around you will have a much better day.

Andre

Let's see if I understand this: "World Band" describes shortwave, but was a term made up by an advertiser and is " _used only_ for commercial advertisements" even though the term _is_ now almost universally used bu just about everybody as a generic term for shortwave broadcasting and to describe shortwave radios, and so we should quit using the term?? Huh? Come again? Is _that_ what you're saying? Could you send me some of whatever funny cigarettes you're smoking?

D, Forsling

Steve,

What are you talking about old man? This is the reports
of Radio

Nederland regarding about "world band" on their websites, the links

below:

http://www.rnw.nl/realradio/booklist/html/passport.html

OK kid, I read it. Looks like a pretty good review to me.

http://www.rnw.nl/realradio/features/html/cr031106.html

OK kid, I read this one also. How is the material presented here any of
Larry Magne's problem?

Why don't you read those articles first before you make
any

comments or postings in this newsgroup so you wont humiliate yourself.

It will be too embarrassing for you that you have a low comprehension

and a low IQ. Perhaps you don't realize that in Google shortwave

newsgroup, this is the most popular site being read all over the world

to get information. Your comments or postings reflects you own

personality and also who you are.

In this newsgroup, you definitely going to have a high blood

pressure, so take it easy and don't forget to take your meds as soon

as you get up in the morning. You, and the ones around you will have a

much better day.

Andre

You are right about the old WCKY! I used to listen to it as a kid even. Every night the CBS radio mystery theater was on 1530:-)

I wonder if the nighttime pattern has changed? I have the same trouble you do here in Bowling Green. Must not be a lot of southwest radiation?
>>

Originally WCKY, Covington, KY, this station protects the co-channel Class A in Sacramento, CA, using four towers.

Therefore, nearly no radiation SW, W or NW.

WCKY had the frequency all to itself for quite a while.

The Sacramento station, KFBK, was a conversion from, then, a Class IV to a Class I-B.

Who cares who came up with the term? While "shortwave"
seems more of a technical description for HF (how is someone
unfamiliar with radio to distinguish between longwave,
mediumwave, shortwave, microwave, etc.?), "world band"
appears to be a better term for conveying the idea that
international broadcasts are heard on the HF bands. (Of
course, there's more on shortwave than just international
broadcasts.)

One of the wonderful things about the English language is its versatility. "World Band" is descriptive, not just in terms of an advertising slogan but in describing a service that can, literally, serve the entire globe.

"Passport to World Band Radio" is a perfect title for a reference book that covers radio throughout the world. No one gave Grundig, AOR, Drake and other manufacturers exclusive permission to use the term. It probably came from and advertising agency's creative team.

No name change is needed.

Rich

Sure. But you realize there is a relatively involved procedure to get it moderated, right?

For the Big 8 hierarchy -- rec.*, soc.*, comp.*, news.* and four others whose names I forget -- you essentially have to go through the process originally used to create the group - request for discussion, call for votes, etc. It is not a quick process.

Royce Dean <swl3@ibm.net> had written:
| I'll agree 100%. They sound good. I like the reverb too! I think their
| pattern change occurs at west coast sunset, where they protect KFBK
| Sacramento, I think.

Yes -- it (then-WCKY) was strong in eastern and central Missouri
for a couple of hours after sunset until the switch was flipped.

The reference to reverb is amusing -- in the early 1970s I recall
WCKY as an easy-listening station -- with reverb! Mix in a little
groundwave/skywave phase cancellation, which one occasionally got
for WCKY near St. Louis, and you got quite the ethereal effect!

That's only the *second* most inappropriate use of reverb I've ever
heard -- the most inappropriate was when KPRC in Houston
was a news/talk station in head-on competition with KTRH -- and
used reverb in 1985 and part of 1986!

Hey all,

My station is interested in getting our call letters printed on our windscreens, instead of using traditional mic flags. My boss has seen it before, but we haven't had any luck finding a place to do it.

Has anyone had this done, or know of someplace that does it?

TIA!

I've noticed that the European broadcasters do that windscreen
printing a lot instead of printing the station name on the mic flag.

Maybe it's cheaper to print on a foam than it is on plastic?

Not to mention the extended psychological analysis to find out why
anyone would want to moderate such a newsgroup. You'd find it more
interesting and productive to spend your time trying to find the
aliens the gummint is hiding.

For sale:

Partial ownership of 1 KW full-time AM in Oregon.

(The "Radio Crazy" is still loose! Hi!)

Joint venture. Active or inactive investors with at least $10,000 (ten grand)each are welcome. No individual can own over 49 percent. This goes for me too!

Station is on the air for over 60 years. City of over 20,000 with county population exceeding 100,000. It billed over $227,000 in 2002.

They are asking only $100,000 WITHOUT the real estate.

I am NOT a shill, broker, agent, owner or part owner. I am also not a crook. (Name of my parole officer and Brazil one-way ticket serial number on request!)

"AM bashers" and other negative nabobs please deposit funds in my unmarked Swiss bank account. Others will place funds in the escrow account of communications attorney.

FWIW, Oregon is a terrible state for small business owners. Income and property taxes are both extremely high. The state legislature recently added to the burden by imposing a 3% income tax surcharge. This on top of a personal state income tax rate of 9% for most people. Corporate taxes are even worse.

Government regulations and restrictions are also excessive and burdensome. Since Oregon government on all levels is full of environmental extremists (remember the Spotted Owl controversy?), you're not likely to be approved for ANY real estate venture that involves towers or radiation of RF energy.

Of course there is no sales tax and car tags are only $30 for 2 years. But trust me, you'll pay for this many times over when you get your income tax, property tax, and workers compensation bills. Been there, done that, got the hell out of there!

WJIB 740 AM Stereo in Cambridge/Boston, MA -- one of the few, if not the last, Easy Listening/Beautiful Music stations on the AM band in the USA -- uses stereo reverb. It's not too heavy, but you can notice it.

> That's only the *second* most inappropriate use of reverb I've ever

FM talk station "New Jersey 101.5" (WKXW-FM Trenton, NJ) uses a healthy dose of stereo reverb during their talk programming as well as the Oldies music they play on weekends. It does get a bit annoying, especially if you're listening with headphones.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Thursday's (Nov. 27) Special Ed Angstgiven radio collage will be
from 3 PM thru 7 PM. It should be concentrated

I strongly recommend listening to the show that follows from 7 to 8
PM. Arwulf's "Face The Music"

Ingredients:
Semigestible vintage Thanksgiving, Military Food and Meat Industry
propaganda film soundtracks
Table manners and nutrition educational films
A few hundred sound effects
Reconstructed Julia Child and others recipes and instructions
Various species of sounds and spices
A few tablespoons of "accessible" music pieces for consistency and color

fold, spindle, mutilate, then combine ingredients,
simmer in FM radio set to 88.3 in vicinity of Ann Arbor, Michigan
- or -
deep fry in computer linked to http://www.wcbn.org/listen.html from 3
to 7 PM, EST. Thursgivingday, Nov 27
*(Eastern Standard Thyme)

actual
> purchase of the station and license transfer by the FCC ?"

I believe he has already addressed that question in this forum. Perhaps you are new here. He is simply trying to put together an investment group of fellow broadcasters to buy a station, and from time to time finds a station that is available. It has already been well established here that the majority of contributors to this forum do not mind Meyer's postings. Since new people subscribe to forums all the time, he repeats the postings from time to time. (sort of like radio advertising and music playlists - it keeps repeating all the time)

If you have a genuine interest in possibly investing, you can contact him directly and I'm sure he'll be glad to call you and answer all of your questions. If you're simply trying to call him out in this forum for the purpose of flaming him - which is what it looks like - he'll probably ignore you, as would I if I were him.

I for one hope that someday he succeeds, and if he doesn't, at least he tried. Good for Meyer! It's easy being a cynic, but how many of us have had the courage to go out and actually pursue a dream? If Meyer ever gets a station, that's one station Clear Channel or Cumulus is not going to have, and one community that will no doubt have a radio station with a LOCAL flavor, and not giving out one prize in a national contest and making it sound like is was a local winner, like Cumulus recently did.

[Moderator's Note: Or like Clear Channel used to and, to a certain extent, still does.]

Interestingly, this may be among the poorest AMs of its class in terms of coverage. The day signal covers Cat City and most of Palm Springs. By the time you get to Palm desert, it can be noisy. At night, it gets out maybe 8 or 9 miles. Which is what you get with a high-band signal broadcasting from a desert.

There is no Coachella Valley station that covers the entire market, day or night.

Good for Meyer! It's easy being a cynic, but how many of us have had the courage to go out and actually pursue a dream?

Here here Paul.

I have no problem with Meyer's post. He's doing a service.

I can say that I have previously invested in one of his station deals and helped succeed in putting a former dark station back on-air (WLYC 1050 in Williamsport, Pa) However my two US partners and I had to get out when we realised through lack of funding that we could not take the old girl into profitability.

However it is still on-air, and that's the main thing as far as I'm concerned.

I learned a great deal from that exercise and am currently back looking for the next crack of the American corporate whip.

Meyer, thanks very much for the prompt & candid reply.

Another poster mentioned that you had answered this previously, and while I am a not a "new" reader of this newsgroup (quite the contrary) I did not recall seeing that message. If that was the case, please accept my apologies and assurance that no malice or 'flaming' was intended. Although there's been some discussion in the past as to the appropriateness of your posts in r.r.b, they've always been on-topic and entertaining to boot.

I guess I was just curious as to how your Internet approach to 'marketing' was succeeding, as compared to the more traditional ways of brokering these sorts of deals.

Did you ever try this with a TV station (yes, I know you're the ***Radio*** Crazy but after all, the visual TX is just AM with a fancy sideband filter and the aural TX is good old FM) ?

In any case, thanks again and I hope you have a nice holiday !

It's about time someone made radio oldies fun again. Hopefully there will be a satellite radio station that makes oldies fun and there will be more stations like this. In fact, come to think of it, I have listened to 1530 at night here in GA.

I wonder if they use PAMS Series 18 jingles? I just love those jingles and those old deeejays. I think we are too hard on Clear Channel. There is a horrible local yokel station in my GA town that downloads off satellite (and pulled a Yankee out of the ad sales pool to get a big city look) But there is a Clear Channel station that has better personalities.

For more info on old music radio check
http://www.mindspring.com/~kturnerga/aircheck.

This is very interesting. I might ask my station rep from Clear Channel who's big in my area. She's easier to talk to than the rep from the "dollar a holler" CHR station in the bottom of the TV studio.

I don't think we can assume there is a homogeneous 25-54 age set. We can cleave it in half at age 35 or 40. But don't sell oldies short; they are still in demand.

I wish that these morons at the stations would find out that it isn't microcasting any more than it was buying listeners with contests a la the Eighties. What Rush Limbaugh says (and I agree) is that we need more fun media personalities. Music is great but the older end of the 25-54 demographic wants someone fun.

I am biased in this arena as I collect airchecks and operate an aircheck station at live365.com. But darnit it's true; some of us want something besides a wireless MP3 jukebox (which is what radio's become). And people are getting burned out on slender playlists too.

Another problem is a lack of decent new music coming out. We are trying to get the baby boomers' kids to listen and they unfortunately like the rap crap and commercialized alternative nonsense. Thus we are ignoring older people also likely to spend money. I am 37 btw.

Let's return to good old Top 40 (or if not, CHR) radio and its wonderful disk jockeys. That may be a hidden secret not many want to exploit.

Thanks
Ken

Before moving to California, I was amazed at the amount of truly local stuff on WZOO-FM Ashtabula, Ohio and WKDD-FM Akron, Ohio - two small-market stations bought by Clear Channel a couple years ago. Very focused on local issues. WKDD was, and continues to be, one of my all-time favorite stations. Clear Channel did a good job of not changing that.

Here in the High Desert, KZXY-FM Apple Valley is also a small-market station owned by Clear Channel. I think they do OK too. Their sister AM talk station had round-the-clock live coverage of the wildfires in this area... lots and lots of good information.

I'm not saying that there aren't stations they don't completely screw up, but there are some good ones out there.

What amazes me is that Infinity owns a station out here... I don't recall which one.

Clear Channel and Infinity are both run basically "by the numbers."
That is to say, local managers can do pretty much what they want as
long as they meet their cash flow budgets. Conversely, they must cut
anything and everything if they don't, regardless of the impact on
operations. This style of management means the quality of the local
GM is really crucial. And as anyone who's been around the business a
while knows, the quality of general managers is wildly variable.

>What amazes me is that Infinity owns a station out here... I don't recall
>which one.

Infinity and Clear Channel both scooped up lots of marginal stations
by buying entire groups to get the better ones. Where they differ is
that Infinity really does not want to be in smaller markets, whereas
CCU seems to want to own everything it possibly can, everywhere.
However, even CCU has been sloughing off a few lately. The 1220 AM in
Canyon Country, CA was sold back to its former owner for less than a
third of what CCU paid for it. He was making money operating it --
they never did.

Neither WSAI or WCPO/WUBE used Series #18, so anthything is possible.
Currenbtly they are using resings fo the Pacific And Southern TM
package first used when on 1360.

They have some other TM items still to used on air.

To hear resings of classic PAMS in the internet, try www.kmin980.com
and click on Listen Now.

They are live in the am and pm dirve and have otehr live segments
through out the week. Sadely, like most braodcasters today, they rely
on computer automation during other times. Owner is a good friend and
really cares about locally owned radio.

We use Sony wireless mics a lot, and if you put a typical plastic mic flag on the body, then the user's hand is placed too close to the antenna, which interferes with transmission. We figured that one way around it was to have our calls placed on the windscreen itself. In addition, mic flags tend to get scratched up rather quickly, so they look like crap after a while. This is probably going to happen with the windscreen too, but hopefully won't be as noticeable.

Oh my....

How did this thread deteriorate. Don't get so upset folks. This is what I found from the ITU. Several countries are signatories so I would guess it is the most accurate info.

World Band - Frequencies allocated for International Broadcasting.

Wide Band - A radio capable of receiving or transmitting on a large spectrum of frequencies.

Shortwave - Frequencies allocated for International Broadcasting including utility, military and civil brodcasting stations.

MF (Medium Frequency)- Defined as any frequency or mode between .3 Mhz to 3 Mhz.

HF (High Frequency) - Defined as any frequency or mode between 3 Mhz to 30 Mhz.

Hope this helps.

Larry....

Amateur Radio Newsline™ Report 1372 – November 28, 2003

Amateur Radio Newsline report number 1372 with a release date of Friday, November 28, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia plans a celebration to welcome no-code, a New Zealand ham plans an Amateur Radio replacement for a frequency standard station and the U-S-A is on the verge of banning unsolicited junk e-mail. Find out the details on Amateur Radio Newsline report number 1372 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: WELCOMING NO CODE “DOWN-UNDER”

Last week Australia’s decided to abolish code exams on the 1st of January. Now its planning a world-wide on-the-air celebration as 2003 gives way to 2004 and Morse testing disappears. Jim Linton, VK3PC, has the story and an invitation for you to take part:

--

On New Year's Day 2004 Australian radio amateurs will gain access to the High Frequency bands using licenses that don't require the passing of Morse code telegraphy tests. The Wireless Institute of Australia invites the world's amateur radio fraternity to join an on-air celebration of this special occasion.

To celebrate the event, there will be a "WIA Welcome to HF QSO Party" beginning at 0001 Australian Eastern Daylight Time and conclude at 2400 UTC on New Year's Day - a total of 35 hours. The VK radio amateurs appearing on HF bands for the first time can be identified by three-letter VK callsign suffixes that begin with the letters H, T, U, X, Y and Z.

WIA amateur stations will be on air to join the HF QSO Party, and these have two-letter callsign suffixes "WI" or three letter suffixes starting with "WI." Listen for the call "CQ WIA Welcome to HF QSO Party".

For the Amateur Radio Newsline, I’m Jim Linton VK3PC.

--

Many in Amateur Radio have been campaigning for years to have code tests removed as a license requirement to operate on amateur bands below 30 MHz. For Australia this will happen on the 1st of January, 2004 with this very special on-the-air celebration.

(DO NOT READ. Find out more by e-mailing hfqsoparty@wiavic.org.au (Q-News))

**

INTERNATIONAL - NEW ZEALAND: A PROPOSAL TO REPLACE VNG

Still down-under, word that well known "Digital Modes" Amateur, Murray Greenman, ZL1BPU, has proposed that New Zealand and Australian hams put together a network of simple and inexpensive transmitters. This, to provide a high accuracy Standard Frequency Service to replace the VNG standards station that has now gone QRT. Amateur Radio Newslines Jim Meachen ZL2BHF is in Auckland with the details:

--

Amateurs in the South Pacific have for many years relied on VNG transmissions as a prime source of accurate frequency reference. With the closure of VNG in December 2002, the sole remaining precision signal source in our area is WWVH, in Hawaii. Unfortunately the WWVH signal quality in the South Pacific is generally too poor for reliable use, either to zero beat a simple calibrator, or using more sophisticated computer based techniques.

ZL1BPU says that a series of tests over the last two years has shown that simple low power carrier transmissions on the 80m band would fulfill most of the requirements of a Standard Frequency Service:

--

Greenman: “Using simple HF transmitters that I've designed, we have confirmed that low power transmissions are very useful, for both calibration and propagation study, up to at least 3000 km range.

Anyone can monitor these signals, using a stable receiver and freely available software to look for small frequency shifts that accompany each propagation path. Classic effects such as multiple paths with different refractive indices for different signal polarization’s are easily observable.

Doppler shift is particularly marked around sunrise and sunset. Observing these signals gives a better understanding of propagation, which is the key to accurate on-air frequency measurement.”

--

The Service now operates on a test basis with transmissions from a high precision local reference on an exact kHz point 80m frequency using a carrier power of 1-5W. The Transmissions are identified in Morse every 30 minutes. Operation is from a different geographical location each weekend. Transmission times are announced and coordinated beforehand by e-mail.

Reporting from Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline

--

ZL1BPU adds that these are privately owned, operated and attended test transmissions, not beacons. Establishing a Standard Frequency Service formally, perhaps under the auspices of the NZART, might be considered in the

future. (NZART News)

**

COMMUNICATIONS LAW: HOUSE PASSES ANTI-SPAM LAW

Here in the U-S-A, Congress has moved closer to passing the first-ever federal protections against unwanted commercial e-mails. This, with the House passing a bill on Saturday, November 22nd that would impose new limits on sending direct advertising offers -- commonly called spam mail.

Approved on a 392 to 5 vote, the measure would prohibit senders of unsolicited commercial e-mail from disguising their identity by using a false return address or misleading subject line. It would also prohibit bulk mailers from harvesting addresses off websites and require such e-mails to include a mechanism so recipients can indicate they do not want future mass mailings. Penalties for failure to comply could be up to five years in prison in some circumstances.

The House bill largely mirrors ant-Spam legislation the Senate approved last month. Supporters hope that slight differences between the two measures can be resolved before Congress adjourns for the year. The Bush administration says that it supports the anti-spam efforts. (Published news reports)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Montgomery Amateur Radio Club repeater serving Rockville Maryland.

(5 sec pause here)

**

RADIO LAW: THE FCC ON PRIVACY OF INFORMATION

The FCC has put in place a temporary policy that will keep the public from knowing who is facing enforcement action by that agency. Amateur Radio Newsline’s Bruce Tennant, K6PZW, picks up the story:

--

Don’t look for names and call signs of alleged regulatory violators to be released by the FCC anymore. At least not for a while. This is because the agency has revised the format in which it's supplying the media and the public with information regarding alleged regulatory scofflaws, including those in the Amateur Radio service.

The revised temporary policy is based on privacy concerns within the FCC. Until further notice, the agency says that it will only provide the location where a violator lives along with a very brief synopsis of the action taken.

Following a policy review now taking place the FCC says it will announce a new privacy policy for all future information releases.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

No timetable has been announced for the privacy policy review to be completed. (FCC)

**

ENFORCEMENT: NO MORE ADS AND WE RENEW YOUR LICENSE

And without mentioning any name or callsign, the FCC has acted in a pending non-certified radio equipment marketing case. This, as a Tomah, Wisconsin, licensee is informed that renewal of his Technician license would be granted on the condition that he permanently remove from the World-Wide-Web certain information.

The FCC says what it wants removed includes any advertisements for, or references to, the sale of transmitting equipment that operates, or is intended to operate, on frequencies in the Citizens Band service. Also references to gear for any other radio service requiring the use of certified transmitting equipment but which has not been certificated by the regulatory agency.

If he says O-K, he gets his ticket renewed. If he refuses to comply, the FCC says that his renewal will be designated for hearing before Administrative Law judge. (FCC)

**

ENFORCEMENT: PA REPEATER PROBLEM

The FCC has also warned a Lewistown, Pennsylvania, Extra class licensee that he must heed the request by a repeater owner to stay off that system and that technical problems with his own repeater must be corrected immediately.

And in an Order issued by Philadelphia FCC office that licensee was told that his repeater could not operate under automatic control until further notice. He was also requested to provide operational information about the repeater, including names and addresses of control operators. (FCC)

**

ENFORCEMENT: TOWER VANDAL FACES 27 MONTHS IN PRISON

And you can just about write the words "the end" to the case of a Washington man accused of tampering with more than 20 high voltage power towers in four western states that we have been reporting on. 62-year-old Michael Poulin has admitted the charges and has entered a plea bargain agreement with federal prosecutors. As a result, he will serve no more than 27 months in prison. He also faces a possible fine of $500,000. Without the plea agreement he could have been sentenced to jail for up to 10 years. (CGC)

**

RADIO LAW FOLLOW-UP: THE NEVADA HIGHWAY PATROL VS THE FCC

Some enforcement news of a different kind by way of the Reno Gazzette Journal and the C-G-C Communicator. Both bring word that the Nevada Highway Patrol has turned over a 255 page investigative report and 2,500 pages of supporting documentation to that states Attorney General's office. The Attorney General will now consider the possibility of criminal charges will be determined in connection with the police agency’s use of a radio system on frequencies for which it holds no licenses.

As previously reported, the highway patrol launched the investigation earlier this year when it was discovered that it didn’t have the proper licenses to operate the $14 million communications system built for it in 2000. The FCC has threatened to fine Nevada and block the states future license requests if the Nevada Highway Patrol does not quickly abandon use of the unauthorized frequencies. (CGC)

**

WITH THE ARRL: 2004 ELECTION RESULTS

The ARRL has announced that Frank Fallon, N2FF, retained his seat as Director of the League's Hudson Division. This, by defeating Vice Director Steve Mendelsohn, W2ML, by a vote of 1933 to 1470.

Ballots were counted November 21 at ARRL Headquarters. The Hudson Division's was the sole contested seat in the current director-vice director election cycle.

Incumbents running in the Central, New England, Northwestern and Roanoke Divisions ran unopposed and were declared elected. Joyce Birmingham, KA2ANF, was the lone candidate for the vice director's seat that W2ML vacated to run for the division's top spot and was also declared as elected.

And don’t look for as many League elections to take place in the future as in years past. These candidates were elected to serve three-year terms of office that begin at noon on January 1, 2004. The change from two year to three year terms was instituted by the ARRL Board a few years ago. (ARRL)

**

REQUIRED READING: SURGE PROTECTION - SEPARATING MYTH FROM FACT

If you think that $2.98 bargain basement power strip will protect your ham gear from power line spikes, you could be in for a rude and very expensive awakening. This is the gist of a feature article in the December issue of Popular Communications Magazine titled Surge Protection: Separating Myth From Fact.

The author is Popcom Editor Harold Ort, N2RLL. In it, Ort takes you on a mind boggling journey into the world of powerline surge protectors. He tells you why power surges take place and what really works to protect your station -- and -- what does not.

The article is must reading for any ham that operates his station from mains power. You can find Popular Communications on many newsstands worldwide or subscribe over the web at www dot popular dash communications dot com. (ARNewsline(tm))

**

INDUSTRY NEWS: ROHN ANNOUNCES ASSET PURCHASE AGREEMENT

Amateur Radio and telecommunications industry tower manufacturer ROHN Industries has announced that it's entered into an asset purchase agreement. This with SPX Corporation which is described as a global, multi-industry company.

According to the ARRL Letter, ROHN filed for Chapter 11 debtor-in-possession relief in the US Bankruptcy Court for the Southern District of Indiana on September 16. The deal, if approved by the court would include ROHN subsidiaries that are party to the bankruptcy proceeding. (WA6KLA, ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

WITH ARNEWSLINE: YOUR INPUT NEEDED

Amateur Radio Newsline will be holding its annual Board of Directors meeting in early December and those in charge want to find out what you would like from us in 2004 and beyond. If you have any ideas on how to improve the newscast, the Young Ham of the Year Award, funding, or any aspect of our operation, we welcome your thoughts. E-mail is best. You reach us at newsline@arnewsline.org. (ARNewsline(tm))

**

HAM HELP: DX SOUND BITE NEEDED

Did you have a tape recorder running the weekend of the CQ World Wide SSB contest? If you did then Glen Lowery, K2FF needs to hear what you have.

The reason? Well, it seems that Daryl Goldman, KD5CQT, and Randy Becnel, W5UE , spent a week in Suriname in October. Goldman operated as PZ5CQ while Becnel was on as PZ5UE. The duo also activated PZ5A in the contest.

Anyhow, when the team got back home they realized that they had recorded everyone on tape except PZ5UE. And now there is a presentation planned for early December and audio of Becnel in QSO is needed to complete the show.

If you happened to be listening in and have the one missing station recorded, please contact Glen Lowery by e-mail to k2ff@aol.ccm Everyone involved will be very appreciative if one of you can help out.

More is on the web at www.mdxa.org/pz_2003.html (OPDX)

**

EMERGING TECHNOLOGY: CELL PHONES WILL POSSESS LOCATION-BASED BEHAVIOR

According to a report on the National Institute of Standards and Technology website, your cell phone may one day be able to adjust its behavior or call handling based upon where it determines you are located. Such phones could, for example, advise you of the closest bank, dial the nearest emergency specialist or automatically forward your calls while you're in a conference room. The N-I-S-T website carries many other interesting stories too. Its updated regularly and is in cyberspace at www.nist.gov (CGC)

**

HAM RADIO IN SPACE: ARISS GEAR PASSES PREFLIGHT TEST

Some exciting news on new ham radio hardware slated to be carried to the International Space Station. We have more in this report:

--

ARISS International Chairman Frank Bauer, KA3HDO, reports that he and other members of the USA team just returned from Russia where we they were supporting a series of meetings and tests at the Energia facility.

According to Bauer, the primary reason for the US team visit was to complete the testing of the Phase 1 Ericsson 2 meter and 70 cm radios, along with the Phase 2 Kenwood D 700 radio system using a set of flight identical ARISS antenna systems.

The tests were performed in the KIS facility at Energia that houses all their flight equipment. Inside the KIS is a flight equivalent Service Module. The good news is that the group not only successfully completed the end-to-end testing of the Kenwood and Ericsson radio systems but the SSTV system as well.

The successful completion of these end-to-end tests was a requirement by the Russian team. This, to clear these radio systems for use in the on-orbit Service Module.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

By the way, the International Space Station celebrated its fifth anniversary in Earth orbit on November 20th. (ARISS)

**

ON THE AIR: NEW SPANISH LANGUAGE IRLP REFLECTOR

A Spanish language reflector has come to the Internet Repeater Linking Project. This, with word that Reflector 9201 is in full operation and all users with Spanish skills are invited to join in the fun.

Jay Santiago, KP4EOP, is the operator of node 7040. He and the Chicago based Asociacion Iberoamericana de Radio Aficionados are the people behind the project. They say that 9201 is not closed to non-Spanish speakers. Rather it is a place in ham radio cyberspace where the Spanish language will be primary.

Up until now, IRLP- has been dominated English and French speaking nodes and reflectors. This left a large portion of the worlds Spanish only speakers out of communications over the very popular repeater linking system -- a problem that’s now been corrected thanks to the Asociacion Iberoamericana de Radio Aficionados. (K9DC)

**

PROPAGATION TECHNOLOGY: NEW SOLAR FLARE THEORY

The recent series of solar storms to hit Earth may be caused by the sun's iron-rich interior. So says one solar researcher who theorizes that the sun's core is made of iron rather than hydrogen.

Dr. Oliver Manuel is a professor of nuclear chemistry. He believes that iron, not hydrogen, is the sun's most abundant element. And, in a paper accepted for publication in the Journal of Fusion Energy, Manuel asserts that the standard solar model which assumes that the sun's core is made of hydrogen has led to misunderstandings of how such solar flares occur.

As ever ham knows, these flares can play havoc with high frequency communications while turning some VHF frequencies into world-wide D-X bands. (ANS and Space Daily)

**

DX

And speaking about DX, word that OK1TN will operate portable KP2 from St. Thomas in the Virgin Islands through the 13th of December. If you make contact, QSL as directed on the air.

Also, K3JT is active as 5X1X from Uganda for the five or six weeks. Sorry. No other information on this operation is available at this time.

Lastly, the Council of Europe Radio Amateur Club, has launched a competition open to all radio amateurs. This, to commemorate the 18th anniversary of its establishment in June 1986. The challenge involves sending a list of all contacts made with their club station TP2CE using its various special prefixes before the end of June 2004. Complete rules can be found on the Internet at ewwa.free.fr

(This weeks DX news provided by OPDX, GB2RS and Modern DX’er)

**

THAT FINAL ITEM: T-HUNT TIME AGAIN

And finally this week, whether you're young or old, you could become a champion at hidden transmitter hunting. It's time to start training now, as you'll hear in this report from Amateur Radio Newsline's Joe Moell K-Zero-Oh-V

--
USA's best on-foot hidden transmitter hunters will be heading west next summer. The fourth annual USA ARDF Championships will begin June 16 near Santa Barbara, California. Get ready for practice sessions followed by separate days of intense competition on the two meter and 80 meter bands. Medals will be awarded in nine age and gender categories, following the rules of the International Amateur Radio Union.

The competitive courses are open to anyone of any age, experienced or not. Here's your chance to learn from experts like Jay Thompson W6JAY, Newsline's Young ham of the year. He was a medal winner at this year's Championships in Ohio.

These USA Championships will take place just in time for final selection of Team USA members who will travel to the Czech Republic for the ARDF World Championships in September.

Event sponsor for 2004 is the Santa Barbara Amateur Radio club. General Chair is Marvin Johnston KE6HTS, a member of USA's first team to the World Championships back in 1998 and winner of medals at the last two USA Championships.

The official Web site of the 2004 Championships is now being prepared, announcing the location of event headquarters, rules and technical details. Meanwhile, you can find out all about championship direction finding, and how your can have events in your home town, at the "Homing In" Web site, www.homingin.com

You'll learn the rules for this fast-growing sport, meet some of the current champions, get equipment suggestions and find out how to get on an e-mail list for the latest radio-orienteering news. That's homingin, one word, homingin.com

>From southern California, where we have regular on-foot foxhunts and everyone is invited, this is Joe Moell K-Zero-Oscar-Victor for Amateur Radio Newsline.

--

2403. For sale: Partial ownership in Oregon AM radio station.

Newsgroup: rec.radio.broadcasting
Date: 2003-12-01 14:53:21 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bqfkl1$73p$1@xuxa.iecc.com>
Source record: 6630

For sale:

Partial ownership in 1 KW full-time AM radio station
in S. Oregon.

Joint venture. Active/inactive investors with at least
$10,000 each are welcome. No individual may own over
49 percent. This rule applies to me too!

I have permission of my parole officer to run this
posting and buy a (one-way)ticket to Brazil for a
short trip!

Station is on the air for over 60 years. Full price of
station is only $100,000 and it billed over $227,000
in 2002. This is a steal!

(The "Radio Crazy" IT'S baaaaaaaak!!!)

Tel: (478)741-1710 in Macon, GA or email. Only those
fully identifying themselves will be given callsign
and city of license.

Please! No "AM bashers" or other negative nabobs!

The "Radio Crazy" is not THAT crazy. He is a
semi-retired radio engineer and in 2001 was Chief
Engineer for a 5 KW full-time AM in New York City.

Resume and references from my parole officer on
request, HI!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

2406. Re: WSAI 1530 Cincinnati - Great Station

Newsgroup: rec.radio.broadcasting
Date: 2003-12-03 04:03:58 UTC
From: TC <tec@consultant.com>
Message-ID: <bqjnbehii1@xuxa.iecc.com>
Source record: 6633

Actually, WSAI repurchased TM's Southern & Pacific jingles. The package was originally a custom for WCFL/WWDJ/WQXI/WSAI. The original multitracks were pulled (I know... I did it) and new vocal arrangements were scored utilizing the new frequency of 1530. The cuts were sung at TM Century, Inc.

In addition to the TM cuts, they are using the Drake-Chanault stager ID, 20/20 news jingle and thematic breaks.

A local High Desert radio station guide

http://www.highdesertinsider.com/html/radio.html

lists 105.3 FM Barstow as KIIS Top 40's

KIIS, of course, is 102.7 in Los Angeles.

105.3 Barstow (actually licensed to Yermo) is listed as KRSX, but it is licensed to Citicasters, so it's possible that it might be a repeater or translator. The listing is kinda weird (but then again, the highdesertinsider web page isn't an official list).

I haven't heard any programming on 105.3 that sounds like Kiss FM but I'll have to listen again and see what I can find. I may be a little too far from Barstow to get a good signal though.

What really struck me as strange is that there seem to be no fewer than five FCC licenses for stations on 105.3 in California with the calls KITS-FM.

Do an FM Search on the FCC's website, on 105.3 in California, and you will see KITS, KITS-FM1, KITS-FM2, KITS-FM3, and KITS-FM4 on 105.3.

KITS is San Francisco, FM1 is Walnut Creek, FM2 is Pleasanton, FM3 is San Francisco, and FM4 is Antioch. All owned by Infinity...

Can someone explain this? I've never seen it before.

They're reusing the Kiss logo and format in markets across the country. Last time I was in Chicago, I saw the exact same Kiss FM logo (only with 102.7 replaced by 103.5) on billboards across the city. My guess is the webmaster at this site mistook the similarity in formats/logos (and possibly simulcast morning show?) to mean the Barstow-area station is a translator of the real KIIS.

Of course, being a LONG way from California, it's possible the Barstow-area station actually *is* a high-powered translator of KIIS<grin>...

FM Boosters. Same purpose as a translator, but operates on the same frequency as the primary station. I suppose they're used when open frequencies for translators are scarce (certainly the case in the Bay Area!) and when terrain is rough enough that the boosters won't

interfere with the main transmitter, at least not in places where anyone lives!

There are twelve of them in Pleasanton, relaying different SF-area stations. A bunch in Walnut Creek too. I count a total of 55 in various Bay Area sites.

They exist elsewhere too. KPRI has three within the San Diego city limits alone. Current Engineering Database shows 179 boosters licensed.

>>

Nope.

"KIIS" implies AM.

KIIS (AM) is 850 in Thousand Oaks.

0.5 kW days, 0.25 kW nights, DA-2.

Citicasters owns it.

The original KIIS (AM) was 1150 in L.A.

It has been KXTA since 1997.

KIIS-FM is indeed L.A. ... also Citicasters.

They are all repeaters for KITS. They are very low power, usually
directional and used to fill in dead spots where the original signal can't
get through. There are several of those around the Bay Area for other
stations too. They are very common in areas like around the bay where
geography plays havoc with FM/VHF Line of sight.

They flipped 103.5 to Kiss? Used to be active rock, and alt-rock before that. But the last time I was in Chicago was '94... there have probably been a lot of changes since then. Wonder how it does vs. B96. (I'm going to Chicago in a couple weeks so I guess I'll find out!)

>My guess
> is the webmaster at this site mistook the similarity in formats/logos

Simulcast? Hm. Wonder if it's Rick Dees or Sean Valentine. Dees is actually the morning guy at KIIS. Valentine is the afternoon drive guy but his show is voice-tracked and used as the morning show at a bunch of KISS stations in smaller markets.

> Of course, being a LONG way from California, it's possible the
> Barstow-area station actually *is* a high-powered translator of
> KIIS<grin>...

That's what I was thinking. Barstow is actually two hours north of LA (as the crow flies; it'll take longer to drive there because you have to deal with LA traffic and it isn't as straight shot).

> FM Boosters. Same purpose as a translator, but operates on the same
> frequency as the primary station.

Thank you (and thanks to everyone else who replied.) I'm a little embarrassed about not knowing this, even though I've never worked in the industry.

On-channel boosters. The Bay Area's terrain blocks signals from
reaching areas that would otherwise have no problem getting
coverage. The boosters "fill in the blanks", as it were. All but
the San Francisco location are in East Bay communities on the
opposite side of the Oakland and Berkeley hills from San Francisco.
These boosters provide coverage to those communities and the I-680
corridor that connects most of them. There is little or no
interference with the main station largely because the hills
so effectively block the main signal. (I believe there is carrier
synchronization involved as well, but I am not clear on the details.)

You'll see boosters for other stations as well, all in East Bay
communities such as the ones above.

Not sure what the San Francisco KITS booster is doing -- KITS is
transmitting from the Sutro tower which should give reasonably good
coverage of most of the city.

On-channel boosters are not quite the same thing as translators.
Boosters are used when terrain obstacles block parts of the predicted
coverage contour of an FM station. They are allowed only to fill such
"holes," not to extend what would otherwise be the station's coverage
area. The SF bay area is full of them, as the topography prevents any
FM station from reaching full coverage without boosters.

From: kludge@panix.com
Message-ID: <bqo8hm$9qe$1@xuxa.iecc.com>
Source record: 6645

I tuned in yesterday afternoon to WKOC, our local alternative rock station,
to discover that they are playing a single song over and over, with an
announcement that our old favorite country station is moving to this frequency.

What was most amusing was that the song they were playing, "Gone Country"
is basically about various musicians who sold out and become country performers
for the money. Not exactly the sort of statement I would want to make if I
were changing format.

The legal ID on the hour included a bit more explanation, about how WCMS,
a local country station, has recently changed format and that therefore there
was a big hole in the dial for people looking for country music, so that they
were building up a brand new country station "from the bottom up." Which sort
of contradicts the notion of bringing back our old favorite one, but whatever.

I'm just amused by the whole thing.

http://www.tvradioworld.com/default.asp

Fun little site, you can make lists of radio and TV stations from all over the world. Web links and even internet radio are noted.

A few caveats though.

1. Right on the first page, it groups the world into three regions: Region 1 North America, Region 2, Middle East and Asia, Region 3, Europe and Africa. Uh, isn't this backward?

2. I don't know how up to date any of this material is...

3. It can sometimes take a while to "drill down" to the local list for any particular US state, Canadian province, or country....

4. Certain FM stations in Japan or Eastern Europe are mistakenly labeled as "Television" stations (the database programming wrongly assumes the US VHF band plan)

I didn't think station-owned translators were allowed to extend the
station's coverage area either? (but independently-owned translators
are; IIRC the FCC does not allow independently-owned boosters)

Seems to me a large proportion of *commercial* translators are fillins,
not range extenders. Of course the situation is very different for
non-commercial translators!

San Bruno, actually. The SF booster is ON Sutro Tower, though, to fill in the hole left by Twin Peaks and such.

Amateur Radio Newsline(tm) Report 1373 - December 5, 2003

Closed Circuit Advisory

This is a closed-circuit advisory, and is not for re-transmission.
Repeat, not for broadcast.

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator. As we move into the holiday season, we ask that you include Newsline on your list of giving. This is the first request we've made since April, and we'll be back in the following weeks to thank everyone that helped in that campaign. But with support in the months since that campaign only averaging between $200 and $250, and with our normal monthly expenses of between $600 and $800 each month to bring you the latest news on Amateur Radio, you can see where the math is headed.

The address for the Newsline Support Fund is Newsline, PO Box 660937, Arcadia, CA 91066. If you missed that, it will be given again at the end of today's newscast. And now the latest news:

**

Amateur Radio Newsline report number 1373 with a release date of Friday, December 5, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in space fail to show up for a highly publicized operating event while hams on the ground save a life. Find out the details on Amateur Radio Newsline report number 1373 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: ISS ASTRO-HAMS A NO-SHOW FOR K6DUE COMMEMORATIVE EVENT.

What if you planned a party but your host never showed up to open the door and turn on the music. This is essentially what happened to the ARISS folks the weekend of November 29th and 30th in regard to the kickoff of its NA1SS special event tribute to the life of Roy Neal, K6DUE. But it was not completely unexpected. Amateur Radio Newsline's Norm Seeley, KI7UP, has the rest of the story:

The event was to get underway on Saturday, November 29th during as the space station passed over the US West Coast. ARISS International Chairman Frank Bauer, KA3HDO, says that Expedition 8 Commander Mike

Foale, KB5UAC, had even been supplied with a list of potentially good radio passes and the frequencies where to call the I-S-S had been published world wide a few weeks ago. Stations on the ground were even asked to keep their Q-S-O's as brief as possible so that the greatest number of hams possible could make contact with the space travelers.

And so it was that hams world wide were ready to honor K6DUE by making contact with the station in space that his years of effort helped to create. But over the entire weekend there were no reports of voice contacts with either Foale or his crewmate Alex Kaleri, U8MIR. Nor was the RS0ISS automated packet robot station activated either.

Why the crew was a no-show remains a mystery. Frank Bauer is certain that Foale knew about the event. In fact a message was received from KB5UAC that said he would try to be on the air for about 2 passes each weekend of December for the event. Bauer also received confirmation that final information regarding this past weekend was uplinked to the ISS crew on Friday, November 28th.

Bauer says that ARISS has discussed the situation with NASA. He says that there are two events that could have kept Foale from getting on the air. The first revolves around a broken exercise treadmill that KB5UAC reportedly spent a lot of his own time fixing this past weekend. The other is the widely reported crushing noise heard by the crew last week. It was in the aft end of the Service Module and its possible that the crew might have gotten instructions from the Russian team to determine the cause. This is being checked out.

Either way, Bauer reminds everyone that last weekend was only the kickoff and that the event commemorating K6DUE's contributions to manned ham radio space operations and that the event continues through the end of the month. He also says that ARISS will alert the ham radio community of potential opportunities for contacts as they become available.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona for the Amateur Radio Newsline.

--

It should be noted that when it made the original announcement several weeks ago, ARISS said that crew participation in the event was completely contingent on the schedule of the on-orbit duties and other issues that might crop up on board the orbiting space station. (ARISS)

**

RESCUE RADIO: LA HAMS ASSIST CARDIAC VICTIM

Ham radio has helped to save the life of one of its own. This, as members of a Southern California repeater respond to a users call for assistance. Amateur Radio Newsline's Mert Garlick, N6AWE, has the details:

--
Almost every ham has heard of the Los Angeles 147.435 MHz repeater. Some call it notorious. Others have given it the nickname of "the animal farm" for the lack of discipline of its users. But on Sunday night, November 23rd, some of the tarnish turned to silver as bad manners gave way to human kindness and a life was saved.

--
Elmer: "We were all sitting around and listening to the radio as we usually do in an evening. All of the sudden, an individual keyed up a microphone whom we were all aware was having some health problems. One of our listeners, Alan Sanchez, KC6QXA, immediately noticed the distress in this persons vloice. He keyed up the mic and asked if he was OK. He indicated he was having some difficulty breathing and needed help. So, Alan immediately called Faith Gonzales who said to call 911 immediately because she was also very familiar with thisd gentlemans health problems
--

That's Gary Elmer is KG6DVO. He recently took over the system. And according to Elmer, the work of his users did not end there. While medical aid was in route, Mike Stavropoulos, KD6JTD, headed over to where the stricken ham lives. He helped him get up, opened the security gate for the paramedics and directed them to the apartment. Mike then followed the ambulance to the hospital and filled medics in on the hams condition.

Later that evening, the hospitalized ham went into cardiac arrest. He was revived by his doctors. Had he been at home the chances are that he would now be a silent key now. Gary Elmer says that he is very proud of his users:

--

Elmer: "You know we like to tear it up and cut up, and have a good time. And you know that some people might of the fun we have. And yes, we have been in trouble with the FCC, but you know, when called upon, we too can rise to the occasion as evidenced by the actions of those three amateurs the other night."

--

As we go to air Elmer says that the ham is still in the hospital recovering. More important he is alive thanks to his friends on the Los Angeles 147.435 MHz repeater.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE, also in the City of Angels.

--

In past years the Los Angeles 4-3-5 repeater has received a lot of negative press. This time the press is positive because this time it and its users probably saved a life. (ARNewsline(tm))

**

COORDINATION: REVISED SOCAL 2-METER BANDPLAN NEARING APPROVAL

Still in the Golden state, December 6th was the date set for a vote on a revised 2 Meter bandplan proposed by TASMA, Southern California's Two Meter Area Spectrum Management Association. Amateur Radio Newslines Bruce Tennant, K6PZW, gives us a sneak peak:

--

Among the problems the revised bandplan seeks to correct is recognition of the work of neighboring coordination councils. TASMA has always officially acknowledged the Northern Amateur Relay Council of California, but not those serving the states of Arizona and Nevada. California shares borders and R-F with those states and the revised TASMA bandplan will provide for such political recognition.

Also to be considered will be frequency assignments for specific modes and updating the recognized manned space operations listings. This to conform the Southern California bandplan with the world in relation to current Amateur Radio International Space Station operations.

This revised plan is the product of 2 years of hard work by the regional coordination body written with significant input from the areas Amateur Radio community. It already received a thorough public review at the 2003 ARRL Southwestern Division Convention last September.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For more information please visit www.tasma.org. (TASMA, ARRL SW Commuinicator)

**

Break 1

We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W6JW repeater serving Santa Clarita California.

(5 sec pause here)

**

RESTRUCTURING - SOUTH AFRICA: PROPOSED CHANGES TO LICENSE REQUIREMENTS AND PRIVILEGES

Another nation has taken the first steps in restructuring its Amateur Radio service. We have this report on what South Africa has done so far in welcoming codefree operations:

--

South Africa is taking a look at how to handle the question of Morse code testing until such time as it goes away and it looks as if it has an answer. It comes in a proposal to lower the Morse requirement from 12 to 5 words per minute. That is until applicants for the South African Zed U license will no longer need be tested for proficiency in Morse code.

Also proposed is the introduction of a new license class with the callsign prefix ZT. This license will not have any Morse code requirement. Rather, the holders of ZT licenses would have full VHF privileges and will be permitted to transmit with a maximum power output of 100 W on portions of the 160, 80, 40 and 15 meter bands.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

This interim solution would hold in South Africa until a final disposition on the future of Morse testing is made by that nations telecommunications regulators. (Q-News)

**

THE VEC PROGRAM: NEW GENERAL CLASS QUESTION POOL RELEASED

If you are planning to take a United States General Class written exam after next July 1st or know someone who is, then listen up. On and after that date tests will be based on a new set of questions just released by the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

According to a news release from the committee, changeinclude the number of questions increased to 432 and release pf the pool in both Microsoft Word and ASCII text formats with no graphic files. Look for the new questions in cyberspace at www.arrl.org/arrlvec/pools.html. (W4WW, NCVEC)

**

RADIO LAW: COMPLAINT LEVELS TO FCC RISE

The United States FCC has released a report on the inquiries and complaints processed by its Consumer & Governmental Affairs Bureau during the third quarter of 2003. According to the report complaint activity increased within all major areas except cable during the third quarter.

The largest increase occurred within Radio and Broadcasting where a total of 19,920 indecency and obscenity complaints were received. Complaint activity was also higher in all five top wireless categories, with the largest percentage increases coming in the service quality and equipment section. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-241435A1.doc (CGC)

**

ENFORCEMENT: YET ANOTHER TOWER FINE

The fines for tower related violations continue. The latest is an $8000 fine issued to the Barinowski Investment Company, L P. Barinowski is the owner of a tower located near Savannah, Georgia. It was cited for failure to clean and repaint its antenna structure to maintain good visibility. (FCC)

**

EMERGING TECHNOLOGY: NET-BY-PHONE NOW PLAYS MP3

The HandiHams say that there is now an MP3 file playback feature on the Net-By-Phone service that allows blind users who do not own a computer to access the Internet. This, by using a plain old vanilla telephone.

By way of example, a Net-By-Phone user accessing a website like Amateur Radio Newsline that has a link to an MP3 file can hear that file over the phone by simply selecting it. The system does not play the file right away, but it will download the file in the background and send you an e-mail when it is ready. When you retrieve the e-mail, the file will automatically play, just as a voice e-mail from a Net-By-Phone customer plays automatically.

Net-By-Phone is located in Chicago and is a fee based subscription service. You can find out more on the web at www.net-by-phone.com or call the toll free demonstration line at 1-800-358-7858. (HandiHams)

**

HAM TRAINING: TRAIN THE TRAINER

49 youngsters are now licensed hams and are the newest members of Pennsylvania's Trinity High School Radio Club. This, thanks to a program called "Train the Trainer" by Pete Di Volpi, K3PD, a teacher named Sean Barnes, N3JQ and the Harrisburg Radio Amateurs Club V-E Team.

TheTrinity High School Radio Club operators station KB3JAG. Barnes started the radio club so lower classmen could get exposure to the hobby before they attend his physics class. He notes that the schools physics program and the principals of amateur radio teend to integrate very well.

The Harrisburg Radio Amateurs Club is a Special Services club in central Pennsylvania. It has only 100 members, but has seen over 100 new licensees produced in the last two years from their V-E and Train the Trainer programs. Teachers that are interested in Sean Barnes curriculum can e-mail him to SeanBarnesPolo@aol.com (W3UU, K3PD)

**

HAMFESTS AND CONVENTIONS: FT.TUTHILL BECOMES WILLIAMS HAMFEST

The Ft. Tuthill Arizona hamfest has changed its name, its location and its date. Now the Williams Hamfest and ARRL Arizona State Convention, this premiere event will be held next July 2nd to the 4th, at the Williams Rodeo Grounds, Williams Arizona.

According to a news release from Mark Keshauer, N7KKQ, the move means that the hamfest sponsors can provide lower fees for tailgaters and campers, bigger spaces, a fireworks display and free admission. Most important, the famed Saturday night B-B-Q which is a staple of this show -- will continue. Sorry, that's not free but is among the best feeds found at any hamfest in the United States.

More information is on-line at www.arca-az.org/arca/images/press%20release (N7KKQ)

**

HAMVENTION 2004: THE YEAR OF THE CONTACT

Hamvention planners have announced that the theme for 2004 will be the "Year of the Contact," and they are starting out by improving their own. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
According to Hamvention General Chairman Gary Des Combes, N-8-E-M-O, his team has been making numerous changes to the shows web site, This, so that things like exhibits, general admission ticket sales and Flea Market spaces can be handled on line and the necessary forms simply downloaded.

And yes, we did say Flea Market rather than Outside Exhibits. As regular listeners know, a number of years ago the Hamvention made the name change to Outside Exhibits. Only one problem. The ham radio public never bought in to that new upscale title.

Hams have always referred to the Hamvention Flea Market as -- well -- the Flea Market. So, taking a cue from the many radio amateurs who have responded to the Hamvention request for input, show planners have gone back to the future. Des Combes says that as of now, the Flea Market is the Flea Market, once again.

Gary Des Combes tells Amateur Radio Newsline that this is only the first of a number of "Going Back to the Future" changes that the public has asked for and that they will get. In fact, "Going Back to the Future" will be a sub theme during Hamvention 2004.

The dates are next May 14th to the 16th. The location is the HARA Arena in Trotwood Ohio just outside the city of Dayton.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Lots more information is on-line at www.hamvention.org. (Hamventionr)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAMS HELPING: THE NORTH POLE NETWORK

The holiday season brings hams a great opportunity. What better way could there be to introduce hospitalized children and their families to the magic of Amateur Radio--and to spread holiday cheer--than to arrange to have Santa visit them via Amateur Radio? Newsline's Joe Moell, K0OV, tells us about the North Pole Network.

--

Kids at Childrens Hospital of Orange County get holiday visits from clowns, carolers, firemen, baseball players and rock stars. But nobody is more welcome and anticipated than the ten Amateur Radio operators who arrive on the weekend just before Christmas. They come to establish a special ham radio link that makes it possible for patients to talk directly to the "real" Santa in his office next to the big toy workshop at the North Pole.

Members of the Hospital Disaster Support Communications System have been visiting children and adults in Orange County hospitals for over 25 years, and we think there's no better way than this to spread holiday cheer while showing our hobby in the best possible light.

Will your club be part of the North Pole network this year? If so, we have some suggestions for you. For instance, personalize each QSO. It would be easy to just put the mike in front of a little girl and instruct her to tell Santa her name and where she lives. But imagine how much better the QSO will be if Santa calls her by name right from the start. He's Santa Claus, so he should know! Before each year's North Pole Network session begins, the hospital therapists provide our North Pole station with the list of names for every room and bed, along with plenty of other tidbits about the kids that make good conversation starters for Santa.

You'll find lots of other hints for your best North Pole Network ever at our group's special Web site. The URL is long, but you can get to it with one click from the Hospital Disaster Support Communications System site at www.hdscs.org

The most important hint we have for you is: Don't miss the miracles. Every year, we have had at least one extra-special encounter that astonished families, staff and the hams. In a Santa QSO, children have spoken for the first time following brain trauma. Fevers have broken shortly after North Pole Network visits. A head injury patient started

to eat after being encouraged to do so by Santa, and so forth. We don't know exactly how much the personal contact with Father Christmas has aided in patients' recoveries, but we are always grateful that our hobby can add a little joy and holiday spirit to patients and their families.

Again, the Web spot to visit is HDSCS.org, short for Hospital Disaster Support Communications System. From southern California, this is Joe Moell Kay-zero-Oscar-Victor for Amateur Radio Newsline.

--

More on this and other ham radio holiday activities in the coming weeks. (K0OV, ARNewsline(tm))

**

INTERNATIONAL - AUSTRALIA: VK2BVS HONORED BY VK PRIME MINISTER

Australia's Prime Minister John Howard and Foreign Minister Alexander Downer expresses gratitude for Australian ham radio training in developing countries. This, by way of a certificate sent to Sam Voron VK2BVS in which the Australian Government expresses its gratitude to Voron for a valued contribution towards assisting developing countries to reduce poverty and achieve sustainable development.

The honor was bestowed on Voron for the six months he spent in Somalia where he organized an Amateur Radio training course. In addition to Howard and Downer, the certificate was signed by Dr. Brendan Nelson who is a member of Australia's Parliamentary House of Representatives. (QRZ.COM)

**

INTERNATIONAL - SWEDEN: NEW PAN-EUROPEN TV SHOW ON ITS WAY

Ham radio in Europe will soon have a TV show of its own. Jeramy Boot, G4NJH, is in Nottingham, the UK, with the rest of the story:

--
The Swedish-based 'Club-TV' wishes to establish a monthly amateur radio magazine programme to be transmitted via digital satellite TV to most of Europe. Club-TV wants to cover all aspects of amateur radio and thinks there is a number of amateurs around Europe who can handle a video camera and edit the result.

Videos of 10 to 20 minutes would be perfect. There is no cost involved other than the tape as the broadcasts receive commercial sponsorship.

During the past year Club-TV has carried out a number of tests and broadcast a couple of programmes. The transmission is via the Sirius 2 satellite at 5 degrees East with a Symbol Rate of 6667 and FEC 1/2.

Jeramy boot, G4NJH.

--

Jeramy says that inquiries go to Ben Jockert, SM6CKU, by e-mail to sm6cku@parabolic.se. (GB2RS)

**

ON THE AIR: NEW VHF/UHF PROPAGATION BEACONS NEAR ATLANTA

Back in the United States, Gary Bailey, WA4IOB, invites VHF operators to listen for his new 2 meter and 70 centimeter beacons. The transmitter are located in grid E M 73 near Snellville, Georgia about 25 miles east of Atlanta. The mode is CW on 144.285 MHz and 432.352 MHz with 2 watts output on each band. The 2 meter transmitter feeds a horizontal square loop. The 70-centimeter antenna is 4 half wave dipoles in a 90-degree horizontal quadrature configuration feedwith a 4-way power splitter. Both sign the call B B B W-A-4-I-O-B slash E M 73. Signal reports go to grb734@bellsouth.net (VHF Reflector)

**

DX

In D-X, LA5RIA will be active as JW5RIA from Bear Island until June of JW5RIA will operate on 160 to 6 metres CW, SSB and digital modes. Q-S-L as directed on the air. (RSGB)

Also, eight American operators are active from Christmas Island, East Kiribati, until the 7th of December. Call signs to listen for are T32MP, T32WW, and several others on all bands using all modes. They will have three stations with amplifiers and a large selection of antennas to pipe their signals worldwide. (RSGB)

**

THAT FINAL ITEM: A KILLER RENEWAL

And finally this week, the story of a ham who might have a hard time attending a license renewal hearing. Thats because he is in jail. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

According to the ARRL Letter, the FCC has issued an Order to Show Cause to a Texas ham who is currently serving a 32-year prison sentence for the 1996 murder of his wife. The order released November 21st is the governments opening salvo in a hearing process that could end with the revocation of the Advanced class license of Roger Thomas Scaggs, W-5-E-B-C.

The FCC says that Scaggs' murder conviction raises very serious questions as to whether he possesses the requisite character qualifications to remain a Commission licensee. It also causes the agency to question whether his license should be revoked.

Scaggs is 64. He apparently was able to renew his ham ticket in the spring of 1998. This is the same year in which he was later convicted of murdering his wife. The FCC granted Scaggs' application for an

administrative update. In this case, apparently a change of address from Austin to Gatesville, Texas.

The FCC only recently became aware of Scaggs' murder conviction, which could keep him behind bars at least until he's 75. Assuming that Scaggs indicates that he will appear for or be represented at a formal hearing, the FCC will follow up with a Hearing Designation Order.

The session itself will be held before an Administrative Law Judge and would consider evidence concerning the effect of Scaggs' felony conviction on his qualifications to remain an FCC licensee. If no action is taken Scaggs license will next expire in 2008.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

Scaggs was given the customary 30 days to let the FCC know whether he plans to appear at the hearing. (ARRL)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, saying 73 and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

Ah, thank you. That makes more sense -- though, interestingly, a
1998 schematic from STI of the tower doesn't show the booster. The
FMs it shows are KFOG, KSOL, KOIT, KKSF.

I guess I had thought more FMs were on Sutro (such as whatever 95.7
is this year). But it is mostly a TV tower, after all.

I've produced a comic novelty CD related to a topical issue - telemarketers and the National Do Not Call Registry. The concept is a series of off the wall recordings to play at the telemarketers instead of just saying no. The title of the CD is "Fun With Telemarketers".

It occurred to me to contact radio stations, especially those with "irreverent" hosts who might find something quirky like this of interest, obviously in hopes of getting a mention on their shows. Coming up on Christmas, this would make a great stocking stuffer.

Finding stations is simple enough but is there a typical protocol to approaching them with something like this? Would an e-mail or letter and perhaps a promo CD along with my website address be adequate or would a phone call be likely to be significantly more effective? There's a lot of radio stations, and the logistics and expense of calling a significant number of them by phone seems prohibitive.

If anyone's curious here's the website

http://starwatermusic.com

Any thoughts and suggestions will be appreciated!

Radio Express is the most experienced in international business. All the others have constant turnover and changes in ways of doing business. Radio Express is the original international radio syndicator in the US, and its founder was one of the co-founders of American Top 40... a good, long history in satisfying radio needs.

we run small fm radio station in croatia with some Behringer chain before
stereo coder but news will be
PC with MBL4 (latency maybe issue depends on program - music . talk , telco
hybrid ...) but
for station on budget MBL4 now Sonos driven with decent soundcard will be
good choice
and since here in Croatia is hard to find second hand decent equipment like
compellor or prisms...

<< Subject: Looking for tips & suggestions for marketing to radio stations
From: "Starwater Music" starwater@mpNOinetSPAM.EVERnet
Date: Sat, Dec 6, 2003 12:30 PM
Message-id: <bqt3of$9mg$1@xuxa.iecc.com>

I've produced a comic novelty CD related to a topical issue - telemarketers and the National Do Not Call Registry. The concept is a series of off the wall recordings to play at the telemarketers instead of just saying no. The title of the CD is "Fun With Telemarketers".

It occurred to me to contact radio stations, especially those with "irreverent" hosts who might find something quirky like this of interest, obviously in hopes of getting a mention on their shows. Coming up on Christmas, this would make a great stocking stuffer.

Finding stations is simple enough but is there a typical protocol to approaching them with something like this? Would an e-mail or letter and perhaps a promo CD along with my website address be adequate or would a phone call be likely to be significantly more effective? There's a lot of radio stations, and the logistics and expense of calling a significant number of them by phone seems prohibitive.

If anyone's curious here's the website

http://starwatermusic.com

Any thoughts and suggestions will be appreciated!

Better get an email contact on your site.
I wanted to play your stuff on my new national pgm but couldn't contact you.

If you're serious, there is an email link on the 3rd page - hit the BUY icon. However, thanks for pointing out an oversight, I should have an e-mail link on ALL pages. You can also contact me by removing the NO SPAM EVER from the email address here.

Or to restate a different way, write to me at: starwaterATmpinetDAHTnet

2435. A "KB" MP3

Newsgroup: rec.radio.broadcasting
Date: 2003-12-08 05:42:13 UTC
From: bobradil@aol.com
Message-ID: <br12vlslu1@xuxa.iecc.com>
Source record: 6562

The "KB" refered to here is, of course, WKBW, Buffalo, as radio fans in the northeast USA know, in it's day was probably the best radio station on the air(sorry WABC fans).

This segment was recorded on 2/27/1973, the last night for Jack Armstrong, probably their best known personality.

WKBW, now WWKB, earlier this year returned to a music format, this time as an oldies station. Jack has returned to his 6P-10P shift. In this MP3 Jack has proven to be somewhat prophetic.

Anyone interested can just send me an email request. This MP3 is less than 500K.

Hey,

I'm Mike Jahn, the original New York Times rock critic (late 60s - early 70s). About the same time as I bought a scanner, my mother informed me that she saved ever rock review I ever did for The Times, and there were several hundred of them. Consequently, I started a non-commercial site, TALES OF THE ANCIENT ROCKER, and am scanning and putting them up on the Web. I just posted a review I wrote about Janis Joplin's first New York concert backed by Full Tilt Boogie (Forest Hills Stadium, NYC, August 1970).

I thought you might be interested.

The Valerie Williams/Chip Moody/Tracy Rowlett blooper where her jaws freeze is, IMHO, the standard-setter for local news bloopers & blunders. But I seem to have lost my copy.

Does anyone have a copy of this they would be willing to share?

I tried to past a request a couple of weeks ago but it came through looking MIME-encoded or something...sorry.

Thanks for any help in locating this...I need a good laugh about now.

Thu 27th Nov 2003

A television crew has been at Manx Radio filming a documentary which is due to be broadcast on Sky TV at the beginning of February.

It's about the story of United Christian Broadcasters in the British Isles, and the fact Manx Radio was the first station to air the organisation's programmes, between 1987, and 1989.

Director and Producer, Graeme Spencer, believes it's very important for stations to provide a wide range and choice of programming.

Hi Keith,

You're right, it _is_ trouble. You never want to cascade processors like that - the different processing algorithms in the separate boxes will end up "fighting" each other and your station will pump nonstop or flatten out or produce some other undesirable result.

Furthermore, even if you put a Compellor or a Dominator in your audio chain, you're still dealing with an 8100 that's at best 20 years old. Even disregarding the fact that there's now much newer tech out there, your unit has electronics that have been worn and softened by time.

My suggestion: for under $4,000 you can get an Omnia-3 that's all digital and will punch up your station very nicely. Check out www.omniaaudio.com.

The "Radio Moron" is baaaaaaaakkk!!!

For sale:

Partial ownership in 1 KW fulltime AM in S. Oregon.
City of about 20,000. On air for over 60 years.
Station grossed over $227,000 in 2002. Full price is
$100,000 asking WITHOUT the optional real estate.

This is a joint venture. Active or inactive investors
with at least $10,000 each are welcome. We will accept
ONE investor only with $5,000 however to get things
started. The VERY FIRST investor will get a reward of
some free extra stock for being a risktaker.

All investors would be on the board with full voting
rights if desired. No individual can own over 49
percent and this applies to me too!

References:
a-Brazilian Bandit Airways. (Purchased one-way ticket
to Rio, paid all cash, unmarked small bills)

b-My parole officer. Mr. Larson E. Rapp!
c-Wayne Greenhorn, Rightwing, New Hampshire. (W2NSE)
d-Half century Wireless association. (Rejected due to
low IQ) Ham since 1950. (Really!)
e-Resume on request. (Really!)

Call (478)741-1710 in Macon, GA or email. Only those
fully identifying themselves will be given callsign
and city of license.

Please! No "AM bashers" or other negative nabobs.

We are equal opportunity crooks! You will be equally
mistreated no matter what your race or religion or
favorite team! Hi!

I am NOT a shill, agent, broker, owner or part owner.
I am also not a crook!

There is a great Retro Web Station, playing 60s 70s 80s hits as well
as a lot of obscure tunes from the 60s and 70s. They also have CBS
theater every night at 8PM and Nightfall at midnight!
There is no cost to sign up, and there is an automated request feature
on the site!
There are upwards of 15 - 20 thousand tunes!
Dylan, Beatles, Captain Beefheart, Doors, Van Morrison, You name it,
it's probably there. If it's not, e-mail them and they'll add it!
There is a Beatles block every two hours also!
There are two streams, one for broadband [56k] and one for modems
[16k]!!
http://www.wilsonswebdesign.com/RadioShow/
Check it out, it's worth it!

2449. Firesign Theatre on CNN Ticker

Newsgroup: rec.radio.broadcasting
Date: 2003-12-12 18:20:16 UTC
From: tedalvy@aol.comdotcom

About 9AM PT 12-12-03 Firesign Theatre on CNN Ticker (bottom of screen)

paraphrased:
Fabled Firesign Theatre to recreate comedy at UCLA April 1, 2004 [then a list of some guest performers]

Let's Eat: Feasting on the Firesign Theatre
America's Bravest Thespians and Troubadours Perform the Audio-Plays of the Firesign Theatre

Thursday, April 1, 2004 at 8pm

UCLA Royce Hall http://www.ucla.edu/
Tickets: $40, 30, 20
($17 students)

Hal Willner, Artist in Residence

Cast: John Goodman, Brad Hall, Howard Hesseman, Julia Louis Dreyfus, Nelson Lyon, Chloe Webb

Musical Guests: Captain Billy's Whiz Bang, Ralph Carney, Todd Rundgren, David Thomas of Pere Ubu,

Steve Weisberg's "kind of" Big Band...and other special guests!

The Firesign Theatre was and remains anarchic melodrama written and wonderfully performed by one of

the greatest gangs of four ever; Philip Proctor, David Ossman, Philip Austin and Peter Bergman. The

four Firesign records made between 1968 and 1971 (Don’t Crush That Dwarf, How Can You Be in Two

Places at Once…, I Think We’re All Bozos on this Bus and Waiting for the Electrician), conceived as

radio theater for the psychedelic era, constitute a dazzling comic epic whose plots and sub-plots

are still scrutinized, memorized and revered by legions across this great country “about which

we’re singing about.” From the mind of Hal Willner, who created the now legendary Harry Smith

Project and Halloween evenings in Royce Hall, comes Let’s Eat..., sequences from Firesign’s famed

recordings performed by a kaleidoscopic cast of actors, singers, writers – zealots all –

accompanied by onstage sound effects and musical flourishes. Among the evening’s guests: Ralph

Spoilsport, George Leroy Tirebiter, Nick Danger, Rocky Rococo, Nancy, Pico & Alvarado and a Bozo

named Barney.!

Lineup subject to change

Produced by Hal Willner and Janine Nichols

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Saturday, December 20, 2003 - WMOX-1010, Merdian, MS will conduct a DX test from 12:00 am - 1:00 am CST (UTC 0600-0700). The test will include Morse code IDs. Also, the code will be played 12:04am-12:06am, 12:30am-12:34am and 12:58am - 1:00am. Between the code breaks, the regularly scheduled program, "Coast to Coast AM", will be broadcast. Also, between the code breaks, local operator Jim Myrick will verbally identify himself and WMOX AM 1010 at various times, as in "This is Jim Myrick and you are listening to AM 1010 WMOX Meridian, Mississippi". WMOX is scheduled to broadcast at 10 kW during the test.

Reception reports(with return postage) may be sent to:

WMOX Radio
P.O. Box 5184
Meridian, Ms. 39301

OR
E-mail: smith@wmox.net

(Arranged by Bill Smith of WMOX.)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

2453. St. Louis: P-D commentary on radio

Newsgroup: rec.radio.broadcasting
Date: 2003-12-14 16:37:45 UTC
From: markrobt@comcast.net
Message-ID: <bri3kp$ad2$1@xuxa.iecc.com>
Source record: 6579

A very funny article in today's St Louis Post-Dispatch -- and one
that will get the Conventional Wisdom Crowd's underwear all in a knot --
as one of the P-D's columnists, Daniel Finney, listens to
local (FM) radio for a week and writes of his impressions.

URL (line break after ReadForm&):
http://www.stltoday.com/stltoday/emaf.nsf/Popup?ReadForm&
db=stltoday%5Centertainment%5Cstories.nsf&docid=ED50E24E4273457686256DFA0052CF90

Highlights (fair use excerpts):

About country station KSD-FM: "One of the DJs let loose a pretty
loud belch after shilling for McDonald's. Already, I can hear
what I've been missing the past half-decade."

Of heritage rocker KSHE: "Along comes another commercial for
mortgage refinancing. I begin to wish I had a house to
refinance. The station returns to "Bob and Tom." Ah, it's
good to be in touch with this local programming. I mean,
it's not like I could hear a syndicated show from Indianapolis
on the air in Des Moines."

Of AC KYKY: "A series of unremarkable soft songs played in a row
until Blues Traveler's "Run Around." KYKY, like seemingly every other
station, is giving away $10,000. I think about ways to spend
the money - mostly on new albums so I won't have to wait for
commercial radio to play a song I even kind of want to listen to."

Regarding modern-rock KPNT: "I'm told this is the station all the
hip, young people are listening to. It sounds more like the station
the marketing people want you to think all the kids listen to."

Finally, on KDHX: "Of course, the next day, I tune in to hear
Serbian pop music and lose all my interest. Still, I've got
to admire a station that tries to be all things to all people.
There's got to be room for a place with a mix that eclectic."

Interestingly, no AM stations were covered in Finney's column (not even
KMOX).

Hi Everyone,

I have a rig here which is a Superstar 3900 Black and was wondering if anyone could give me some advice?

I have heard that there are simple conversions which can be done to these to get extra frequencies by connecting and disconnecting different points on the circuit board? I have found losts of information on these mods but am unsure what their outcomes mean????

These are the mods which I found on internet, but what do they do or mean?

Open Clarifier
1)Find D75 and R135 and cut one end of them.
2)On the back of the clarifier knob follow the green wire to the PC board. Cut this wire from the PC board.
3)Now Solder this wire to a constant 8VDC source, like the collector of TR41.
4)Take the yellow wire and cut it from the knob. Tape this wire it is not needed.
5)This should make the radio TX/RX on the same frequency.

10 Meter Mod
1) Find IC7 near the PLL chip.
2) Get a SPST switch and mount it in the radio.
3) Solder a wire from one side of the switch to Pin #13.
4) Solder a wire from the other side of the switch to Pin #12.
5) That's it .Put the radio on 'Band D' then flip the switch to jump up to 28.300 to 28.500.

Tweak and peak
Audio Limiter - Cut R249
AM Power - VR13
SSB Power - VR12

If anyone has any advice or experience of doing this could they help?

This radio also has a small fault which the channel display keeps flickering and shorting on and off whenever it feels like it, does anyone know if this could be easily fixed?

Best Regards

Steven

2455. Re: world radio station list

The "Radio Crazy", it's baaaaaaak!!! Hi!

Partial ownership of fulltime 1 KW AM in S. Oregon for sale. City of about 20,000 with county population of over 100,000. Oldest station in that county. On the air for over 60 years.

Full asking price of only $100,000. This is a steal as the station grossed over $227,000 in 2002.

Joint venture (If you venture, you end up in the joint! Hi!)

Active or inactive investors with at least $10,000 each are welcome. The FIRST investor may put in as little as $5,000 and will get extra stock for being the risk-taker. No individual may own over 49 percent. This rule applies to me too.

Hello all.

I'd like to know what's wrong with WKMI 1360 here in Kalamazoo? I noticed during late October or early November that the sound on this station was very distorted. At first I thought it was my stereo equipment but when we purchased a new car and drove it home. We turned on 1360 to hear the Rush Limbaugh program while we were driving. At first I thought that the cars radio was defective but when I went into the house and switched on the stereo I got the same distorted sound.

While driving back from a trip to Detroit we switched on WKMI between Battlecreek and Kalamazoo and yes the same problem occurs. I know that it must be a problem with KMI because if you compare the sound of the Rush program with WBCK 930 and WKMI 1360 the sound on 930 is much better.

What's the problem?

There are some local stations being carried full time or in pieces by XM
satellite. KIIS-FM in Los Angeles is one example.

I have XM and the Talk Radio is better with FREE AM
XM does not have any good host except Hannity.
The open road would be good if they dumped Bozo.
He makes us all look like dumbies.

Just like the rest of the stations......It started when they fired the professional, licensed engineers that used to run the station in a professional, high-standards manner.....even if they had to do it behind managements' backs....(c;

It's just awful what the FCC allows the big corporation radio moguls to get away with, now.

2462. Newbie Question concerning physical format of broadcast radio programs.

Newsgroup: rec.radio.broadcasting
Date: 2003-12-16 16:12:50 UTC
From: eldricbach@hotmail.com
Message-ID: <brnau2$d63$1@xuxa.iecc.com>
Source record: 6590

I'm somewhat curious as to the type of format that radio broadcasts (such as talk radio programs) are currently stored at radio stations, or if it is a syndicated radio program, that copies of old shows are shipped to other radio stations. Also, is primarily all broadcast shows (including OTR broadcasts) in the same type of format these days? I've spent most of my time examining the formats of broadcast video media the past few months, so I do not have that much knowledge when it comes to radio (which is what I'm looking into now).
Anyway, thanks in advance for your time and patience and I hope someone can help me with this problem.

KIIS is going away from XM, soon...though the channel in question will
still carry the Rick Dees morning show.

The original poster was probably hearing a show on Orlando's "Real
Radio 104.1" (WTKS-FM), an FM talk station which has the bulk of its
schedule broadcast on XM's "Extreme" talk channel. WTKS shows airing
on XM include their "Monsters of the Midday" show, along with PM
driver Jim Phillips and night host Drew Garabo, and I believe they're
all live on XM/Extreme.

Amateur Radio Newsline™ Report 1374 – December 12, 2003

LISTENER ADVISORY: PLEASE ASSIST IN THIS SURVEY

This is directed only to those who are not currently ARRL members.

Amateur Radio Newsline has agreed to help compile a survey which seeks answers for these two questions:

1: If you are not a member of the ARRL, why not?

2: If you were a member of the ARRL and quit, why?

If you are already an ARRL member, please do not reply as those conducting the survey only want to hear from those hams who never joined or who have dropped their membership.

Please respond by e-mail to hamvideo@juno.com before December 18th. And we sincerely thank-you for assisting in this survey. (The Producers)

**

Amateur Radio Newsline report number 1374 with a release date of Friday, December 12 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new study says that the Executive Branch should take over the duties of the FCC, hams in Australia could loose part of the 70 centimeter band and the K-6-D-U-E commemorative event is finally on the air from space. Find out the details on Amateur Radio Newsline report number 1374 coming your way right now.

RADIO POLITICS: STUDY SAYS WHITE HOUSE SHOULD REGULATE RF SPECTRUM

A new study says that its time for the White House to replace the FCC as the nations regulator of the airwaves. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, is here with the story:

--

The Center for Strategic and International Studies is a private research organization that analyzes global issues. And in a recent report, it basically posed the rhetorical questions of -- what if the FCC went away -- and -- what if the Executive branch of the federal government -- the White House -- took over management of the nation’s airwaves?

Would it be better or worse for America? The Center says yes. That in its view, such a change would definitely improve the way the finite resource called electromagnetic spectrum is managed, but critics have their doubts. One told Amateur Radio Newsline: -- quote -- “You think the spectrum management is bad now, put it under the executive branch” -- unquote.

Be that as it may, the Center’s report called Spectrum Management for the 21st Century was recently presented to Representative Tom Davis. Davis is chairman of the House Committee on Government Reform and the report recommends a number of steps to stop what the think-tank describes as the increasing number of fights over existing spectrum space.

Among its recommendations are to develop a national spectrum strategy. Increase research support for technologies that make better use of the spectrum and the controversial one. Establish a spectrum oversight advisory board to implement full White House control of all spectrum related matters.

Davis said his committee will weigh the report’s findings, along with the results of five ongoing General Accounting Office reviews and a Presidential Spectrum Policy Initiative study commissioned last June. With all of this information for Congress to gather and digest, any change in who will regulate the nations spectrum is probably years, if not decades away.

With thanks to KC0DGY for bringing this to our attention, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

Currently, the Federal Communications Commission oversees commercial use of the electronic magnetic spectrum while the National Telecommunications and Information Administration handles all aspects of government use. Its far to early to speculate on what effect -- if any -- such a change might have on Amateur Radio.

More information can be found on-line at http://www.gcn.com/vol1_no1/mobile-wireless/24166-1.html (KC0DGY, GCN)

**

INTERNATIONAL - VK: 20 - 430 MHZ AT RISK IN VK-LAND

Australian hams may loose access to all of 420 through 430 MHZ. This, as demands in this part of the spectrum by non-amateurs increases.

Q-News reports on an e-mail from the Space & Terrestrial Systems Team at the Australian Communications Authority to the Wireless Institute of Australia’s Federal President Ernest Hocking, VK1LK, last Tuesday. It deals with an amendment that was made to the Australian radio regulations recently that prohibits the operation of amateur stations in the frequency band 420-430 MHz in certain locations. This, to minimize the risk of interference to that nations Fire Brigades Network and the Mobile Data Radio Service emergency services that operate in this frequency band.

VK1LK told Q-NEWS that he will continue to adopt the view that the Wireless Institute of Australia is looking for primary allocation in the 430 to 440 MHz

band -- or at least some part of it -- to protect ham radio interests. (Q-News)

**

INTERNATIONAL: BIG HAM RADIO EDUCATIONAL SUCCESS IN ALBANIA

Success reported for 33 students in an internationally sponsored Albanian Amateur Radio training project. We go across the Atlantic to Jeremy Boot, G4NJH, is in Nottinham the UK for the latest:

--
The following update on the unique amateur radio training course that is ongoing in Albania has been sent in by Martti Laine, OH2BH, in Tirana.

"A memorable second week came to an end when the US ARRL delegation headed by K7WX and K9LA departed Tirana with many fond memories and new friendships taken back home”

"The theory exam was conducted on Wednesday the 26th of November with 33 students gaining a pass at the CEPT 1 level. Now the course will move on to pure amateur radio related subjects under the leadership of Uli, DJ2YA, while John, G3OKA, will head back to the UK after a job well done.”

Britain's RSGB deserves credit for their support of the first part of the program. I’m G4NJH, in Nottingham.

--

Another wave of lecturers representing Finland and Germany has now arrived. Also, Albanian authorities have released the callsign ZA1UT. This is an acronym for the 'University of Tirana and is meant to assist in commemorating this extraordinary ham radio educational program. (GB2RS)

**

HAM RADIO IN SPACE: K6DUE OPERATING EVENT UNDER WAY

The K6DUE International Space Station Commemorative Event from the International Space Station is finally under way. What’s described as a challenging schedule kept the crew from getting on the air November 29th and 30th, but the ISS ham station was active during a pass on Saturday, December 6th. We have more in this report:

--
According to ARISS International Chairman Frank Bauer, KA3HDO, numerous hams across North America and Europe were able to contact with Astronaut Mike Foal, KB5UAC or heard the ISS ham radio station downlink. Those who did qualify for a special ISS Commemorative Certificate. Information on obtaining one is on-line at www.rac.ca/ariss

KA3HDO also reports that the Phase 2 equipment setup has been completed and the gear activated at approximately 11:20 UTC on December 8th. The new radio is a Kenwood D 700 dual band transceiver. It appeared to operate flawlessly but the packet operation was turned off after Russian controllers requested that the

crew power down the hardware while bilateral safety paperwork coordination is being completed. Bauer says that hopefully, this will be completed quickly and that the long awaited packet operation will be on the air once again.

For the Amateur Radio Newsline, Norm Seeley, KI7UP.

--

The event commemorates the contributions of the late Roy Neal, K6DUE, to manned ham radio space operations and continues through the end of the month. (ARISS)

LAW: HIGH TECH MUST FIGHT CYBERTERRORISM

The Federal government says that technology companies must cooperate in the battle against cyber terrorism. This, according to Homeland Security Secretary Tom Ridge who said that the alternative is to submit to government imposed security regulations.

Speaking at a recent two day conference sponsored by his agency, Ridge said that the enemies of freedom use the same techniques as hackers do and the nations industries must be as diligent and determined as the hackers."

The two-day conference was the first formal brainstorming session to draft security guidelines and a cyberspace attack warning systems. (Published news reports)

**

ENFORCEMENT: FCC AGAIN WARNS AERO ENTHUSIASTS ABOUT UNLICENSED OPERATIONS

The FCC is once again warning several hang gliding and sky-diving enthusiasts and the operators of a number of training facilities about the use of ham gear by unlicensed persons. Bruce Tennant, K6PZW, reports:

--

In a letter to sixteen such California based flying groups, the FCC’s Riley Hollingsworth says that the Commission is receiving an increasing number of complaints that users of these facilities are operating Amateur Radio equipment without a license. Hollingsworth specifically notes the use of hand-held radio transceivers as the biggest violation.

Hollingsworth says that while the FCC encourages the use of radio equipment for the safety of flyers, there are numerous alternative radio services that do not

require a license. These include the Family Radio Service and the Multiple Use Radio Service.

Hollingswoth adds that the use of Amateur Radio Transmitting equipment is also permissible as long as the users -- in this case the pilots and sky-divers -- are licensed in the Amateur Radio Service. Translated, they must have a ham ticket to put an Amateur band transceiver on-the-air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth's letter tells the groups that the use of radio transmitting equipment in a service where a license is required, without obtaining a license, is a violation the Communications Act and will result in criminal penalties. He says that fines normally range from $7,500 to $10,000. (FCC)

**

ENFORCEMENT: HOMEOWNERS ASSN MUST FIND INTERFERENCE

And a big win for a Pennsylvania ham that could be precedent setting. The FCC has written to the lawyer representing the Pine Ridge Community Association in the city of Stroudsburg. The note informs the counsel that his interpretation of the Community Association's obligations under Part 15 was incorrect and that the Association is required to investigate the source of its radio frequency interference to an Amateur licensee residing within the Association's property. (FCC)

**

AT THE FCC: CHANGES AT THE CGB

Still with the FCC, word that Louis J. Sigalos has been named Chief and Sherry Dawson has been named Deputy Chief of the FCC's Consumer Affairs and Outreach Division of the Consumer & Governmental Affairs Bureau. This bureau is responsible for conducting outreach to the American public on a broad array of telecommunications issues including the deployment of broadband services, the transition to digital TV, wireless phones and services including local number portability and much more. The Division also promotes public awareness of the Commission's strategic goals and initiatives through consumer advisories and fact sheets, consumer forums and participation in conferences and workshops. (FCC)

**

CHANGING OF HE GUARD: JULIAN HIRSCH

Some sad news. Famed technical writer Julian Hirsch, W2KFB, who spent most of his life testing the latest developments in stereo equipment and explaining them for Stereo Review magazine has died.

Hirsch was a graduate electrical engineer from Cooper Union University. He and Gladden Houck created the Hirsch-Houck Laboratories to test electronic equipment in 1957.

Hirsch went on to author more than 4,000 reports on stereo systems, speakers, turntables and other equipment until his retirement in 1998. He was 81 when he passed away on November 24th. (LA Times, other published news reports)

**

HAM EVENTS: HRU 2004 ON LONG ISLAND NY

Mark Sunday, January 18, 2004 at 8AM, for the fifth annual Ham Radio University. The event is being held at the East Woods School in Oyster Bay New York with special forums geared to the non-ham as well as the experienced ham radio operator. The focus will be hands-on with many demonstrations on just about everything including ham radio satellite communications, low power operating using radios as small as a tuna tin and the latest in emergency communications. There will also be a testing session for those who would like to take an FCC exam.

Again this year, Ham Radio University will be combined with the ARRL New York City and Long Island Section Convention. Talk-in will be provided on the W-2-V-L repeater on 146.85 MHz and using an access tone of 136.5 Hertz. For more information e-mail n2ga@arrl.org (K2EPM)

**

INDUSTRY NEWS: FREE SUB TO THE UNEMPLOYED FROM ATVQ

If you are out of work and would like to have something to read, has Amateur Television Quarterly Magazine got a deal for you. How about a free one-year subscription to their flagship magazine?

To qualify, you must be normally employed and not retired. Also, the offer is limited to the first 100 to apply.

To take advantage of this one time offer, send a letter by U-S mail requesting a free subscription and stating that you are temporarily out of work. The address is Holiday Offer - ATVQ, 5931 Alma Dr. Rockford, IL 61108.

Sorry, the magazine will not accept e-mail subscriptions for this one time offer. (ATVQ)

**

INDUSTRY NEWS: JVC TO CLOSE US VHS TAPE PLANT

A not so happy Christmass for some employees of JVC America. This, as the company announces that it will shut down its VHS tape production plant in Tuscaloosa Alabama by January 31st.

The reason given for the closure is the loss of the VHS market to Digital Video Discs. About 115 people will be laid off from the VHS tape plant closing. JVC already has compact disc and DVD plants in Tuscaloosa and Kennesaw, Georgia that employ about 550 people. (KB4KCH)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARNEWSLINE(TM) NEWS: WE THANK YOU

I'm Andy Jarema, N6TCQ with a list of people to thank.

It's been since March that we did this, and we were in big trouble financially at the time. The following is only the first half of who helped us in April:

George Jacobs W3ASK of Silver Spring, MD. He's the former Propagation and Space Communications Editor of CQ Magazine.

Benton Bonney, W4PE of Orlando

David Ziskind, KE4QLH of Atlanta

Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, who since became a recurring contributor

The Hiram's Ham Amateur Radio Society of Reynoldsburg, OH

Donald West, W9DEW of Fortville, IN

Paul Lebzelter, K8PFL of West Branch, MI

Michael Leahan, N9PQK of Sun Prairie, WI

Gary Harrison, K0BC of Bolivar, MO

Kent Stutzman of Newton, KS

George Ancell, N5LEZ and B&G Communications of Electra, TX

That wasn't everybody in April- we'll continue trying to catch up in the weeks that follow.

Finally, in the entertainment industry, oftentimes one of the biggest stars is listed at the end of the opening credits, such as: "and starring Martin Sheen as President Bartlett."

We at Newsline also have one of those: "and starring Roy Blanchard, N5YHS,” as an occasional, but extraordinary benefactor. Roy, you're amazing!”

Thank you to everyone. Your April response to our crisis was exceptional, and got us all the way to December. We promise to do our best to continue to earn your care and support.

A reminder that Newsline is a 501(c)(3), federally chartered, California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org.

I'm Andy Jarema, N6TCQ.

**

ON THE AIR: 6 METERS IS BIG IN KNOXVILLE

If you live near Knoxville Tennessee and like to operate vintage ham gear, listen up. This one is for you.

The Repeater Journal reports that a group of local hams have gone back to the future and created a new Six Meter Nostalgia Net that meets on 50 point 4 Megahertz -- or should we say Megacycles in this case. The gathering takes place every Thursday night at 8:30 P.M. local time and anyone with gear capable of running full carrier A-M is invited to take part.

And what if you are not into A-M operation? Well the same group also sponsors F-M and S-S-B nets on Sundays. The F-M gathering takes places at 9 P.M. on the 53.770 MHz repeater. Five minutes after the F-M net is secured the S-S-B net takes to the airwaves on 50 point 200 MHz.

And if that’s not enough, yet another Knoxville area 6 meter F-M net has just started up on the 53 point 610 MHz repeater. It meets on Thursdays at 8:00 P-M local Eastern U-S time. (Repeater Journal)

**

EMERGING TECHNOLOGY: RADIO RESEARCH: NAVY AND AIR FORCE AGREE ON NEW JOINT COMMUNICATIONS SYSTEM

The Air Force and Navy have agreed to merge their two formerly separate programs for the acquisition of improved radio systems. The result will be the development of a single family of radios designed to replace incompatible units in use across the services.

Called the Joint Tactical Radio System, this joint Air Force-Navy initiative is expected to produce more than 17,000 units. Initial deliveries of the new radios are expected to begin in late 2008. (Science OnLine)

**

INTERNATIONAL - CANADA: VE9HC RE-ELECTED

Radio Amateurs of Canada reports that Hugh Clark, VE9HC was recently re-elected Section Manager in the Maritimes Section. This, for a two-year term that will begin on March 1st, 2004. Clark ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL - IRAQ: BAGHDAD COMES TO ECHOLINK

Ian Abel, G3ZHI, reports that Iraq is now on Echolink. Ian says that on December 4th he held a 90 minute cyberspace QSO with YI1SRA in Baghdad using the Echolink program. Laith was operating from an Internet cafe as full Internet access has yet to be widely restored in the city.

YI1SRA reported that he and fellow members of the Baghdad Radio Club are hoping to install a 2 meter repeater in the city. It would be linked to Echolink network allowing on demand around the clock contact with the city and provide communications back home for any foreign ham in Baghdad.

YI1SRA also now has e-mail. Messages to him go to laithtariq@yahoo.com (G3ZHI)

**

DX

In D-X, now its your chance to QSO the real Santa Claus on the air. This, as station OH9SCL is active from Santa Claus Land near the Arctic Circle. OH9SCL will take to the ham radio airwaves from December 17th through the 21st. Operation will be 80 through 10 meters on cw, ssb, rtty, psk31 and slow scan television. The digital modes will be primary focus durning the weekend hours. Santa’s ham radio helpers this year include Finnish amateurs OH2BH, OH2NWG, OH3BHL and several others. QSL via OH9UV. (Via e-mail)

Meantime, the ARRL says that its new Logbook of the World secure contact-verification database continues to grow. ARRL Membership Services Manager Wayne Mills, N7NG, reports that nearly 5000 users have uploaded logs containing some 25.4 million Amateur Radio contacts. This has resulted in more than 1 million QSL records to date. (ARRL)

**

THAT FINAL ITEM: BRINGING THE DEAD BANDS BACK TO LIFE

And finally, its that time of year that the V-H-F frequencies are pretty dead as far as propagation goes. So here's as idea from Terry Hosack, W-A-3-L-T-B, on how to bring them to life.

Terry suggests over the V-H-F Reflector that you download a copy of the W-S-J-T program for digital high speed meteor scatter, weak signal, trop and E-M-E. He says to be certain that you get all the current updates including the new JT65 mode.

Hosack says that other than skeds, activity may be found on 144.140 and 50.260 Mhz mainly during contest and activity periods. If you are on the East Coast just beam west. Conversely, if you live out West, beam to the East and you might be surprised at what you might hear.

Terry says to just put the program in the monitor mode and see if you can decode any signals. If you find an interest in the mode you can buy or build an interface to actually transmit and help bring the dead VHF bands back to life.

The following web site is used for Skeds and chat about WSJT and meteorscatter: http://www.pingjockey.net/cgi-bin/pingtalk (VHF Reflector)

XM took Kiss in-house a few weeks ago, except for Rick Dees' morning show. The rest of the day is hit after hit, on jockless autopilot, with no L.A. content. In XM's first year, its "Mix" channel was a simulcast of Houston's "Mix" (not sure of the call letters; I wasn't a subscriber then), but that was also taken in-house, in November 2002 -- again, it's fully automated and jockless. According to info found on the XMFan.com bulletin board (unofficial, of course), both of these channels are programmed by minority shareholder Clear Channel.

I believe Sirius carries WSM Nashville.

Does this happen only at certain times of day? (and only if you're at some distance from Kalamazoo, maybe 30-50 miles) From mid-afternoon through mid-morning and overnight, sometimes a station's skywave signal interferes with its own groundwave signal. That's why Chicago stations will sometimes sound distorted when monitored 75-100 miles away. The distortion will change in nature over time (2-3 minutes) and will occasionally disappear altogether.

Alternatively...

does it happen only in certain areas, clearing up in other parts of town? Some stations have directional antennas that are too selective - more directional on 1360 than they are on 1359 and 1361. The result is that if you're in the "wrong" direction from the station - a direction in which they don't send most of their signal - you may receive "too much" audio by comparision to the "carrier" signal. This results in distortion. WKMI is only directional at night, so if this is the reason, the distortion should disappear during the day.

Of course, it's also very possible the station is broken<grin>!

Stay below 28 MHz!

> Tweak and peak
> Audio Limiter - Cut R249

Do NOT do this or you will splatter all over. If the modulation seems
weak, try a power mic.

> AM Power - VR13
> SSB Power - VR12

Using a watt meter tune for max, then back it off a bit. If you're going to use an amp, set AM for about 3 watts and SSB for no more than 10 watts for a clean signal.

As another poster said, it's probably a cold-solder joint on the back of the display board. If you're good at soldering PC boards, you could touch all the solder points up with a fine-tipped iron and probably fix it.

Yea, this is one of the things leaning me to XM. I just moved from LA area
to Delaware and I'm missing SoCal radio :-(

Actually, I think they should switch to KYSR (Star 98.7), better music and
Jamie & Danny in the morning. Then again if they put all the LA stations
from ClearChannel & Infinity I would be in radio heaven. ;-)

Hannity isn't an XM product. The show is owned by ABC and is just carried by XM. Same with Truckin' Bozo (Clear Channel). Both can be heard on terrestrial radio.

To ansdwer your question.

First of all it's an all day thing. It seems to be all over town. About a month ago I was riding out to a place where I play piano music for some older people at an assisted living place on the other side of town and the distorted sound never cleared up from my house to the other side of town.

As I stated earlier the distortion was heard as far away as Battle Creek. To discribe the sound would bew like running a radio with batteries that are about to die. You know that raspy sound that a station makes when the batteries are about to die.

It's definitely a problem at the station. Many AM stations these days are
only on the air because if they aren't, the FCC will take the license. The
way those owners operate them, I'm surprised they just don't give the
license up anyway. It's poor maintenance and a lack of caring on the part
of the person(s) who should care and fix the problem.

Talk Radio shows with time value are almost always carried live via satellite. Some shows, even time sensitive ones, are often refed either by the network or stored in a digital automation system at the station for broadcast later. Networks also store the show in digital form if they provide the refeed. Refeeding a time sensitive show can be embarrassing when the host is talking about a breaking news event.

Shipping shows from one station to another is known as "bicycling" and I haven't seen that done in at least a decade.

> Also, is primarily all broadcast
>shows (including OTR broadcasts) in the same type of format these
>days? I've spent most of my time examining the formats of broadcast
>video media the past few months, so I do not have that much knowledge
>when it comes to radio (which is what I'm looking into now).

The primary media is digital. Nearly every station has a large hard drive storage system used to store commercials, music and any other material it may need. The material can be called up manually, live assist, or fully automated.

The other storage media are CD, minidisc and, occasionally DAT (digital tape). Many stations have no analog audio tape in use. There will probably be a reel-to-reel or cassette machine gathering dust just in case a tape comes in from the outside. Some brokered (pay for play) and religious shows are delivered on cassette.

Gaining in popularity is MP3 because it can be sent over the Internet. Many shows allow stations to go to a web site and download the current or archived shows. If the file is sampled at a decent rate it's broadcast quality.

Londoners and those connected to the internet will be able to listen to the capital's first weekly Jewish show on the FM frequency in nearly five years, as leading UK Jewish website SomethingJewish (www.somethingjewish.co.uk) takes to the air on 104.4fm from Sunday December 21.

Broadcasting on London's first radio art station Resonance 104.4fm, The SomethingJewish Show will go out each and every Sunday from 3.30pm to 4.30pm on Resonance104.4fm and on the internet at www.resonancefm.com

A mixture of arts and entertainment, The SomethingJewish Show will feature the best Jewish performers around, details of the best events in town to catch Jewish arts and entertainment and will also seek to showcase new and unsigned Jewish talent.

With a diverse Jewish playlist featuring Jewish artists, artists who have a Jewish connection or artists that are inspired by Jewish influences, The SomethingJewish Show aims to appeal to anyone who is looking for something fresh in the Jewish arts world.

WKMI is the #4 rated station in its market, which is relatively small and ranked #182 nationally. I'd be surprised if a relatively successful station, albeit in a smaller market, is just ignoring a critical engineering issue. The first suggestion, if the station is one of interest, is to call it and make a polite inquiry of the manager or program director or operations manager.

That said, I do take issue with a statement that most AM stations are on the air to hold the license. Most AM stations are on the air to make money. Not all do, but many are among America's top billing stations, and those AMs with decent signals that cover their markets are successful. And many smaller AMs that have limited coverage have found great success and profit by serving ethnic communities, minority groups or religious followings.

In some cases, there are over-radioed markets where the FMs have better coverage and the AMs are inferior (Palm Springs leaps to mind) where the AMs are all pretty miserable and none even covers the entire market. However, even in those cases, there is generally someone who is willing to take the risk of buying the station to program their "better idea."

I suspect you're right and it's a maintenance problem. One of the
local TV stations here in town seems to be forever having audio
problems when it runs network programs off of the satellite or the
evening news from the station in the next nearby larger market. Some
nights the sound is so bad as to be unintelligible. Yet, it goes on
month after month this way. They just don't care enough to pay to fix
it (or can't afford to).

David,

I always value your opinions and find you one the most sane of the regulars here. But I did not say that "Most" AMs are only on the air to hold the license, I said "Many" are. There is a big diff and it is true. What you said about the successful AMs is also true. I just think that any station that let's it's quality get that bad is among the ones just holding the license. If I owned it, it would be in stereo and have the best audio quality available 24/7. If I couldn't afford to keep it going properly I would sell it or send the license back to the FCC.

2478. DX test Results

Here's the results of the most recent DX test that have been received here:

Sunday, December 14, 2003 - WILM-1450, Wilmington, DE 1:05 am - 3:00 am EST:

There wasn't much success in hearing this test outside the NE US. Gordon Bell in Troy, NY heard them and sent a detailed report to WILM, as did Mike Prindle, listening in Eastern Long Island. However, Dave Hochfelder in Highland Park, NJ tried for the test and didn't hearing, even with a local phased. Rick Robinson in Hendersonville, NC also tried but didn't hear them; the same was the case for Bill Dvorak in Madison, WI, Adam Myrow in Memphis, TN, Gerry Bishop in Niceville, FL, Robert Foxworth in Tampa, FL, and Paul LaFreniere in Grand Marais, MN. Les Rayburn in Central Alabama and Ron Gitscher in Palm Coast, FL both tried for the test and are analyzing their tapes of the test.

That's all for now...

Lynn.

I just wanted to wish everyone happy holidays. Here's a list of some of
the records I played in my Christmas show

12-21-03 Christmas Show

Blue Holiday (45 version)-Shirelles
It's Christmas Once Again-Frankie Lymon
It's That Time Of The Year-Manhattens
Happy Reindeer-Dancer, Prancer & Nervous
Sleighride (stereo)-Ronettes
I Want A New Baby For Christmas-Johnny Preston
White Christmas-Ravens
A Soalin'-Peter, Paul & Mary
I Hope You Have A Merry Christmas-Kim Weston
Santa Bring My Baby Back To Me-Nathaniel Mayer
Christmas In The Jungle-Derek Roberts
Jingle Bells-Singing Dogs
Merry Christmas Baby-Otis Redding
Christmas (Baby Please Come Home)-Darlene Love
Christmas Imitations-Bobby Rydell & Chubby Checker
Christmas Just Ain't Christmas Without The One You Love-O'Jays
God Rest Ye Merry Gentlemen-Smokey Robinson & Miracles
Rudolph The Red Nosed Reindeer-Cadillacs
Why Can't Everyday Be Like Christmas-Elvis Presley
Candy Cane Sugary Plum-Danny & The Juniors
It's Christmas Time-Five Keys
Merry Twistmas-Marcels
Santa, Santa-Rockyfellers
I'm Falling In Love With A Snowman-Millie Small
Another Lonely Christmas-Moonglows
Trouble's A Brewin'-Jack Scott
Donde Esta Santa Claus-Augie Rios
Christmas Auld Lang Syne-Bobby Darin

NOTE TO PD'S.....I'm always looking for more stations to carry my show.
Check it out at http://www.hitsofyesteryear.com

KP,

You didn't mention what type of vehicle was involved. Sounds like it's not the radio, but something in the vehicle. If its under warranty, bring it to the dealer, they ought to straighten it out.

-Steve

Someone mentioned that while watching too much TV decreases IQ, Radio listening is actually shown to increase IQ. Is there any concrete evidence/sites/publishings in this regard ?

Thanks.

Vijay

2482. DX tests Summary

Newsgroup: rec.radio.broadcasting
Date: 2003-12-19 17:55:16 UTC
From: ircamember@ircaonline.org
Message-ID: <brve24$17q$1@xuxa.iecc.com>

For anyone interested, here's a reminder of upcoming DX tests; if anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Saturday, December 20, 2003 - WMOX-1010, Meridian, MS 12:00 am-1:00 am
CST (0600-0700 UTC).

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

Point taken on the "many" vs. "most" distinction.

Since I am at the West Coast's first regularly operating IBOC AM station, I
can attest to the potential of better quality. AM IBOC on the couple of
receivers we have sounds better than some of the more squashed FMs in the LA
market...

However, there are a "scad" (to avoid having to say either "many" or "most")
of AMs that do not deserve to exist, as they cover very little, or have
miserable facilities and high-Q DAs and no intent to improve. I just wonder
if IBOC may create a band cleansing in the process.

How can ANYONE'S IQ increase listening to 40 minutes of REPEATING commercials an hour?

But, wait a minute! Someone says there is a fine line between genius and INSANITY! That must be why....(c;

It would seem that listening to Clear Channel would only tend to melt the brain into a mass resembling chocolate pudding.....

I almost lost it, last night, after I'd seen the stupid Gateway Computers cow feet come through the ceiling over the bed for the 72nd time in 2 hours. Who programs this shit?

But Larry, that's the whole point. Repetition is the key to getting people to remember the commercial!

My favorite example: Sunland Ford/Lincoln/Mercury in nearby Victorville, California. I have heard their stupid cutesy slogan and company jingle so many times I could literally sing it in my sleep. But I remember it.

The worst is when I'm driving over on the west side of Victorville and I pass their lot and then hear the jingle on the radio. (Happens more often than you might think.)

Since the High Desert only has one television station (KHIZ-TV 64 in Victorville), most of the residents of this area get their local programming from the Los Angeles television stations via satellite or cable. Well, Sunland has bought copious amounts of advertising time from the local cable company too. And it's not even a few different spots, it's the same one. Over, and over, and over, ad nauseum. I'm sure that if it is possible to buy local or regional advertising slots from DirecTV and DISH, they have done that too.

> It would seem that listening to Clear Channel would only tend to melt
> the brain into a mass resembling chocolate pudding.....

It's not a Clear Channel thing. Commercials are just as annoying on everyone else's broadcast channels too. And while there are a few truly innovative, entertaining or thought-provoking ad campaigns, most of them just... suck.

Yeah but I bet its trashing the analog signal that people are listening to. WOR in New York sounds like a buzz-saw when its running IBOC. Not that it's any better at night anymore either. Music sounds all distorted and clipped.

We bought a dozen or so average consumer radios, from a walkman to a boom box to a clock radio, and whatever is in between. On every one, the music in analog sounds as good as it did before, and switching the IBOC on and off produced during several days of testing no significant differences on average radios.

The only thing that IBOC requires is a narrower analog bandwidth. The processing stays the same, and most radios sound identical as they have limited bandwidth to begin with.

Your experience is precisely the opposite of a 50kw (oldies) music
station with which I am familiar. It turned off the IBOC because of
unacceptable adjacent channel interference issues. To the great
surprise of the PD, who believed as you do that no one would notice
the difference in the analog bandwidth, he immediately began getting
calls from listeners during his airshift saying the sound of the
station had improved greatly, and praising the station for whatever it
had done to make it sound so much better. AFAIK this station has no
immediate plans to resume testing of IBOC.

I personally have heard this station with IBOC operating and found the
analog signal nearly unlistenable on a narrow-band standard GM car
radio.

I guess I'm just too old to listen to radio any more. I download lots
of old shows off alt.binaries.sounds.radio.oldtime that have FOUR
commercials in them, smoothly integrated right into the show itself so
you don't actually realize Glenn Miller is selling you a Philco until
it's almost over...(c;

Oh, well, all the BBC stations are live on the net and archived so I
don't miss my favs. I emailed them and offered to pay my radio tax to
do my part because I'm on their servers quite often. That shook 'em
up. They refused my offer but appreciated the thought.

I listen to a 4 minute snippet of some talking head on news/talk, then
when the 8 minutes of spots comes on I turn it back off and go back to
my MP3 player. Radio is the reason for the MP3 explosion.

Ah, yes, car dealer ads appear to be the worst. And don't forget the
weekend remotes from the car dealer, the staple financial lifeline
of small markets. I bet you have those in Victorville, too.

The most clever *and* memorable of recent times (although with heavy
repetition) seem to be the Epsom printer spots. Since they're
running on KCBS in heavy rotation, I think I've got those memorized
now.

Has anyone thought to test on car radios? It's my observation that
the average car radio on AM has more sensitivity and (sometimes) wider
bandwidth than the average home unit. That, to me, would seem to be
the acid test.

Most of the stuff you can get in a Target or Mall-Wart for home
use is pretty junky. A Zenith Circle-of-Sound clock radio from the
1970s will run circles around anything for home use today.
(I miss Zenith in a curious kind of way.) The best recent unit that
I have is a Cambridge Sound Works Model 88 from 2001. It seems fully
NSRC compliant. The two music stations on AM that I could stand to
listen to for extended periods, KFRC (oldies) and KMZT (classical)
sound reasonably good -- not quite FM, but better than almost any
AM. It's a little weak as far as sensitivity goes, though.

| The only thing that IBOC requires is a narrower analog bandwidth. The
| processing stays the same, and most radios sound identical as they have
| limited bandwidth to begin with.

But then there is the interference. Electrical interference on AM is
bad enough as it is.

Two stations here in the New York City market (WPAT-AM 93 Paterson and WZRC-AM 1480 New York) were also trial-running IBOC, in addition to WOR-710.

The test didn't last for even a month.....

Maybe there's something to do with the processing or what. Who knows.

All I know is, when I'm listening to WOR with IBOC going, there is also a hiss in the audio - almost like tape hiss. And this is on a medium quality digitally tuned walkman, so I know I have the station on the dot.

However, on some realy really low-fi clock radios and pocket radios the station sounds 'OK' sort of...not including the hissing going down all the way to 68 and to 74 (where it's sort of overridden by the splatter from the stations at 66 WFAN and 77 WABC respectively.

I had an opportunity to listen to WKMI today. My wife left me in her car for a minute while she ran into a store to pick up something. The fact that the minute turned out to be an hour is immaterial to this discussion :) She has a 2002 car with a Bose audio system so it's capable of good quality. We were within the WKMI 2 mv/m contour in a quiet (RF wise) location in which I was able to listen to a 1 kw AM station about 20 miles away with a good signal. I listened to all the AM stations in the market and WKMI sounded to me like either something was being over driven or more likely the RF final (if they still have a plate modulated transmitter) is soft and they are pushing it hard to get power output.

But then again (if it is plate modulated) it could be a really sick tube in the modulator section. Listening to adjacent channels I do not believe that they are running IBOC.
I'm going to have to do some checking next week to figure this out. Unless they are waiting for parts I can't believe anyone would let this go like it is for long.

That is a good question for the radio programmers on this newsgroup.

Why is the spotload so heavy? Breaks on talk stations like WABC used to be three or four commercials. Now it's more.

All news WCBS used to tout that it only played one commercial at a time between news capsules. Now they sometimes play two.

WINS sometimes plays three in a row when they used to do one or two spots about 8 years ago (pre all this consolidation).

Infinity some years back made all their stations up the spot loads.

Ditto, why cluster all the spots in 10 minute sweeps twice an hour instead of breaking them up into frequent two or three minute breaks so it SEEMS like less commercials are being played?

All of us tested our own car radios, which, with two exceptions, are anoalog
only. We noticed no difference. I probably had the acid test in my hands, as
I had created the format and know the music to the point I can hear it
without a radio. I noted no difference in any car radio, ranging from a
$39.95 cheapie in a van to a $3,000 Bose system.
>
> Most of the stuff you can get in a Target or Mall-Wart for home

But nearly 75% of all listening is in the home or office, not the car.

I had a McKay-Dymek in the 70's and 80's and it was the radio that I used to
do an initial set-up of audio chains. However, even then we did the same
thing as today: purchase of radios typical of those used for 90% of
listening. And adjustments were made to optimize the sound for the last 10
years or so of consumer gear.

The interference to other stations takes place in areas where those other stations do not have listeners. the minor inconvenience of not being able to DX 1010 and 1030 in LA is nothing compared with the gain of eventual broad acceptance of digital AM.

It's RF trash being dumped on the vehicle power lines. Is it related to
the heater being turned on? Start pulling fuses until the problem goes
away and you'll locate the source.

That's the part that confuses me. We've got music stations that announce "coming up next -- 9 in a row". They mean 9 songs, but if you listen often enough you quickly learn that also means 9 minutes of advertising [0] - i.e., that announcement is your cue to change stations...

I suppose since the ratings don't show whether someone was listening during the ads - only that they were listening - that if clumping the spot load increases the numbers the rest of the hour it makes short-term economic sense. One just has to wonder what will happen when the advertisers start finding they get a smaller increase in sales per thousand "ears" bought?

(indeed I note the station in the bad example above has begun to promote "fewer commercials, more music" and indeed appears to have broken up their spot load across the hour)

For all bands of radio combined, perhaps. It can't possibly be true for AM.

Tons of research has been done on this, and fewer stops create far less tune out. Generally, tune out occurs in the first spot, so there is no disadvantage to running many at a time.

In general, stations that went to fewer stops have increased ratings while those adding more have gone down in ratings.

The "never more than a minute from music" sounded good, but did not work.

The other thing that REALLY turns me off is when they run out of things to say/do and start saying "News Talk 1250, WTMA" over and over and over ad nauseum. "News Talk 730, WSC" (WSCC is more ashamed of its call letters. Being a Clear Channel station, they think they should be able to use RCA's WSC station call, assigned to marine band use.)

Dan Moon, who switched from 1250 to 730 after being on WTMA for 30 years, once asked the call in listeners what they never wanted to hear on WTMA, again. I called in and waited my turn after 6 spots played. "Dan, if I never heard 'News Talk 1250, WTMA' again, it wouldn't be too soon. Every one of us out here listening KNOWS what the station's call letters are and KNOWS what frequency it is on. We don't need to be told 37 times every 10 minutes. Why don't you put on some music if you all run out of things to talk about." His answer was truly funny and he didn't want to talk to me further. Three more callers followed me up. I swear it was uncoordinated, but very effective. It took 'em three weeks to get the self-promotion spots back up to 37 every 10 minutes in the aftermath.

Over on Clear Channel's WSCC, ol' Dan says the call letters/frequency nearly continuously, now. Of course, he says WSC, not their real call until the hour when they have a quickie spot to satisfy the FCC.

I'm for an FCC regulation on all of them that makes it ILLEGAL to say the stations call letters EXCEPT once during the 2-minute-to-the-hour requirement and makes it illegal to quote the station's frequency all together! Any takers?!

Yes, you complain about this. Yes, the listeners calling in complain about this. No, the frequent call letter mentions are not for you, or those other listeners.

It has been proven time and time again that frequent call letter mentions = higher ratings. While you indeed may know which station you're listening to, many others tune in and out and DO NOT. And quite a few of 'em end up with Arbitron diaries.

Don't believe me? Hook up with a radio friend of yours - in programming - and have 'em tell you. I've heard about diaries in one of my former home markets that would amaze you.

Rush Limbaugh has been a talk radio institution since 1988. Four years before that, he rose to prominence as a local host on Sacramento news/talker KFBK, which happened to employ me (not overlapped with Rush being in Sac ;) for 7 1/2 years.

So, that means Rush has been on 1530 AM in Sacramento for nearly 20 years straight, every single weekday from 9 AM to noon, with late night and weekend repeats.

Despite that, I've heard of relatively recent diaries (within the past 5 years) that have placed Rush on: KCTC (AM 1320, a nostalgia station), KSTE (AM 650, a sister talk station to KFBK which runs Premiere's Glenn Beck in that slot), KCRA (a former set of calls for the aforementioned AM 1320), and that's just off the top of my head.

This, despite the fact you'd expect any sentient being in Sacramento to know which radio station Rush was on, even if they don't listen to talk radio or radio at all! KFBK has featured very frequent billboard ad campaigns, along with other media, promoting Rush's show, even in recent years.

The frequent call mentions may frost you...but for stations, especially news/talk stations...they usually mean HIGHER RATINGS.

Mike

Except for the legal ID, the station can call itself anything it wants, as long as what they want is not trade marked by someone else.

Except for yourself, how many listeners care that WSC is a marine call? None.

However, you can look at arguably the nations most successful AM, KGO in San Francisco. 25 years, 102 ratings in first place. They give the calls 50 to 60 times an hour. Always have.

11.6% of Arbitron diaries have unidentifiable listening in them. It is nearly all to stations that do not identify enough who they are.

Most listeners listen to multiple stations. Most do not remember where they tuned at a specific time unless constantly reminded.

> Over on Clear Channel's WSCC, ol' Dan says the call letters/frequency

So? They have named the station WSC to make it easy to remember. This is like WWWE in Cleveland (now WTAM) using 3-WE as an identifier.

No one but you cares.

You are kidding, right? Except for the legal ID, a station can use any
identifier it wants.

Find something really important to worry about.

> > But nearly 75% of all listening is in the home or office, not the car.
> >
> For all bands of radio combined, perhaps. It can't possibly be true
for AM.

There are only 2 bands, AM and FM, that appear in ratings above minimum
reporting standards.

I ran audience by location for LA, the highest in-car location in the US.

AM
At Home 49%
In Car 36%
At work 14%

FM
At home 42%
In Car 30%
At work 25%

There is a small AM advantage in car, a larger one in home, and a
disadvantage at work.

Nationally, a greater portion of listening is in home and at work, due to
shorter commute times than LA. And the AM vs. FM in car distinction is
smaller still due to that very same commute time reduction.

In Chicago, for example, the difference in percentage of AM and FM listening
in car is less than 2 percent, at just under 30% of listening time. In a
market like El Paso, with significantly less commute distances, the AM and
FM percentage that is in-car is about 25% for each band.

I deduce from this that you've never seen a filled-out Arbitron diary. If you actually worked in radio, the sight of a filled-out diary would scare the bleep out of you. There are many stations that run more call-sign and/or frequency and/or slogan mentions than your example, and yet diaries continue to contain error after error after error. I have seen call signs absolutely butchered, dial positions listed as "right next to 92 on my radio" or "my fifth pushbutton," and station slogans that bear no resemblance to any station in the market being surveyed. The fact that stations actually get credit for some diary-keeping listeners I can only ascribe to some sort of miracle. Every one of you out there listening does NOT know the call sign or frequency, in fact more listeners don't know than those who do know.

Most radio listeners are not hobbyists who follow radio and know all its ins and outs. They are casual listeners who have it on in the background, or are listening for the programming, and don't give a hoot in h*ll what the call sign or frequency are.

I beg to differ. If anyone called the FCC on that Central Pennsylvania station that id'd itself as WHOT-FM all of the time except at the top of the hour, would the FCC not spank the station? (I'm referring to a station that was mentioned in the Airwaves Digest a few years ago. WHOT-FM is the legal callsign of a station at 101.1 in Youngstown, Ohio, and has been for years.)

>> Over on Clear Channel's WSCC, ol' Dan says the call letters/frequency

Bull. There is no way anyone will mistake "3WE" for someone's call letters.

Nor will anyone mistake "Power 106", "Hot 97", or "Z92.5" for another station's calls. It's *not* the same thing.

> No one but you cares.

It *is* misleading and shouldn't be allowed. I just don't care enough to complain.

> You are kidding, right? Except for the legal ID, a station can use any
> identifier it wants.

So if I license a station and ID myself properly as, say, KIYS at the top of the hour, and I'm at 102.7, but during the rest of the hour I call myself 102.7 KIIS, no one will care? There is, of course, a station on 102.7 with those calls.

Wink 106 FM in Corning, New York, used to play that game a few years ago... I'd hear it when I was driving through Corning on the way to Albany or Boston. The jingles said "Wink 106, W-I-N-K". WINK-FM, if I'm not mistaken, is in

Tampa, or was a few years ago anyhow. Even at the top of the hour, the DJ would ID the station correctly ("You're listening to WNKI, Corning/Elmira") and right after that you would hear the rest of the jingle, which used the wrong calls (WINK).

I never cared enough to file a complaint with the FCC, but it's still not right. I'd be pissed if I owned or worked for the stations whose calls were being improperly used.

For sale:

(The "Radio Crazy" it's baaaaaaaaaaak!!)

Partial ownership of fantastic 4-station group in
Northern Michigan by Lake Huron. (One of the Great
Lakes, silly!)

Joint venture. Active or inactive investors with
$100,000 each are welcome. Total asking price is $3.2
million and the studio building and land alone
appraise at $600,000. The station's total billing was
about $800,000.

Three FM's and one AM. Here is the breakdown.
1-Class C1 FM, 100,000 watts ERP.
1-Class C2 FM, 50,000 watts ERP.
1-Class C3 FM, 20,500 watts ERP (25 KW but excessive
ht. above avg. terrain)
1-AM, 5000 watts days, less at night, non-DA.

In three communities. A "showcase"

Only those fully identifying themselves will be told
the call letters and cities of license.

Tel: (478)741-1710 in Macon, GA.

I am not a crook, shill, agent, owner or part owner.

Please, no "FM bashers".

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Isn't the point to increase "Time Spent Listening" to be full 15 minute blocks so the station gets credit for that? If you run two 10 minute breaks, you can have 20 minutes of programming between them gaining 40 minutes Time Spent Listening over the course of the hour assuming one comes back after the commercials.

If you had only 5-10 minute blocks of programming with commericlas in between, you would never get the 15 minute blocks of Time Spent Listening that radio stations seem to want.

Am I correct on this or way off?

This was the old 103.9 WHTO Muncy, PA. Muncy, PA is east of Williamsport, PA along I-180. All this would have been going on in the early 90's as I was going to school in Lock Haven (west of Williamsport) at the time and 103.9 was the best Top 40 station around (for the area). I remember that they would use "103.9 WHOT" when the jock would talk on the air, but at the top of the hour Legal ID, the fast-talking voiceover guy would use the proper "WHTO Muncy, Williamsport". I also have an old bumper sticker of theirs that reads "103.9 WHOT is Red Hot". By the mid to late 90's 103.9 had moved to another frequency and moved their location to somewhere southeast of Williamsport. I assume for better coverage of the area.

I remember when I listened to the station and wanted to call them looking for a phone number under WHOT and not seeing anything. I don't know how I finally figured out it was WHTO, but what I do remember was I was confused! Was it WHTO or WHOT? I didn't know for sure, but I did know I was listening to 103.9 FM. I guess that counts for something.

A question related to all of this: In the Williamsport ratings, who would get credit if someone wrote down in their diary that they were listening to WHOT? WHOT at the time was not in Williamsport, it was elsewhere - Youngstown, Ohio as Steven Sobol mentioned. On the same vien would 103.9 WHOT or just 103.9 give credit to WHTO - the real 103.9 in Muncy (Williamsport)? Obviously, a radiophile who put down WHTO would do the station best since they'd definitely get credit.

To me, a situation like this is where a radio station shoots itself in the foot by using calls on the air that are completely different than those that they are legally assigned. It confuses the average listener, but it would seem to me that it really confuses the ratings book which is what all radio stations live an die by.

>in Muncy (Williamsport)? Obviously, a radiophile who put down WHTO
>would do the station best since they'd definitely get credit.

If WHTO had "WHOT" registered with Arbitron as their on-air slogan,
they'd get credit for any "WHOT" in the diaries. Probably full
credit, as the Youngstown station's signal comes nowhere near the
Williamsport market.

They'd also get credit if someone marked down "103.9", since they
automatically get credit for on-frequency mentions. So, if they
registered "WHOT" and someone marked down "103.9 WHOT", there's no
doubt who they're hearing.

There are other ways... Apple did that memorable TV commercial during
the Superbowl one year and it still gets replays just because it was
so interesting.

Stan Freberg did a few radio commercials for Chung King which also
attained notoriety.

>It's not a Clear Channel thing. Commercials are just as annoying on everyone

This is one reason why I like sponsorship advertising. You don't have
to claim a thing. You just tell the public what you do for a living.

Has anyone done studies to show where each type is most effective?

If you couldn't get anyone to even give you $5,000 trying for an
Oregon AM in these groups and elsewhere for weeks, why do you think
someone would give you $100,000?

Just doesn't seem likely. Shoot for the practical, at least.

If a person listens form 5:55 to 6:20, the station gets 45 minutes of
credit.

Credit is given for 15 minutes as long as the listener has 5 minutes or more
of recorded listening in any quarter hour.

There is no way to get "40 minutes" of credit as the system is based on
quarter hours.
>
> If you had only 5-10 minute blocks of programming with commericlas in
> between, you would never get the 15 minute blocks of Time Spent

You only need 5 minutes to get credit for a quarter hour. However, few
listeners are so precise, most writing down hour and half hour blocks.

That is an interesting point, and one to ask in Florida, where a bunch of
Clear Channel talkiers are all called "WFLA" except at the top of the hour.
They are not networked, either. they only ID with real calls on top of hour.

Or in Puerto Rico, where the news net of WKAQ (AM) has been called "WKAQ
Radio Reloj" for 4 decades on a network of about 5 or 6 stations, some 24/7,
and none IDing with true calls except onthe hour.

I don't think a formal complaint has been made, although I know some DXers
have written complaints of an informal type.
>

I'll bet it would be hard for anyone to say that the station, whose name is
Wink, could not spell wink so diary keepers would know how to write it down.

As long as the signals don't overlap, it probably makes no difference to
them unless they have an interest in preserving a national service mark.

The station probably registered WHOT as a slogan, along with the Hot
moniker. Since there is no other similar call in the MSA (Metro Survey Area
or Metropolitan statistical Area), the one with the fake calls used as a
slogan will get credit as long as Arbitron was notified.

> WHOT at the time was not in Williamsport, it was

Again, if the staiton registered "WHOT - Hot" they would get credit. In
general, most diary entries are by frequency, so the point is almost moot.
>

Since no one else uses the calls in the market area, I don't think the
listener would be confused at all.

The constant repetition does work. What does not work is not saying the name
or calls often.

It's funny. Some people get teed off because the station "overannounces" the call sign or name. Yet...some of these people also get annoyed when you DON'T hear a call sign or name until the top of the hour.

That is the case with a lot of college stations where deejays just slap on record after record (or CD after CD) on the air, mumble a couple of words every half hour but that's about it....then back to another 30-in-a-row.

I don't see anything in the regulations that specifically says that's an
illegal practice. It's very hard to believe the FCC doesn't know that
it happens, but I don't know of them ever citing anyone for it.

One would suppose you'd have to be reasonably careful to not pick "fake
calls" that could be confused with another station in the market. I
wouldn't call myself "WHOT-FM" if I ran a station in Warren, Ohio - if I
were in Manchester, New Hampshire I might think differently..

The one in Sarasota, at least, has quit doing that. I was back there
a couple of weeks ago and they were ID'ing under their own calls,
which my senile mind has already forgotten. Grant Hudson of CKLW fame
was anchoring morning news -- I do remember that much. (and he was
sounding rather subdued, compared to the old days, but the voice was
still recognizable).

An old friend of mine, who was a station owner for many years, has retired, but just couldn't help himself being out of broadcasting. So, he got a LPFM license WSHG-LP and spent $70K putting up a nice little station run by volunteers in his hometown, St George, SC, much to the big boys' dismay.....

Wonder if he's in anybody's rating book? Anybody you ask in town will tell you they're listening to it, just because it's a RADIO STATION, not a continuous advertisement.....

Well, back to 30-in-a-row. Wish we had one in Charleston.

>comes back after the commercials.

Part of it is to get 2 quarter hours before listeners tune away. In the case of the limited number of breaks, "research has shown" that listeners are more aware of the number of elements than they are of their length. A :60 is perceived the same as a :30. Each is an element.

The hope is that listeners will perceive fewer elements in a limited number of breaks than they would with more breaks with fewer spots.

When the breaks were 5 minutes it was tolerable. Now that the spots seem to outnumber the songs, listeners are wearing out their radio's presets. Especially young listeners. I have a couple of my young nieces and nephews visiting. Not only do they change stations when a single song they don't like plays, they immediately change stations when a break begins. I thank MTV for creating generations with 3 second attention spans.

I asked why. They said "it'll be a long time before the music starts again."

That's not something a programmer wants to hear.

Both radio and TV are so riddled with clutter that it amazes me anyone stays tuned. Listen to your favorite station for an hour. Write down every time a new element begins. Music, news, spots, promos, jingles and jock chatter each constitutes an element.

TV has taken clutter to awesome heights, both aural and visual. Vitually every channel has a "bug" supered over all but commercials. Annoying as hell. During shows there's a crawl or a super about an upcoming show. Crawls used to be used only for emergency information. I can only imagine the anger of a movie director when he sees his masterpiece splattered with material that destroys the mood he tried to create. Often one super overlaps another.

True, though look at the rest of that list for Milwaukee. 80% of the top-10 stations are FM. Only 53% of all radio stations (not counting non-commercial) in the Milwaukee market are FM. There's a lot of AM stations being left out.

A similar situation exists in other markets. In many (14 of the top 35) markets, an AM station is #1. However, in 11 of the top 35 the top-ranked AM station is the ONLY AM in the top 10, and in no market are there more than three AMs in the top 10. (unless you count the AM side of an AM/FM simulcast)

I guess the point is, an AM station can be successful but ONLY if it has the signal to fully cover the market. The vast majority don't.

> the signal to fully cover the market. The vast majority don't.

That is exactly the issue. There are markets where only one or two AMs fully cover the Arbitron survey area, others with none.

Look at a few examples: Houston, maybe 2 AMs, 610 and 740 cover the whole market. Washington, DC: no AM fully covers metro. Cleveland: 3 AMs cover daytime, two at night. Miami/Ft Lauderdale... maybe 2 (560 and 610) cover day and night.

On the other hand, markets like San Francisco have multiple good AM signals, and 3 to 4 AMs in the top 10 consistently. NY is similar, with WABC, WINS and WCBS among the top stations, and WFAN top or second highest biller.

Pittsburgh: one AM has fullmarket coverage. Denver: 2, maybe 3 have full day and night coverage. Phoenix: 2 AMs truly cover the whole MSA. Dallas/Ft Worth... except for 1080, 570 and 820, no station covers the whole metro.

It is all about the signal.

Guess your nephews and nieces are giving new meaning to the phrase "baby changing station." They're showing good sense, and radio will have to adjust to the choices that technology offers them.

I'd argue though that as MTV shortens the attention span of young people, it creates acceptance of audiovisual clutter rather than resistance to it. And inevitably a bit of impatience with audio alone.

There is a reason for that. They're not trying to SELL you stuff, they're trying to give you stock ticker, news capsules, time and weather so that they can devote the "talking head" portion of the screen to news and interviews that would otherwise would be impossible to do if you had to break for all of the stuff that's running on the crawls and tabs.

It's an efficient screen space use for an all-news channel. However, it is annoying when the soap-opera, comedy or movie you're watching gets blasted by this flash and then a crawl for an ad or promo starts appearing at the bottom or top of the screen.

It was fine when they started doing ad crawls for the World Cup soccer games so you didn't have to interrupt the fast moving games years ago, but now it's gotten out of hand.

Maybe I wouldn't mind as much if the TV stations and cable channels would just run ad crawls at the bottom and ditched the "spot" method of advertising.

The most annoying network in this regard is Fox -- I like the Simpsons, but I don't enjoy seeing Bart & Homer running across the bottom of the screen during King of the Hill. Unfortunately, all the networks have gotten pretty bad.

I can't help but have very fond memories of 25 years ago, when a typical network prime time half hour contained six national commercials, two local commercials, two network promos, plus a station ID and a network ID. Compare that with today, and it is no wonder that PVRs and devices that allow viewers to skip through all that crap and just watch the actual 21 1/2 minutes of programming contained in that half hour.

Broadcasters and cable networks are truly killing the value of their media with all this clutter.

I think we may be saying the same thing. I believe MTV's (and now
everyone else's) technique of fast-paced editing has reduced their
tolerance for long (in time) shots over a few seconds. I don't believe
they have greater tolerance for clutter.

By and large, radio advertising is boring stuff. it's usually some
screaming jock or business owner hawking something that has no
relevance to the audience. Agencies are so devoted to TV that radio is
a second thought. I can't remember the last radio spot I heard. I can
remember spots made years ago by people like Stan Freberg who believed
in theatre of the mind.

D.C. is not a MW-friendly town. The big blaster WTOP-AM 15 can be heard clear up to New York City at night.

However WTOP had to network with two other small metro-area stations (one AM & one FM) in order for its News format (actually more spots than news) to be heard throughout the D.C. market.

Another station, WWRC-1260 (now all sports) has trouble covering Washington D.C. bigtime.

P.S.: Why did Clear Channel flip AM 1260 from CNN-Radio News to Fox Sports?

Now they have two all-sports statios with the same name: SportsTalk 1260 (WWRC) and SportsTalk 98 (WTEM). Both licenced to the same city and serving the same market with the same format. Way to dilute your brand guys!!! Or is there something I'm missing here?

I'm convinced that Clear Channel has no idea what to do with 1260; they gobbled it up when they bought Chancellor, flipped it from nostalgia to business, then to CNN and now to Fox Sports.

It's always near the bottom of the heap book after book after book regardless of the format - although much of that can be attributed to it's signal. I really think it's just part of the Clear Channel business philosophy - they don't run formats on their AM stations that serve a community interest, they run formats that are *easy to sell*. The key word in that sentence is *easy*. Sports sells (even with big honkin' zero's in the book) because it's geared to young men. Nostalgia doesn't sell because it's geared to an older demographic that advertisers just aren't targeting. Business and CNN were just place holder formats (sports may be as well) to keep from having a dead carrier.

Clear Channel seems to understand how to invest dollars in the licensing and infrastructure of it's properties (their recent RDS bonanza as an example), but they don't seem willing to investing in the content of their properties (AM's most notably).

If I were a cynical person, thinking from a purely business perspective, I'd think that they enjoy expending capitol on hardware/infrastructure because those capitol expenditures can be written off on taxes. Investing in content is undoubtedly considered by the accountants as an expense, and therefore ineligible for the tax write-offs. Wouldn't it be sad if the bean counters were really running the show after all...

Now, excuse me while I go wait for the black helicopters. <grin>

The "Radio Crazy", it's baaaaaak!!!!! Hi!

This is a biggie! Partial ownership in powerful daytime non-directional AM in Little Rock, AR market. 10,000 watts days, 500 watts PSA. Covers most of the state! Transmitter land and tower included. Studio rents for only $350.00 a month. Low dial spot contributes to tremendous coverage.

Seller is asking $2.0 million but is flexible.

Joint venture. (You venture out, you go to the JOINT! Hi!)

Active or inactive investors with $100,000 (100 grand)each are welcome. No individual may own over 49 percent. This includes me!

Seller claims this is the most powerful AM in Arkansas in terms of coverage. Okay wise guy, we KNOW there is a 50 KW AM in Little Rock. (KAAY).

Please! No "AM bashers" or other negative nabobs. If you don't have $100,000 don't even ask!

As usual I am NOT a broker, agent, shill, owner or part owner. I am also not a crook!

Tel: (478)741-1710 in Macon, GA.

73,

Meyer Gottesman, W6GIV

WMAL doesn't *really* throw a city grade signal over the entire MSA. It's awful anemic to the western and northern suburbs (Loudon county, western Fairfax and northern Montgomery counties) - especially with that big NW null in the night pattern.

Yeah - WTOP's AM pattern must have kept some engineer awake at night with worry. I can't recall who they protect to the west (perhaps an Ohio station, I can' recall), but the western suburbs really suffer. Bonneville did a good thing by adding WTOP-FM and WXTR to the "network".

I recall hearing recently that more diaries were noting the WTOP-FM frequency than the AM frequency these days, so I guess Bonneville's investment in the FM property was a good move.

Radio is a mass medium, and you can't keep everyone happy. So the station must make decisions based on what they perceive the audience wants, and what is good for the station. Another classic example can be local severe weather. Two people can be listening to the same broadcast, and one thinks you're not doing enought to cover the weather situation, while the other thinks you're over-reacting and trying to scare people and would you please shut up about the damn weather! Of course when we get them hurricanes here, nobody thinks you're broadcasting too much weather! HI!

Nobody knows what to do with it. It has miserable coverage. As far back as
1970, the baseball games had to be simulcast on WEZR to cover the VA
suburbs, since e ven daytime, 1260 has no signal out there.

Well you can always cash in by selling it to some leased-access
broadcaster or someone with an agenda (like a church or IDT) thinking
that they're going to get an influential "DC" station.

That's cash in your hand and one less engineering and accounting
headache. That's what I'd do if I were in charge of C.C.

They protect 1500 KSTP in Minnesota. The FM is a decent fill for the null
areas.

But, the AM comes in five over S9 here in Williamsburg. I always tune in
before driving up to DC to check on the traffic... I keep the signal until
north of Richmond for a while, then it picks up about an hour later and
comes in well. It's fine on the eastern side of the beltway, but on the
western side it disappears, and right near the confluence of 95 and 395
there is a Japanese language station on 1480 that causes severe second adjacent
channel interference as you drive by.

I recently found that the drive time show is now four hours of oldies!! SWEET!! I love it.

Maybe Univision Radio can flip the entire format to oldies? Or at least extend it to weekends and overnights...that would be nice. I'd have a soundtrack for my weekends again. :-)

IDT already thinks it has a monster signal in the Washington metro. I look every once in a while to see if the 50kw increase is anywhere near beginning to happen. They seem to believe the most important part of their media division is a name change and more American Flags and liberty bells in the logo. They haven't a clue.

The network is running dull, drab ex politicians and sqeaky voiced commentators who echo the top honcho's political views.

Here's the results of the most recent DX test that have been received here:

Saturday, December 20, 2003 - WMOX-1010, Meridian, MS tested 12:00 am - 1:00 am CST:

This test was heard by many - it evidently got out well. In York, PA, Bruce Collier got them right away, with their first code ID. All the way in Seaside, OR, Patrick Martin also heard the test, mainly the Morse code - he noted interference from CBR. Bill Harms in Elkridge, MD also heard the test, despite a local about 6 mi away. James Niven in Moody, TX reported the test coming in pretty well at his QTH - he heard CBS news, ads, and "Coast to Coast AM" as well as the Morse. Nick Hall-Patch in Victoria, BC had about decided he didn't hear the test when CBR faded down and the Morse from the test came up. Shawn Axelrod in Winnipeg, MB says he heard nothing but the code, repeated several times; the same was true for Rick Robinson in Hendersonville, NC - he heard the code repeated at least 10 times, but WINS-1010 in NYC was dominant - as was the case for Gerald Atherton in Rice Lake, WI. Robert Hoops in IN also reported hearing just the Morse - he commented that he would not have been able to ID WMOX without it. Ron Gitscher in Palm Coast, FL heard them, as did Gerry Bishop in Niceville, FL. John J. Reiger in South Milwaukee, WI reports he heard them, poor but with code, and no QRM from CFRB or WINS - he said he got an e-mail QSL from Jim Myrick of WMOX in 6 minutes! Jerry Coatsworth in Merlin, ON also heard the WMOX code under WINS and CFRB; Barry McLarnon in Ottawa, ON also heard them under CFRB, as well as a station he thinks might be in TN. Liz Cameron of the Michigan Area Radio Enthusiasts also heard the test, but only the code IDs, due to QRM from CFRB. Michael Procop in Bedford, OH also heard the code IDs, as well as some Coast to Coast bumper music, but also noted QRM from CFRB and WINS - and WINS was largely the problem for Dave Braun in Wyoming, DE, who also reported hearing the test and the code.

But not everyone was able to hear the test - Kevin Redding in Mesa, AZ had no luck, as did Chuck Boehnke in Keaau, HI, Patrick Griffith in Westminster, CO, Eric Breon in Middletown, PA (he noted that WINS and CFRB dominated the frequency by him), Russ Edmunds in Blue Bell, PA, and Nigel Pimblett in Medicine Hat, AB (for him, CBR, at 180 mi away, was the main problem).

That's all for now...

Lynn.

2567. Christmas Wasteland

Newsgroup: rec.radio.broadcasting
Date: 2003-12-26 14:53:39 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <bshi1j$jc5$1@xuxa.iecc.com>
Source record: 6495

What's with the wall-to-wall AM band Christmas music? I don't know if it's particularly bad this year and I never noticed, or if it's that Big Radio owns everything and is saving on staffing this year (are they thinking nobody is listening so they might as well force the issue?).

Maybe the weather was better in previous years and I was just outside more.

Anyway I get some station on every AM channel in the daytime, and there were about three sports talk shows (they have a right to be there and I don't mind but please) and 97 Christmas Music channels all day. How is this possible? Is it like car dealers being closed on Sunday, sort of a gentlemen's agreement? But listeners just flip it off.

I like the background sound of Imus and Boortz and Rush while I work, not Leroy Anderson for Christsake.

Actually a lot of stations carried Rush and Rush went to Christmas Music for the Deaf, and the local Rush station preempted Rush for their own Christmas Music. It's gotten two deep, it's so bad: Christmas Music preempting Christmas Music preempting the regular show.

The Messaih _once_ on some station would be nice on Christmas Eve, but that's my own nostalgia. Nobody listens to Leroy Anderson unless there's a rap version.

> produced during several days of testing no significant differences on
> average radios.

Try it on a GE Superadio III. It's an "average" radio that you can buy for $49 at Sears. If you can't hear the difference in quality with the IBOC on, then a hearing check is in order.

Mark my words... IBOC on AM will be a flop. In addition to the horrendous interference, degraded analog audio, and artifact-laden digital audio, who would spend $500+ for an "HD Radio" setup, just to hear the same local stations, when XM or Sirius costs less than half as much and delivers 100 channels of new, exciting, and often commercial-free programming? And when the radio stations realize that consumers aren't going for it, who would spend the $75,000 - $100,000 per station to convert to IBOC?

Arthur Liu's Multicultural Broadcasting tried IBOC on 930 WPAT and 1480 WZRC in the NYC area. But they gave up on it after only a few weeks on the air, because of the degradation of audio and signal quality, and because none of these stations' listeners would ever care to own an IBOC receiver, even *if* they were available in stores. But it's funny -- you never hear about these kinds of negative experiences in Radio World or other publications that are rabidly pro-IBOC. And I know things are really strange when even _David Eduardo_ is speaking favorably of IBOC. What is the world coming to?

Date: 2003-12-26 22:03:30 UTC
From: radionews@aol.com
Message-ID: <bsib7i$9tu$1@xuxa.iecc.com>
Source record: 6402

Amateur Radio Newsline™ Report 1376 - December 26, 2003

Amateur Radio Newsline report number 1376 with a release date of Friday, December 26, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A California city says NO to BPL, an earthquake hits the central California and Kids Day 2004 is just a week or so away. The details on Amateur Radio Newsline report number 1376 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: LOMPOC SAYS NO TO BPL

The City of Lompoc, California, has said NO to Broadband over Powerlines, and its a big win for ham radio. Amateur Radio Newsline's Bruce Tennant, K6PZW, has been monitoring the situation and has the details:

--

Paul Andreasen, K1JAN, said it this way -- quote: "Well, we won ONE at least!"

What Andreasen is referring to was a plan by Lompoc city leaders to deploy Broadband over Powerlines in that city and the work of the ham community to head it off.

Andreasen is the ARRL Technical Coordinator for the Santa Barbara Section and a ARRL Technical Advisor for the League's Southwestern Division. And he was one of the organizers of the movement to stop the deployment of B-P-L in the Lompoc area.

In an e-mail, Andreasen says that his group sprang into action when they learned of plans to permit powerline broadband. He presented city leaders with several studies and some facts on interference effects to and from other licensed RF users.

--

Andreasen: "I know the mayor so I stopped in one day and asked him. He said yes they were and I introduced him to some of the facts of radiation not only causing problems with public communications, the CHP, Amateur Radio, etc., but about it also causing problems with the BPL system (itself).

--

Meantime, Eric Lemmon, WB6FLY, made the California Highway Patrol aware of their efforts. The statewide C-H-P radio system operates on low-band F-M which falls right smack in the middle of the spectrum used by B-P-L.

And then they wait until December 17th for the newspapers to report the results of their City Council vote on the matter. The good news: No Broadband Over Powerlines in Lompoc. Instead, the City Council approved a rival, non radiating system that uses fiber optic technology.

But that's not all. The company that did the study for the planners was told by the City Administrator not to entertain any radiating methodologies at all. All because ham radio operators spoke up and provided proof that B-P-L could be hazardous to the regions R-F environment.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Another quote from Paul Andreasen, K1JAN, kind of sums it up. "We not only win one, but a bureaucracy kept it's word!" (K1JAN, W6YN)

**

RESCUE RADIO: THE CENTRAL CALIFORNIA QUAKE

Meantime, about 90 miles North of Lompoc an earthquake measuring 6 point 5 on the Richter scale struck at 11:15 a.m. on Monday December 22nd. Centered not far from the famed Hearst Castle tourist attraction at San Simmeon. Ham radio was quick to respond as we hear in this report:

--

K6YR: "Various parts of the livingroom looked like the U.S. Army had gone through a Fedeey'n safe house. Just glass and food stuffs all over the place. It was pretty scary."

--
That's Rob Griffin, K6YR, the Section Manager for the area where the quake hit. He was describing what his own home looked like after the magnitude 6.5 temblor hit. But Griffin would have to put off clean-up chores because there was other work that needed to be done:

--

K6YR: By noon the San Luis Obispo Emergency Operations Center had called out the ARES and RACES operators, primarily supporting the Red Cross in opening shelters in Paso Robles and Oceana. Morrow Bay also had Red Cross shelters and we provided communications for the Red Cross because their cell phones just weren't functioning for the first 12 hours after the earthquake.

--

According to Griffin with cellphones down, another way to communicate was needed by emergency workers. Enter ham radio volunteers.

--

K6YR: "We had some come from as far as South county which includes Oceana, Nipomo, maybe even some from Santa Maria to help support the North county Paso Robles ARES area."
--

The city of Paso Robles was hardest hit. Part of the historic downtown area was destroyed and two people were killed. Griffin says that hams were on scene providing communications for about 24 hours. When we spoke to K6YR some were still there:

--

K6YR: " There are some Amateur operators still manning the county Emergency Operations Center. but my understanding is that the communications and support up at the Paso Robles Police Department has closed down for the timer being and it appears that the Red Cross has its communications which relies on cell phones back in operation."

--

The bottom line. It took the cellular providers about 12 hours to get service back to most of the stricken area. Meantime ham radio operators were there, doing what they do best.

For the Amateur Radio Newsline, I'm Burt Hicks, WB6MQV, reporting.

--

According to Cal Tech, Monday's temblor was the state's first deadly earthquake since the magnitude 6.7 shaker that hit Northridge California in 1994. (ARNewsline(tm))

**

RESTRUCTURING: VK TO GET REVISED AMATEUR RADIO SERVICE

Hams in Australia will soon have a restructured Amateur Radio Service. Some of the changes are coming soon Others are still being negotiated. Q-News Graham Kemp, VK4BB, is here with the details:

--

As reported, the Australian Communications Authority has decided to discontinue the Morse code proficiency requirement for the amateur service. The ACA will also remove the prohibition of third party communications to an amateur station in another country. If another country seeks a prohibition on such communications, this will be published and conveyed to the amateurs. To effect this decision, the ACA will need to amend the Radiocommunications Licence Conditions Determination No. 1 of 1997. Thats the Amateur LCD.

The ACA will directly inform the amateur community through established communication channels when the amendment has been made. The ACA will update the Amateur Internet Linking System consumer fact sheet to

incorporate changes to third party communication arrangements.

The ACA will continue to impose limits on the purity and stability of emitted frequencies, and maximum power limits on amateur stations in accordance with the ITU's requirements for transmitting stations. The ITU requirements will be incorporated into the ACA's public information doments in early 2004 to ensure that they are available to amateur licensees.

The ACA will maintain current requirements for use of a callsign while operating an amateur station, as contained in sections 8, 37 and 44 of the Amateur LCD. The ACA is still considering whether to permit the abbreviation of callsigns during emergency services operations and training. A decision will be announced by mid-2004.

The ACA will proceed with the proposal for Australia to participate in European Conference of Postal and Telecommunications Administrations - CEPT. While liaison with CEPT about T/R 61-01 can commence immediately, the licensing arrangements necessary to implement this will not begin until mid-2004.

The ACA is working through submissions about the remaining proposals, including the licensing structure, and expects to announce decisions by mid 2004.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of Q-News Australia.

--

Obviously for hams down-under, this is the start of something big. (Q-News)

**

Break 1

News never takes a holiday and neither do we. From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K-9-K-E repeater serving Godfrey Illinois.

(5 sec pause here)

**

HAM RADIO EVENTS: KID'S DAY IS SUNDAY JANUARY 4

Its one of the two most important ham radio holidays of the ham radio year and its only about a week away. Of coarse we are talking about the first of two Kids Day operating events for 2004.

According to a recent ARRL Letter, the first Kid's Day of 2004 will occur on a Sunday. Next Sunday, January the 4th. And unlike most other on-the-air events, Kid's Day is not a contest. Rather its a time when

experienced hams open their hearts and their stations to invite kids in and put them on the air to experience the magic that is ham radio.

Kid's Day will run from 1800 to 2400 UTC, and there's no limit on operating time. The suggested exchange is a youngsters name, age, location and favorite color. Most operation will be found on 14.270 to 14.300, 21.380 to 21.400 and 28.350 to 28.400 MHz and local 2 meter repeaters.

Guidelines for Kids Day are available at www.arrl.org/FandES/ead/kd-rules.htm. And -- oh yes: If you miss this Kids Day operating event the next one won't take place until Saturday, June 19th. (ARRL)

HAM RADIO EDUCATION: IARU CONGRATULATES NEW HAMS

A top IARU official has welcomed Albania's newly licensed hams to the hobby. Bill Pasternak, WA6ITF, is here with more:

--

Ole Garpestadt, LA2RR, is IARU Region 1 Chairman. And while participating in the recent graduation ceremony for Project Goodwill Albania 2003, he took the time to congratulate the new Albanian licensees, and welcomed them to the bands.

Garpestadt credited the University of Triana and the program organizers with their success in conducting the training and succeeding in something that the IARU itself has had only limited results with. It should be noted that LA2RR participated in final negotiations with Albanian authorities for their entry to CEPT and bringing the Albanian licensing regime into line with the rest of the CEPT world.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

One final note on Project Goodwill Albania 2003. Its organizer, the famed D-Xer Martti Laine, O-H-2-B-H, was awarded a "Senior Fellow of Polytechnic University of Tirana" at the graduation ceremony. In his closing remarks Liane thanked everyone involved for what he termed as their five weeks of serious effort. (Via press release)

HAM RADIO EDUCATION: 2004 - 2005 FAR SCHOLARSHIPS OPEN

Meanwhile, here in the United States, it's ham radio scholarship time again. This, with word that Foundation for Amateur Radio is providing applications for hams to apply for the 59 awards that it will administer for the 2004 through 2005 academic.

Right now, the foundation is inviting Amateur Radio licensees planning to pursue a full-time course of study beyond high school, and who are

either enrolled in or accepted for enrollment at an accredited university, college or technical school to compete for these scholarships. Awards range from $500 to $2500 with preference in some cases going to residents of specific geographic area or to those pursuing certain study programs.

The cutoff date is April 30, 2004. Application forms are available by mailing a request to FAR Scholarships, P.O. Box 831 Riverdale, Maryland. The Zipcode is 20738. (Foundation for Amateur Radio)

**

ELECTRONIC ASSISTANCE: REPAIRCLINIC.COM

A new Web site has been created to usher Americans away from their throwaway habits and into the world of yesteryear when we just kept it working.

Called RepairClinic.com, the cyberspac port provides aids for those looking to repair anything from a refrigerator or air conditioner to more complex devices such as microwave ovens. The site appears to derive most of its income by selling spare parts and factory manuals.

At the moment the site sticks to typical kitchen appliances. It does not provide advice on such items as radios, T-V sets, VCRs and other consumer electronics. At least, not yet. (Science Today)

RESCUE RADIO: THE LATEST TOWER TO COLLAPSE IS....

A 528 foot tower supporting antennas for WMGX and WYNZ in the Portland, Maine area collapsed on Thursday, December 11th. As reported on Scott Fybush's web site, the reason for the tower falling appears to be a guy wire that apparently snapped. The story, and a photo of the tower prior to collapse, can be seen at www.fybush.com/nerw.html Its not known if any ham radio repeaters shared this support structure. (CGC)

NAMES IN THE NEWS: JENNICAM GOING QRT

And, by the time you read this, Jennifer Ringley will have taken her famed jennicam.org webcam off the Internet and Q-R-T. This, after 7 years of her permitting the world to watch her life through a cyberspace eye.

Ringley was 20 and a student at a Pennsylvania college when she installed a web camera in her room and launched jennicam.org. That was in April of 1996 and over the years the cameras have followed her every movement 24 hours a day.

A self-described former computer geek who now lives in Northern California, Ringley has posted that her web cam was intended to be a fun way for her mom or friends to keep tabs on her. Also, that it was an interesting use for the digital camera that she bought on a whim in the bookstore.

Now, the site has a notice saying it will be closing on December 31st. No reason is given and Ringley has not respond to e-mail query's from the press. (Published news reports)

NEWSLINE NEWS: MORE THANK YOU'S WITH N6TCQ

Ladies and gentlemen, we end this year and begin the next by saying thank you to more listeners who kept the Amateur Radio Newsline on the air throughout 2003. Here's Andy Jarema, N6TCQ:

--
This week we have the second half of our list of people who helped us financially in the month of April:

Linda Reeder of Salt Lake City, Vic Hartpence, W7RKU of Sparks, NV, The Puget Amateur Radio Society of Kirkland, WA, The Quarter Century Wireless Association of Eugene, OR'. Bill Alexander, KR6G of Quincy, CA, Leo Halog, KR6EG of San Fransisco, Mark Lunge and the MSARC N6MPX Repeater System, San Leandro, Monthly contributor William Walters, WA2IBM, of San Jose, Monthly contributor Scott Hensley of the Area Communications Team, San Jose
SCATS, the Southern California Amateur Transmitting Society, in West Covina, Our good friend Dave Bell, W6AQ of Hollywood, And Newsline Staff volunteers who paid out-of-pocket to keep Newsline on the air.

Thank you to everyone. Your April response to our crisis was exceptional, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. I'm Andy Jarema,
N6TCQ.

HAM RADIO AND SPACE: THE MARS EXPRESS

An amazing space DX record for ham radio. This as Charlie Suckling, G3WDG reports that he has successfully received the 'Mars Express' deep-space probe using his 3 meter dish antenna.

Mars Express has been on its way to the red planet since the 2nd of June and was scheduled to arrive on Christmas Day. The signal was earlier received on 8.4 GHz by James Miller, G-3-R-U-H, at the AMSAT D-L ground station in Bochum, Germany. This, when the probe was 107 million kilometers away on November 16th.

Although traveling at the speed of light, the signal took about six minutes to reach earth. The AMSAT D-L website has information on how amateurs can receive Mars Express.

The AMSAT-DL website at www.amsat-dl/pa5/reception_g3ruh.htm provides information on how amateurs can receive Mars Express. (GB2RS)

**

HAM RADIO IN SPACE: PC SAT UPDATE

AMSAT North America reports that P-C sat is doing fine and will continue in good sunlight through New Years Eve. The satellite is seeing about 50 packet users per day and 30 per pass over the USA.

Anyone with a 2 meter transceiver and T-N-C can easily copy this bird. Just tune the radio to 145.825 and watch for 1200 baud normal AX.25 packet. (AMSAT)

**

INTERNATIONAL-SWEDEN: NO CODE ON JANUARY 1?

GB2RS reports that Sweden is likely to permit former CEPT Class 2 amateurs access to the High Frequency bands from the 1st of January. SM0SMK, the President of Swedish national amateur radio society has said that they hope the Morse code test requirement will be removed at the turn of the year.b (RSGB)

**

INTERNATIONAL - UK: NEW TRAINING PRESENTATIONS ON THE WEB

The Chelmsford Amateur Radio Society in Essex England has made all of its Powerpoint slide presentations for the United Kingdom's Foundation and Intermediate courses available on the web. Those who are interested in seeing what's involved in getting these new U-K licenses can download the slides from www.qsl.net/g0mwt (M5AKA)

**

DX

In DX, the FMRE Sunday bulletin has announced that the X-F4 DXpedition to Socorro Island will begin March 3rd, and run for two weeks. The call sign to be used is X-F-4-I-H. 8 operators from Mexico will be active all bands and modes including VHF, UHF and satellite. No QSL information is available at this time. (XE1KK, N4GN)

And S57CQ expects to be in Bhutan by the time you hear this newscast. He plans to spend as much of his spare time as possible active as A52Q. QSL as directed on the air. (RSGB)

Lastly PA4WM will be in Turkey for six months, on a four week rotation schedule. He operates SSB, CW and RTTY as TA1/PA4WM with 100 watts into a G5RV. He plans to upgrade his antennas with a vertical and receiving antenna for 160 and 80 meters at the earliest available time. (GB2RS)

**

THAT FINAL ITEM: HEAVY METAL ON THE HAM BANDS

And finally this week, Heavy metal is back on the ham bands. No, not the rock music kind. We are talking heavy metal as in vintage AM gear. Paul Goodman, K2ORC, has more in this report filed over the air - using AM :

--

Sunset on December 27, 2003 will mark the kickoff of this year's Heavy Metal Rally. A showcase for AM transmitters that weigh at least 250 pounds and produce 250 watts or
more, the annual event is sponsored by Electric Radio magazine.

The Rally has become a coast to coast highlight for many AM amateur stations in North America with activity on 160, 75 and 40 meters. The event goes all night, ending at sunrise on December 28

Participants who want to compete for the top place trophy submit logs to the event coordinator. Scoring for the Heavy Metal Rally utilizes a point system that takes into account, among other things, total number of contacts and the number of states and bands worked. In a departure from traditional contest-type scoring, a station can receive an extra point for each positive signal or audio report received by the event coordinator from other hams and SWLs.

Scoring notwithstanding, many AM fans participate in the Heavy Metal Rally simply for the pleasure of talking and listening to other AM stations with strong signals and outstanding audio.

Winter HF operating conditions generally lead to numerous coast to coast contacts featuring a diversity of transmitters. It would not be unusual for listeners to hear, an amateur in Colorado on a restored Gates broadcast transmitter chatting with someone in California running a Collins broadcast transmitter.

--
Contact Audio
--

While broadcast transmitters may be the first thing to come to mind when picturing equipment that meets the Heavy Metal weight and power criteria, the Rally also features a sizeable number of homebrew and military rigs. For more information on the 2003 Heavy Metal Rally, including the email address for log submissions and a list of suggested operating frequencies, please visit amfone.net -- that's alpha-mike-foxtrot-oscar-november-echo - dot - net.

Reporting for the Amateur Radio Newsline, this is Paul Goodman, K2ORC.

--

Sounds great, doesn't it! You can hear more for yourself on Saturday evening December 27th overnight into Sunday the 28th on 160 and 75 meters. Its the 2003 Heavy Metal Rally on your radio to enjoy. (ARNewsline(tm))

**

NEWSCAST CLOSE

For this week and this year, that's all from the Amateur Radio Newsline. Our thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News for their assistance in producing this weeks report.

>Big Radio owns everything and is saving on staffing this year (are they
>thinking nobody is listening so they might as well force the issue?).

It's a combination of those factors.

* Christmas Day is a very, very, very low listening day for AM
news/talk stations. When you're out with the family, exchanging
presents, doing all those Christmas things...listening to
issue-oriented talk is perhaps the last thing you want to do. I'm a
news/talk junkie, and even *I* am not really "in the mood" for it on
Christmas Day. There's not usually a lot going on in the world aside
from Christmas-related "news", so it's almost not worth bothering.

* Most stations give their full-time/regular staff Christmas Day off.
That leaves either automation or board ops as the only people working.
And as you noted, even Rush strayed from format on that day, with a
probably pre-recorded Christmas Music show for whatever stations were
not preempting him with something else.

* There are many syndicated packages and shows aimed at news/talk
stations who are providing the non-traditional programing. I know of
at least two "Christmas music syndicators" which air a satellite feed
of Christmas music for news/talk stations, from early evening
Christmas Eve through late night Christmas Day. The traditional radio
networks offer things, too...like ABC's Disney Christmas 3 hour
special (almost an in-house production for the Mouse House ;).

I did hear some "regular" talk Christmas Eve night...syndicated Rollye
James was live on Wednesday night (heard locally on CC's WHLO/640
Akron). And I'm pretty sure "Coast to Coast AM" ran a regular George
Noory show, though it was likely a best of.

> with the IBOC on, then a hearing check is in order.

The number of such radios pales when comparred to the number represented by
more typical devices. I'll bet that in LA, the case in point, there are less
than 2,000 of those radios. Who would buy a very expensive portable radio
that promotes high AM quality as its selling point? Answer: talk show
addicts who have a hard time hearing a local station.
>
> Mark my words... IBOC on AM will be a flop. In addition to the
> horrendous interference, degraded analog audio, and artifact-laden

> hear the same local stations,

The receivers will be below $100 within 12 months, if not sooner. the prices
will track CD players and DVD players in price declines.

The fact that most radio listening is to local stations answers that
question.

And I have heard AM IBOC and it sounds better than many highly compressed
FMs I A/B'd with. The new algorithm is excellent.

On 99% of AM receivers, there is no analog degradation because the receivers
are not wide enough to detect the difference.

> when XM or Sirius costs less than half
> as much and delivers 100 channels of new, exciting, and often
> commercial-free programming?

You forget that a full installation is not just the radio, but the
installation and antenna. And then there is $10 to $13 a month in user fees,
plus tax.

> And when the radio stations realize that
> consumers aren't going for it, who would spend the $75,000 - $100,000
> per station to convert to IBOC?

You are letting the cart get ahead of the horse. The CES is going to be
filled with IBOC equipment, and I believe some at much more affordable
prices.

> in Radio World or other publications that are rabidly pro-IBOC. And I
> know things are really strange when even _David Eduardo_ is speaking
> favorably of IBOC. What is the world coming to?

1480 and even 930 are miserable signals. Both also roabably have high-Q
antennas. On a good system, IBOC sounds good, and the analgo audio is
indistinguishable from the "way it was before."

Many stations, especially those doing block, brokered programming, will not
gain initially from IBOC. those with decent signals can gain a lot.

2577. Why did my favorite radio station fail?

Newsgroup: rec.radio.broadcasting
Date: 2003-12-27 21:09:19 UTC
From: Arklier <youaint@gettinit.bla>
Message-ID: <bsksdv$da7$1@xuxa.iecc.com>
Source record: 6404
Cross-posted to: rec.radio.broadcasting,alt.radio.broadcasting

I'm asking about 96.5 FM-KYPT in Seattle. From around January 2000 until Monday December 22nd 2003, it was an 80s station called The Point. When it came online, there were a few stations that had a mix of 70s, 80s, and more recent stuff, but after the others gradually shifted to other eras of music. At the end, it was virtually the only station in Seattle to have any 80s music at all, and the only one that was 100% 80s music. Now it is an alternative/hard rock station called K-ROCK. I personally don't think it's an improvement, as I dislike alternative music intensely. I'm OK with hard rock, but it's not worth dodging Nirvana and their copycats.

The station has never been very friendly in the customer relations department as far as letting listeners know what is going on. About a year and a half ago, they fired virtually their entire on-air staff one day in the middle of the week with absolutely no warning to the listeners or to the people who were getting the axe, I'm sure. When people tuned in for the morning show the next day, there were two guys who didn't know what the heck was going on fielding calls from confused and irate listeners, and their web site was suddenly down for several months 'for construction'. Their new web page at www.965thepoint.com continues this trend by being decidedly un-informative. I'm not asking why this station in particular changed format, but rather what factors may have prompted the change (for the worse, IMHO). The station is owned by Infinity Radio, which owns several other stations in the area, though they don't have a monopoly. Strangely enough, Infinity Radio owns another station in the same area that has classic rock (KZOK), so it would seem that the audience would overlap significantly.

It's rather saddening that the Seattle area will have no more free 80s music. It doesn't effect me as much, as my car stereo (where I do 95% of my radio listening) is Sirius satellite radio ready, and since they have an all 80s channel, I've decided to activate with them. Still, I will miss The Point's web site where they always had announcements about which 80s bands were coming to the area, and the contests they used to have to win tickets for the concerts.

> than 2,000 of those radios. Who would buy a very expensive portable radio

Most of the AM radios I encounter are 10 dollar no-brand (or one shot brand) portables that you're lucky if they can pick up three of the stronger stations in your market all across the dial. Hell, I saw one in a store that was only able to pick up one station no matter how much I turned the tuning dial -- it was AM 66 WFAN all the way from 5.4 to 16 and nothing else.

Yes I hear the hiss and crap on my Superadio and on a lot of other hi-fi radios I have in the house... but let's get real...who aside from us radio geeks listens to AM on something like that? Most people are just using a cheapie clock radio for news in the morning (if that) -- car radio for news on the commute and maybe the odd ball game.

And before you think I like IBOC, I am actually gunning for its failure. I hate it. It makes my radios sound like garbage during the day.

But if doesn't fail (and it won't)...hey guess what...that's why I have a little 100 milliwatt part 15 rig set up to re-lay the Music Choice channels on my cable TV for my apartment.

I meant Spanish pop oldies... :)

Univision does have three stations that I can name off the top of my head that do an oldies-format in Spanish: Los Angeles, Las Vegas and recently Chicago's AM 56 WIND changed to oldies from talk.

I'd dig it if WADO dropped the lame talk shows and infomercials and went music. Maybe they'd get a little uptick in the ratings...

Hello!,

My name is Ray and I'm making an online list of every oldies song that station (Majic) 102.7 is playing during their History of Rock & Roll from A-Z marathon. Take a look at it and see if you can help me finish it off. If you know any of the songs I'm missing (and trust me there's a couple) you can post them here at the group or you can e-mail me (the address is on the site). As a matter a fact, here's the site...

http://www.angelfire.com/games5/eyeremember/oldieslist.html

Thanks for helping,
Ray

> The number of such radios pales when comparred to the number represented by
> more typical devices.

Allowing IBOC to take advantage of the weaknesses of "typical" AM receivers in order to cover up its faults is akin to contructing a waterfront building according to the parameters of a "typical" hurricane. Or, it's like manufacturing a car whose lifespan is only 80,000 miles because the "typical" driver only keeps it that long.

For years, the complaints about AM radio have been interference and poor audio quality. Now, IBOC comes along and in order to "solve" these problems, it _purposely_ transmits additional interference and _purposely_ degrades the audio quality even further. Where is the sense in that!?

> The receivers will be below $100 within 12 months, if not sooner. the prices
> will track CD players and DVD players in price declines.

But the prices for IBOC receivers -- if they ever arrive -- will not be competitive with that of analog radios... just like digital TVs still cost a lot more than comparable analog sets, half a decade after their introduction.

> The fact that most radio listening is to local stations answers that
> question.

Another hypocritical answer. For years, engineers like yourself have complained about the loss of coverage area that FM Stereo and AM Stereo allegedly cause. Many stations on both bands have discontinued stereo broadcasts, just to squeak a few more miles out of their fringe coverage. But now, suddenly that doesn't matter anymore? Now, with IBOC, listeners outside the primary coverage area are suddenly of no importance?

But you just wait... once mutual IBOC interference from an adjacent station comes back to bite these stations in the butt, suddenly _then_ they will start complaining about it. It's like a guy who lets his dog shit all over his neighbor's property and doesn't care about it -- but once somebody else's dog comes and shits on his _own_ front lawn, then he suddenly is concerned about it.

> And I have heard AM IBOC and it sounds better than many highly compressed
> FMs I A/B'd with. The new algorithm is excellent.

Yeah, if you like digital aliasing artifacts screeching in your ears. The "spectrally replicated" treble response of AM IBOC is akin to fingernails scratching a chalkboard. A few weeks ago, I listened to

XM for about 2 hours in a coworker's car, and the screechy fake treble
actually gave me a headache -- and that's with a bitrate nearly twice
as high as AM IBOC. The only way I could live with either IBOC or XM
is if I turned the treble control all the way down.

> On 99% of AM receivers, there is no analog degradation because the receivers
> are not wide enough to detect the difference.

Not quite... the NRSC tested four receivers which are supposed to be
the most representative of "typical" AM radios. Only one of the
radios (a Delphi car radio) was narrowband enough to not exhibit any
degradation. But the three others did have degraded audio with IBOC
in use, the worst being a Sony boombox. iBiquity's excuse for this
was that according to their testing, the degradation wasn't bad enough
that it would cause most listeners to change the station. But the
point is, according to the NRSC tests, 3/4ths of today's most popular
radios _will_ have degraded audio when AM IBOC is in use.

> You are letting the cart get ahead of the horse. The CES is going to be
> filled with IBOC equipment, and I believe some at much more affordable
> prices.

Yeah, like B.E.'s IBOC exciter, with a list price of over $22,000...
that's a steal!

> 1480 and even 930 are miserable signals. Both also roabably have high-Q
> antennas. On a good system, IBOC sounds good, and the analgo audio is
> indistinguishable from the "way it was before."
>
> Many stations, especially those doing block, brokered programming, will not
> gain initially from IBOC. those with decent signals can gain a lot.

Ah, equality at its best... the big 50 kW stations can enjoy "digital"
reception for their local listeners, no matter how much they hash all
over the band, while the smaller stations get the short shrift, and
may not even be able to use IBOC at all.

Case in point... 1530 WSAI. When they're transmitting IBOC at night
(as they have been constantly), the "hash" to adjacent channels is so
bad, it can even be heard on the _studio monitor_ of a neighboring
station, 1520 WKWH in Shelbyville, IN.

Mostly back catalog stuff from big late 70s/early 80s A/C pop artists like Julio Iglesias, Camilo Sesto, Braulio. Also stuff from Celia Cruz, Roberto Ledesma, Trio Los Condes, Los Panchos, Los Angeles Negros, etc.

No Xavier Cugat, Augustin Magaldi or other really classic stuff like that - demos are probably too old for those.

I haven't had a chance to hear much of it since by the time I'm out of work the show is over (at 7 p.m.). No AM reception in my office building unless you are standing next to a window or an interior steel structural support.

Las Vegas and LA are Mexican 60's oldies. Chicago is more international 70's
oldies.

NY would be caribbean-flavored oldies.

The typical AM receiver can not tell the difference between the reduced
IBOC-mandated analog bandwidth and a full NRSC bandwidth. In fact, I fidn
that the reduced transmitted bandwidth sounds better on many radios than
wider bandwidth.

There are 700 million radios out there; most all of them have crummy AM
response.

IBOC offers a future improvement to AM and FM.

It does not degrade analog FM at all; on AM I feel the degradation looks bad
on paper, but in reality it is insignificant and may be an improvment.

The said the same thing about CD players, VHS players and DVD players. I
paid over $700 for my first VHS; $1200 for my first CD player. And the tapes
and CDs were very expensive to start.
>
> > The fact that most radio listening is to local stations answers that

> Another hypocritical answer. For years, engineers like yourself have
> complained about the loss of coverage area that FM Stereo and AM
> Stereo allegedly cause.

I don't. FM stero may cause more multipath in some areas, but very very few FMs are mono. AM stereo sucks. There are reasons beyond coverage (which is not generally affected per se) that doomed that system... most in the hands of the FCC.

> Many stations on both bands have discontinued
> stereo broadcasts, just to squeak a few more miles out of their fringe
> coverage.

In the case of FM, this is mostly with low powered stations and very few of them.

In AM, it is because the system never took off, as AM was already dead for music and fidelity when the FCC finally mandated one system.

> But now, suddenly that doesn't matter anymore? Now, with
> IBOC, listeners outside the primary coverage area are suddenly of no
> importance?

Listeners outside the metro are do not afford most stations any opportunity for extra revenue. I am with two Los Angeles stations that are generally in the top 10 in Riverside, a separate market. That coverage and audience is of no value at all; it gets no revenue,k it is too far away to become involved with and not useful.
>

About 90% of FM listening is in the 70 dbu contour; in metros, the 10 mv/m contour on AMs holds most of the listeners. Most Ams today don't put a 10 over the entire market, and are generally crippled from the start.

I am listening daily to an LA music AM in IBOC digital and the audio is crisp, nice, clear, and very listenable. It is nothing like you say.

We tested with a bunch or receivers, rnging from clock radios to boom boxes
to walma n type devices. None of us could tell any significant difference in
A/B testing. By the way, the NRSC test you refer to was before the revised
IBOC algorithm and not necessarily on a station with a wide bandwidth
antenna system.

> But the
> point is, according to the NRSC tests, 3/4ths of today's most popular

Near 3 weeks of operation, not one listener comment on the analog signal.

That is actually pretty reasonable as broadcast gear goes. An Optimod or an
Omnia are in the 10 k range... good equipment is costly... our last morning
show boards cost around $80 thousand each.

No, they may not. They are brokered or ethnic because they can not compete on signal alone. So they specialize. No one asked them to file for insufficient facilities, or not to upgrade in time as markets grew.
>

Does WKWH have its studio inside its interference free night contour? Many AMs have studios in locations where the night signal is unlistenable. And WSAI is direcitonal at night, protecting Sacramento. Of course, WKWH only has 250 watts at night.

IBOC can only be run 6 AM to 6 PM or sunrise to sunset, whihever is greater.

Any experiments were to determne the insertion level for IBOC for porposed night operation.

<snip>

I was driving from my home in Temecula, CA to visit family in the Central Valley and listened to KNX (You can only get KFMB(FM) for so far, and my KIIS(FM) tolerances aren't what they were a few years back...) on Christmas day, and I was a bit suprised... I was expecting some tape/automation, but it seemed entirely live (news/traffic/weather) with fairly framiliar voices, but then at 13:00 +/- an hour or so they went to a two hour "highlights of the moon landing" thing that was quite enjoyable -- even though the landing was 15 years before I was born.

Unfourtinately, I lost KNX at the top of the grapevine, so I missed the last :45 or so ... if there's a copy somewhere on the web, I would appreciate a pointer (Preferred email: abuse _at_ lincoln _dot_ homeip _dot_ net)

Happy Holidays!

Lincoln

And you'll probably be happy to know that WADO has finally killed their Kahn POWER-Side... perhaps because its inherent distortion and telephone-like audio doesn't sound too good with music.

Meanwhile, 1600 WWRL is still transmitting POWER-Side, although I don't think they are putting out a 15 Hz Kahn AM Stereo pilot tone, like WADO was.

And if WADO wants to play more music than news/talk, that's fine by me. The skywaves are strong enough this season that almost every night, I can get "Radio Reloj" from Cuba quite clearly on 570 kHz, coming in right on top of local WMCA.

Okay, what is the frequency and call of the French-language station in
Brooklyn? I can't even remember if it's AM or FM but it had some very
fine music the last time I was in town.

Tell me about it. ALthough those of us with the occasional hi-fi AM radio would like to hear something resembling hi-fi. And it wouldn't be all that out of the way for the broadcaster to do.

I thought the whole idea was to put out the best audio quality you could to make the crappy radios sound the best they can. I still don't see how IBOC helps the ANALOG signal.

It's funny...that to listen to AM I now have to look for the crappiest radio I have instead of the best radio so that I don't hear the hiss, the clipping and the hash if the radio drifts out of tune...

I wonder if they probably tore that thing out when they rebuilt the
transmitter facility a few years back.

You keep adding so much crap in the air chain it does have an effect on
the sound you put out. Please keep the amount of boxes to a necessary
minimum.

No C-Quam boxes, no Powerside, no IBOC; just a properly adjusted
compressor/limiter and a transmitter should be all that should be there.

> IBOC-mandated analog bandwidth and a full NRSC bandwidth. In fact, I fidn
> that the reduced transmitted bandwidth sounds better on many radios than
> wider bandwidth.

It depends on how strongly the station is pushing their audio
processing and pre-emphasis. With moderate processing, like a
European shortwave station, you only notice the lack of high
frequencies. But with "make-your-ears-bleed" processing and
pre-emphasis pushed to the max, like what 710 WOR uses, that
brick-wall filter at 5 kHz can cause some very nasty "ringing"
distortion which becomes audible on receivers of any bandwidth. For
example, take a listen to how bad WOR sounds on their own modulation
monitor -- their analog audio is filled with ringing distortion, and
that's it's been ever since they started using IBOC....

http://www.wor710.com/Engineering/iboc/wor_mod_mon.wav

> There are 700 million radios out there; most all of them have crummy AM
> response.

Yes, but if we always catered to the lowest common denominator, then
there would be no such thing as a sports car, McDonald's would be
considered fine dining, Emerson and Realistic would be the leading
brands of "high-end audio", and George W. Bush would be President (oh,
wait -- scratch that one).

> It does not degrade analog FM at all; on AM I feel the degradation looks bad
> on paper, but in reality it is insignificant and may be an improvment.

Well, imagine if all the Class C "graveyard channel" stations started
using IBOC -- would the mutually assured destruction caused by that be
"insignificant"?

> The said the same thing about CD players, VHS players and DVD players. I
> paid over $700 for my first VHS; $1200 for my first CD player. And the tapes
> and CDs were very expensive to start.

But CDs still cost more than cassettes, even though they are far
cheaper to manufacture. And don't expect an HD Radio Walkman any time
soon -- the battery drain is far too high to useable on the typical
pair of AA cells.

> Listeners outside the metro are do not afford most stations any opportunity
> for extra revenue.

Many areas of the country rely upon fringe-area reception to have any AM/FM radio at all. I'm very close to one such area -- central NJ, which is halfway between NYC and Philly and thus almost every adjacent FM channel is occupied with a signal that is "non-local" but is listenable. Now that NYC's 102.7 WNEW has begun using IBOC, in some areas all you hear on 102.5 and 102.9 is a constant white-noise hiss, much to the consternation of any fringe-area listeners of Philly's 102.9 WMGK.

> I am listening daily to an LA music AM in IBOC digital and the audio is
> crisp, nice, clear, and very listenable. It is nothing like you say.

Well then, I invite you to listen to WOR's audio samples, made with the new "HDC" codec -- spectrum analysis reveals that all audio above 5 kHz is artificially created using "spectral replication". Even WOR's engineers admit that this sometimes causes the digital audio to sound "shredded", due to the incorrectly reproduced treble harmonics.....

http://www.wor710.com/Engineering/iboc/audio_samples.htm

> XM and IBOC have different systems.

Both use AACplus with Spectral Band Replication. XM uses it at a claimed average of 64 kbps for music channels, while IBOC-AM is 36 kbps for stereo mode and 20 kbps for mono mode, and IBOC-FM is at either 64 or 96 kbps -- which is still far from the claimed "CD-quality" sound.

> We tested with a bunch or receivers, rnging from clock radios to boom boxes
> to walma n type devices. None of us could tell any significant difference in
> A/B testing.

Next time you are in NYC, switch between 710 WOR and 770 WABC, even on the crappiest, most narrow-bandwidth AM radio you can find. WOR's IBOC signal might sound "okay", but once you switch to WABC, the difference in clarity is immediately noticeable. Due to their maxed-out audio processing, WOR may be "louder", but WABC sounds a whole lot cleaner.

> Near 3 weeks of operation, not one listener comment on the analog signal.

WOR listeners have complained to the _electric company_, thinking that the IBOC "hash" surrounding their signal was power line interference. And most listeners never call a radio station for any reason. Many times when a station is off the air, is transmitting dead air, or has other obvious problems, nobody calls.

> Any experiments were to determne the insertion level for IBOC for porposed
> night operation.

Regardless of the purpose, WSAI shouldn't be transmitting IBOC at night -- their STA to do so expired back in September, and the FCC database shows no record of a renewal. WSAI is not properly marked in the database as a hybrid digital station, either.

And good luck airing any New Year's celebration on an IBOC station -- unless you kill the analog delay, the count-down to midnight will be about 8 seconds late.

2603. Media Broadcast Marketing Tools: Fantasy Sports Pools

Newsgroup: rec.radio.broadcasting
Date: 2003-12-30 13:56:01 UTC
From: jfkmaven@21stCenturyInc.com
Message-ID: <bss05hmob1@xuxa.iecc.com>
Source record: 6429

Someone was looking for a Media Broadcast
set of tools to increase audience size
and reach. This year-round product could
help you build up internet traffic and build
up your repeat sticky visitors to your Sports
Talk Shows your Sports News Show and others, too.

You could offer your listeners a Daily $25,000
to $50,000 Grand Prize for ANY Perfect Pool Slate
with 8 or more games, 350 days of the year using
this product and it would be an INSURED Grand Prize,
too. This can be licensed as a local market
EXCLUSIVE as well.

Take a look at Sports Pool Selection System (SPSS)
instead of the current system that is being used at
present for your listeners. We already have
the NFL and the NBA feeds and Schedules and Spreads
running now and we will be adding College Hoops
(Q1-2004),Major League Baseball (Q2-2004),and then
College Football (Q3-2004). This will provide year
round excitement for your listeners and multiple
sponsorship opportunities for your advertisers
which can convert to advertising dollars for you.

http://www.21stCenturyInc.com/NBA (Beta Test Site)

It also occurred to me that this could be a
great opportunity for your sales department if you
licensed the software from us directly and then
relicensed it to your advertisers selectively or gave
it away in return for a commitment to year round
advertising to provide them with year round Sports
Pools which can be localized for single establishments.

Each Bar & Grill can form an All-Star Team, enter their
picks every day, all year long, and every day there will
be a consensus Individual Winner and Team winner for
the highest percentage of correct coices within the
Score listening radius. NFL Pools, NBA Pools, NCAA
Hoops Tourneys, MLB Pools using Run Differentials,
NHL Pools using Goal Differentials, etc.

Our other main advantage includes the fact
that we also provide a product with more excitement
and with more skill involved since we calculate

results based on up-to-the-minute "Consensus Betting Spreads" and we also provide an Over/Under choice for every contest every day, as well.

It also occurred to me that we have so may obvious advantages over UPickEm that even local Sports Bars and Grills would be very favorably inclined towards installing the SPSS system using either on-site internet kiosques at their establishments with overhead monitors or just by granting internet access to the URLs we host for them to provide these Sports Selection Pools. Alternatively employees could distribute entry sheets at the establishments and then someone in the back office could enter their picks.

http://www.21stCenturyInc.com/NBA

For the Sports Bar or Restaurant owner, this accomplishes several things:

1) It creates a sticky site phenomenon to encourage returning patrons either to their website or to their on premises locations where different prizes and contests could be run based on whether or not you are present at the Sports Bar and whether or not you are present at the end of the night when the last game is over.

2) Since the odds of getting a full slate of 8 games correct against the spread and also getting 8 over/unders correct on the same slate are so high (1 in 64,000) the Grand Prizes offered (covered by insurance) could probably be worth as much as $64,000 as well. Even the Dolphins did not go 17-0 Against the Spread in 1972, so in fact the odds are truly very high.

3) Minor prizes for the Best Slate per Location could be determined by the local bar owners, and you could consider providing the Grand Prize on a daily basis for the best Individual Slates and the Overall Team Champion among establishments. McCulligan's vs. Hooter's vs. Joe's Upstairs or whatever. The XYZ Jocks vs. the ABC Jocks vs. the PDQ Jocks, any groups, any teams and any contests that patrons want to set up. And you could almost broadcast the leader board real time and on line to add to the excitement. Until an individual game has begun anyone can go into the Bar and add the balance of a slate in real-time or they can log into the website, join the Hooter's Team or the Finnegan's Team and make their online picks, too.

Our Pools are specific to a League right now, but
we may add the concept of a blended or hybrid pool if
there is enough demand for it. Really skillful players
can pick the 10 games from any sport where they think
they really have an insight into the accuracy of the
spreads and the over/unders.

Other licensing options would include granting you
the master license for your local listeners and advertisers
and letting you resell the advertising and the licenses
to other establishments within your geographical
territory on either an exclusive or non-exlusive basis.

We can discuss the terms after you have tried out
the system, which is still undergoing some enhancements
and further debugging at:

http://www.21stCenturyInc.com/NBA is one for example.

The NBA standings displayed have been calculated for
part of the season without the spread and for part of
the season AFTER including the spread so the numbers
will look a little weird in test mode. It also includes
some exhibition games as well, so do not be concerned.
During 2004 we will publish BOTH standings separately.

jfbevilaqua@21stCenturyInc.com

Regards and Happy New Year,
John Bevilaqua
President
21st Century Systems, Inc.

> Strangely enough, Infinity Radio owns another station in the same area
> that has classic rock (KZOK), so it would seem that the audience would
> overlap significantly.

In looking at the latest ratings from R&R, the station was the lowest-rated FM in Infinity's Seattle cluster and had pretty much stayed in the 2 area. Even though The End's ratings have been going down, Infinity decided that there was still an audience for modern rock--particularly in Nirvana and Pearl Jam's hometown--that could be lured away from The End. And so Seattle now has a modern rock format war raging. Also, the all-80s format's been dying out nationwide for some time now.

I can understand why you're unhappy with the format changes, but the nature of the business is such that most of the station owners don't often want to tip their hands. Also, in the case of low-rated formats like all-80s with an extremely loyal audience, they'd rather immediately flip the format and get it over with rather than announce

the flip and risk backlash and campaigns to stop the switch. In the end, Infinity thought that modern rock would do better for them than all-80s. It may be disheartening to you, but that's the biz.

It does not help. However, it does appear from observation that _reducing_
the bandwidth to the IBOC analog requirement makes the majority of the
narrowband AM receivers out there sound better. By not transmitting anything
outside the passband of the receivers or which is at the downslope region
may actually make the audio better. Otherwise, you are pushing boulederss
through a funnel.

Because it's a good indication of when skywave propagation from the
Caribbean is strong. When Radio Reloj kocks out your local station, you
know it's time to tune in the Cuban station on 530 for live salsa
broadcasts, or tune to 4VEH for musique Zouk.

Sirius is terrific, but choosing a receiver or a service on the basis of the band-readiness of your car stereo is a bad idea from the previous generation of satellite radio equipment. You'll get more enjoyment from a Plug 'n Play unit that lets you take the music from home to car to office. "XM-ready" or "Sirius-ready" car stereos are ready only for a satellite-tuner of the same make as the car stereo, one that limits your subscription to the vehicle. With luck your receiver has auxiliary input, or perhaps the Sirius jack or the CD changer jack can be deployed as an aux. Otherwise, PnP's work through the cassette deck or through FM modulation, and there will be an appreciable hit in sound quality compared to the car-dedicated unit you have planned for.

Suggestion: ask around at the "Install Garage" area at www.siriusbackstage.com .

The "Radio Meshuga", it is loose!!!!

For sale: Partial ownership in nice little 1 KW
full-time AM in Arkansas in college town.

Full price expected to be about $100,000.

Joint venture. (If you venture, you go to the joint!
Hi!)

Active or inactive investors with at least $10,000
each are welcome. All investors would be on the board
with full voting rights if desired.

No individual would be allowed more than 49 percent.
This goes for me too!

I am NOT a broker, agent, shill, owner or part owner.
May I add (sarcastic evil leer!)also that despite the
hints from detractors, flamers, etc., that I am not a
crook!

Station is on the air since 1987. Transmitter land is
included and studios rent for $350.00 a month.

You can talk to the "Radio Meshuga" at: (478)741-1710
in Macon, GA or of course email: wrecktech@yahoo.com

Please do not annoy my parole officer!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"
aka "Der Radio Meshuga"

Because Invinity needed to do someting.
It's all about the money.
80's music has no listener appeal.

"Sound better" by whose judgement? That of iBiquity supporters?
People who leave their radio's treble knob turned all the way down
(and yes, I've encountered numerous people who do that)?

The engineers at 710 WOR discovered that a 6 kHz audio cut-off sounds
far better than 5 kHz, even on narrowband receivers -- and the
experience of myself and many other listeners supports that as well.
But, iBiquity won't let them use it, because it doesn't meet the IBOC
system spec.

But WOR does switch their audio to 6 kHz at sunset when the IBOC
sidebands are turned off, and on the average cheap radio, the
difference is subtle, but unmistakable. If you try to process an
Optimod 9200 too heavily when its 5 kHz filter is in use, you get a
very nasty-sounding "ringing" distortion. But when you switch the
9200 to its 6 kHz filter (which actually has its cut-off at about 6.25
kHz), this problem disappears and that extra kHz's worth of audio
response provides a significant improvement in crispness and clarity.

If AM stations really think that nobody is listening to them with
hi-fi receivers, then I would accept a 6 kHz cut-off. That's what AM
stations in the U.K. are using, and while it's definitely not hi-fi or
even mid-fi, it does sound alright. But not 5 kHz -- on an Optimod
9200, the distortion is intolerable, and on other processors, you're
still left with very dull-sounding audio.

There is no Cuban station on 530. Never has been. There is very little live
music on Cuban stations any more.

> or tune to 4VEH for musique Zouk.

4VEH is a very hard catch, and is mostly religious. It has not been an easy
DX for 2 decades since it moved off of 1035 and reduced power.
